1. Introduction

1.1 This document sets out the framework for the national curriculum and includes:

- contextual information about both the overall school curriculum and the statutory national curriculum, including the statutory basis of the latter
- aims for the statutory national curriculum
- statements on inclusion, and on the development of pupils’ competence in numeracy and mathematics, language and literacy across the school curriculum
- programmes of study for all the national curriculum subjects other than for key stage 4 English, mathematics and science. A formal consultation on the key stage 4 programmes of study for these subjects will commence in the autumn term.

1.2 Subject to the approval of Parliament, it is the government’s intention that the final version of this framework will be published in the autumn of 2013, and that the elements that require statutory force will come into effect for the majority of year groups from September 2014. For pupils in year 2, year 6 and year 10, the new English, mathematics and science programmes of study will be introduced from September 2015; and for pupils in year 11 the programmes of study for these subjects will be introduced from September 2016.
2. The school curriculum in England

2.1 Every state-funded school must offer a curriculum which is balanced and broadly based\(^1\) and which:

- promotes the spiritual, moral, cultural, mental and physical development of pupils at the school and of society, and
- prepares pupils at the school for the opportunities, responsibilities and experiences of later life.

2.2 The school curriculum comprises all learning and other experiences that each school plans for its pupils. The national curriculum forms one part of the school curriculum.

2.3 All state schools are also required to make provision for a daily act of collective worship and must teach religious education to pupils at every key stage and sex and relationship education to pupils in secondary education.

2.4 Maintained schools in England are legally required to follow the statutory national curriculum which sets out in programmes of study, on the basis of key stages, subject content for those subjects that should be taught to all pupils. All schools must publish their school curriculum by subject and academic year online.\(^2\)

2.5 All schools should make provision for personal, social, health and economic education (PSHE), drawing on good practice. Schools are also free to include other subjects or topics of their choice in planning and designing their own programme of education.

---

\(^2\) From September 2012, all schools are required to publish information in relation to each academic year, relating to the content of the school’s curriculum for each subject and details about how additional information relating to the curriculum may be obtained: [http://www.legislation.gov.uk/uksi/2012/1124/made](http://www.legislation.gov.uk/uksi/2012/1124/made).
3. The national curriculum in England

Aims

3.1 The national curriculum provides pupils with an introduction to the essential knowledge that they need to be educated citizens. It introduces pupils to the best that has been thought and said; and helps engender an appreciation of human creativity and achievement.

3.2 The national curriculum is just one element in the education of every child. There is time and space in the school day and in each week, term and year to range beyond the national curriculum specifications. The national curriculum provides an outline of core knowledge around which teachers can develop exciting and stimulating lessons to promote the development of pupils’ knowledge, understanding and skills as part of the wider school curriculum.

Structure

3.3 Pupils of compulsory school age in community and foundation schools, including community special schools and foundation special schools, and in voluntary aided and voluntary controlled schools must follow the national curriculum. It is organised on the basis of four key stages and twelve subjects, classified in legal terms as ‘core’ and ‘other foundation’ subjects.

3.4 The Secretary of State for Education is required to publish programmes of study for each national curriculum subject, setting out the ‘matters, skills and processes’ to be taught at each key stage. Schools are free to choose how they organise their school day, as long as the content of national curriculum programmes of study is taught to all pupils.

---

3 The key stage 2 programmes of study for English, mathematics and science are presented in this document as ‘lower’ (years 3 and 4) and ‘upper’ (years 5 and 6). This distinction is made as guidance for teachers and is not reflected in legislation. The legal requirement is to cover the content of the programmes of study for years 3 to 6 by the end of key stage 2.
3.5 The proposed structure of the new national curriculum, in terms of which subjects are compulsory at each key stage, is set out in the table below:

*Figure 1 – Structure of the national curriculum*

*At key stage 2 the subject title is ‘foreign language’; at key stage 3 it is ‘modern foreign language’.*
Key stage 4 entitlement areas

3.7 The arts (comprising art and design, music, dance, drama and media arts), design and technology, the humanities (comprising geography and history) and modern foreign language are not compulsory national curriculum subjects after the age of 14, but all pupils in maintained schools have a statutory entitlement to be able to study a subject in each of those four areas.

3.8 The statutory requirements in relation to the entitlement areas are:

- schools must provide access to a minimum of one course in each of the four entitlement areas
- schools must provide the opportunity for pupils to take a course in all four areas, should they wish to do so
- a course that meets the entitlement requirements must give pupils the opportunity to obtain an approved qualification.
4. Inclusion

Setting suitable challenges

4.1 Teachers should set high expectations for every pupil. They should plan stretching work for pupils whose attainment is significantly above the expected standard. They have an even greater obligation to plan lessons for pupils who have low levels of prior attainment or come from disadvantaged backgrounds. Teachers should use appropriate assessment to set targets which are deliberately ambitious.

Responding to pupils’ needs and overcoming potential barriers for individuals and groups of pupils

4.2 Teachers should take account of their duties under equal opportunities legislation that covers disability, race, religion or belief, sex and sexual orientation.

4.3 A wide range of pupils have special educational needs, many of whom also have disabilities. Lessons should be planned to ensure that there are no barriers to every pupil achieving. In many cases, such planning will mean that these pupils will be able to study the full national curriculum. The SEN Code of Practice will include advice on approaches to identification of need which can support this. A minority of pupils will need access to specialist equipment and different approaches. The SEN Code of Practice will outline what needs to be done for them.

4.4 With the right teaching, that recognises their individual needs, many disabled pupils have little need for additional resources beyond the aids which they use as part of their daily life. Teachers must plan lessons so that these pupils can study every national curriculum subject. Potential areas of difficulty should be identified and addressed at the outset of work.

4.5 Teachers must also take account of the needs of pupils whose first language is not English. Monitoring of progress should take account of the pupil’s age, length of time in this country, previous educational experience and ability in other languages.

4.6 The ability of pupils for whom English is an additional language to take part in the national curriculum may be in advance of their communication skills in English. Teachers should plan teaching opportunities to help pupils develop their English and should aim to provide the support pupils need to take part in all subjects.
5. Numeracy and mathematics

5.1 Teachers should use every relevant subject to develop pupils’ mathematical fluency. Confidence in numeracy and other mathematical skills is a precondition of success across the national curriculum.

5.2 Teachers should develop pupils’ numeracy and mathematical reasoning in all subjects so that they understand and appreciate the importance of mathematics. Pupils should be taught to apply arithmetic fluently to problems, understand and use measures, make estimates and sense check their work. Pupils should apply their geometric and algebraic understanding, and relate their understanding of probability to the notions of risk and uncertainty. They should also understand the cycle of collecting, presenting and analysing data. They should be taught to apply their mathematics to both routine and non-routine problems, including breaking down more complex problems into a series of simpler steps.
6. Language and literacy

6.1 Teachers should develop pupils’ spoken language, reading, writing and vocabulary as integral aspects of the teaching of every subject. English is both a subject in its own right and the medium for teaching; for pupils, understanding the language provides access to the whole curriculum. Fluency in the English language is an essential foundation for success in all subjects.

Spoken language

6.2 Pupils should be taught to speak clearly and convey ideas confidently using Standard English. They should learn to justify ideas with reasons; ask questions to check understanding; develop vocabulary and build knowledge; negotiate; evaluate and build on the ideas of others; and select the appropriate register for effective communication. They should be taught to give well-structured descriptions and explanations and develop their understanding through speculating, hypothesising and exploring ideas. This will enable them to clarify their thinking as well as organise their ideas for writing.

Reading and writing

6.3 Teachers should develop pupils’ reading and writing in all subjects to support their acquisition of knowledge. Pupils should be taught to read fluently, understand extended prose (both fiction and non-fiction) and be encouraged to read for pleasure. Schools should do everything to promote wider reading. They should provide library facilities and set ambitious expectations for reading at home. Pupils should develop the stamina and skills to write at length, with accurate spelling and punctuation. They should be taught the correct use of grammar. They should build on what they have been taught to expand the range of their writing and the variety of the grammar they use. The writing they do should include narratives, explanations, descriptions, comparisons, summaries and evaluations: such writing supports them in rehearsing, understanding and consolidating what they have heard or read.

Vocabulary development

6.4 Pupils’ acquisition and command of vocabulary are key to their learning and progress across the whole curriculum. Teachers should therefore develop vocabulary actively, building systematically on pupils’ current knowledge. They should increase pupils’ store of words in general; simultaneously, they should also make links between known and new vocabulary and discuss the shades of meaning in similar words. In this way, pupils expand the vocabulary choices that are available to them when they write. In addition, it is vital for pupils’ comprehension that they understand the meanings of words they meet in their reading across all
subjects, and older pupils should be taught the meaning of instruction verbs that they may meet in examination questions. It is particularly important to induct pupils into the language which defines each subject in its own right, such as accurate mathematical and scientific language.
7. Programmes of study and attainment targets

7.1 The following pages set out the proposed statutory programmes of study for all subjects except for English, mathematics and science at key stage 4. Where content is shown in grey text, it is non-statutory.
English

Purpose of study

English has a pre-eminent place in education and in society. A high-quality education in English will teach pupils to write and speak fluently so that they can communicate their ideas and emotions to others and through their reading and listening, others can communicate with them. Through reading in particular, pupils have a chance to develop culturally, emotionally, intellectually, socially and spiritually. Literature, especially, plays a key role in such development. Reading also enables pupils both to acquire knowledge and to build on what they already know. All the skills of language are essential to participating fully as a member of society; pupils, therefore, who do not learn to speak, read and write fluently and confidently are effectively disenfranchised.

Aims

The overarching aim for English in the national curriculum is to promote high standards of literacy by equipping pupils with a strong command of the written and spoken word, and to develop their love of literature through widespread reading for enjoyment. The national curriculum for English aims to ensure that all pupils:

- read easily, fluently and with good understanding
- develop the habit of reading widely and often, for both pleasure and information
- acquire a wide vocabulary, an understanding of grammar and knowledge of linguistic conventions for reading, writing and spoken language
- appreciate our rich and varied literary heritage
- write clearly, accurately and coherently, adapting their language and style in and for a range of contexts, purposes and audiences
- use discussion in order to learn; they should be able to elaborate and explain clearly their understanding and ideas
- are competent in the arts of speaking and listening, making formal presentations, demonstrating to others and participating in debate.

Spoken language

The national curriculum for English reflects the importance of spoken language in pupils’ development across the whole curriculum – cognitively, socially and linguistically. Spoken language underpins the development of reading and writing. The quality and variety of language that pupils hear and speak are vital for developing their vocabulary and grammar and their understanding for reading and writing. Teachers should therefore ensure the continual development of pupils’ confidence and competence in spoken language and listening skills.
Pupils should develop a capacity to explain their understanding of books and other reading, and to prepare their ideas before they write. They must be assisted in making their thinking clear to themselves as well as to others and teachers should ensure that pupils build secure foundations by using discussion to probe and remedy their misconceptions. Pupils should also be taught to understand and use the conventions for discussion and debate.

Statutory requirements which underpin all aspects of speaking and listening across the six years of primary education form part of the national curriculum. These are reflected and contextualised within the reading and writing domains which follow.

**Reading**

The programmes of study for reading at key stages 1 and 2 consist of two dimensions:

- word reading
- comprehension (both listening and reading).

It is essential that teaching focuses on developing pupils’ competence in both dimensions; different kinds of teaching are needed for each.

Skilled word reading involves both the speedy working out of the pronunciation of unfamiliar printed words (decoding) and the speedy recognition of familiar printed words. Underpinning both is the understanding that the letters on the page represent the sounds in spoken words. This is why phonics should be emphasised in the early teaching of reading to beginners (i.e. unskilled readers) when they start school.

Good comprehension draws from linguistic knowledge (in particular of vocabulary and grammar) and on knowledge of the world. Comprehension skills develop through pupils’ experience of high-quality discussion with the teacher, as well as from reading and discussing a range of stories, poems and non-fiction. All pupils must be encouraged to read widely across both fiction and non-fiction to develop their knowledge of themselves and the world in which they live, to establish an appreciation and love of reading, and to gain knowledge across the curriculum. Reading widely and often increases pupils’ vocabulary because they encounter words they would rarely hear or use in everyday speech. Reading also feeds pupils’ imagination and opens up a treasure-house of wonder and joy for curious young minds.

It is essential that, by the end of their primary education, all pupils are able to read fluently, and with confidence, in any subject in their forthcoming secondary education.
Writing

The programmes of study for writing at key stages 1 and 2 are constructed similarly to those for reading:

- transcription (spelling and handwriting)
- composition (articulating ideas and structuring them in speech and writing).

It is essential that teaching develops pupils’ competence in these two dimensions. In addition, pupils should be taught how to plan, revise and evaluate their writing. These aspects of writing have been incorporated into the programmes of study for composition.

Writing down ideas fluently depends on effective transcription: that is, on spelling quickly and accurately through knowing the relationship between sounds and letters (phonics) and understanding the morphology (word structure) and orthography (spelling structure) of words. Effective composition involves articulating and communicating ideas, and then organising them coherently for a reader. This requires clarity, awareness of the audience, purpose and context, and an increasingly wide knowledge of vocabulary and grammar. Writing also depends on fluent, legible and, eventually, speedy handwriting.

Spelling, vocabulary, grammar, punctuation and glossary

The two statutory appendices – on spelling and on grammar and punctuation – give an overview of the specific features that should be included in teaching the programmes of study. References to developing pupils’ vocabulary are also included within the appendices. Pupils should be taught to control their speaking and writing consciously and to use Standard English. They should be taught to use the elements of spelling, grammar, punctuation and ‘language about language’ listed. This is not intended to constrain or restrict teachers’ creativity, but simply to provide the structure on which they can construct exciting lessons. A non-statutory glossary is provided for teachers.

Throughout the programmes of study, teachers should teach pupils the vocabulary they need to discuss their reading, writing and spoken language. It is important that pupils learn the correct grammatical terms in English and that these terms are integrated within teaching.

School curriculum

The programmes of study for English are set out year-by-year for key stage 1 and two-yearly for key stage 2. The single year blocks at key stage 1 reflect the rapid pace of development in word reading during these two years. Schools are, however, only required to teach the relevant programme of study by the end of the key stage. Within each key stage, schools therefore have the flexibility to introduce content earlier or later than set out in the programme of study. In addition, schools can introduce key stage content during an earlier key stage if appropriate.
All schools are also required to set out their school curriculum for English on a year-by-year basis and make this information available online.

**Attainment targets**

By the end of each key stage, pupils are expected to know, apply and understand the matters, skills and processes specified in the relevant programme of study.
## Programme of study (statutory requirements)

**SPOKEN LANGUAGE**

Pupils should be taught to:

- listen and respond appropriately to adults and their peers
- ask relevant questions to extend their understanding and build vocabulary and knowledge
- articulate and justify answers, arguments and opinions
- give well-structured descriptions and explanations
- maintain attention and participate actively in collaborative conversations, staying on topic and initiating and responding to comments
- use spoken language to develop understanding through speculating, hypothesising, imagining and exploring ideas
- speak audibly and fluently with an increasing command of Standard English
- participate in discussions, presentations, performances and debates
- gain, maintain and monitor the interest of the listener(s)
- consider and evaluate different viewpoints, attending to and building on the contributions of others
- select and use appropriate registers for effective communication.

## Notes and guidance (non-statutory)

**SPOKEN LANGUAGE**

These statements apply to all years and should be taught at a level appropriate to the age of the pupils. Ensure that pupils build on the oral language skills that have been taught in preceding years.

Pupils should be taught to develop their competence in spoken language and listening to enhance the effectiveness with which they are able to communicate across a range of contexts and to a range of audiences. They should therefore have opportunities to work in groups of different sizes – in pairs, small, large groups and as a whole class. Pupils should understand how to take turns and when and how to participate constructively in conversations and debates.

Attention should also be paid to increasing pupils’ vocabulary, from describing their immediate world and feelings to developing a broader, deeper and richer vocabulary to discuss abstract concepts and a wider range of topics, and to their knowledge about language as a whole.

Ensure that pupils receive constructive feedback on their spoken language and listening not only to improve their knowledge and skills but also to establish secure foundations for effective spoken language in their studies at primary school, helping them to achieve in secondary education and beyond.
Key stage 1

Year 1

During year 1 teachers should build on work from the Early Years Foundation Stage, making sure that pupils can sound and blend unfamiliar printed words quickly and accurately using the phonic knowledge and skills that they have already learnt. Teachers should also ensure that pupils continue to learn new grapheme-phoneme correspondences (GPCs) and revise and consolidate those learnt earlier. The understanding that the letter(s) on the page represent the sounds in spoken words should underpin pupils' reading and spelling of all words. This includes common words containing unusual GPCs. The term 'common exception words' is used throughout the programmes of study for such words.

Alongside this knowledge of GPCs, pupils need to develop the skill of blending the sounds into words for reading and establish the habit of applying this skill whenever they encounter new words. This will be supported by practising their reading with books consistent with their developing phonic knowledge and skill and their knowledge of common exception words. At the same time they will need to hear, share and discuss a wide range of high-quality books to develop a love of reading and broaden their vocabulary.

Pupils should be helped to read words without overt sounding and blending after a few encounters. Those who are slow to develop this skill should have extra practice.

Pupils’ writing during year 1 will generally develop at a slower pace than their reading. This is because they need to encode the sounds they hear in words (spelling skills), develop the physical skill needed for handwriting, and learn how to organise their ideas in writing.

Pupils entering year 1 who have not yet met the early learning goals for literacy should continue to follow the curriculum of the Early Years Foundation Stage to develop their word reading, spelling and language skills. However, these pupils should follow the year 1 programme of study in terms of the books they listen to and discuss, so that they develop their vocabulary and understanding of grammar, as well as their knowledge more generally across the curriculum. If they are still struggling to decode and spell, they need to be taught to do this urgently through a rigorous and systematic phonics programme so that they catch up rapidly.

Teachers should ensure that their teaching develops pupils’ oral vocabulary as well as their ability to understand and use a variety of grammatical structures, giving particular support to pupils whose oral language skills are insufficiently developed.
**Year 1 programme of study (statutory requirements)**

**READING**

**Word reading**

Pupils should be taught to:

- apply phonic knowledge and skills as the route to decode words
- respond speedily with the correct sound to graphemes (letters or groups of letters) for all 40+ phonemes, including, where applicable, alternative sounds for graphemes
- read accurately by blending sounds in unfamiliar words containing GPCs that have been taught
- read common exception words, noting unusual correspondences between spelling and sound and where these occur in the word
- read words containing taught GPCs and -s, -es, -ing, -ed, -er and -est endings
- read other words of more than one syllable that contain taught GPCs
- read words with contractions, e.g. I’m, I’ll, we’ll, and understand that the apostrophe represents the omitted letter(s)
- read aloud accurately books that are consistent with their developing phonic knowledge and that do not require them to use other strategies to work out words
- re-read these books to build up their fluency and confidence

**Notes and guidance (non-statutory)**

**READING**

**Word reading**

Pupils should revise and consolidate the grapheme-phoneme correspondences (GPCs) and the common exception words taught in Reception. As soon as they can read words comprising the year 1 GPCs accurately and speedily, they should move on to the year 2 programme of study for word reading.

The number, order and choice of exception words taught will vary according to the phonics programme being used. Ensuring that pupils are aware of the GPCs they contain, however unusual these are, supports spelling later.

Young readers encounter words that they have not seen before much more frequently than experienced readers do, and they may not know the meaning of some of these. Practice at reading such words by sounding and blending can provide opportunities not only for pupils to develop confidence in their decoding skills, but also for teachers to explain the meaning and thus develop pupils’ vocabulary.

Pupils should be taught how to read words with suffixes by being helped to build on the root words that they can read already. Pupils’ reading and re-reading of books that are closely matched to their developing phonic knowledge and knowledge of common exception words supports their fluency, as well as increasing their
in word reading. confidence in their reading skills. Fluent word reading greatly assists comprehension, especially when pupils come to read longer books.

<table>
<thead>
<tr>
<th>READING Comprehension</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pupils should be taught to:</td>
</tr>
<tr>
<td>- develop pleasure in reading, motivation to read, vocabulary and understanding by:</td>
</tr>
<tr>
<td>- listening to and discussing a wide range of poems, stories and non-fiction at a level beyond that at which they can read independently</td>
</tr>
<tr>
<td>- being encouraged to link what they read or hear read to their own experiences</td>
</tr>
<tr>
<td>- becoming very familiar with key stories, fairy stories and traditional tales, retelling them and considering their particular characteristics</td>
</tr>
<tr>
<td>- recognising and joining in with predictable phrases</td>
</tr>
<tr>
<td>- learning to appreciate rhymes and poems, and to recite some by heart</td>
</tr>
<tr>
<td>- understand both the books they can already read accurately and fluently and those they listen to by:</td>
</tr>
<tr>
<td>- drawing on what they already know or on background information and vocabulary provided by the teacher</td>
</tr>
<tr>
<td>READING Comprehension</td>
</tr>
<tr>
<td>Pupils should have extensive experience of listening to, sharing and discussing a wide range of high-quality books with the teacher, other adults and each other to engender a love of reading at the same time as they are reading independently.</td>
</tr>
<tr>
<td>Pupils’ vocabulary should be developed when they listen to books read aloud and when they discuss what they have heard. Such vocabulary can also feed into their writing. Knowing the meaning of more words increases pupils’ chances of understanding when they read by themselves. The meaning of some new words should be introduced to pupils before they start to read on their own, so that these unknown words do not hold up their comprehension.</td>
</tr>
<tr>
<td>However, once pupils have already decoded words successfully, the meaning of those that are new to them can be discussed with them, so contributing to developing their early skills of inference. By listening frequently to stories, poems and non-fiction that they cannot yet read for themselves, pupils begin to understand how written language can be structured, such as how to build surprise in narratives, and the characteristic features of non-fiction. Listening to and discussing information books and other non-fiction establishes the foundations for their learning in other subjects.</td>
</tr>
</tbody>
</table>
- checking that the text makes sense to them as they read and correcting inaccurate reading
- discussing the significance of the title and events
- making inferences on the basis of what is being said and done
- predicting what might happen on the basis of what has been read so far
- participate in discussion about what is read to them, taking turns and listening to what others say
- explain clearly their understanding of what is read to them.

