EXPLANATORY NOTE

This note is not part of the licence

1. This Open General Export Licence has been revised to remove Belarus as a permitted destination.
2. This Open General Export Licence permits, without further authority but subject to certain conditions, the export of the items specified in Schedule 1 from the United Kingdom if the exporter is established in the United Kingdom, to any destination specified in Schedule 2.
3. The licence enables the exporter to collaborate through established relationships on commercial cryptographic product development.
4. The Export Control Order 2008 (the Order) contains certain registration and record keeping requirements which apply to persons using this licence.
 - a. Under Article 28 of the Order, an exporter who exports items under the authority of this licence must, before or within 30 days after the first occasion he makes use of the licence, provide details to the Secretary of State of his name and the address where copies of the records referred to above may be inspected. This notification must be made via DIT's electronic licensing system, [SPIRE](#).
 - b. Under Article 29 of the Order, any person established in the United Kingdom who exports items from the United Kingdom or another Member State under the authority of this licence must maintain and retain certain records relating to each such export for at least three years from the end of the calendar year in which the export takes place and must permit such records to be inspected and copied by any person authorised by the Secretary of State.
5. Persons who registered to use previous versions of this licence do not need to re-register. Registrations are carried over to the current in force version of this licence.
6. The Secretary of State has the power to suspend or revoke licences at any time and in such circumstances and on such terms as he thinks fit. If an exporter receives written notice to this effect, they will be prevented from relying on this Licence. The power to suspend may be used in addition to criminal prosecution or as an alternative. Suspension may occur for example where an exporter is being investigated or prosecuted in relation to a possible criminal offence or has been found guilty of a criminal offence under the export control legislation. It may also be used in situations where an exporter has breached the conditions of the licence and failed to take corrective action within a reasonable period (see condition 3(3)).
7. Where DIT identifies failures in compliance with licence conditions or the legislation during a compliance visit, DIT may send a warning letter to the exporter listing the improvements that need to be made to ensure compliance. The letter will set out the timeframe within which these improvements must be completed. Failure to complete these improvements may lead to the exporter's ability to use the licence being suspended.
8. The exporter may apply for Standard Individual Export Licences during the period

of suspension. Suspension will not automatically prevent use of another OGEL so long as all its terms and conditions are met, and the licence has not been suspended or revoked.
