Compilation Instructions

This certifies the competence of Aircraft electrical / avionic tradesperson to undertake or supervise the maintenance activities listed in column (b) overleaf. The certificate is to be completed in accordance with the requirements of MAM-P, Chapter 8.3. It is only valid while the individual to whom it relates remains on the posted strength of the station at which it was completed.

- 1. On satisfactory completion of training of the tradesperson to whom this certificate relates, the authorizing officer is to insert their initials and the date in the first block of the appropriate column or columns overleaf against each activity concerned; an entry in column (d) requires a supporting entry in column (c).
- 2. If the certification relates to an on-Aircraft activity, the Aircraft type and mark areto be inserted in column (b) against the appropriate activity.
- 3. An authorizing officer is to revalidate competence by inserting their initials and the date in the next vacant block of the appropriate column or columns.
- 4. Each authorizing officer is to complete the identification block below when making their first entry overleaf.