Pupils should be shown some of the processes for finding out information.

Through listening, pupils also start to learn how language sounds and increase their vocabulary and awareness of grammatical structures. In due course, they will be able to draw on such grammar in their own writing.

Rules for effective discussions should be agreed with and demonstrated for pupils. They should help to develop and evaluate them, with the expectation that everyone takes part. Pupils should be helped to consider the opinions of others.

Role-play can help pupils to identify with and explore characters and to try out the language they have listened to.

**WRITING**

**Transcription**

**Spelling** (see Appendix 1)

Pupils should be taught to:

- spell:
  - words containing each of the 40+ phonemes already taught
  - common exception words
  - the days of the week

Spelling should be taught alongside reading, so that pupils understand that they can read back words they have spelt.

Pupils should be shown how to segment words into individual phonemes and then how to represent the phonemes by the appropriate grapheme(s). It is important to recognise that phoneme-grapheme correspondences (which underpin spelling) are more variable than GPCs (which underpin reading). For this reason, pupils need to do much more word-specific rehearsal for
- name the letters of the alphabet:
  - naming the letters of the alphabet in order
  - using letter names to distinguish between alternative spellings of the same sound
- add prefixes and suffixes:
  - using the spelling rule for adding –s or –es as the plural marker for nouns and the third person singular marker for verbs
  - using the prefix un–
  - using –ing, –ed, –er and –est where no change is needed in the spelling of root words (e.g. helping, helped, helper, eating, quicker, quickest)
- apply simple spelling rules and guidelines, as listed in Appendix 1
- write from memory simple sentences dictated by the teacher that include words taught so far.

**Handwriting**

Pupils should be taught to:
- sit correctly at a table, holding a pencil comfortably and correctly
- begin to form lower-case letters in the correct direction, starting and finishing in the right place
- form capital letters
- form digits 0-9

**Handwriting**

Handwriting requires frequent and discrete, direct teaching. Pupils should be able to form letters correctly and confidently. The size of the writing implement (pencil, pen) should not be too large for a young pupil’s hand. Whatever is being used should allow the pupil to hold it easily and correctly so that bad habits are avoided.

Left-handed pupils should receive specific teaching to meet their needs.

At this stage pupils will be spelling some words in a phonically plausible way, even if sometimes incorrectly. Misspellings of words that pupils have been taught should be corrected; other misspelt words should be used to teach pupils about alternative ways of representing those sounds.

Writing simple dictated sentences that include words taught so far gives pupils opportunities to apply and practise their spelling.
- understand which letters belong to which handwriting ‘families’ (i.e. letters that are formed in similar ways) and to practise these.

**Composition**

Pupils should be taught to:

- write sentences by:
  - saying out loud what they are going to write about
  - composing a sentence orally before writing it
  - sequencing sentences to form short narratives
  - re-reading what they have written to check that it makes sense
- discuss what they have written with the teacher or other pupils
- read aloud their writing clearly enough to be heard by their peers and the teacher.

**Composition**

At the beginning of year 1, not all pupils will have the spelling and handwriting skills they need to write down everything that they can compose out loud.

Pupils should understand, through demonstration, the skills and processes essential to writing: that is, thinking aloud as they collect ideas, drafting, and re-reading to check their meaning is clear.

**Vocabulary, grammar and punctuation**

Pupils should be taught to:

- develop their understanding of the concepts set out in Appendix 2 by:
  - leaving spaces between words
  - joining words and joining sentences using *and*
  - beginning to punctuate sentences using a capital letter and a full stop, question mark or exclamation

**Vocabulary, grammar and punctuation**

Pupils should be taught to recognise sentence boundaries in spoken sentences and to use the vocabulary listed in Appendix 2 when their writing is discussed.

Pupils should begin to use some of the distinctive features of Standard English in their writing. ‘Standard English’ is defined in the glossary.
<table>

<tr>
<td>- use the grammatical terminology in Appendix 2 in discussing their writing.</td>
</tr>
</tbody>
</table>
**Year 2**

By the beginning of year 2, pupils should be able to read all common graphemes. They should be able to read unfamiliar words containing these graphemes, accurately and without undue hesitation, by sounding them out in books that are matched closely to each pupil's level of word reading knowledge. They should also be able to read many common words containing GPCs taught so far, such as *shout, hand, stop, or dream*, without needing to blend the sounds out loud first. Pupils' reading of common exception words, such as *you, could, many, or people*, should be secure. Pupils will increase their fluency by being able to read these words easily and automatically. Finally, pupils should be able to retell some familiar stories that have been read to and discussed with them or that they have acted out during year 1.

During year 2, teachers should continue to focus on establishing pupils' accurate and speedy word reading skills. They should also make sure that pupils listen to and discuss a wide range of stories, poems, plays and information books; this should include whole books. The sooner that pupils can read well and do so frequently, the sooner they will be able to increase their vocabulary, comprehension and their knowledge across the wider curriculum.

In writing, pupils at the beginning of year 2 should be able to compose individual sentences orally and then write them down. They should be able to spell correctly many of the words covered in year 1 (see Appendix 1). They should also be able to make phonically-plausible attempts to spell words they have not yet learnt. Finally, they should be able to form individual letters correctly, so establishing good handwriting habits from the beginning.

It is important to recognise that pupils begin to meet extra challenges in terms of spelling during year 2. Increasingly, they should learn that there is not always an obvious connection between the way a word is said and the way it is spelt. Variations include different ways of spelling the same sound, the use of so-called silent letters and groups of letters in some words and, sometimes, spelling that has become separated from the way that words are now pronounced, such as the ‘le’ ending in *table*. Pupils’ motor skills also need to be sufficiently advanced for them to write down ideas that they may be able to compose orally. In addition, writing is intrinsically harder than reading: pupils are likely to be able to read and understand more complex writing (in terms of its vocabulary and structure) than they are capable of producing themselves.

For pupils who do not have the phonic knowledge and skills they need for year 2, teachers should use the year 1 programmes of study for word reading and spelling so that pupils' word reading skills catch up. However, teachers should use the year 2 programme of study for comprehension so that these pupils hear and talk about new books, poems, other writing, and vocabulary with the rest of the class.
### Year 2 programme of study (statutory requirements)

**READING**

**Word reading**

Pupils should be taught to:

- continue to apply phonic knowledge and skills as the route to decode words until automatic decoding has become embedded and reading is fluent
- read accurately by blending the sounds in words that contain the graphemes taught so far, especially recognising alternative sounds for graphemes
- read accurately words of two or more syllables that contain the same GPCs as above
- read words containing common suffixes
- read further common exception words, noting unusual correspondence between spelling and sound and where these occur in the word
- read most words quickly and accurately when they have been frequently encountered without overt sounding and blending
- read aloud books closely matched to their improving phonic knowledge, sounding out unfamiliar words accurately, automatically and without undue hesitation
- re-read these books to build up their fluency and confidence in word reading.

### Notes and guidance (non-statutory)

**READING**

**Word reading**

Pupils should revise and consolidate the GPCs and the common exception words taught in year 1. The exception words taught will vary slightly, depending on the phonics programme being used. As soon as pupils can read words comprising the year 2 GPCs accurately and speedily, they should move on to the years 3 and 4 programme of study for word reading.

When teaching pupils how to read longer words, pupils should be shown syllable boundaries and how to read each syllable separately before they combine them to read the word.

Pupils should be taught how to read suffixes by building on the root words that they have already learnt. The whole suffix should be taught as well as the letters that make it up.

Pupils who are still at the early stages of learning to read should have ample practice in reading books that are closely matched to their developing phonic knowledge and knowledge of common exception words. As soon as the decoding of most regular words and common exception words is embedded fully, the range of books that pupils can read independently will expand rapidly. Pupils should have opportunities to exercise choice in selecting books and be taught how to do so.

- drawing on what they already know or on background information and vocabulary provided by the teacher
- checking that the text makes sense to them as they read and correcting inaccurate reading
- making inferences on the basis of what is being said and done
- answering and asking questions
- predicting what might happen on the basis of what has been read so far
- participate in discussion about books, poems and other works that are read to them and those that they can read for themselves, taking turns and listening to what others say
- explain and discuss their understanding of books, poems and other material, both those that they listen to and those that they read for themselves.

**WRITING**

**Transcription**

*Spelling* (see Appendix 1)

Pupils should be taught to:

- spell by:
  - segmenting spoken words into phonemes and representing these by graphemes, spelling many correctly

**WRITING**

**Transcription**

*Spelling*

In year 2, pupils move towards more word-specific knowledge of spelling, including homophones. The process of spelling should be emphasised: that is, that spelling involves segmenting spoken words into phonemes and then representing all the phonemes by graphemes in the right order. Pupils should do this both for single-
learning new ways of spelling phonemes for which one or more spellings are already known, and learn some words with each spelling, including a few common homophones

- learning to spell common exception words
- learning to spell more words with contracted forms
- distinguishing between homophones and near-homophones

- add suffixes to spell longer words, e.g. –ment, –ness, –ful, –less, –ly
- apply spelling rules and guidelines, as listed in Appendix 1
- write from memory simple sentences dictated by the teacher that include words and punctuation taught so far.

**Handwriting**

Pupils should be taught to:

- form lower-case letters of the correct size relative to one another
- start using some of the diagonal and horizontal strokes needed to join letters and understand which letters, when adjacent to one another, are best left unjoined
- write capital letters and digits of the correct size, orientation and relationship to one another and to lower case letters
- use spacing between words that reflects the size of the letters.

At this stage pupils will still be spelling some words in a phonically plausible way, even if sometimes incorrectly. Misspellings of words that pupils have been taught should be corrected; other misspelt words can be used as an opportunity to teach pupils about alternative ways of representing sounds.

Pupils should be encouraged to apply their knowledge of suffixes from their word reading to their spelling. They should also draw from and apply their growing knowledge of word and spelling structure, as well as their knowledge of root words.

**Handwriting**

Pupils should revise and practise correct letter formation frequently. They should be taught to write with a joined style as soon as they can form letters securely with the correct orientation.
Composition

Pupils should be taught to:

- develop positive attitudes towards and stamina for writing by:
  - writing narratives about personal experiences and those of others (real and fictional)
  - writing about real events
  - writing poetry
  - writing for different purposes

- consider what they are going to write before beginning by:
  - planning or saying out loud what they are going to write about
  - writing down ideas and/or key words, including new vocabulary
  - encapsulating what they want to say, sentence by sentence

- make simple additions, revisions and corrections to their own writing by:
  - evaluating their writing with the teacher and other pupils
  - re-reading to check that their writing makes sense and that verbs to indicate time are used correctly and consistently, including verbs in the continuous form
  - proof-reading to check for errors in spelling, grammar

Composition

Reading and listening to whole books, not simply extracts, helps pupils to increase their vocabulary and grammatical knowledge, including their knowledge of the vocabulary and grammar of Standard English. These activities also help them to understand how different types of writing, including narratives, are structured. All these can be drawn on for their writing.

Pupils should understand, through being shown, the skills and processes essential to writing: that is, thinking aloud as they collect ideas, drafting, and re-reading to check their meaning is clear.

Drama and role-play can contribute to the quality of pupils’ writing by providing opportunities for pupils to develop and order their ideas by playing roles and improvising scenes in various settings.

Pupils might draw on and use new vocabulary from their reading, their discussions about it (one-to-one and as a whole class) and from their wider experiences.
Vocabulary, grammar and punctuation

Pupils should be taught to:

- develop their understanding of the concepts set out in Appendix 2 by:
  - learning how to use both familiar and new punctuation correctly (see Appendix 2), including full stops, capital letters, exclamation marks, question marks, commas for lists and apostrophes for contracted forms
  - learning how to use:
    - sentences with different forms: statement, question, exclamation, command
    - expanded noun phrases to describe and specify, e.g. the blue butterfly
    - the present and past tenses correctly and consistently including the progressive form
    - subordination (using when, if, that, or because) and co-ordination (using or, and, or but)
    - learning the grammar in column 1 of year 2 in Appendix 2
    - using some features of written Standard English

Vocabulary, grammar and punctuation

The terms for discussing language should be embedded for pupils in the course of discussing their writing with them. Their attention should be drawn to the technical terms they need to learn.
- use and understand the grammatical terminology in Appendix 2 in discussing their writing.
Lower key stage 2 – years 3-4

By the beginning of year 3, pupils should be able to read books written at an age-appropriate interest level. They should be able to read them accurately and at a speed that is sufficient for them to focus on understanding what they read rather than on decoding individual words. They should be able to decode most new words outside their spoken vocabulary, making a good approximation to the word’s pronunciation. As their decoding skills become increasingly secure, teaching should be directed more towards developing the breadth and depth of their reading, making sure that they become independent, fluent and enthusiastic readers who read widely and frequently. They should be developing their understanding and enjoyment of stories, poetry, plays and non-fiction, and learning to read silently. They should also be developing their knowledge and skills in reading non-fiction about a wide range of subjects. They should be learning to justify their views about what they have read: with support at the start of year 3 and increasingly independently by the end of year 4.

Pupils should be able to write down their ideas with a reasonable degree of accuracy and with good sentence punctuation. Teachers should therefore be consolidating pupils’ writing skills, their grasp of sentence structure and their knowledge of linguistic terminology. Teaching them to develop as writers involves increasing their competence as well as teaching them to enhance the effectiveness of what they write. Teachers should make sure that pupils build on what they have learnt, particularly in terms of the range of their writing and the more varied grammar from which they can draw to express their ideas. Pupils should be beginning to understand how writing can be different from speech. Joined handwriting should be the norm; pupils should be able to use it fast enough to keep pace with what they want to say.

Pupils’ spelling of common words should be correct, including exception words and other words that they have learnt (see Appendix 1). Pupils should spell words as accurately as possible using their phonic knowledge and other knowledge of spelling, such as morphology and etymology.

Most pupils will not need further direct teaching of word reading skills: they are able to decode unfamiliar words accurately, and need very few repeated experiences of this before the word is stored in such a way that they can read it without overt sound-blending.

As in key stage 1, however, pupils who are still struggling to decode need to be taught to do this urgently through a rigorous and systematic phonics programme so that they catch up rapidly with their peers. If they cannot decode independently and fluently, they will find it increasingly difficult to understand what they read and to write down what they want to say. As far as possible, however, they should follow the year 3 and 4 programme of study in terms of listening to new books, hearing and learning new vocabulary and grammatical structures, and discussing these.
Specific requirements for pupils to discuss what they are learning and to develop their wider skills in spoken language form part of this programme of study. In years 3 and 4, pupils should become more familiar with and confident in using language in a greater variety of situations, for a variety of audiences and purposes, including through drama, formal presentations and debate.

<tr>
<td>- reading books that are structured in different ways and reading for a range of purposes</td>
<td></td>
</tr>
<tr>
<td>- using dictionaries to check the meaning of words that</td>
<td></td>
</tr>
</tbody>
</table>
they have read

- increasing their familiarity with a wide range of books, including fairy stories, myths and legends, and retelling some of these orally
- identifying themes and conventions in a wide range of books
- preparing poems and play scripts to read aloud and to perform, showing understanding through intonation, tone, volume and action
- discussing words and phrases that capture the reader’s interest and imagination
- recognising some different forms of poetry (e.g. free verse, narrative poetry)

- understand what they read, in books they can read independently, by:
  - checking that the text makes sense to them, discussing their understanding and explaining the meaning of words in context
  - asking questions to improve their understanding of a text
  - drawing inferences such as inferring characters’ feelings, thoughts and motives from their actions, and justifying inferences with evidence
  - predicting what might happen from details stated and implied
  - identifying main ideas drawn from more than one

| They should also learn the conventions of different types of writing, such as the greeting in letters, a diary written in the first person or the use of presentational devices such as numbering and headings in instructions. |
| Pupils should be taught to use the skills they have learnt earlier and continue to apply these skills to read for different reasons, including for pleasure, or to find out information and the meaning of new words. |
| Pupils should continue to have opportunities to listen frequently to stories, poems, non-fiction and other writing, including whole books and not just extracts, so that they build on what was taught previously. In this way, they also meet books and authors that they might not choose themselves. Pupils should also have opportunities to exercise choice in selecting books and be taught how to do so, with teachers making use of any available library services and expertise to support this. |
| Reading, re-reading, and rehearsing poems and plays for presentation and performance give pupils opportunities to discuss language, including vocabulary, extending their interest in the meaning and origin of words. Pupils should be encouraged to use drama approaches to understand how to perform plays and poems to support their understanding of the meaning. These activities also provide them with an incentive to find out what expression is required, so feeding into comprehension. |
| In using non-fiction, pupils should know what information they need |
### Writing

#### Transcription

**Spelling (see Appendix 1)**

Pupils should be taught to:

- use further prefixes and suffixes and understand how to add them (Appendix 1)
- spell further homophones
- spell words that are often misspelt (Appendix 1)
- use the first two or three letters of a word to check its spelling in a dictionary
- write from memory simple sentences, dictated by the teacher, that include words and punctuation taught so far.

The expectation should be that all pupils take part.

### Writing

#### Transcription

**Spelling**

Pupils should learn to spell new words correctly and have plenty of practice in spelling them.

They should understand how to place the apostrophe in words with regular plurals (e.g. girls’, boys’) and in words with irregular plurals (e.g. children’s).

As in years 1 and 2, pupils should continue to be supported in understanding and applying the concepts of word structure (see Appendix 2).

Dictionaries are not useful for pupils who cannot yet spell, since these pupils do not have sufficient knowledge of spelling to use them efficiently.
### Handwriting
Pupils should be taught to:

- use the diagonal and horizontal strokes that are needed to join letters and understand which letters, when adjacent to one another, are best left unjoined
- increase the legibility, consistency and quality of their handwriting, e.g. by ensuring that the downstrokes of letters are parallel and equidistant; that lines of writing are spaced sufficiently so that the ascenders and descenders of letters do not touch.

### Composition
Pupils should be taught to:

- plan their writing by:
  - discussing writing similar to that which they are planning to write in order to understand and learn from its structure, vocabulary and grammar
  - discussing and recording ideas
- draft and write by:
  - composing and rehearsing sentences orally (including dialogue), progressively building a varied and rich vocabulary and an increasing range of sentence structures (See Appendix 2)
  - organising paragraphs around a theme
  - in narratives, creating settings, characters and plot

---

Pupils should be using joined handwriting throughout their independent writing. Handwriting should continue to be taught, with the aim of increasing the fluency with which pupils are able to write down what they want to say. This, in turn, will support their composition and spelling.

---

Pupils should continue to have opportunities to write for a range of real purposes and audiences as part of their work across the curriculum. These purposes and audiences should underpin the decisions about the form the writing should take, such as a narrative, an explanation or a description.

Pupils should understand, through being shown these, the skills and processes that are essential for writing: that is, thinking aloud to explore and collect ideas, drafting, and re-reading to check their meaning is clear, including doing so as the writing develops. Pupils should be taught to monitor whether their own writing makes sense in the same way that they monitor their reading, checking at different levels.

In order to develop creative and imaginative writing, pupils can be
- in non-narrative material, using simple organisational devices such as headings and sub-headings
  - evaluate and edit by:
    - assessing the effectiveness of their own and others’ writing and suggesting improvements
    - proposing changes to grammar and vocabulary to improve consistency, e.g. the accurate use of pronouns in sentences
  - proof-read for spelling and punctuation errors
  - read aloud their own writing, to a group or the whole class, using appropriate intonation and controlling the tone and volume so that the meaning is clear.

- encouraged to adopt, create and sustain a range of roles, responding appropriately to others in role (both verbally and non-verbally). They should have opportunities to create their own improvised, devised and scripted drama for each other and a range of audiences as well as to rehearse, refine, share and respond thoughtfully to drama and theatre performances.
Vocabulary, grammar and punctuation

Pupils should be taught to:

- develop their understanding of the concepts set out in Appendix 2 by:
  - extending the range of sentences with more than one clause by using a wider range of conjunctions, e.g. *when*, *if*, *because*, *although*
  - using the perfect form of verbs to mark relationships of time and cause
  - choosing nouns or pronouns appropriately for clarity and cohesion and to avoid repetition
  - using conjunctions, adverbs and prepositions to express time and cause
  - using fronted adverbials
  - learning the grammar in column 1 of year 3 and 4 in Appendix 2
- indicate grammatical and other features by:
  - using commas after fronted adverbials
  - indicating possession by using the possessive apostrophe with singular and plural nouns
  - using and punctuating direct speech
- use and understand the grammatical terminology in Appendix 2 accurately and appropriately when discussing their writing and reading.

Vocabulary, grammar and punctuation

Grammar should be taught explicitly: pupils should be taught the terminology and concepts set out in Appendix 2, and be able to apply them correctly to examples of real language, such as their own writing or books that they have read.

At this stage, pupils should start to learn about some of the differences between Standard English and non-Standard English and begin to apply what they have learnt, for example, in writing dialogue for characters.
Upper key stage 2 – years 5-6

By the beginning of year 5, pupils should be able to read aloud a wider range of poetry and books written at an age-appropriate interest level with accuracy and at a reasonable speaking pace. They should be able to read most words effortlessly and to work out how to pronounce unfamiliar written words with increasing automaticity. If the pronunciation sounds unfamiliar, they should ask for help in determining both the meaning of the word and how to pronounce it correctly. They should be able to prepare readings, with appropriate intonation to show their understanding, and should be able to summarise and present a familiar story in their own words. They should be reading widely and frequently, outside as well as in school, for pleasure and information. They should be able to read silently, and then discuss what they have read.

