Ref 300

Dear Sir/Madam,

While I agree there are far too many people who 'put on' their condition to gain D.L.A. a better stricker medical would stop this, but I do not agree with continuing D.L.A. with a persons other benefits, D.L.A. should still be paid to the disabled providing they fulfil the medical conditions required. As for the disabled working, there are simply no jobs for the able bodied let alone the disabled and most employers will not employ disabled people. As for sharing the clients information with others, there is no way I would agree with this a persons health conditions are there personal private business, not to be shared with others.

The whole D.L.A. does need reform and a stricker medical with consultation with the clients G.P. should weed out the frauds.

Far too many people are now fraudulently claiming D.L.A, but this consultation document does nothing to stop the fraud.

Yours faithfully,
