

Dear Sir/Madam,

Plutonium Re-use Application

Shetland Islands Council wishes to support the submission to this consultation by the Nuclear Free Local Authorities. In particular Shetland Islands Council believes the consultation is premature as the Nuclear Decommissioning Authority is still considering a number of possible options for the plutonium stocks, for example using the PRISM reactor. Until these new options have been fully assessed it is impossible to hold a valid consultation,

Shetland Islands Council has no objection to its submission being made public.

Yours faithfully,