Pupils should be able to write down their ideas quickly. Their grammar and punctuation should be broadly accurate. Pupils’ spelling of most words taught so far should be accurate and they should be able to spell words that they have not yet been taught by using what they have learnt about how spelling works in English.

During years 5 and 6, teachers should continue to emphasise pupils’ enjoyment and understanding of language, especially vocabulary, to support their reading and writing. Pupils’ knowledge of language, gained from stories, plays, poetry, non-fiction and textbooks, will support their increasing fluency as readers, their facility as writers, and their comprehension. As in years 3 and 4, pupils should be taught to enhance the effectiveness of their writing as well as their competence.

It is essential that pupils whose decoding skills are poor are taught through a rigorous and systematic phonics programme so that they catch up rapidly with their peers in terms of their decoding and spelling. However, as far as possible, these pupils should follow the upper key stage 2 programme of study in terms of listening to books and other writing that they have not come across before, hearing and learning new vocabulary and grammatical structures, and having a chance to talk about all of these.

By the end of year 6, pupils’ reading and writing should be sufficiently fluent and effortless for them to manage the general demands of the curriculum in year 7, across all subjects and not just in English, but there will continue to be a need for pupils to learn subject-specific vocabulary. They should be able to reflect their understanding of the audience for and purpose of their writing by selecting appropriate vocabulary and grammar. Teachers should prepare pupils for secondary education by ensuring that they can consciously control the structure of sentences in their writing and understand why sentences are constructed as they are. This involves consolidation, practice and discussion of language.

Specific requirements for pupils to discuss what they are learning and to develop their wider skills in spoken language form part of this programme of study. In years 5 and 6,
pupils' confidence, enjoyment and mastery of language should be extended through public speaking, performance and debate.

</table>

When reading with or to pupils, attention should be paid to new vocabulary – both a word’s meaning(s) and its correct pronunciation.
range of fiction, poetry, plays, non-fiction and reference books or textbooks

- reading books that are structured in different ways and reading for a range of purposes
- increasing their familiarity with a wide range of books, including myths, legends and traditional stories, modern fiction, fiction from our literary heritage, and books from other cultures and traditions
- recommending books that they have read to their peers, giving reasons for their choices
- identifying and discussing themes and conventions in and across a wide range of writing
- making comparisons within and across books
- learning a wider range of poetry by heart
- preparing poems and plays to read aloud and to perform, showing understanding through intonation, tone and volume so that the meaning is clear to an audience

- understand what they read by:
  - checking that the book makes sense to them, discussing their understanding and exploring the meaning of words in context
  - asking questions to improve their understanding
  - drawing inferences such as inferring characters’ feelings, thoughts and motives from their actions,

are very similar at different ages. Pupils should continue to apply what they have already learnt to more complex writing.

Pupils should be taught to recognise themes in what they read, such as loss or heroism. They should have opportunities to compare characters, consider different accounts of the same event and discuss viewpoints (both of authors and of fictional characters), within a text and across more than one text.

They should continue to learn the conventions of different types of writing, such as the use of the first person in writing diaries and autobiographies.

Pupils should be taught the technical and other terms needed for discussing what they hear and read, such as metaphor, simile, analogy, imagery, style and effect.

In using non-fiction, pupils need to know what information they need to look for before they begin and need to understand the task. They should be shown how to use contents pages and indexes to locate information.

The skills of information retrieval that are taught should be applied, e.g. in reading history, geography and science textbooks, and in contexts where pupils are genuinely motivated to find out information, such as reading information leaflets before a gallery or museum visit or reading a theatre programme or review. Teachers should consider making use of any available library services and expertise to support this.
and justifying inferences with evidence
- predicting what might happen from details stated and implied
- summarising the main ideas drawn from more than one paragraph, identifying key details that support the main ideas
- identifying how language, structure and presentation contribute to meaning
- discuss and evaluate how authors use language, including figurative language, considering the impact on the reader
- distinguish between statements of fact and opinion
- retrieve, record and present information from non-fiction
- participate in discussions about books that are read to them and those they can read for themselves, building on their own and others’ ideas and challenging views courteously
- explain and discuss their understanding of what they have read, including through formal presentations and debates, maintaining a focus on the topic and using notes where necessary
- provide reasoned justifications for their views.

Pupils should have guidance about and feedback on the quality of their explanations and contributions to discussions.

Pupils should be shown how to compare characters, settings, themes and other aspects of what they read.
### Transcription

**Spelling (see Appendix 1)**

Pupils should be taught to:

- use further prefixes and suffixes and understand the guidelines for adding them
- spell some words with 'silent' letters, e.g. *knight, psalm, solemn*
- continue to distinguish between homophones and other words which are often confused
- use knowledge of morphology and etymology in spelling and understand that the spelling of some words needs to be learnt specifically, as listed in Appendix 1
- use dictionaries to check the spelling and meaning of words
- use the first three or four letters of a word to check spelling, meaning or both of these in a dictionary
- use a thesaurus.

### Handwriting and Presentation

Pupils should be taught to:

- write legibly, fluently and with increasing speed by:
  - choosing which shape of a letter to use when given choices and deciding, as part of their personal style, whether or not to join specific letters
- continue to practise handwriting and be encouraged to increase the speed of it, so that problems with forming letters do not get in the way of their writing down what they want to say. They should be clear about what standard of handwriting is appropriate for a particular task (e.g. quick notes or a final handwritten version). They should also be taught to use an unjoined style (e.g. for

information in a sentence

- using expanded noun phrases to convey complicated information concisely
- using modal verbs or adverbs to indicate degrees of possibility
- using relative clauses beginning with *who*, *which*, *where*, *when*, *whose*, *that* or with an implied (i.e. omitted) relative pronoun
- learning the grammar in column 1 of year 1 in Appendix 2

- indicate grammatical and other features by:
  - using commas to clarify meaning or avoid ambiguity in writing
  - using hyphens to avoid ambiguity
  - using brackets, dashes or commas to indicate parenthesis
  - using semi-colons, colons or dashes to mark boundaries between main clauses
  - using a colon to introduce a list
  - punctuating bullet points consistently

- use and understand the grammatical terminology in Appendix 2 accurately and appropriately in discussing their writing and reading.
English Appendix 1: Spelling

Most people read words more accurately than they spell them. The younger pupils are, the truer this is.

By the end of year 1, pupils should be able to read a large number of different words containing the grapheme-phoneme correspondences (GPCs) that they have learnt, whether or not they have seen these words before. Spelling, however, is a very different matter. Once pupils have learnt more than one way of spelling particular sounds, choosing the right letter or letters depends on their either having made a conscious effort to learn the words or having absorbed them less consciously through their reading. Younger pupils have not had enough time to learn or absorb the accurate spelling of all the words that they may want to write.

This appendix provides examples of words embodying each pattern which is taught. Many of the words listed as ‘example words’ for years 1 and 2, including almost all those listed as ‘exception words’, are used frequently in pupils’ writing, and therefore it is worth pupils learning the correct spelling. The ‘exception words’ contain GPCs which have not yet been taught as widely applicable, but this may be because they are applicable in very few age-appropriate words rather than because they are rare in English words in general.

The word-lists for years 3 and 4 and years 5 and 6 are statutory. The lists are a mixture both of words pupils frequently use in their writing and those which they often misspell. Some of the listed words may be thought of as quite challenging, but the 100 words in each list can be covered in fewer than two school years if teachers simply add words each week.

The rules and guidance are intended to support the teaching of spelling. Phonic knowledge should continue to underpin spelling after key stage 1; teachers should still draw pupils’ attention to GPCs that do and do not fit in with what has been taught so far. Increasingly, however, pupils also need to understand the role of morphology and etymology. Although particular GPCs in root words simply have to be learnt, teachers can help pupils to understand relationships between meaning and spelling where these are relevant. For example, understanding the relationship between medical and medicine may help pupils to spell the /s/ sound in medicine with the letter ‘c’. Pupils can also be helped to spell words with prefixes and suffixes correctly if they understand some general principles for adding them. Teachers should be familiar with what pupils have been taught about spelling in earlier years, such as which rules pupils have been taught for adding prefixes and suffixes.

The spelling appendix is structured in the same way as the programmes of study: the left-hand column is statutory; the middle and right-hand columns are non-statutory guidance.

The International Phonetic Alphabet (IPA) is used to represent sounds (phonemes). A table showing the IPA is provided in this document.
### Year 1

#### Work for year 1

**Statutory requirements**

**Revision of Reception work**

The boundary between revision of work covered in Reception and the introduction of new work may vary according to the programme used, but basic revision should include:

- All letters of the alphabet and the sounds which they most commonly represent
- Consonant digraphs and the sounds which they represent
- Vowel digraphs which have been taught and the sounds which they represent
- The process of segmenting words into sounds before choosing graphemes to represent the sounds
- Words with adjacent consonants
- Rules and guidelines which have been taught

No examples are suggested because the selection will vary according to the programme used, particularly where vowel digraphs are concerned.

<table>
<thead>
<tr>
<th>Statutory requirements</th>
<th>Rules and guidance (non-statutory)</th>
<th>Example words (non-statutory)</th>
</tr>
</thead>
<tbody>
<tr>
<td>The sounds /f/, /l/, /s/, /z/ and /k/ spelt ff, ll, ss, zz and ck</td>
<td>The /f/, /l/, /s/, /z/ and /k/ sounds are usually spelt as ff, ll, ss, zz and ck if they come straight after a single vowel letter in short words. Exceptions: if, pal, us, bus, yes.</td>
<td>off, well, miss, buzz, back</td>
</tr>
<tr>
<td>The /ŋ/ sound spelt n before k</td>
<td></td>
<td>bank, think, honk, sunk</td>
</tr>
<tr>
<td>Division of words into syllables</td>
<td>Each syllable is like a ‘beat’ in the spoken word. Words of more than one syllable often have an unstressed syllable in which the vowel sound is unclear.</td>
<td>pocket, rabbit, carrot, thunder, sunset</td>
</tr>
</tbody>
</table>
| **-tch** | The /tʃ/ sound is usually spelt as *tch* if it comes straight after a single vowel letter.  
**Exceptions:** rich, which, much, such. | catch, fetch, kitchen, notch, hutch |
| **The /v/ sound at the end of words** | English words hardly ever end with the letter *v*, so if a word ends with a /v/ sound, the letter *e* usually needs to be added after the ‘v’. | have, live, give |
| **Adding s and es to words (plural of nouns and the third person singular of verbs)** | If the ending sounds like /s/ or /z/, it is spelt as –*s*. If the ending sounds like /iz/ and forms an extra syllable or ‘beat’ in the word, it is spelt as –*es*. | cats, dogs, spends, rocks, thanks, catches |
| **Adding the endings –ing, –ed and –er to verbs where no change is needed to the root word** | –*ing* and –*er* always add an extra syllable to the word and –*ed* sometimes does.  
The past tense of some verbs may sound as if it ends in /tʃd/ (extra syllable), /d/ or /tʃ/ (no extra syllable), but all these endings are spelt –*ed*.  
If the verb ends in two consonant letters (the same or different), the ending is simply added on. | hunting, hunted, hunter, buzzing, buzzed, buzzer, jumping, jumped, jumper |
| **Adding –er and –est to adjectives where no change is needed to the root word** | As with verbs (see above), if the adjective ends in two consonant letters (the same or different), the ending is simply added on. | grander, grandest, fresher, freshest, quicker, quickest |
| **Vowel digraphs and trigraphs** | Some may already be known, depending on the programmes used in reception, but some will be new. |
| ai | The digraphs *ai* and *oi* are never used at the end of English words. | rain, wait, train, paid, afraid  
oil, join, coin, point, soil |
| oi | day, play, say, way, stay  
boy, toy, enjoy, annoy |
| ay | ay and *oy* are used for those sounds at the end of words and at the end of syllables. | made, came, same, take, safe  
these, theme, complete  
five, ride, like, time, side  
home, those, woke, hope, hole |
| oy | June, rule, rude, use, tube, tune  
car, start, park, arm, garden |
| a–e | see, tree, green, meet, week  
sea, dream, meat, each, read (present tense)  
head, bread, meant, instead, read (past tense) |
| e–e | (stressed sound): her, term, verb, person  
(unstressed schwa sound): better, under, summer, winter, sister |
| i–e | girl, bird, shirt, first, third  
turn, hurt, church, burst, Thursday |
| o–e | Very few words end with the letters *oo*.  
food, pool, moon, zoo, soon |
<p>| u–e | book, took, foot, wood, good |</p>

### Years 3 and 4

**Revision of work from years 1 and 2** Pay special attention to the rules for adding suffixes.

**New work for years 3 and 4**

#### Statutory requirements

<table>
<thead>
<tr>
<th>Adding suffixes beginning with vowel letters to words of more than one syllable</th>
<th>Rules and guidance (non-statutory)</th>
<th>Example words (non-statutory)</th>
</tr>
</thead>
<tbody>
<tr>
<td>If the last syllable of a word is stressed and ends with one consonant letter which has just one vowel letter before it, the final consonant letter is doubled before any ending beginning with a vowel letter is added. The consonant letter is not doubled if the syllable is unstressed.</td>
<td>forgetting, forgotten, beginning, beginner, prefer, preferred</td>
<td></td>
</tr>
<tr>
<td>The /ɪ/ sound spelt y elsewhere than at the end of words</td>
<td>These words should be learnt as needed.</td>
<td>myth, gym, Egypt, pyramid, mystery</td>
</tr>
<tr>
<td>The /ʌ/ sound spelt ou</td>
<td>These words should be learnt as needed.</td>
<td>young, touch, double, trouble, country</td>
</tr>
</tbody>
</table>

#### More prefixes

<table>
<thead>
<tr>
<th>The suffix –ation</th>
<th>The suffix –ation is added to verbs to form nouns. The rules already learnt still apply.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Most prefixes are added to the beginning of root words without any changes in spelling, but see in– below. Like un–, the prefixes dis– and mis– have negative meanings.</td>
<td>information, adoration, sensation, preparation, admiration</td>
</tr>
<tr>
<td>dis–, mis–: disappoint, disagree, disobey misbehave, mislead, misspell (mis + spell) in–: inactive, incorrect illegal, illegible immature, immortal, impossible, impatient, imperfect irregular, irrelevant, irresponsible re–: redo, refresh, return, reappear, redecorate sub–: subdivide, subheading, submarine, submerge inter–: interact, intercity, international, interrelated (inter + related) super–: supermarket, superman, superstar anti–: antiseptic, anti-clockwise, antisocial auto–: autobiography, autograph</td>
<td></td>
</tr>
<tr>
<td>The suffix –ly</td>
<td>The suffix –ly is added to an adjective to form an adverb. The rules already learnt still apply. The suffix –ly starts with a consonant letter, so it is added straight on to most root words. Exceptions: (1) If the root word ends in –y with a consonant letter before it, the y is changed to i, but only if the root word has more than one syllable. (2) If the root word ends with –le, the –le is changed to –ly. (3) If the root word ends with –ic, –ally is added rather than just –ly, except in the word publicly. (4) The words truly, duly, wholly.</td>
</tr>
<tr>
<td>Words with endings sounding like /ʒə/ or /tʃə/</td>
<td>The ending sounding like /ʒə/ is always spelt –sure. The ending sounding like /tʃə/ is often spelt –ture, but check that the word is not a root word ending in (t)ch with an er ending – e.g. teacher, catcher, richer, stretcher.</td>
</tr>
<tr>
<td>Endings which sound like /ʒən/</td>
<td>If the ending sounds like /ʒən/, it is spelt as –sion</td>
</tr>
<tr>
<td>The suffix –ous</td>
<td>Sometimes the root word is obvious and the usual rules apply for adding suffixes beginning with vowel letters. Sometimes there is no obvious root word. –our is changed to –or before –ous is added. A final ‘e’ must be kept if the /dʒ/ sound of ‘g’ is to be kept. If there is an /i:/ sound before the –ous ending, it is usually spelt as i, but a few words have e.</td>
</tr>
<tr>
<td>Endings which sound like /ʃən/, spelt –tion, –sion, –ssion, –cian</td>
<td>Strictly speaking, the suffixes are –ion and –ian. Clues about whether to put t, s, ss or c before these suffixes often come from the last letter or letters of the root word. –tion is the most common spelling. It is used if the root word ends in t or te. –ssion is used if the root word ends in ss or –mit. –sion is used if the root word ends in d or se. Exceptions: attend – attention, intend – intention. –cian is used if the root word ends in c or cs.</td>
</tr>
<tr>
<td>Words with the /k/ sound spelt ch (Greek in origin)</td>
<td></td>
</tr>
<tr>
<td>Words with the /ʃ/ sound spelt ch (mostly French in origin)</td>
<td>chef, chalet, machine, brochure</td>
</tr>
<tr>
<td>Words ending with the /ɡ/ sound spelt –gue and the /k/ sound spelt –que (French in origin)</td>
<td>league, tongue, antique, unique</td>
</tr>
<tr>
<td>Words with the /s/ sound spelt sc (Latin in origin)</td>
<td>In the Latin words from which these words come, the Romans probably pronounced the c and the k as two sounds rather than one – /s/ /k/</td>
</tr>
<tr>
<td>Words with the /eɪ/ sound spelt ei, eigh, or ey</td>
<td>vein, weigh, eight, neighbour, they, obey</td>
</tr>
<tr>
<td>Possessive apostrophe with plural words</td>
<td>The apostrophe is placed after the plural form of the word; –s is not added if the plural already ends in –s, but is added if the plural does not end in –s (i.e. is an irregular plural – e.g. children’s).</td>
</tr>
<tr>
<td>Homophones or near-homophones</td>
<td>accept/except, affect/effect, ball/bawl, berry/bury, brake/break, fair/fare, grate/great, groan/grown, here/hear, heel/heal/he’ll, knot/not, mail/male, main/mane, meat/meet, medal/meddle, missed/mist, peace/piece, plain/plane, rain/rein/reign, scene/seen, weather/whether, whose/who’s</td>
</tr>
</tbody>
</table>
Word list for years 3 and 4

accident(ally)  circle  famous  island  peculiar  sentence
actual(ly)  complete  favourite  knowledge  perhaps  separate
address  consider  February  learn  popular  special
answer  continue  forward(s)  length  position  straight
appear  decide  fruit  library  possess(ion)  strange
arrive  describe  grammar  material  possible  strength
believe  different  group  medicine  potatoes  suppose
bicycle  difficult  guard  mention  pressure  surprise
breath  disappear  guide  minute  probably  therefore
breathe  early  heard  natural  promise  through
build  earth  heart  naughty  purpose  thought
busy/business  eight/eighth  exercise  occasion(ally)  quarter  through
calendar  enough  experience  notice  question  various
caught  exercise  experiment  oppose  regular  weight
centre  experiment  important  ordinary  reign  woman/women
certain  extreme  interest  particular  remember

Teachers should continue to emphasise to pupils the relationships between sounds and letters, even when the relationships are unusual. Once root words are learnt in this way, longer words can be spelt correctly, if the rules and guidelines for adding prefixes and suffixes are also known.

Examples:

business: once busy is learnt, with due attention to the unusual spelling of the /i/ sound as ‘u’, business can then be spelt as busy + ness, with the y of busy changed to i according to the rule.

disappear: the root word appear contains sounds which can be spelt in more than one way so it needs to be learnt, but the prefix dis- is then simply added to appear.

Understanding the relationships between words can also help with spelling. Examples:

bicycle is cycle (from the Greek for wheel) with bi– (meaning two) before it.
medicine is related to medical so the /s/ sound is spelt as c.
opposite is related to oppose, so the schwa sound in opposite is spelt as o.
### Years 5 and 6

**Revise work done in previous years**

<table>
<thead>
<tr>
<th>New work for years 5 and 6</th>
<th>Rules and guidance (non-statutory)</th>
<th>Example words (non-statutory)</th>
</tr>
</thead>
</table>
| **Statutory requirements** | Not many common words end like this. If the root word ends in –ce, the /?/ sound is usually spelt as c – e.g. vice – vicious, grace – gracious, space – spacious, malice – malicious. **Exception:** anxious. | **Example words (non-statutory)**

<table>
<thead>
<tr>
<th>Endings which sound like /fas/ spelt –cious or –tious</th>
<th></th>
<th></th>
</tr>
</thead>
</table>

| **Endings which sound like /fal/** | –cial is common after a vowel letter and –tial after a consonant letter, but there are some exceptions. **Exceptions:** initial, financial, commercial, provincial (the spelling of the last three is clearly related to finance, commerce and province). | official, special, artificial, partial, confidential, essential |

| **Words ending in –ant, –ance/–ancy, –ent, –ence/–ency** | Use –ant and –ance/–ancy if there is a related word with a /æ/ or /e?/ sound in the right position; –ation endings are often a clue. Use –ent and –ence/–ency after soft c (/s/ sound), soft g (/dʒ/ sound) and qu, or if there is a related word with a clear /?/ sound in the right position. There are many words, however, where the above guidelines don’t help. These words just have to be learnt. | observant, observance, (observation), expectant (expectation), hesitant, hesitancy (hesitation), tolerant, tolerance (toleration), substance (substantial) innocent, innocence, decent, decency, frequent, frequency, confident, confidence (confidential) assistant, assistance, obedient, obedience, independent, independence |

| **Words ending in –able and –ible** | The –able/–ibly endings are far more common than the –ible/–ibly endings. As with –ant and –ance/–ancy, the –able ending is used if there is a related word ending in –ation. If the –able ending is added to a word ending in –ce or –ge, the e after the c or g must be kept as those letters would otherwise have their ‘hard’ sounds (as in cap and gap) before the a of the –able ending. The –able ending is usually but not always used if a complete root word can be heard before it, even if there is no related word ending in –ation. The first five examples opposite are obvious; in reliable, the complete word rely is heard, but the y changes to i in accordance with the rule. The –ible ending is common if a complete root word can’t be heard before it but it also sometimes occurs when a complete word can be heard (e.g. sensible). | adorable/adorably (adoration), applicable/applicably (application), considerable/considerably (consideration), tolerable/tolerably (toleration) changeable, noticeable, forcible, legible dependable, comfortable, understandable, reasonable, enjoyable, reliable possible/possibly, horrible/horribly, terrible/terribly, visible/visibly, incredible/incredibly, sensible/sensibly |

<p>| <strong>Adding suffixes beginning with vowel letters to words ending in –fer</strong> | The r is doubled if the –fer is still stressed when the ending is added. The r is not doubled if the –fer is no longer stressed. | referring, referred, referral, preferring, preferred, transferring, transferred reference, referee, preference, transference |</p>
<table>
<thead>
<tr>
<th>Use of the hyphen</th>
<th>Hyphens can be used to join a prefix to a root word, especially if the prefix ends in a vowel letter and the root word also begins with one.</th>
<th>co-ordinate, re-enter, co-operate, co-own</th>
</tr>
</thead>
</table>
| Words with the /i:/ sound spelt ei after c | The ‘i before e except after c’ rule applies to words where the sound spelt by ei is /i:/.
Exceptions: protein, caffeine, seize (and either and neither if pronounced with an initial /i:/ sound). | deceive, conceive, receive, perceive, ceiling |
<p>| Words containing the letter-string ough | ough is one of the trickiest spellings in English – it can be used to spell a number of different sounds. | ought, bought, thought, nought, brought, fought, cough, tough, enough, through, thorough, borough |
| Words with ‘silent’ letters (i.e. letters whose presence cannot be predicted from the pronunciation of the word) | Some letters which are no longer sounded used to be sounded hundreds of years ago: e.g. in knight, there was a /k/ sound before the /n/, and the gh used to represent the sound that ‘ch’ now represents in the Scottish word loch. | doubt, island, lamb, solemn, thistle, knight |
| Homophones and other words that are often confused | In these pairs of words, nouns end –ce and verbs end –se. Advice and advise provide a useful clue as the word advise (verb) is pronounced with a /z/ sound – which could not be spelt c. aisle: a gangway between seats (in a church, train, plane) isle: an island aloud: out loud allowed: permitted affect: usually a verb (e.g. The weather may affect our plans) effect: usually a noun (e.g. It may have an effect on our plans). If a verb, it means ‘bring about’ (e.g. He will effect changes in the running of the business.). altar: a table-like piece of furniture in a church alter: to change ascent: the act of ascending (going up) assent: to agree/agreement (verb and noun) bridil: to do with a bride at a wedding bridle: reins etc. for controlling a horse cereal: made from grain (e.g. breakfast cereal) serial: adjective from the noun series – a succession of things one after | advice/advise, device/devise, licence/license, practice/practise, prophecy/prophesy, farther: further, father: a male parent, guessed: past tense of the verb guess, guest: visitor, heard: past tense of the verb hear, herd: a group of animals, led: past tense of the verb lead, lead: present tense of that verb, or else the metal which is very heavy (as heavy as lead), morning: before noon, mourning: grieving for someone who has died, past: noun or adjective referring to a previous time (e.g. In the past) or preposition or adverb showing place (e.g. he walked past me), passed: past tense of the verb ‘pass’ (e.g. I passed him in the road), precede: go in front of or before |</p>

</tbody>
</table>
Teachers should continue to emphasise to pupils the relationships between sounds and letters, even when the relationships are unusual. Once root words are learnt in this way, longer words can be spelt correctly if the rules and guidelines for adding prefixes and suffixes are also known. Many of the words in the list above can be used for practice in adding suffixes.

Understanding the history of words and relationships between them can also help with spelling. Examples:

*Conscience* and *conscious* are related to *science*: *conscience* is simply *science* with the prefix *con-* added. These words come from the Latin word *scio* meaning *I know*.

The word *desperate*, meaning ‘without hope’, is often pronounced in English as *desp’rate*, but the –*sper-* part comes from the Latin *spero*, meaning ‘I hope’, in which the *e* was clearly sounded.

*Familiar* is related to *family*, so the /ə/ sound in the first syllable of *familiar* is spelt as *a*.
International Phonetic Alphabet

The table below shows each symbol of the International Phonetic Alphabet (IPA) and provides examples of the associated grapheme(s).\(^5\) The table is not a comprehensive alphabetic code chart; it is intended simply as guidance for teachers in understanding the IPA symbols used in the spelling appendix. The pronunciations in the table are, by convention, based on Received Pronunciation and could be significantly different from other accents.

\(^5\) This chart is adapted slightly from the version provided on the DfE’s website to support the Year 1 phonics screening check.

English Appendix 2: Vocabulary, grammar and punctuation

The grammar of our first language is learnt naturally and implicitly through interactions with other speakers and from reading. Explicit knowledge of grammar is, however, very important, as it gives us more conscious control and choice in our language. Building this knowledge is best achieved through a focus on grammar within the teaching of reading, writing and speaking. Once pupils are familiar with a grammatical concept (for example ‘modal verb’), they should be encouraged to apply and explore this concept in the grammar of their own speech and writing and to note where it is used by others. Young pupils, in particular, use more complex language in speech than in writing, and teachers should build on this, aiming for a smooth transition to sophisticated writing.

The table below focuses on Standard English and should be read in conjunction with the programme of study as it sets out the statutory requirements. The first column refers to the structure of words and vocabulary building. The table shows when concepts should be introduced first, not necessarily when they should be completely understood. It is very important, therefore, that the content in earlier years be revisited in subsequent years to consolidate knowledge and build on pupils’ understanding. Teachers should also go beyond the content set out here if they feel it is appropriate.

The grammatical terms that pupils should learn are set out in the final column. They should learn to recognise and use the terminology through discussion and practice. All terms in **bold** should be understood with the meanings set out in the glossary.

</tbody>
</table>
| 3 | Formation of **nouns** using a range of **prefixes**, such as *super-*; *anti-*; *auto-*  
Use of the forms *a* or *an* according to whether the next word begins with a **consonant** or a **vowel** (e.g. *a rock, an open box*)  
**Word families** based on common **words**, showing how words are related in form and meaning (e.g. *solve, solution, solver, dissolve, insoluble*) | Expressing time, place and cause using **conjunctions** (e.g. *when, before, after, while, so, because*), **adverbs** (e.g. *then, next, soon, therefore*), or **prepositions** (e.g. *before, after, during, in, because of*) | **Introduction to paragraphs as a way to group related material**  
**Headings and sub-headings to aid presentation**  
**Use of the present perfect form of verbs** instead of the simple past (e.g. *He has gone out to play contrasted with He went out to play*) | **Introduction to inverted commas to punctuate direct speech**
**adverb, preposition conjunction**
**word family, prefix
consonant, subordinate clause
direct speech consonant letter
eadverb, vowel letter
inverted commas (or ‘speech marks’)** |
|---|---|---|---|
| 4 | **The grammatical difference between plural and possessive -s**  
Standard English forms for verb **inflections** instead of local spoken forms (e.g. *we were instead of we was, or I did instead of I done*) | **Noun phrases expanded by the addition of modifying adjectives, nouns and preposition phrases** (e.g. *the teacher expanded to: the strict maths teacher with curly hair*)  
**Fronted adverbials** (e.g. *Later that day, I heard the bad news.*) | **Use of paragraphs to organise ideas around a theme**  
**Appropriate choice of pronoun or noun within and across sentences to aid cohesion and avoid repetition** | **Use of inverted commas and other punctuation to indicate direct speech e.g. a comma after the reporting clause; end punctuation within inverted commas (e.g. *The conductor shouted, “Sit down!”*)**  
**Apostrophes to mark singular and plural possession (e.g. *the girl’s name, the girls’ names*)**  
**Use of commas after fronted adverbials** | **determiner pronoun, possessive pronoun, adverbial** |
| 5 | **Converting nouns or adjectives into verbs using suffixes** (e.g. *-ate; -ise; -ify*)  
**Verb prefixes** (e.g. *dis-, de-, mis-, over- and re-*) | **Relative clauses** beginning with **who, which, where, when, whose, that, or an omitted relative pronoun**  
Indicating degrees of possibility using **adverbs** (e.g. *perhaps, surely*) or **modal verbs** (e.g. *might, should, will, must*) | **Devices to build cohesion within a paragraph** (e.g. *then, after that, this, firstly*)  
**Linking ideas across paragraphs using adverbials of time (e.g. *later*), place (e.g. *nearby*) and number (e.g. *secondly*) | **Brackets, dashes or commas to indicate parenthesis**  
**Use of commas to clarify meaning or avoid ambiguity** | **modal verb, relative pronoun relative clause parenthesis, bracket, dash cohesion, ambiguity** |
| 6 | The difference between vocabulary typical of informal speech and vocabulary appropriate for formal speech and writing (e.g. find out – discover; ask for – request; go in – enter)
How words are related by meaning as synonyms and antonyms (e.g. big, large, little). | Use of the **passive** to affect the presentation of information in a **sentence** (e.g. I broke the window in the greenhouse versus The window in the greenhouse was broken [by me]).
The difference between structures typical of informal speech and structures appropriate for formal speech and writing (such as the use of question tags, e.g. He’s your friend, isn’t he?, or the use of **subjunctive forms** such as If I were or Were they to come in some very formal writing and speech) | Linking ideas across paragraphs using a wider range of **cohesive devices**: repetition of a **word** or phrase, grammatical connections (e.g. the use of **adverbials** such as on the other hand, in contrast, or as a consequence), and **ellipsis**
Layout devices, such as headings, sub-headings, columns, bullets, or tables, to structure text | Use of the semi-colon, colon and dash to mark the boundary between independent **clauses** (e.g. It’s raining; I’m fed up)
Use of the colon to introduce a list
**Punctuation** of bullet points to list information
How hyphens can be used to avoid ambiguity (e.g. man eating shark versus man-eating shark, or recover versus re-cover) | subject, object active, passive synonym, antonym ellipsis, hyphen, colon, semi-colon, bullet points |
Glossary for the programmes of study for English

The following glossary includes all the technical grammatical terms used in the programmes of study for English, as well as others that might be useful. It is intended as an aid for teachers, not as the body of knowledge that should be learnt by pupils. Apart from a few which are used only in schools (e.g. root word), the terms below are used with the meanings defined here in most modern books on English grammar. It is recognised that there are different schools of thought on grammar, but the terms defined here clarify those being used in the programmes of study. For further details, teachers should consult the many books that are available.

Terms in definitions

As in any tightly structured area of knowledge, grammar, vocabulary and spelling involve a network of technical concepts that help to define each other. Consequently, the definition of one concept builds on other concepts that are equally technical. Concepts that are defined elsewhere in the glossary are hyperlinked. For some concepts, the technical definition may be slightly different from the meaning that some teachers may have learnt at school or may have been using with their own pupils; in these cases, the more familiar meaning is also discussed.
| active voice | An active verb has its usual pattern of subject and object (in contrast with the passive). | Active: *The school arranged a visit.*  
Passive: *A visit was arranged by the school.* |
| adjective | The surest way to identify adjectives is by the ways they can be used:  
• before a noun, to make the noun’s meaning more specific (i.e. to modify the noun), or  
• after the verb be, as its complement.  
Adjectives cannot be modified by other adjectives. This distinguishes them from nouns, which can be.  
Adjectives are sometimes called “describing words” because they pick out single characteristics such as size or colour. This is often true, but it doesn’t help to distinguish adjectives from other word classes, because verbs, nouns and adverbs can do the same thing. | *The pupils did some really good work.* [adjective used before a noun, to modify it]  
*Their work was good.* [adjective used after the verb be, as its complement]  
Not adjectives:  
*The lamp glowed.* [verb]  
*It was such a bright red!* [noun]  
*He spoke loudly.* [adverb]  
*It was a French grammar book.* [noun] |
| adverb | The surest way to identify adverbs is by the ways they can be used: they can modify a verb, an adjective, another adverb or even a whole clause.  
Adverbs are sometimes said to describe manner or time. This is often true, but it doesn’t help to distinguish adverbs from other word classes that can be used as adverbials, such as preposition phrases, noun phrases and subordinate clauses. | *Usha soon started snoring loudly.* [adverbs modifying the verbs started and snoring]  
*That match was really exciting!* [adverb modifying the adjective exciting]  
*We don’t get to play games very often.* [adverb modifying the other adverb, often]  
*Fortunately, it didn’t rain.* [adverb modifying the whole clause ’it didn’t rain’ by commenting on it]  
Not adverbs:  
*Usha went up the stairs.* [preposition phrase used as adverbial]  
*She finished her work this evening.* [noun phrase used as adverbial]  
*She finished when the teacher got cross.* [subordinate clause used as adverbial] |
| adverbial | An adverbial is a word or phrase that is used, like an adverb, to modify a verb or clause. Of course, adverbs can be used as adverbials, but many other types of words and phrases can be used this way, including preposition phrases and subordinate clauses. | *The bus leaves in five minutes.* [preposition phrase as adverbial: modifies leaves]  
*She promised to see him last night.* [noun phrase modifying either promised or see, according to the intended meaning]  
*She worked until she had finished.* [subordinate clause as adverbial] |
| antonym | Two words are antonyms if their meanings are opposites. | hot - cold  
light - dark  
light - heavy |
| apostrophe | Apostrophes have two completely different uses:  
• showing the place of missing letters (e.g. I’m for I am)  
• marking possessives (e.g. Hannah’s mother). | *I’m going out and I won’t be long.* [showing missing letters]  
*Hannah’s mother went to town in Justin’s car.* [marking possessives] |
| article | The articles the (definite) and a or an (indefinite) are the most common type of determiner. | *The dog found a bone in an old box.* |
| auxiliary verb | The auxiliary verbs are *be*, *have* and *do* and the modal verbs. They can be used to make questions and negative statements. In addition:  - *be* is used in the **progressive** and **passive**  - *have* is used in the **perfect**  - *do* is used to form questions and negative statements if no other auxiliary verb is present  | They are winning the match. [be used in the progressive]  
*Have you finished your picture?* [have used to make a question, and the perfect]  
No, I don’t know him. [do used to make a negative; no other auxiliary is present]  
*Will you come with me or not?* [modal *will* used to make a question about the other person’s willingness] |
| clause | A clause is a special type of phrase whose **head** is a verb. Clauses can sometimes be complete sentences. Clauses may be **main** or **subordinate**. Traditionally, a clause had to have a **finite** verb, but most modern grammarians also recognise **non-finite** clauses.  | *It was raining.* [single-clause sentence]  
*It was raining but we were indoors.* [two finite clauses]  
*If you are coming to the party, please let us know.* [finite subordinate clause inside a finite main clause]  
*Usha went upstairs to play on her computer.* [non-finite clause] |
| cohesion | A text has cohesion if it is clear how the meanings of its parts fit together. Cohesive devices can help to do this. In the example, there are repeated references to the same thing (shown by the different colours and underlines), and the logical relations, such as time and cause, between different parts are clear.  | *A visit* has been arranged for year 6, to the **Mountain Peaks Field Study Centre**, leaving school at 9.30am. *This is an overnight visit.* The centre has beautiful grounds and a **nature trail**. During the afternoon, the children will follow the **trail**. |
| cohesive device | Cohesive devices are words used to show how the different parts of a text fit together. In other words, they create **cohesion**. Some examples of cohesive devices are:  - **determiners and pronouns**, which can refer back to earlier words  - **conjunctions and adverbs**, which can make relations between words clear  - **ellipsis** of expected words.  | Julia’s dad bought her a football. *The football was expensive!* [determiner; refers us back to a particular football]  
Joe was given a bike for Christmas. *He* liked it very much. [the pronouns refer back to Joe and the bike]  
*We’ll be going shopping before we go to the park.* [conjunction; makes a relationship of time clear]  
I’m afraid we’re going to have to wait for the next train. Meanwhile, we could have a cup of tea. [adverb; refers back to the time of waiting]  
Where are you going? [   ] To school! [ellipsis of the expected words *I’m going*; links the answer back to the question] |
| complement | A verb’s subject complement adds more information about its subject, and its object complement does the same for its **object**. Unlike the verb’s object, its complement may be an adjective. The verb *be* normally has a complement.  | *She is our teacher.* [adds more information about the subject, *she*]  
*They seem very competent.* [adds more information about the subject, *they*]  
*Learning makes me happy.* [adds more information about the object, *me*] |
| compound, compounding | A compound word contains at least two root words in its **morphology**; e.g. *whiteboard*, *superman*. Compounding is very important in English.  | blackbird, blow-dry, bookshop, ice-cream, English teacher, inkjet, one-eyed, bone-dry, baby-sit, daydream, outgrow |
**conjunction**  
A conjunction links two words or phrases together.  
There are two main types of conjunctions:  
- **co-ordinating conjunctions** (e.g. *and*) link two words or phrases together as an equal pair  
- **subordinating conjunctions** (e.g. *when*) introduce a subordinate clause.  

<table>
<thead>
<tr>
<th>Co-ordination examples</th>
<th>Subordination examples</th>
</tr>
</thead>
<tbody>
<tr>
<td><em>James bought a bat and ball.</em></td>
<td><em>Kylie is young but she can kick the ball hard.</em></td>
</tr>
<tr>
<td><em>Everyone watches when Kyle does back-flips.</em></td>
<td><em>Joe can’t practise kicking because he’s injured.</em></td>
</tr>
</tbody>
</table>

**consonant**  
A sound which is produced when the speaker closes off or obstructs the flow of air through the vocal tract, usually using lips, tongue or teeth.  
Most of the letters of the alphabet represent consonants. Only the letters *a, e, i, o, u* and *y* can represent *vowel* sounds.

<table>
<thead>
<tr>
<th>Consonant examples</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>/p/</td>
<td>[flow of air stopped by the lips, then released]</td>
</tr>
<tr>
<td>/t/</td>
<td>[flow of air stopped by the tongue touching the roof of the mouth, then released]</td>
</tr>
<tr>
<td>/f/</td>
<td>[flow of air obstructed by the bottom lip touching the top teeth]</td>
</tr>
<tr>
<td>/s/</td>
<td>[flow of air obstructed by the lip of the tongue touching the gum line]</td>
</tr>
</tbody>
</table>

**continuous**  
See *progressive*.

**co-ordinate, co-ordination**  
Words or phrases are co-ordinated if they are linked as an equal pair by a co-ordinating conjunction (i.e. *and, but,* or).  
In the examples on the right, the co-ordinated elements are shown in the same colour, and the conjunction is underlined.  
The difference between co-ordination and subordination is that, in subordination, the two linked elements are not equal.

<table>
<thead>
<tr>
<th>Co-ordination examples</th>
<th>Subordination examples</th>
</tr>
</thead>
<tbody>
<tr>
<td><em>Susan and Amra met in a café.</em></td>
<td><em>Not co-ordination: They ate before they met.</em></td>
</tr>
<tr>
<td><em>They talked and drank tea for an hour.</em></td>
<td></td>
</tr>
<tr>
<td><em>Susan got a bus but Amra walked.</em></td>
<td></td>
</tr>
</tbody>
</table>

**determiner**  
A determiner specifies a noun as known or unknown, and it goes before any modifiers (e.g. adjectives or other nouns).  
Some examples of determiners are:  
- **articles** (*the, a or an*)  
- **demonstratives** (e.g. *this, those*)  
- **possessives** (e.g. *my, your*)  
- **quantifiers** (e.g. *some, every*).

<table>
<thead>
<tr>

<tr>
<td><em>that pupil</em></td>
<td></td>
</tr>
<tr>
<td><em>Julia’s parents</em></td>
<td></td>
</tr>
<tr>
<td><em>some big boys</em></td>
<td></td>
</tr>
</tbody>
</table>

**digraph**  
A type of *grapheme* where two letters represent one phoneme.  
Sometimes, these two letters are not next to one another; this is called a split digraph.

<table>
<thead>
<tr>
<th>Digraph examples</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>The digraph <em>ea</em> in <em>each</em> is pronounced /iː/.</td>
<td></td>
</tr>
<tr>
<td>The digraph <em>sh</em> in <em>shed</em> is pronounced /ʃ/.</td>
<td></td>
</tr>
<tr>
<td>The split digraph <em>i–e</em> in <em>line</em> is pronounced /aɪ/.</td>
<td></td>
</tr>
</tbody>
</table>

**ellipsis**  
Ellipsis is the omission of a word or phrase which is expected and predictable.

<table>
<thead>
<tr>
<th>Ellipsis examples</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Frankie waved to Ivana and <em>she watched her drive away.</em></td>
<td><em>She did it because she wanted to do it.</em></td>
</tr>
</tbody>
</table>
### etymology
A word’s etymology is its history: its origins in earlier forms of English or other languages, and how its form and meaning have changed. Many words in English have come from Greek, Latin or French.
- The word *school* was borrowed from a Greek word όμο(σκ)ολή (skholē) meaning ‘leisure’.
- The word *verb* comes from Latin verbum, meaning ‘word’.
- The word *mutton* comes from French mouton, meaning ‘sheep’.

### finite verb
Every sentence typically has at least one verb which is either past or present tense. Such verbs are called ‘finite’. The imperative verb in a command is also finite.
- Verbs that are not finite, such as participles or infinitives, cannot stand on their own: they are linked to another verb in the sentence.
- **Lizzie** *does* the dishes every day. [*present tense*]
- Even **Hana** *did* the dishes yesterday. [*past tense*]
- *Do* the dishes, Naser! [*imperative*]

### fronting, fronted
A word or phrase that normally comes after the verb may be moved before the verb: when this happens, we say it has been ‘fronted’. For example, a fronted adverbial is an adverbial which has been moved before the verb.
- When writing fronted phrases, we often follow them with a comma.
- **Before we begin**, make sure you’ve got a pencil. [*Without fronting: Make sure you’ve got a pencil before we begin.*]
- **The day after tomorrow**, I’m visiting my granddad. [*Without fronting: I’m visiting my granddad the day after tomorrow.*]

### future
Reference to future time can be marked in a number of different ways in English. All these ways involve the use of a present-tense verb.
- See also tense.
- Unlike many other languages (such as French, Spanish or Italian), English has no distinct ‘future tense’ form of the verb comparable with its present and past tenses.
- **He will leave tomorrow.** [*present-tense will followed by infinitive leave*]
- **He may leave tomorrow.** [*present-tense may followed by infinitive leave*]
- **He leaves tomorrow.** [*present-tense leaves*]
- **He is going to leave** tomorrow. [*present tense is followed by going to plus the infinitive leave*]

### GPC
See grapheme-phoneme correspondences.

### grapheme
A letter, or combination of letters, that corresponds to a single phoneme within a word.
- The grapheme *f* in the words *ten*, *bet* and *ate* corresponds to the phoneme /t/.
- The grapheme *ph* in the word *dolphin* corresponds to the phoneme /f/.

### grapheme-phoneme correspondences
The links between letters, or combinations of letters, (graphemes) and the speech sounds (phonemes) that they represent.
- In the English writing system, graphemes may correspond to different phonemes in different words.
- The grapheme *s* corresponds to the phoneme /s/ in the word *see*, but...
- ...it corresponds to the phoneme /z/ in the word *easy*.

### head
See phrase

### homonym
Two different words are homonyms if they both look exactly the same when written, and sound exactly the same when pronounced.
- Has he *left* yet? Yes – *he went* through the door on the *left*.
- The noise a dog makes is called a *bark*. Trees have *bark*.
| homophone                  | Two different words are homophones if they sound exactly the same when pronounced. | hear, here
|                          |                                        | some, sum |
| infinitive                | A verb’s infinitive is the basic form used as the head-word in a dictionary (e.g. walk, be). Infinitives are often used: | I want to walk.
|                          |  • after to                           | I will be quiet.
|                          |  • after modal verbs.                 |            |
| inflection                | When we add -ed to walk, or change mouse to mice, this change of morphology produces an inflection (‘bending’) of the basic word which has special grammar (e.g. past tense or plural). In contrast, adding -er to walk produces a completely different word, walker, which is part of the same word family. Inflection is sometimes thought of as merely a change of ending, but, in fact, some words change completely when inflected. | dogs is an inflection of dog.
|                          |                                        | went is an inflection of go.
|                          |                                        | better is an inflection of good. |
| intransitive verb         | A verb which does not need an object in a sentence to complete its meaning. See ‘transitive verb’. | The old woman died.
|                          |                                        | We all laughed. |
| main clause               | A sentence contains at least one clause which is not a subordinate clause; such a clause is a main clause. A main clause may contain any number of subordinate clauses. | It was raining but the sun was shining. [Two main clauses] The man who wrote it told me that it was true. [One main clause containing two subordinate clauses.] She said, “It rained all day.” [One main clause containing another.] |
| modal verb                | Modal verbs are used to change the meaning of other verbs. They can express meanings such as certainty, ability, or obligation. The main modal verbs are will, would, can, could, may, might, shall, should, must and ought. A modal verb only has finite forms and has no suffixes (e.g. I sing ? he sings, but not I must - he musts). | I can do this maths work by myself. This ride may be too scary for you! You should help your little brother. Is it going to rain? Yes, it might. Canning swim is important. [not possible because can must be finite; contrast: Being able to swim is important, where being is not a modal verb] |
| modify, modifier          | One word or phrase modifies another by making its meaning more specific. Because the two words make a phrase, the ‘modifier’ is normally close to the modified word. | In the phrase primary-school teacher: teacher is modified by primary-school (to mean a specific kind of teacher) school is modified by primary (to mean a specific kind of school). |
### morphology

A word’s morphology is its internal make-up in terms of root words and suffixes or prefixes, as well as other kinds of change such as the change of *mouse* to *mice*.

Morphology may be used to produce different inflections of the same word (e.g. *boy* - *boys*), or entirely new words (e.g. *boy* - *boyish*) belonging to the same word family.

A word that contains two or more root words is a compound (e.g. *news+paper, ice+cream*).

---

### noun

The surest way to identify nouns is by the ways they can be used after determiners such as *the*: for example, most nouns will fit into the frame "The __ matters/matter."

Nouns are sometimes called “naming words” because they name people, places and “things”; this is often true, but it doesn’t help to distinguish nouns from other word classes. For example, prepositions can name places and verbs can name ‘things’ such as actions.

Nouns may be classified as **common** (e.g. *boy, day*) or **proper** (e.g. *Ivan, Wednesday*), and also as **countable** (e.g. *thing, boy*) or **non-countable** (e.g. *stuff, money*). These classes can be recognised by the determiners they combine with.

---

### noun phrase

A noun phrase is a phrase with a noun as its head, e.g. *some foxes, foxes with bushy tails*. Some grammarians recognise one-word phrases, so that *foxes are multiplying* would contain the noun *foxes* acting as the head of the noun phrase *foxes*.

---

### object

An object is normally a noun, pronoun or noun phrase that comes straight after the verb, and shows what the verb is acting upon.

Objects can be turned into the subject of a passive verb, and cannot be adjectives (contrast with complements).

---

| dogs has the morphological make-up: dog + s. |
| unhelpfulness has the morphological make-up: unhelpful + ness |
| where unhelpful = un + helpful |
| and helpful = help + ful |

---

| Our dog bit the burglar on his behind! |
| My big brother did an amazing jump on his skateboard. |
| Actions speak louder than words. |
| Not nouns: He’s behind you! [this names a place, but is a preposition, not a noun] |
| She can jump so high! [this names an action, but is a verb, not a noun] |

| common, countable: a book, books, two chocolates, one day, fewer ideas |
| common, non-countable: money, some chocolate, less imagination |
| proper, countable: Marilyn, London, Wednesday |

---

| Adult foxes can jump. [adult modifies foxes, so adult belongs to the noun phrase] |
| Almost all healthy adult foxes in this area can jump. [all the other words help to modify foxes, so they all belong to the noun phrase] |

---

| Year 2 designed puppets. [noun acting as object] |
| I like that. [pronoun acting as object] |
| Some people suggested a pretty display. [noun phrase acting as object] |

Contrast:

| A display was suggested. [object of active verb becomes the subject of the passive verb] |
| Year 2 designed pretty. [incorrect, because adjectives cannot be objects] |
Verbs in English have two participles, called ‘present participle’ (e.g. walking, taking) and ‘past participle’ (e.g. walked, taken).

Unfortunately, these terms can be confusing to learners, because:

- they don’t necessarily have anything to do with present or past time
- although past participles are used as perfects (e.g. has eaten) they are also used as passives (e.g. was eaten).

He is walking to school. [present participle in a progressive]
He has taken the bus to school. [past participle in a perfect]
The photo was taken in the rain. [past participle in a passive]

The sentence It was eaten by our dog is the passive of Our dog ate it. A passive is recognisable from:
- the past participle form eaten
- the normal object (it) turned into the subject
- the normal subject (our dog) turned into an optional preposition phrase with by as its head
- the verb be(was), or some other verb such as get.

A verb is not ‘passive’ just because it has a passive meaning; it must be the passive version of an active verb.

Contrast active.
A visit was arranged by the school.
Our cat got run over by a bus.

Active versions: The school arranged a visit.
A bus ran over our cat.

Not passive: He received a warning. [past tense, active received]
We had an accident. [past tense, active had]

Verbs in the past tense are commonly used to:
- talk about the past
- talk about imagined situations
- make a request sound more polite.

Most verbs take a suffix –ed, to form their past tense, but many commonly-used verbs are irregular.

See also tense.

Tom and Chris showed me their new TV. [names an event in the past]

Antonio went on holiday to Brazil. [names an event in the past; irregular past of go]
I wish I had a puppy. [names an imagined situation, not a situation in the past]
I was hoping you’d help tomorrow. [makes an implied request sound more polite]

She has downloaded some songs. [present perfect; now she has some songs]
I had eaten lunch when you came. [past perfect; I wasn’t hungry when you came]
A phoneme is the smallest unit of sound that signals a distinct, contrasting meaning. For example:

- /t/ contrasts with /k/ to signal the difference between tap and cap.
- /l/ contrasts with /r/ to signal the difference between bought and ball.

It is this contrast in meaning that tells us there are two distinct phonemes at work.

There are around 44 phonemes in English; the exact number depends on regional accents. A single phoneme may be represented in writing by one, two, three or four letters constituting a single grapheme.

The word cat has three letters and three phonemes: /kæt/.
The word catch has five letters and three phonemes: /kaʧ/.
The word caught has six letters and three phonemes: /kɔ:t/.

A phrase is a group of words that are grammatically connected so that they stay together, and that expand a single word, called the ‘head’. The phrase is a noun phrase if its head is a noun, a preposition phrase if its head is a preposition, and so on; but if the head is a verb, the phrase is called a clause. Phrases can be made up of other phrases.

She waved to her mother. [A noun phrase, with the noun mother as its head]
She waved to her mother. [A preposition phrase, with the preposition to as its head]
She waved to her mother. [A clause, with the verb waved as its head]

A plural noun normally has a suffix –s or –es and means ‘more than one’.

There are a few nouns with different morphology in the plural (e.g. mice, formulae).

dogs [more than one dog]; boxes [more than one box]
mice [more than one mouse]

A possessive can be:

- a noun followed by an apostrophe, with or without s
- a possessive pronoun.

The relation expressed by a possessive goes well beyond ordinary ideas of ‘possession’. A possessive may act as a determiner.

Tariq’s book [Tariq has the book]
The boys’ arrival [the boys arrive]
His obituary [the obituary is about him]
That essay is mine. [I wrote the essay]

A prefix is added at the beginning of a word in order to turn it into another word.

Contrast suffix.

overtake, disappear

A preposition links a following noun, pronoun or noun phrase to some other word in the sentence. Prepositions often describe locations or directions, but can describe other things, such as relations of time.

Words like before or since can act either as prepositions or as conjunctions.

Tom waved goodbye to Christy. She’ll be back from Australia in two weeks.
I haven’t seen my dog since this morning.

Contrast: I’m going, since no-one wants me here! [conjunction: links two clauses]

<tr>
<td><strong>pronoun</strong></td>
<td>Pronouns are normally used like nouns, except that:</td>
<td><em>She waved to him.</em> <em>Amanda waved to Michael.</em></td>
</tr>
<tr>
<td></td>
<td>• they are grammatically more specialised</td>
<td></td>
</tr>
<tr>
<td></td>
<td>• it is harder to modify them</td>
<td></td>
</tr>
<tr>
<td></td>
<td>In the examples, each sentence is written twice: once with pronouns (underlined), and once with nouns. The colours show where the same thing is being talked about.</td>
<td></td>
</tr>
<tr>
<td><strong>punctuation</strong></td>
<td>Punctuation includes any conventional features of writing other than spelling and general layout: the standard punctuation marks . , ; : ? ! – ( ) “ ’ , and also word-spaces, capital letters, apostrophes, paragraph breaks and bullet points. One important role of punctuation is to indicate sentence boundaries.</td>
<td><em>&quot;I'm going out, Usha, and I won't be long,&quot; Mum said.</em></td>
</tr>
<tr>
<td>Received Pronunciation</td>
<td>Received Pronunciation (often abbreviated to RP) is an accent which is used only by a small minority of English speakers in England. It is not associated with any one region. Because of its regional neutrality, it is the accent which is generally shown in dictionaries in the UK (but not, of course, in the USA). RP has no special status in the national curriculum.</td>
<td><em>I regret to inform you that Mr Joseph Smith has passed away.</em> [formal letter] <em>Have you heard that Joe has died?</em> [casual speech] <em>Joe falls down and dies, centre stage.</em> [stage direction]</td>
</tr>
<tr>
<td>register</td>
<td>Classroom lessons, football commentaries and novels use different registers of the same language, recognised by differences of vocabulary and grammar. Registers are ‘varieties’ of a language which are each tied to a range of uses, in contrast with dialects, which are tied to groups of users.</td>
<td></td>
</tr>
</tbody>
</table>
### Relative Clause

A relative clause is a special type of subordinate clause that modifies a noun. It often does this by using a relative pronoun such as *who* or *that* to refer back to that noun, though the relative pronoun *that* is often omitted.

A relative clause may also be attached to a clause. In that case, the pronoun refers back to the whole clause, rather than referring back to a noun.

In the examples, the relative clauses are underlined, and the colour-coding pairs the pronouns with the words they refer back to.

That’s the **boy** who lives near school. [*who* refers back to *boy*]

The **prize** that I won was a book. [*that* refers back to *prize*]

The **prize** I won was a book. [*the pronoun *that* is omitted*]

Tom broke the game, **which** annoyed Ali. [*which* refers back to the whole clause]

### Root Word

Morphology breaks words down into root words, which can stand alone, and suffixes or prefixes which can’t. For example, *help* is the root word for other words in its word family such as *helpful* and *helpless*, and also for its inflections such as *helping*. Compound words (e.g. help-desk) contain two or more root words. When looking in a dictionary, we sometimes have to look for the root word (or words) of the word we are interested in.

- **played** [the root word is *play*]
- **unfair** [the root word is *fair*]
- **football** [the root words are *foot* and *ball*]

### Schwa

The name of a vowel sound that is found only in unstressed positions in English. It is the most common vowel sound in English.

It is written as /ə/ in the International Phonetic Alphabet. In the English writing system, it can be written in many different ways.

/əlɒŋ/ [along]

/bʌtə/ [butter]

/dɒktə/ [doctor]
A sentence is a group of words which are grammatically connected to each other but not to any words outside the sentence.

The form of a sentence’s main clause shows whether it is being used as a statement, a question, a command or an exclamation.

A sentence may consist of a single clause or it may contain several clauses held together by subordination or co-ordination. Classifying sentences as 'simple', 'complex' or 'compound' can be confusing, because a 'simple' sentence may be complicated, and a 'complex' one may be straightforward. The terms 'single-clause sentence' and 'multi-clause sentence' may be more helpful.

John went to his friend’s house. He stayed there till tea-time.

You are my friend. [statement]
Are you my friend? [question]
Be my friend! ['command']
What a good friend you are! [exclamation]

Ali went home on his bike to his goldfish and his current library book about pets. [single-clause sentence]
She went shopping but took back everything she had bought because she didn’t like any of it. [multi-clause sentence]

I did it because they were not willing to undertake any more work on those houses. [formal Standard English]
I did it cos they wouldn’t do any more work on those houses. [casual Standard English]
I done it cos they wouldn’t do no more work on them houses. [casual non-Standard English]

A syllable is stressed if it is pronounced more forcefully than the syllables next to it. The other syllables are unstressed.

A sentence is a group of words which are grammatically connected to each other but not to any words outside the sentence.

The form of a sentence’s main clause shows whether it is being used as a statement, a question, a command or an exclamation.

</thead>
<tbody>
<tr>
<td><strong>subjunctive</strong></td>
<td>In some languages, the inflections of a verb include a large range of special forms which are used typically in subordinate clauses, and are called 'subjunctives'. English has very few such forms and those it has tend to be used in rather formal styles.</td>
<td>The school requires that all pupils be honest. The school rules demand that pupils not enter the gym at lunchtime. If Zoé were the class president, things would be much better.</td>
</tr>
</tbody>
</table>
| **subordinate, subordination** | A subordinate word or phrase tells us more about the meaning of the word it is subordinate to. Subordination can be thought of as an unequal relationship between a subordinate word and a main word. For example:  
• an adjective is subordinate to the noun it modifies  
• subjects and objects are subordinate to their verbs. Subordination is much more common than the equal relationship of co-ordination. See also subordinate clause. | big dogs [big is subordinate to dogs]  
Big dogs need long walks. [big dogs and long walks are subordinate to need]  
We can watch TV when we’ve finished. [when we’ve finished is subordinate to watch] |
| **subordinate clause** | A clause which is subordinate to some other part of the same sentence is a subordinate clause; for example, in The apple that I ate was sour, the clause that I ate is subordinate to apple (which it modifies). Subordinate clauses contrast with co-ordinate clauses as in It was sour but looked very tasty. (Contrast: main clause) However, clauses that are directly quoted as direct speech are not subordinate clauses. | That’s the street where Ben lives. [relative clause; modifies street]  
He watched her as she disappeared. [adverbial; modifies watched]  
What you said was very nice. [acts as subject of was]  
She noticed an hour had passed. [acts as object of noticed]  
Not subordinate: He shouted, “Look out!” |
| **suffix** | A suffix is an 'ending', used at the end of one word to turn it into another word. Unlike root words, suffixes cannot stand on their own as a complete word. Contrast prefix. | call - called  
teach - teacher [turns a verb into a noun]  
terror - terrorise [turns a noun into a verb]  
green – greenish [leaves word class unchanged] |
| **syllable** | A syllable sounds like a beat in a word. Syllables consist of at least one vowel, and possibly one or more consonants. | Cat has one syllable.  
Fairy has two syllables.  
Hippopotamus has five syllables. |
| **synonym** | Two words are synonyms if they have the same meaning, or similar meanings. Contrast antonym. | talk - speak  
old - elderly |
**tense**

In English, tense is the choice between **present** and **past verbs**, which is special because it is signalled by inflections and normally indicates differences of time. In contrast, languages like French, Spanish and Italian, have three or more distinct tense forms, including a future tense. (See also: future.)

The simple tenses (present and past) may be combined in English with the **perfect** and **progressive**.

- *He* **studies**. [present tense – present time]
- *He studied yesterday*. [past tense – past time]
- *He *studies tomorrow, or else!* [present tense – future time]
- *He may study tomorrow*. [present tense + infinitive – future time]
- *He plans to study tomorrow*. [present tense + infinitive – future time]
- *If he studied tomorrow, he’d see the difference!* [past tense – imagined future]

Contrast three distinct tense forms in Spanish:
- *Estudia*. [present tense]
- *Estudió*. [past tense]
- *Estudiará*. [future tense]

---

**transitive verb**

A transitive verb takes at least one object in a sentence to complete its meaning, in contrast to an **intransitive verb**, which does not.

- *He loves Juliet.*
- *She understands English grammar.*

---

**trigraph**

A type of **grapheme** where three letters represent one **phoneme**.

- *High, pure, patch, hedge*

---

**unstressed**

See stressed.

---

**verb**

The surest way to identify verbs is by the ways they can be used: they can usually have a tense, either **present** or **past** (see also future).

Verbs are sometimes called ‘doing words’ because many verbs name an action that someone does; while this can be a way of recognising verbs, it doesn’t distinguish verbs from **nouns** (which can also name actions). Moreover many verbs name states or feelings rather than actions.

Verbs can be classified in various ways: for example, as auxiliary, or modal; as transitive or intransitive; and as states or events.

- *He lives in Birmingham*. [present tense]
- *The teacher wrote a song for the class*. [past tense]
- *He likes chocolate*. [present tense; not an action]
- *He knew my father*. [past tense; not an action]

Not verbs: *The walk to Halina’s house will take an hour*. [noun]

*All that **surfing** makes Morwenna so sleepy!* [noun]

---

**vowel**

A vowel is a speech sound which is produced without any closure or obstruction of the vocal tract.

Vowels can form **syllables** by themselves, or they may combine with **consonants**.

In the English writing system, the letters *a, e, i, o, u* and *y* can represent vowels.
| word | A word is a unit of grammar: it can be selected and moved around relatively independently, but cannot easily be split. In punctuation, words are normally separated by word spaces. Sometimes, a sequence that appears grammatically to be two words is collapsed into a single written word, indicated with a hyphen or apostrophe (e.g. well-built, he’s). | headteacher or head teacher [can be written with or without a space] primary-school teacher [normally written with a hyphen] I’m going out. 9.30 am |
| word class | Every word belongs to a word class which summarises the ways in which it can be used in grammar. The major word classes for English are: noun, verb, adjective, adverb, preposition, determiner, pronoun, conjunction. Word classes are sometimes called ‘parts of speech’. | teach - teacher extend – extent - extensive grammar – grammatical – grammarian |
| word family | The words in a word family are normally related to each other by a combination of morphology, grammar and meaning. |
Key stage 3

Subject content

Reading

Pupils should be taught to:

- develop an appreciation and love of reading, and read increasingly challenging material independently through:
  - reading a wide range of fiction and non-fiction, including in particular whole books, short stories, poems and plays with a wide coverage of genres, historical periods, forms and authors. The range will include high-quality works from:
    - English literature, both pre-1914 and contemporary, including prose, poetry and drama
    - Shakespeare (two plays)
    - seminal world literature
  - choosing and reading books independently for challenge, interest and enjoyment.
  - re-reading books encountered earlier to increase familiarity with them and provide a basis for making comparisons.

- understand increasingly challenging texts through:
  - learning new vocabulary, relating it explicitly to known vocabulary and understanding it with the help of context and dictionaries
  - making inferences and referring to evidence in the text
  - knowing the purpose, audience for and context of the writing and drawing on this knowledge to support comprehension
  - checking their understanding to make sure that what they have read makes sense.

- read critically through:
  - knowing how language, including figurative language, vocabulary choice, grammar, text structure and organisational features present meaning
  - recognising a range of poetic conventions and understanding how these have been used
  - studying setting, plot, and characterisation, and the effects of these
  - understanding how the work of dramatists is communicated effectively through performance and how alternative staging allows for different interpretations of a play
- making critical comparisons across texts
- studying a range of authors, including at least two authors in depth each year.

Writing

Pupils should be taught to:

- write accurately, fluently, effectively and at length for pleasure and information through:
  - writing for a wide range of purposes and audiences, including:
    - well-structured formal expository and narrative essays
    - stories, scripts, poetry and other imaginative writing
    - notes and polished scripts for talks and presentations
    - a range of other narrative and non-narrative texts, including arguments, personal and formal letters
  - summarising and organising material, and supporting ideas and arguments with any necessary factual detail
  - applying their growing knowledge of vocabulary, grammar and text structure to their writing and selecting the appropriate form
  - drawing on knowledge of literary and rhetorical devices from their reading and listening to enhance the impact of their writing.

- plan, draft, edit and proof-read through:
  - considering how their writing reflects the audiences and purposes for which it was intended
  - amending the vocabulary, grammar and structure of their writing to improve its coherence and overall effectiveness
  - paying attention to accurate grammar, punctuation and spelling; applying the spelling patterns and rules set out in Appendix 1 to the key stage 1 and 2 programmes of study.

Grammar and vocabulary

Pupils should be taught to:

- consolidate and build on their knowledge of grammar and vocabulary through:
  - extending and applying the grammatical knowledge set out in Appendix 1 to the key stage 1 and 2 programmes of study to analyse more challenging texts
• studying the effectiveness and impact of the grammatical features of the texts they read
• drawing on new vocabulary and grammatical constructions from their reading and listening, and using these consciously in their writing and speech to achieve particular effects
• knowing and understanding the differences between spoken and written language, including differences associated with formal and informal registers, and between Standard English and other varieties of English
• using Standard English confidently in their own writing and speech
• discussing reading, writing and spoken language with precise and confident use of linguistic and literary terminology.

**Spoken English**

Pupils should be taught to:

• speak confidently and effectively, including through:
  • using Standard English confidently in a range of formal and informal contexts, including classroom discussion
  • giving short speeches and presentations, expressing their own ideas and keeping to the point
  • participating in formal debates and structured discussions, summarising and/or building on what has been said
  • improvising, rehearsing and performing play scripts and poetry in order to discuss language use and meaning, using role, intonation, tone, volume, mood, silence, stillness and action to add impact.

---

6 Teachers should refer to the glossary that accompanies the programmes of study for English for their own information on the range of terms used within the programmes of study as a whole.
Mathematics

Purpose of study

Mathematics is a creative and highly inter-connected discipline that has been developed over centuries, providing the solution to some of history’s most intriguing problems. It is essential to everyday life, critical to science, technology and engineering, and necessary for financial literacy and most forms of employment. A high-quality mathematics education therefore provides a foundation for understanding the world, the ability to reason mathematically, an appreciation of the beauty and power of mathematics, and a sense of enjoyment and curiosity about the subject.

Aims

The national curriculum for mathematics aims to ensure that all pupils:

- become fluent in the fundamentals of mathematics, including through varied and frequent practice with increasingly complex problems over time, so that pupils have conceptual understanding and are able to recall and apply their knowledge rapidly and accurately to problems
- reason mathematically by following a line of enquiry, conjecturing relationships and generalisations, and developing an argument, justification or proof using mathematical language
- can solve problems by applying their mathematics to a variety of routine and non-routine problems with increasing sophistication, including breaking down problems into a series of simpler steps and persevering in seeking solutions.

Mathematics is an interconnected subject in which pupils need to be able to move fluently between representations of mathematical ideas. The programmes of study are, by necessity, organised into apparently distinct domains, but pupils should make rich connections across mathematical ideas to develop fluency, mathematical reasoning and competence in solving increasingly sophisticated problems. They should also apply their mathematical knowledge to science and other subjects.

The expectation is that the majority of pupils will move through the programmes of study at broadly the same pace. However, decisions about when to progress should always be based on the security of pupils’ understanding and their readiness to progress to the next stage. Pupils who grasp concepts rapidly should be challenged through being offered rich and sophisticated problems before any acceleration through new content. Those who are not sufficiently fluent with earlier material should consolidate their understanding, including through additional practice, before moving on.
Information and communication technology (ICT)

Calculators should not be used as a substitute for good written and mental arithmetic. They should therefore only be introduced near the end of key stage 2 to support pupils’ conceptual understanding and exploration of more complex number problems, if written and mental arithmetic are secure. In both primary and secondary schools, teachers should use their judgement about when ICT tools should be used.

Spoken language

The national curriculum for mathematics reflects the importance of spoken language in pupils’ development across the whole curriculum – cognitively, socially and linguistically. The quality and variety of language that pupils hear and speak are key factors in developing their mathematical vocabulary and presenting a mathematical justification, argument or proof. They must be assisted in making their thinking clear to themselves as well as others and teachers should ensure that pupils build secure foundations by using discussion to probe and remedy their misconceptions.

School curriculum

The programmes of study for mathematics are set out year-by-year for key stages 1 and 2. Schools are, however, only required to teach the relevant programme of study by the end of the key stage. Within each key stage, schools therefore have the flexibility to introduce content earlier or later than set out in the programme of study. In addition, schools can introduce key stage content during an earlier key stage, if appropriate. All schools are also required to set out their school curriculum for mathematics on a year-by-year basis and make this information available online.

Attainment targets

By the end of each key stage, pupils are expected to know, apply and understand the matters, skills and processes specified in the relevant programme of study.
Key stage 1

The principal focus of mathematics teaching in key stage 1 is to ensure that pupils develop confidence and mental fluency with whole numbers, counting and place value. This should involve working with numerals, words and the four operations, including with practical resources (e.g. concrete objects and measuring tools).

At this stage, pupils should develop their ability to recognise, describe, draw, compare and sort different shapes and use the related vocabulary. Teaching should also involve using a range of measures to describe and compare different quantities such as length, mass, capacity/volume, time and money.

By the end of year 2, pupils should know the number bonds to 20 and be precise in using and understanding place value. An emphasis on practice at this early stage will aid fluency.

Pupils should read and spell mathematical vocabulary, at a level consistent with their increasing word reading and spelling knowledge at key stage 1.

</tbody>
</table>
| - represent and use number bonds and related subtraction facts within 20  
- add and subtract one-digit and two-digit numbers to 20, including zero  
- solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as $7 = \square - 9$. | addition and subtraction as related operations.  
Pupils combine and increase numbers, counting forwards and backwards.  
They discuss and solve problems in familiar practical contexts, including using quantities. Problems should include the terms put together, add, altogether, total, take away, distance between, more than and less than, so that pupils develop the concept of addition and subtraction and are enabled to use these operations flexibly. |

**Multiplication and division**

Pupils should be taught to:  
- solve one-step problems involving multiplication and division, by calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher.

**Multiplication and division**

Through grouping and sharing small quantities, pupils begin to understand: multiplication and division; doubling numbers and quantities; and finding simple fractions of objects, numbers and quantities.  
They make connections between arrays, number patterns, and counting in twos, fives and tens.

**Fractions**

Pupils should be taught to:  
- recognise, find and name a half as one of two equal parts of an object, shape or quantity  
- recognise, find and name a quarter as one of four equal

**Fractions**

Pupils are taught half and quarter as ‘fractions of’ discrete and continuous quantities by solving problems using shapes, objects and quantities. For example, they could recognise and find half a length, quantity, set of objects or shape. Pupils connect halves and quarters to the equal sharing and grouping of sets of objects and to
### Year 1 programme of study (statutory requirements)

- parts of an object, shape or quantity.

### Notes and guidance (non-statutory)

- measures, as well as recognising and combining halves and quarters as parts of a whole.

### MEASUREMENT

**Pupils should be taught to:**

- compare, describe and solve practical problems for:
  - lengths and heights (e.g. long/short, longer/shorter, tall/short, double/half)
  - mass or weight (e.g. heavy/light, heavier than, lighter than)
  - capacity/volume (full/empty, more than, less than, quarter)
  - time (quicker, slower, earlier, later)
- measure and begin to record the following:
  - lengths and heights
  - mass/weight
  - capacity and volume
  - time (hours, minutes, seconds)
- recognise and know the value of different denominations of coins and notes
- sequence events in chronological order using language such as: before and after, next, first, today, yesterday, tomorrow, morning, afternoon and evening

### MEASUREMENT

- The pairs of terms: mass and weight, volume and capacity, are used interchangeably at this stage.

- Pupils move from using and comparing different types of quantities and measures using non-standard units, including discrete (e.g. counting) and continuous (e.g. liquid) measurement, to using manageable common standard units.

- In order to become familiar with standard measures, pupils begin to use measuring tools such as a ruler, weighing scales and containers.

- Pupils use the language of time, including telling the time throughout the day, first using o’clock and then half past.
### Year 1 programme of study (statutory requirements)

- recognise and use language relating to dates, including days of the week, weeks, months and years
- tell the time to the hour and half past the hour and draw the hands on a clock face to show these times.

### Notes and guidance (non-statutory)

#### GEOMETRY

**Properties of shapes**

Pupils should be taught to:

- recognise and name common 2-D and 3-D shapes, including:
  - 2-D shapes (e.g. rectangles (including squares), circles and triangles)
  - 3-D shapes (e.g. cuboids (including cubes), pyramids and spheres).

Pupils handle common 2-D and 3-D shapes, naming these and related everyday objects fluently. They recognise these shapes in different orientations and sizes, and know that rectangles, triangles, cuboids and pyramids can be different shapes.

#### Position and direction

Pupils should be taught to:

- describe position, directions and movements, including half, quarter and three-quarter turns.

They use the language of position, direction and motion, including: left and right, top, middle and bottom, on top of, in front of, above, between, around, near, close and far, up and down, forwards and backwards, inside and outside.

Pupils make half, quarter and three-quarter turns and routinely make these turns in a clockwise direction.
**Year 2**

<tr>
<td>▪ solve problems with addition and subtraction:</td>
<td></td>
</tr>
</tbody>
</table>
### Year 2 programme of study (statutory requirements)

- using concrete objects and pictorial representations, including those involving numbers, quantities and measures
- applying their increasing knowledge of mental and written methods
- recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100
- add and subtract numbers using concrete objects, pictorial representations, and mentally, including:
  - a two-digit number and ones
  - a two-digit number and tens
  - two two-digit numbers
  - adding three one-digit numbers
- show that addition of two numbers can be done in any order (commutative) and subtraction of one number from another cannot
- recognise and use the inverse relationship between addition and subtraction and use this to check calculations and missing number problems.

### Notes and Guidance (non-statutory)

Pupils practise addition and subtraction to 20 to become increasingly fluent in deriving facts such as using $3 + 7 = 10$, $10 - 7 = 3$ and $7 = 10 - 3$ to calculate $30 + 70 = 100$, $100 - 70 = 30$ and $70 = 100 - 30$. They check their calculations, including by adding to check subtraction and adding numbers in a different order to check addition (e.g. $5 + 2 + 1 = 1 + 5 + 2 = 1 + 2 + 5$). This establishes commutativity and associativity of addition.

Recording addition and subtraction in columns supports place value and prepares for formal written methods with larger numbers.

### Multiplication and division

Pupils should be taught to:

- recall and use multiplication and division facts for the 2, 5

### Multiplication and division

Pupils use a variety of language to describe multiplication and division.
<table>

</tbody>
</table>
Lower key stage 2

The principal focus of mathematics teaching in lower key stage 2 is to ensure that pupils become increasingly fluent with whole numbers and the four operations, including number facts and the concept of place value. This should ensure that pupils develop efficient written and mental methods and perform calculations accurately with increasingly large whole numbers.

At this stage, pupils should develop their ability to solve a range of problems, including with simple fractions and decimal place value. Teaching should also ensure that pupils draw with increasing accuracy and develop mathematical reasoning so they can analyse shapes and their properties, and confidently describe the relationships between them. It should ensure that they can use measuring instruments with accuracy and make connections between measure and number.

By the end of year 4, pupils should have memorised their multiplication tables up to and including the 12 multiplication table and show precision and fluency in their work.

Pupils should read and spell mathematical vocabulary correctly and confidently, using their growing word reading knowledge and their knowledge of spelling.

<td></td>
</tr>
</tbody>
</table>

### Multiplication and division

Pupils should be taught to:

- recall and use multiplication and division facts for the 3, 4 and 8 multiplication tables
- write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers times one-digit numbers, using mental and progressing to formal written methods
- solve problems, including missing number problems, involving multiplication and division, including integer scaling problems and correspondence problems in which \( n \) objects are connected to \( m \) objects.

### Multiplication and division

Pupils continue to practise their mental recall of multiplication tables when they are calculating mathematical statements in order to improve fluency. Through doubling, they connect the 2, 4 and 8 multiplication tables.

Pupils develop efficient mental methods, for example, using commutativity (e.g. \( 4 \times 12 \times 5 = 4 \times 5 \times 12 = 20 \times 12 = 240 \)) and multiplication and division facts (e.g. using \( 3 \times 2 = 6, 6 \div 3 = 2 \) and \( 2 = 6 \div 3 \)) to derive related facts (\( 30 \times 2 = 60, 60 \div 3 = 20 \) and \( 20 = 60 \div 3 \)).

Pupils develop reliable written methods for multiplication and division, starting with calculations of two-digit numbers by one-digit numbers and progressing to the formal written methods of short multiplication and division.

<td>Pupils continue to measure using the appropriate tools and units, progressing to using a wider range of measures, including comparing and using mixed units (e.g. 1 kg and 200g) and simple equivalents of mixed units (e.g. 5m = 500cm).</td>
</tr>
<tr>
<td>- measure, compare, add and subtract: lengths (m/cm/mm); mass (kg/g); volume/capacity (l/ml)</td>
<td>The comparison of measures should also include simple scaling by integers (e.g. a given quantity or measure is twice as long or five times as high) and this should connect to multiplication.</td>
</tr>
<tr>
<td>- measure the perimeter of simple 2-D shapes</td>
<td>Pupils continue to become fluent in recognising the value of coins, by adding and subtracting amounts, including mixed units, and giving change using manageable amounts. They record £ and p separately. The decimal recording of money is introduced formally in year 4.</td>
</tr>
<tr>
<td>- add and subtract amounts of money to give change, using both £ and p in practical contexts</td>
<td>Pupils use both analogue and digital 12-hour clocks and record their times. In this way they become fluent in and prepared for using digital 24-hour clocks in year 4.</td>
</tr>
<tr>
<td>- tell and write the time from an analogue clock, including using Roman numerals from I to XII, and 12-hour and 24-hour clocks</td>
<td></td>
</tr>
<tr>
<td>- estimate and read time with increasing accuracy to the nearest minute; record and compare time in terms of seconds, minutes, hours and o’clock; use vocabulary such as a.m./p.m., morning, afternoon, noon and midnight</td>
<td></td>
</tr>
<tr>
<td>- know the number of seconds in a minute and the number of days in each month, year and leap year</td>
<td></td>
</tr>
<tr>
<td>- compare durations of events, for example to calculate the time taken by particular events or tasks.</td>
<td></td>
</tr>
</tbody>
</table>
### Year 3 programme of study (statutory requirements)

#### GEOMETRY

**Properties of shapes**

Pupils should be taught to:

- draw 2-D shapes and make 3-D shapes using modelling materials; recognise 3-D shapes in different orientations and describe them
- recognise that angles are a property of shape or a description of a turn
- identify right angles, recognise that two right angles make a half-turn, three make three quarters of a turn and four a complete turn; identify whether angles are greater than or less than a right angle
- identify horizontal and vertical lines and pairs of perpendicular and parallel lines.

#### STATISTICS

Pupils should be taught to:

- interpret and present data using bar charts, pictograms and tables
- solve one-step and two-step questions such as ‘How many more?’ and ‘How many fewer?’ using information presented in scaled bar charts and pictograms and tables.

### Notes and guidance (non-statutory)

#### GEOMETRY

**Properties of shapes**

Pupils’ knowledge of the properties of shapes is extended at this stage to symmetrical and non-symmetrical polygons and polyhedra. Pupils extend their use of the properties of shapes. They should be able to describe the properties of 2-D and 3-D shapes using accurate language, including lengths of lines and acute and obtuse for angles greater or lesser than a right angle.

Pupils should draw and measure straight lines in centimetres.

#### STATISTICS

Pupils understand and use simple scales (e.g. 2, 5, 10 units per cm) in pictograms and bar charts with increasing accuracy.

They continue to interpret data presented in many contexts.
## Year 4

</tr>
</thead>
<tbody>
<tr>
<td><strong>NUMBER</strong></td>
<td><strong>NUMBER</strong></td>
</tr>
<tr>
<td><strong>Number and place value</strong></td>
<td><strong>Number and place value</strong></td>
</tr>
</tbody>
</table>

Pupils should be taught to
- count in multiples of 6, 7, 9, 25 and 1000
- find 1000 more or less than a given number
- count backwards through zero to include negative numbers
- recognise the place value of each digit in a four-digit number (thousands, hundreds, tens, and ones)
- order and compare numbers beyond 1000
- identify, represent and estimate numbers using different representations
- round any number to the nearest 10, 100 or 1000
- solve number and practical problems that involve all of the above and with increasingly large positive numbers
- read Roman numerals to 100 (I to C) and know that over time, the numeral system changed to include the concept of zero and place value.

Using a variety of representations, including measures, pupils become fluent in the order and place value of numbers beyond 1000, including counting in tens and hundreds, and maintaining fluency in other multiples through varied and frequent practice.

They begin to extend their knowledge of the number system to include the decimal numbers and fractions that they have met so far.

They connect estimation and rounding numbers to the use of measuring instruments.

Roman numerals should be put in their historical context so pupils understand that there have been different ways to write whole numbers and that the important concepts of zero and place value were introduced over a period of time.

<td></td>
</tr>
<tr>
<td>- recognise and write decimal equivalents to (\frac{1}{4}; \frac{1}{2}; \frac{3}{4})</td>
<td></td>
</tr>
</tbody>
</table>
### Year 4 programme of study (statutory requirements)

- find the effect of dividing a one- or two-digit number by 10 and 100, identifying the value of the digits in the answer as units, tenths and hundredths
- round decimals with one decimal place to the nearest whole number
- compare numbers with the same number of decimal places up to two decimal places
- solve simple measure and money problems involving fractions and decimals to two decimal places.

### Notes and guidance (non-statutory)

- increasingly complex problems beyond one whole.
- Pupils are taught throughout that decimals and fractions are different ways of expressing numbers and proportions.
- Pupils’ understanding of the number system and decimal place value is extended at this stage to tenths and then hundredths. This includes relating the decimal notation to division of whole number by 10 and later 100.
- They practise counting using simple fractions and decimal fractions, both forwards and backwards.
- Pupils learn decimal notation and the language associated with it, including in the context of measurements. They make comparisons and order decimal amounts and quantities that are expressed to the same number of decimal places. They should be able to represent numbers with one or two decimal places in several ways, such as on number lines.

### MEASUREMENT

**Pupils should be taught to:**

- **Convert between different units of measure** (e.g. kilometre to metre; hour to minute)
- **measure and calculate the perimeter of a rectilinear figure**

**MEASUREMENT**

- Pupils build on their understanding of place value and decimal notation to record metric measures, including money.
- They use multiplication to convert from larger to smaller units.
- Perimeter can be expressed algebraically as $2(a + b)$ where $a$ and

**GEOMETRY**

**Properties of shapes**

Pupils should be taught to:

- compare and classify geometric shapes, including quadrilaterals and triangles, based on their properties and sizes
- identify acute and obtuse angles and compare and order angles up to two right angles by size
- identify lines of symmetry in 2-D shapes presented in different orientations
- complete a simple symmetric figure with respect to a specific line of symmetry.

---

**GEOMETRY**

**Properties of shapes**

Pupils continue to classify shapes using geometrical properties, extending to classifying different triangles (e.g. isosceles, equilateral, scalene) and quadrilaterals (e.g. parallelogram, rhombus, trapezium).

Pupils compare and order angles in preparation for using a protractor and compare lengths and angles to decide if a polygon is regular or irregular.

Pupils draw symmetric patterns using a variety of media to become familiar with different orientations of lines of symmetry; and recognise line symmetry in a variety of diagrams, including where the line of symmetry does not dissect the reflected shape.

</tr>
</tbody>
</table>
Upper key stage 2

The principal focus of mathematics teaching in upper key stage 2 is to ensure that pupils extend their understanding of the number system and place value to include larger integers. This should develop the connections that pupils make between multiplication and division with fractions, decimals, percentages and ratio.

At this stage, pupils should develop their ability to solve a wider range of problems, including increasingly complex properties of numbers and arithmetic, and problems demanding efficient written and mental methods of calculation. With this foundation in arithmetic, pupils are introduced to the language of algebra as a means for solving a variety of problems. Teaching in geometry and measures should consolidate and extend knowledge developed in number. Teaching should also ensure that pupils classify shapes with increasingly complex geometric properties and that they learn the vocabulary they need to describe them.

By the end of year 6, pupils should be fluent in written methods for all four operations, including long multiplication and division, and in working with fractions, decimals and percentages.

Pupils should read, spell and pronounce mathematical vocabulary correctly.

</tr>
</tbody>
</table>

Pupils use multiplication and division as inverses to support the
### Year 5 programme of study (statutory requirements)

- Multiply and divide numbers mentally drawing upon known facts.
- Divide numbers up to 4 digits by a one-digit number using the formal written method of short division and interpret remainders appropriately for the context.
- Multiply and divide whole numbers and those involving decimals by 10, 100 and 1000.
- Recognise and use square numbers and cube numbers, and the notation for squared ($^2$) and cubed ($^3$).
- Solve problems involving addition, subtraction, multiplication and division and a combination of these, including understanding the meaning of the equals sign.
- Solve problems involving multiplication and division, including scaling by simple fractions and problems involving simple rates.

### Notes and guidance (non-statutory)

- Introduction of ratio in year 6, for example, by multiplying and dividing by powers of 10 in scale drawings or by multiplying and dividing by powers of 1000 in converting between units such as kilometres and metres.
- Distributivity can be expressed as $a(b + c) = ab + ac$ in preparation for using algebra.

### Fractions (including decimals and percentages)

**Pupils should be taught to:**

- Compare and order fractions whose denominators are all multiples of the same number.
- Identify, name and write equivalent fractions of a given fraction, represented visually, including tenths and hundredths.
- Recognise mixed numbers and improper fractions and

### Fractions (including decimals and percentages)

**Pupils should be taught throughout that percentages, decimals and fractions are different ways of expressing proportions.**

They extend their knowledge of fractions to thousandths and connect to decimals and measures.

Pupils connect equivalent fractions $> 1$ that simplify to integers with division and fractions $> 1$ to division with remainders, using the
### Year 5 programme of study (statutory requirements)

- Convert from one form to the other and write mathematical statements > 1 as a mixed number (e.g. \( \frac{2}{5} + \frac{4}{5} = \frac{6}{5} = 1\frac{1}{5} \))
- Add and subtract fractions with the same denominator and multiples of the same number
- Multiply proper fractions and mixed numbers by whole numbers, supported by materials and diagrams
- Read and write decimal numbers as fractions (e.g. 0.71 = \( \frac{71}{100} \))
- Recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents
- Round decimals with two decimal places to the nearest whole number and to one decimal place
- Read, write, order and compare numbers with up to three decimal places
- Solve problems involving number up to three decimal places
- Recognise the per cent symbol (%) and understand that per cent relates to “number of parts per hundred”, and write percentages as a fraction with denominator hundred, and as a decimal fraction
- Solve problems which require knowing percentage and decimal equivalents of \( \frac{1}{2}, \frac{1}{4}, \frac{1}{5}, \frac{2}{5}, \frac{4}{5} \) and those with a denominator of a multiple of 10 or 25.

### Notes and guidance (non-statutory)

- Number line and other models, and hence move from these to improper and mixed fractions.
- Pupils connect multiplication by a fraction to using fractions as operators (fractions of), and to division, building on work from previous years. This relates to scaling by simple fractions, including fractions > 1.
- Pupils practise adding and subtracting fractions to become fluent through a variety of increasingly complex problems. They extend their understanding of adding and subtracting fractions to calculations that exceed 1 as a mixed number.
- Pupils read and write proper fractions and mixed numbers accurately and continue to practise counting forwards and backwards in simple fractions.
- Pupils continue to develop their understanding of fractions as numbers, measures and operators by finding fractions of numbers and quantities, writing remainders as a fraction.
- Pupils extend counting from year 4, using decimals and fractions including bridging zero, for example on a number line.
- Pupils say, read and write decimal fractions and related tenths, hundredths and thousandths accurately and are confident in checking the reasonableness of their answers to problems.
- They mentally add and subtract tenths, and one-digit whole numbers.
### Year 5 programme of study (statutory requirements)

<table>
<thead>
<tr>
<th>Notes and guidance (non-statutory)</th>
</tr>
</thead>
<tbody>
<tr>
<td>numbers and tenths.</td>
</tr>
<tr>
<td>They practise adding and subtracting decimals, including a mix of whole numbers and decimals, decimals with different numbers of decimal places, and complements of 1 (e.g. 0.83 + 0.17 = 1).</td>
</tr>
<tr>
<td>Pupils should go beyond the measurement and money models of decimals, for example by solving puzzles involving decimals.</td>
</tr>
<tr>
<td>Pupils should make connections between percentages, fractions and decimals (e.g. 100% represents a whole quantity and 1% is 1/100, 50% is 50/100, 25% is 25/100) and relate this to finding ‘fractions of’. They recognise that percentages are proportions of quantities as well as operators on quantities.</td>
</tr>
</tbody>
</table>

#### MEASUREMENT

Pupils should be taught to:

- convert between different units of metric measure (e.g. kilometre and metre; centimetre and metre; centimetre and millimetre; gram and kilogram; litre and millilitre)
- understand and use equivalences between metric units and common imperial units such as inches, pounds and pints
- measure and calculate the perimeter of composite rectilinear shapes in centimetres and metres
- calculate and compare the area of squares and rectangles

#### MEASUREMENT

Pupils use their knowledge of place value and multiplication and division to convert between standard units.

Pupils calculate the perimeter of rectangles and related composite shapes, including using the relations of perimeter or area to find unknown lengths. Missing measures questions such as these can be expressed algebraically $4 + 2b = 20$ for a rectangle of sides 2 cm and b cm and perimeter of 20cm.

They calculate the area from scale drawings using given measurements.

### GEOMETRY

#### Properties of shapes

Pupils should be taught to:

- identify 3-D shapes, including cubes and other cuboids, from 2-D representations
- know angles are measured in degrees: estimate and compare acute, obtuse and reflex angles
- draw given angles, and measure them in degrees (°)
- identify:
  - angles at a point and one whole turn (total 360°)
  - angles at a point on a straight line and ½ a turn (total 180°)
  - other multiples of 90°

Pupils become accurate in drawing lines with a ruler to the nearest millimetre, and measuring with a protractor. They use conventional markings for parallel lines and right angles.

Pupils use the term diagonal and make conjectures about the angles formed by diagonals and sides, and other properties of quadrilaterals, for example using dynamic geometry ICT tools.

Pupils use angle sum facts and other properties to make deductions about missing angles and relate these to missing number problems.
<table>
<thead>

<th>Notes and guidance (non-statutory)</th>
</tr>
</thead>
</table>
| § use the properties of rectangles to deduce related facts and find missing lengths and angles  
  § distinguish between regular and irregular polygons based on reasoning about equal sides and angles. | Notes and guidance (non-statutory) |

**Position and direction**

Pupils should be taught to:

§ identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed.

**Position and direction**

Pupils recognise and use reflection and translation in a variety of diagrams, including continuing to use a 2-D grid and coordinates in the first quadrant. Reflection should be in lines that are parallel to the axes.

**STATISTICS**

Pupils should be taught to:

§ solve comparison, sum and difference problems using information presented in a line graph  
§ complete, read and interpret information in tables, including timetables.

**STATISTICS**

Pupils connect their work on coordinates and scales to their interpretation of time graphs.

They begin to decide which representations of data are most appropriate and why.

<tr>
<td>Use estimation to check answers to calculations and determine, in the context of a problem, levels of accuracy.</td>
<td></td>
</tr>
</tbody>
</table>

**Fractions (including decimals and percentages)**

Pupils should be taught to:

- Use common factors to simplify fractions; use common multiples to express fractions in the same denomination
- Compare and order fractions, including fractions >1
- Add and subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions
- Multiply simple pairs of proper fractions, writing the answer in its simplest form (e.g. \(\frac{1}{4} \times \frac{1}{2} = \frac{1}{8}\))

**Fractions (including decimals and percentages)**

Pupils should practise, use and understand the addition and subtraction of fractions with different denominators by identifying equivalent fractions with the same denominator. They should start with fractions where the denominator of one fraction is a multiple of the other (e.g. \(\frac{1}{2} + \frac{1}{6} = \frac{5}{6}\)) and progress to varied and increasingly complex problems.

Pupils should use a variety of images to support their understanding of multiplication with fractions. This follows earlier work about fractions as operators (fractions of), as numbers, and
<table>

</tr>
</thead>
<tbody>
<tr>
<td>▪ divide proper fractions by whole numbers (e.g. (\frac{1}{3} + 2 = \frac{7}{6}))</td>
<td>as equal parts of objects, for example as parts of a rectangle.</td>
</tr>
<tr>
<td>▪ associate a fraction with division and calculate decimal fraction equivalents (e.g. 0.375) for a simple fraction (e.g. (\frac{3}{8}))</td>
<td>Pupils use their understanding of the relationship between unit fractions and division to work backwards by multiplying a quantity that represents a unit fraction to find the whole quantity (e.g. if (\frac{1}{4}) of a length is 36cm, then the whole length is 36 \times 4 = 144cm).</td>
</tr>
<tr>
<td>▪ identify the value of each digit to three decimal places and multiply and divide numbers by 10, 100 and 1000 where the answers are up to three decimal places</td>
<td>They practise with simple fractions and decimal fraction equivalents to aid fluency, including listing equivalent fractions to identify fractions with common denominators.</td>
</tr>
<tr>
<td>▪ multiply one-digit numbers with up to two decimal places by whole numbers</td>
<td>Pupils can explore and make conjectures about converting a simple fraction to a decimal fraction (e.g. (\frac{3}{8} = 0.375)). For simple fractions with recurring decimal equivalents, pupils learn about rounding the decimal to three decimal places, or other appropriate approximations depending on the context. Pupils multiply and divide numbers with up to two decimal places by one-digit and two-digit whole numbers. Pupils multiply decimals by whole numbers, starting with the simplest cases, such as (0.4 \times 2 = 0.8), and in practical contexts, such as measures and money.</td>
</tr>
<tr>
<td>▪ use written division methods in cases where the answer has up to two decimal places</td>
<td>Pupils are introduced to the division of decimal numbers by one-digit whole numbers and, initially, in practical contexts involving measures and money. They recognise division calculations as the inverse of multiplication.</td>
</tr>
<tr>
<td>▪ solve problems which require answers to be rounded to specified degrees of accuracy</td>
<td>Pupils also develop their skills of rounding and estimating as a means of predicting and checking the order of magnitude of their</td>
</tr>
<tr>
<td>▪ recall and use equivalences between simple fractions, decimals and percentages, including in different contexts.</td>

</tr>
</tbody>
</table>

### RATIO AND PROPORTION

Pupils should be taught to:

- solve problems involving the relative sizes of two quantities where missing values can be found by using integer multiplication and division facts
- solve problems involving the calculation of percentages (e.g. of measures) such as 15% of 360 and the use of percentages for comparison
- solve problems involving similar shapes where the scale factor is known or can be found
- solve problems involving unequal sharing and grouping using knowledge of fractions and multiples.

### RATIO AND PROPORTION

Pupils recognise proportionality in contexts when the relations between quantities are in the same ratio (e.g. similar shapes, recipes).

Pupils link percentages or 360° to calculating angles of pie charts.

Pupils should consolidate their understanding of ratio when comparing quantities, sizes and scale drawings by solving a variety of problems. They might use the notation : to record their work.

Pupils solve problems involving unequal quantities e.g. 'for every egg you need three spoonfuls of flour', \( \frac{3}{5} \) of the class are boys. These problems are the foundation for later formal approaches to ratio and proportion.

### ALGEBRA

Pupils should be taught to:

- express missing number problems algebraically
- use simple formulae expressed in words

### ALGEBRA

Pupils should be introduced to the use of symbols and letters to represent variables and unknowns in mathematical situations that they already understand, such as:

- missing numbers, lengths, coordinates and angles
### Year 6 programme of study (statutory requirements)

- generate and describe linear number sequences
- find pairs of numbers that satisfy number sentences involving two unknowns
- enumerate all possibilities of combinations of two variables.

### Notes and guidance (non-statutory)

- formulae in mathematics and science
- arithmetical rules (e.g. \(a + b = b + a\))
- generalisations of number patterns
- number puzzles (e.g. what two numbers can add up to).

### MEASUREMENT

**Pupils should be taught to:**

- solve problems involving the calculation and conversion of units of measure, using decimal notation up to three decimal places where appropriate
- use, read, write and convert between standard units, converting measurements of length, mass, volume and time from a smaller unit of measure to a larger unit, and vice versa, using decimal notation up to three decimal places
- convert between miles and kilometres
- recognise that shapes with the same areas can have different perimeters and vice versa
- recognise when it is possible to use formulae for area and volume of shapes
- calculate the area of parallelograms and triangles
- calculate, estimate and compare volume of cubes and cuboids using standard units, including centimetre cubed (\(cm^3\)) and cubic metres (\(m^3\)), and extending to other units

### MEASUREMENT

- They connect conversion (e.g. from kilometres to miles) to a graphical representation as preparation for understanding linear/proportional graphs.
- They know approximate conversions and are able to tell if an answer is sensible.
- Using the number line, pupils use, add and subtract positive and negative integers for measures such as temperature.
- They relate the area of rectangles to parallelograms and triangles, e.g. by dissection, and calculate their areas, understanding and using the formulae to do this.
- Pupils could be introduced to compound units for speed, such as miles per hour, and apply their knowledge in science or other subjects as appropriate.
<table>

</tr>
</thead>
<tbody>
<tr>
<td>such as mm³ and km³.</td>
<td>GEOMETRY</td>
</tr>
</tbody>
</table>

### GEOMETRY

#### Properties of shapes

Pupils should be taught to:

- draw 2-D shapes using given dimensions and angles
- recognise, describe and build simple 3-D shapes, including making nets
- compare and classify geometric shapes based on their properties and sizes and find unknown angles in any triangles, quadrilaterals, and regular polygons
- illustrate and name parts of circles, including radius, diameter and circumference and know that the diameter is twice the radius
- recognise angles where they meet at a point, are on a straight line, or are vertically opposite, and find missing angles.

Pupils draw shapes and nets accurately, using measuring tools and conventional markings and labels for lines and angles.

Pupils describe the properties of shapes and explain how unknown angles and lengths can be derived from known measurements.

These relationships might be expressed algebraically e.g. \( d = 2 \times r \); \( a = 180 - (b + c) \).

#### Position and direction

Pupils should be taught to:

- describe positions on the full coordinate grid (all four quadrants)

Pupils draw and label a pair of axes in all four quadrants with equal scaling. This extends their knowledge of one quadrant to all four quadrants, including the use of negative numbers.
<table>
<thead>
<tr>
<th>Year 6 programme of study (statutory requirements)</th>
<th>Notes and guidance (non-statutory)</th>
</tr>
</thead>
<tbody>
<tr>
<td>- draw and translate simple shapes on the coordinate plane, and reflect them in the axes.</td>
<td>Pupils draw and label rectangles (including squares), parallelograms and rhombuses, specified by coordinates in the four quadrants, predicting missing coordinates using the properties of shapes. These might be expressed algebraically e.g. translating vertex ((a, b)) to ((a-2, b+3)); ((a, b)) and ((a+d, b+d)) being opposite vertices of a square.</td>
</tr>
</tbody>
</table>

**STATISTICS**

Pupils should be taught to:

- interpret and construct pie charts and line graphs and use these to solve problems
- calculate and interpret the mean as an average.

**STATISTICS**

Pupils connect their work on angles, fractions and percentages to the interpretation of pie charts.

Pupils both encounter and draw graphs relating two variables, arising from their own enquiry and in other subjects.

They should connect conversion from kilometres to miles in measurement to its graphical representation.

Pupils know when it is appropriate to find the mean of a data set.
Mathematics Appendix 1: Examples of formal written methods for multiplication and division

This appendix sets out some examples of formal written methods for all four operations to illustrate the range of methods that could be taught. It is not intended to be an exhaustive list, nor is it intended to show progression in formal written methods.

For multiplication, some pupils may include an addition symbol when adding partial products. For division, some pupils may include a subtraction symbol when subtracting multiples of the divisor.

Answer: 28.8
Key stage 3

Introduction

Through the mathematics content, pupils should be taught to:

Develop fluency

- consolidate their numerical and mathematical capability from key stage 2
- apply appropriate calculation strategies and degrees of accuracy to increasingly complex problems
- extend their understanding of the number system to include all fractions and surds
- calculate with fractions and surds as exact numbers
- use algebra to generalise arithmetic and to formulate mathematical relationships
- substitute values in expressions, rearrange and simplify expressions, and solve equations
- move fluently between different representations such as algebra, graphs and diagrams
- develop algebraic and graphical fluency and understand linear and quadratic functions
- interpret relations algebraically and graphically
- use language and properties precisely, such as with 2D and 3D shapes, algebraic expressions, probability and statistics

Reason mathematically

- extend their understanding of the number system, make connections between number relationships, and their algebraic and graphical representations
- extend and formalise their knowledge of ratio and proportion in working with measures and geometry, and in formulating proportional relations algebraically
- identify variables and express relations between them algebraically and graphically
- establish when to use additive, multiplicative or proportional reasoning from the underlying structure of a problem when working numerically
- begin to reason deductively in geometry
- develop reasoning in different areas of mathematics and begin to express their arguments formally.
Solve problems

- develop their mathematical knowledge, in part through solving problems and evaluating the outcomes
- develop their use of formal mathematical knowledge to solve and devise problems, including in financial mathematics
- begin to model situations mathematically and express the results using a range of formal mathematical representations
- apply elementary knowledge to multi-step and increasingly sophisticated problems
- select appropriate concepts, methods and techniques to apply to unfamiliar and non-routine problems.
Subject content

Number

Pupils should be taught to:

- use place value, including for decimals, measures and for any size of integers; the language of larger and smaller numbers; and ordering numbers, including the correct use of $=, \neq, <, >, \leq, \geq$
- use the four operations, including formal written methods, applied to integers, decimal fractions, simple fractions (proper and improper) and mixed numbers, all both positive and negative
- understand and use conventional notation for the priority of operations, including brackets, powers, roots and reciprocals
- understand the relation between operations and their inverses and identify the inverse of a given operation where this exists
- know and use integer powers and associated roots (square, cube and higher), including the use of surd notation (e.g. $\sqrt{8}$), and distinguish between exact representations of surds and their decimal approximations
- interpret and compare numbers in standard form $A \times 10^n$ $1 \leq A < 10$, where $n$ is a positive or negative integer
- compare, order and convert between fractions and decimals
- interpret percentages and percentage changes as a fraction or a decimal, and calculate these multiplicatively
- use mass, length, time, money and other measures, including with decimal quantities
- use a calculator and other technologies to calculate results accurately and then interpret them appropriately
- estimate number, measures and approximate answers, including using these to check other calculation methods
- round numbers and measures to an appropriate degree of accuracy (e.g. to a specified number of decimal places or significant figures), including simple error intervals, using standard interval and inequality notation $a \leq x \leq b$, and standard notation for open and closed intervals $x \in (a, b]$.
- use prime numbers, common factors and common multiples for whole numbers with two and three digits, including highest common factor and lowest common multiple, understanding these as the intersection and union of the prime factors, and other classifications of number, including product notation
- understand the infinite nature of the sets of integers, real and rational numbers
- interpret the number line as a model of the structure of the real number system, including such ideas as infinite divisibility.
Algebra: expressing relationships

Pupils should be taught to:

- read and interpret algebraic notation
- understand and use the concepts and vocabulary of terms, expressions and factors
- express known relations, including spatial generalisations, algebraically using accurate notation, including prioritisation of operations
- manipulate algebraic expressions to maintain equivalence, including expanding products of binomials, factorising by taking out a common factor, collecting like terms and simplifying expressions
- recognise an arithmetic progression, and find the nth term
- make and test conjectures about recursive and long-term behaviour of geometric and other sequences that arise within and outside mathematics
- recognise, sketch and produce graphs of linear and quadratic functions of one variable with appropriate scaling, using equations in x and y and the cartesian plane
- interpret mathematical relationships both algebraically and graphically.

Algebra: using equations and functions

Pupils should be taught to:

- use formulae by substitution to calculate the value of a variable, including for scientific formulae
- begin to model simple contextual and subject-based problems algebraically
- solve linear equations in one variable in a variety of contexts, including subject-based problems, using algebraic methods
- calculate and interpret gradients and intercepts of linear functions numerically, graphically and algebraically, using y=mx+c.
- use linear and quadratic graphs to estimate values of y for given values of x and vice versa and approximate solutions of simultaneous equations
- use given graphs of a variety of functions, including piece-wise linear, exponential and reciprocal graphs, to find approximate solutions to contextual problems.

Ratio, proportion and rates of change

Pupils should be taught to:

- use ratio and scale factor notation and methods involving conversion, mixing, measuring, scaling, comparing quantities and concentrations
• calculate missing quantities and totals using given ratios, including reduction to simplest form
• solve problems involving percentage change, including: percentage increase and decrease and original value problems, simple interest in financial mathematics and repeated growth
• use multiplicative reasoning where two quantities have a fixed product or fixed ratio including graphical, and algebraic representations
• use compound units such as speed, unit pricing and density to solve problems
• solve kinematic problems involving constant speed.

Geometry and measures

Pupils should be taught to:

• solve problems involving perimeter and area of triangles, circles and composite shapes; and cross-sectional areas, surface area and volume of cubes, cuboids, prisms, cylinders and composite solids
• use concrete and digital instruments to measure line segments and angles in geometric figures, including interpreting scale drawings
• describe, sketch and draw using conventional terms and notations: points; lines; parallel lines; perpendicular lines; right angles; regular polygons; reflectively and rotationally symmetric polygons; and irregular polygons
• derive and illustrate properties of triangles, quadrilaterals, circles, and other plane figures (e.g. equal lengths and angles) using appropriate language and technologies
• identify and construct congruent triangles, and construct similar shapes by enlargement, including on coordinate grids
• solve problems involving spatial properties on coordinate grids
• know and use angle relations in parallel lines to deduce unknown angles
• apply angle facts, triangle congruence, similarity and properties of named quadrilaterals to conjecture and derive results about angles and sides, using transformational, axiomatic and property-based deductive reasoning
• use Pythagoras’ Theorem and side ratios in similar triangles to solve problems in right-angled triangles
• identify properties of the faces, edges and vertices of: cubes, cuboids, prisms, cylinders, pyramids, cones and spheres
• interpret mathematical relationships both algebraically and geometrically.
**Probability**

Pupils should be taught to:

- record and describe the frequency of outcomes of simple probability experiments involving randomness, fairness, equally and unequally likely outcomes, using appropriate language and the 0-1 scale
- enumerate sets and combinations of sets systematically, using tables, grids and Venn diagrams
- generate theoretical sample spaces for single and combined events with equally likely, mutually exclusive outcomes; use these to calculate theoretical probabilities; and know that the probabilities of an exhaustive set of mutually exclusive outcomes sum to one.

**Statistics**

Pupils should be taught to:

- describe and compare univariate empirical distributions through: appropriate graphical representation involving discrete, continuous and grouped data; and appropriate measures of central tendency and spread
- describe simple mathematical relationships between two variables in observational and experimental contexts.
Science

Purpose of study

A high-quality science education provides the foundations for understanding the world through the specific disciplines of biology, chemistry and physics. Science has changed our lives and is vital to the world’s future prosperity, and all pupils should be taught essential aspects of the knowledge, methods, processes and uses of science. Through building up a body of key foundational knowledge and concepts, pupils should be encouraged to recognise the power of rational explanation and develop a sense of excitement and curiosity about natural phenomena. They should be encouraged to understand how science can be used to explain what is occurring, predict how things will behave, and analyse causes.

Aims

The national curriculum for science aims to ensure that all pupils:

- develop scientific knowledge and conceptual understanding through the specific disciplines of biology, chemistry and physics
- develop understanding of the nature, processes and methods of science through different types of science enquiries that help them to answer scientific questions about the world around them
- are equipped with the scientific knowledge required to understand the uses and implications of science, today and for the future.

Scientific knowledge and conceptual understanding

The programmes of study describe a sequence of knowledge and concepts. While it is important that pupils make progress, it is also vitally important that they develop secure understanding of each key block of knowledge and concepts in order to progress to the next stage. Insecure, superficial understanding will not allow genuine progression: pupils may struggle at key points of transition (such as between primary and secondary school), build up serious misconceptions, and/or have significant difficulties in understanding higher-order content.

Pupils should be able to describe associated processes and key characteristics in common language, but they should also be familiar with, and use, technical terminology accurately and precisely. They should build up an extended specialist vocabulary. They should also apply their mathematical knowledge to their understanding of science, including collecting, presenting and analysing data. The social and economic implications of science are important but, generally, they are taught most appropriately within the wider school curriculum: teachers will wish to use different contexts to maximise their pupils’ engagement with and motivation to study science.
The nature, processes and methods of science

‘Working scientifically’ specifies the understanding of the nature, processes and methods of science for each year group. It should not be taught as a separate strand. The notes and guidance give examples of how ‘working scientifically’ might be embedded within the content of biology, chemistry and physics, focusing on the key features of scientific enquiry, so that pupils learn to use a variety of approaches to answer relevant scientific questions. These types of scientific enquiry should include: observing over time; pattern seeking; identifying, classifying and grouping; comparative and fair testing (controlled investigations); and researching using secondary sources. Pupils should seek answers to questions through collecting, analysing and presenting data. ‘Working scientifically’ will be developed further at key stages 3 and 4, once pupils have built up sufficient understanding of science to engage meaningfully in more sophisticated discussion of experimental design and control.

Spoken language

The national curriculum for science reflects the importance of spoken language in pupils’ development across the whole curriculum – cognitively, socially and linguistically. The quality and variety of language that pupils hear and speak are key factors in developing their scientific vocabulary and articulating scientific concepts clearly and precisely. They must be assisted in making their thinking clear, both to themselves and others, and teachers should ensure that pupils build secure foundations by using discussion to probe and remedy their misconceptions.

School curriculum

The programmes of study for science are set out year-by-year for key stages 1 and 2. Schools are, however, only required to teach the relevant programme of study by the end of the key stage. Within each key stage, schools therefore have the flexibility to introduce content earlier or later than set out in the programme of study. In addition, schools can introduce key stage content during an earlier key stage if appropriate. All schools are also required to set out their school curriculum for science on a year-by-year basis and make this information available online.

Attainment targets

By the end of each key stage, pupils are expected to know, apply and understand the matters, skills and processes specified in the relevant programme of study.
Key stage 1

The principal focus of science teaching in key stage 1 is to enable pupils to experience and observe phenomena, looking more closely at the natural and humanly-constructed world around them. They should be encouraged to be curious and ask questions about what they notice. They should be helped to develop their understanding of scientific ideas by using different types of scientific enquiry to answer their own questions, including observing changes over a period of time, noticing patterns, grouping and classifying things, carrying out simple comparative tests, and finding things out using secondary sources of information. They should begin to use simple scientific language to talk about what they have found out and communicate their ideas to a range of audiences in a variety of ways. Most of the learning about science should be done through the use of first-hand practical experiences, but there should also be some use of appropriate secondary sources, such as books, photographs and videos.

‘Working scientifically’ is described separately in the programme of study, but must always be taught through and clearly related to the teaching of substantive science content in the programme of study. Throughout the notes and guidance, examples show how scientific methods and skills might be linked to specific elements of the content.

Pupils should read and spell scientific vocabulary at a level consistent with their increasing word reading and spelling knowledge at key stage 1.

### Light

Pupils should be taught to:

- observe and name a variety of sources of light, including electric lights, flames and the Sun
- associate shadows with a light source being blocked by something.

### Notes and guidance (non-statutory)

Pupils should explore materials to raise questions that will help them to understand the differences between materials that are transparent, translucent and opaque (though these words do not need to be used at this stage). They should observe shadows being formed in everyday contexts, such as when they play outside or shine torches indoors.

**Note:** Pupils should be warned that it is not safe to look directly at the Sun, even when wearing dark glasses.

Pupils might work scientifically by exploring shiny things and grouping them according to whether they shine in the dark or not.
<table>

</thead>
<tbody>
<tr>
<td><strong>All living things and their habitats</strong></td>
<td><strong>All living things and their habitats</strong></td>
</tr>
<tr>
<td>Pupils should be taught to:</td>
<td>Pupils should be introduced to the idea that all living things have certain characteristics that are essential for keeping them alive and healthy. They should raise and answer questions that help them to become familiar with the life processes that are common to all living things. Pupils should be introduced to the terms ‘habitat’ (a natural environment or home of a variety of plants and animals) and ‘micro-habitat’ (a very small habitat, for example for woodlice under stones, logs or leaf litter). They should raise and answer questions about the local environment that help them to identify and study a variety of plants and animals within their habitat and observe how living things depend on each other, for example plants serving as a source of food and shelter for animals. Pupils should compare animals in familiar habitats with animals found in less familiar habitats, for example, on the seashore, in woodland, in the ocean, in the rainforest.</td>
</tr>
<tr>
<td>- explore and compare the differences between things that are living, dead, and things that have never been alive</td>
<td></td>
</tr>
<tr>
<td>- identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other</td>
<td></td>
</tr>
<tr>
<td>- identify and name a variety of plants and animals in their habitats, including micro-habitats</td>
<td></td>
</tr>
<tr>
<td>- describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food.</td>
<td></td>
</tr>
</tbody>
</table>

Pupils might work scientifically by: sorting and classifying things according to whether they are living, dead or were never alive, and recording their findings using charts. They should describe how they decided where to place things, exploring questions such as: ‘Is a flame alive? Is a deciduous tree dead in winter?’ and talk about ways of answering their questions. They could construct a simple food chain that includes humans (e.g. grass, cow, human);
### Year 2 programme of study (statutory requirements)

#### Plants

Pupils should be taught to:

- observe and describe how seeds and bulbs grow into mature plants
- find out and describe how plants need water, light and a suitable temperature to grow and stay healthy.

#### Animals, including humans

Pupils should be taught to:

- notice that animals, including humans, have offspring which

### Notes and guidance (non-statutory)

- describing the conditions in different habitats and micro-habitats (under log, on stony path, under bushes); finding out how the conditions affect the number and type(s) of plants and animals that live there.

### Plants

Pupils should use the local environment throughout the year to observe how plants grow (including seeds, bulbs, fruit and vegetables, deciduous and evergreen bushes and trees). Pupils should be introduced to the requirements of plants for growth and survival, as well as the process of reproduction and growth in plants.

**Note:** Seeds and bulbs need water to grow but do not need light; seeds and bulbs have a store of food inside them.

Pupils might work scientifically by: observing and recording, with some accuracy, the growth of a variety of plants as they change over time from a seed or bulb, or observing similar plants at different stages of growth; setting up a comparative test to show that plants need light and water to stay healthy.

### Animals, including humans

Pupils should be introduced to the basic needs of animals for survival, as well as the importance of exercise and nutrition for
<table>

<tr>
<th>Sound</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pupils should be taught to:</td>
</tr>
<tr>
<td>- observe and name a variety of sources of sound, noticing that we hear with our ears</td>
</tr>
<tr>
<td>- recognise that sounds get fainter as the distance from the sound source increases.</td>
</tr>
<tr>
<td>Linked with work in music, pupils should explore various ways of making sounds, for example using a range of musical instruments to make louder and softer and higher and lower sounds.</td>
</tr>
<tr>
<td>Pupils might work scientifically by: comparing different sound sources and looking for patterns; carrying out tests to find the best places to locate fire bells in school.</td>
</tr>
</tbody>
</table>
Lower key stage 2 – years 3-4

The principal focus of science teaching in lower key stage 2 is to enable pupils to broaden their scientific view of the world around them. They should do this through exploring, talking about, testing and developing ideas about everyday phenomena and the relationships between living things and familiar environments, and by beginning to develop their ideas about functions, relationships and interactions. They should ask their own questions about what they observe and make some decisions about which types of scientific enquiry are likely to be the best ways of answering them, including observing changes over time, noticing patterns, grouping and classifying things, carrying out simple comparative and fair tests and finding things out using secondary sources of information. They should draw simple conclusions and use some scientific language, first, to talk about and, later, to write about what they have found out.

‘Working scientifically’ is described separately at the beginning of the programme of study, but must always be taught through and clearly related to substantive science content in the programme of study. Throughout the notes and guidance, examples show how scientific methods and skills might be linked to specific elements of the content.

Pupils should read and spell scientific vocabulary correctly and with confidence, using their growing word reading and spelling knowledge.
## Working scientifically

### Lower key stage 2 programme of study (statutory requirements)

#### Working scientifically

During years 3 and 4, pupils should be taught to use the following practical scientific methods, processes and skills through the teaching of the programme of study content:

- asking relevant questions and using different types of scientific enquiries to answer them
- setting up simple practical enquiries, comparative and fair tests
- making systematic and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers
- gathering, recording, classifying and presenting data in a variety of ways to help in answering questions
- recording findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables
- reporting on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions
- using results to draw simple conclusions, make predictions for new values, suggest improvements and

### Notes and guidance (non-statutory)

#### Working scientifically

Pupils in years 3 and 4 should be given a range of scientific experiences to enable them to raise their own questions about the world around them. They should start to make their own decisions about the most appropriate type of scientific enquiry they might use to answer questions; recognise when a simple fair test is necessary and help to decide how to set it up; talk about criteria for grouping, sorting and classifying; and use simple keys. They should begin to look for patterns and decide what data to collect to identify them. They should help to make decisions about what observations to make, how long to make them for and the type of simple equipment that might be used. They should learn how to use new equipment, such as data loggers, appropriately. They should collect data from their own observations and measurements, using notes, simple tables and standard units, and help to make decisions about how to record and analyse this data. With help, pupils should look for changes, patterns, similarities and differences in their data in order to draw simple conclusions and answer questions. With support, they should identify new questions arising from the data, making predictions for new values within or beyond the data they have collected and finding ways of improving what they have already done. They should also recognise when and how
raise further questions
- identifying differences, similarities or changes related to simple scientific ideas and processes
- using straightforward scientific evidence to answer questions or to support their findings.

sources might help them to answer questions that cannot be answered through practical investigations. Pupils should use relevant scientific language to discuss their ideas and communicate their findings in ways that are appropriate for different audiences.

These opportunities for working scientifically should be provided across years 3 and 4 so that the expectations in the programme of study can be met by the end of year 4. Pupils are not expected to cover each aspect for every area of study.
### Year 3

<tr>
<td>living things whose fossils are found in sedimentary rock and explore how fossils are formed. Pupils could explore different soils and identify similarities and differences between them and investigate what happens when rocks are rubbed together. They can raise and answer questions about the way soils are formed.</td>
<td></td>
</tr>
</tbody>
</table>

**Light**

Pupils should be taught to:

- notice that light is reflected from surfaces
- find patterns that determine the size of shadows.

**Light**

Pupils should explore what happens when light reflects off a mirror or other reflective surfaces, including playing mirror games to help them to answer questions about how light behaves.

**Note:** Pupils should be warned that it is not safe to look directly at the Sun, even when wearing dark glasses.

Pupils might work scientifically by: looking for patterns in what happens to shadows when the light source moves or the distance between the light source and the object changes.

<td></td>
</tr>
</tbody>
</table>
### Year 4

#### Year 4 programme of study (statutory requirements)

**All living things**

Pupils should be taught to:

- identify and name a variety of living things (plants and animals) in the local and wider environment, using classification keys to assign them to groups
- recognise that environments can change and that this can sometimes pose dangers to living things.

#### Notes and guidance (non-statutory)

**All living things**

Pupils should use the local environment throughout the year to raise and answer questions that help them to identify and study plants and animals in their habitat; and how the habitat changes throughout the year. Pupils should begin to put vertebrate animals into groups such as fish, amphibians, reptiles, birds, and mammals; and invertebrates into snails and slugs, worms, spiders, and insects.

**Note:** Plants are more difficult to classify, but can be grouped into categories such as flowering plants (including grasses) and non-flowering plants such as ferns and mosses.

Pupils should explore examples of human impact (both positive and negative) on environments such as the positive effects of nature reserves, ecologically planned parks, or garden ponds, and the negative effects of population and development, litter or deforestation.

Pupils might work scientifically by: exploring local small invertebrates and using guides or keys to identify them; making a guide to local living things; raising and answering questions based on their observations of animals and what they have found out about other animals that they have researched.
### Year 4 programme of study (statutory requirements)

#### Animals, including humans

Pupils should be taught to:

- describe the simple functions of the basic parts of the digestive system in humans
- identify the different types of teeth in humans and their simple functions
- construct and interpret a variety of food chains, identifying producers, predators and prey.

### Notes and guidance (non-statutory)

#### Animals, including humans

Pupils should be introduced to the main body parts associated with the digestive system, such as mouth, tongue, teeth, oesophagus, stomach and intestine and explore questions that help them to understand their special functions.

Pupils might work scientifically by: comparing the teeth of carnivores and herbivores, and suggesting reasons for differences; finding out what damages teeth and how to look after them. They might draw and discuss their ideas about the digestive system and compare them with models or images.

#### States of matter

Pupils should be taught to:

- compare and group materials together, according to whether they are solids, liquids or gases
- observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees Celsius (°C)
- identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature.

### States of matter

Pupils should explore a variety of everyday materials and develop simple descriptions of the states of matter (solids hold their shape; liquids form a pool not a pile; gases escape from an unsealed container). Pupils should observe water as a solid, a liquid and a gas and should note the changes to water when it is heated or cooled.

**Note:** Teachers should avoid using materials where heating is associated with chemical change, for example, through baking or burning.

Pupils might work scientifically by: grouping and classifying a
<table>
<thead>
<tr>
<th>Year 4 programme of study (statutory requirements)</th>
<th>Notes and guidance (non-statutory)</th>
</tr>
</thead>
<tbody>
<tr>
<td>variety of different materials; exploring the effect of temperature on substances such as chocolate, butter, cream (for example, to make food such as chocolate crispy cakes and ice-cream for a party). They could research the temperature at which materials change state, such as when iron melts or when oxygen condenses, using and applying what they have learnt in mathematics. They might observe and record evaporation over a period of time, such as a puddle in the playground or washing on a line, and investigate the effect of temperature on washing drying or snowmen melting.</td>
<td></td>
</tr>
</tbody>
</table>

### Sound

Pupils should be taught to:

- identify how sounds are made, associating some of them with something vibrating
- find patterns between the pitch of a sound and features of the object that produced it
- find patterns between the volume of a sound and the strength of the vibrations that produced it.

Pupils should explore and identify the way sound is made through vibration in a range of different musical instruments from around the world; and find out how the pitch and volume of sounds can be changed in a variety of ways.

Pupils might work scientifically by: finding patterns in the data (for example, blowing across the top of bottles, changing the length and thickness of elastic bands). They might make earmuffs from a variety of different materials to investigate which provides the best insulation against sound. They could make and play their own instruments by using what they have found out about pitch and volume.
### Year 4 programme of study (statutory requirements)

<table>
<thead>
<tr>
<th>Electricity</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pupils should be taught to:</td>
</tr>
<tr>
<td>- identify common appliances that run on electricity</td>
</tr>
<tr>
<td>- construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers</td>
</tr>
<tr>
<td>- identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery</td>
</tr>
<tr>
<td>- recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit</td>
</tr>
<tr>
<td>- recognise some common conductors and insulators, and associate metals with being good conductors.</td>
</tr>
</tbody>
</table>

### Notes and guidance (non-statutory)

<table>
<thead>
<tr>
<th>Electricity</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pupils should construct simple series circuits, trying different components, such as bulbs, buzzers and motors, and including switches, and use their circuits to create simple devices. Pupils should draw the circuit as a pictorial representation, not necessarily using conventional circuit symbols at this stage; these will be introduced in year 6.</td>
</tr>
<tr>
<td><strong>Note:</strong> Pupils might use the terms current and voltage, but these should not be introduced or defined formally at this stage. Pupils should be taught about precautions for working safely with electricity.</td>
</tr>
<tr>
<td>Pupils might work scientifically by: observing patterns, for example that bulbs get brighter if more cells are added, that metals tend to be conductors of electricity, and that some materials can and some cannot be used to connect across a gap in a circuit.</td>

</table>
Upper key stage 2 – years 5-6

The principal focus of science teaching in upper key stage 2 is to enable pupils to develop a deeper understanding of a wide range of scientific ideas. They should do this through exploring and talking about their ideas; asking their own questions about scientific phenomena; and analysing functions, relationships and interactions more systematically. At upper key stage 2, they should encounter more abstract ideas and begin to recognise how these ideas help them to understand and predict how the world operates. They should also begin to recognise that scientific ideas change and develop over time. They should select the most appropriate ways to answer science questions using different types of scientific enquiry, including observing changes over different periods of time, noticing patterns, grouping and classifying things, carrying out comparative and fair tests and finding things out using a wide range of secondary sources of information. Pupils should draw conclusions based on their data and observations, use evidence to justify their ideas, and use their scientific knowledge and understanding to explain their findings.

‘Working and thinking scientifically’ is described separately at the beginning of the programme of study, but must always be taught through and clearly related to substantive science content in the programme of study. Throughout the notes and guidance, examples show how scientific methods and skills might be linked to specific elements of the content.

Pupils should read, spell and pronounce scientific vocabulary correctly.
### Working scientificaly

#### Upper key stage 2 programme of study (statutory requirements)

**Working scientifically**

During years 5 and 6, pupils should be taught to use the following practical scientific methods, processes and skills through the teaching of the programme of study content:

- planning different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary
- taking measurements, using a range of scientific equipment, with increasing accuracy and precision
- recording data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, and bar and line graphs
- using test results to make predictions to set up further comparative and fair tests
- using simple models to describe scientific ideas
- reporting and presenting findings from enquiries, including conclusions, causal relationships and explanations of results, in oral and written forms such as displays and other presentations
- identifying scientific evidence that has been used to support

#### Notes and guidance (non-statutory)

**Working scientifically**

Pupils in years 5 and 6 should use their science experiences to:

- explore ideas and raise different kinds of questions; select and plan the most appropriate type of scientific enquiry to use to answer scientific questions; recognise when and how to set up comparative and fair tests and explain which variables need to be controlled and why. They should use and develop keys and other information records to identify, classify and describe living things and materials, and identify patterns that might be found in the natural environment. They should make their own decisions about what observations to make, what measurements to use and how long to make them for; choose the most appropriate equipment to make measurements and explain how to use it accurately. They should decide how to record data from a choice of familiar approaches; look for different causal relationships in their data and identify evidence that refutes or supports their ideas. They should use their results to identify when further tests and observations might be needed; recognise which secondary sources will be most useful to research their ideas and begin to separate opinion from fact. They should use relevant scientific language and illustrations to discuss, communicate and justify their scientific ideas and should talk about how scientific ideas have developed over time.
or refute ideas or arguments.

| These opportunities for working scientifically should be provided across years 5 and 6 so that the expectations in the programme of study can be met by the end of year 6. Pupils are not expected to cover each aspect for every area of study. |  |
### Year 5

<tr>
<td>Pupils should be taught to:</td>
<td>Pupils should study and raise questions about their local environment throughout the year. They should observe life-cycle changes in a variety of living things, for example plants in the vegetable garden or flower border, and animals in the local environment. They should find out about the work of naturalists and animal behaviourists such as David Attenborough and Jane Goodall.</td>
</tr>
<tr>
<td>▪ explain the differences in the life cycles of a mammal, an amphibian, an insect and a bird</td>
<td>Pupils should find out about different types of reproduction, including sexual and asexual reproduction in plants, and sexual reproduction in animals.</td>
</tr>
<tr>
<td>▪ describe the life process of reproduction in some plants and animals.</td>
<td>Pupils might work scientifically by: observing and comparing the life cycles of plants and animals in their local environment with other plants and animals around the world (in the rainforest, in the oceans, in desert areas and in prehistoric times), asking pertinent questions and suggesting reasons for similarities and differences. They might try to grow new plants from different parts of the parent plant, for example seeds, stem and root cuttings, tubers, bulbs. They might observe changes in an animal over a period of time (for example, by hatching and rearing chicks), comparing how different animals reproduce and grow.</td>
</tr>

<td><strong>Animals, including humans</strong></td>
</tr>
<tr>
<td>Pupils should be taught to:</td>
<td>Pupils should draw a timeline to indicate stages in the growth and development of humans. They should learn about the changes experienced in puberty.</td>
</tr>
<tr>
<td>- describe the changes as humans develop from birth to old age.</td>
<td>Pupils could work scientifically by comparing data about the gestation periods of humans and other animals or by finding out and recording the length and mass of a baby as it grows.</td>
</tr>
<tr>
<td><strong>Properties and changes of materials</strong></td>
<td><strong>Properties and changes of materials</strong></td>
</tr>
<tr>
<td>Pupils should be taught to:</td>
<td>Pupils should build a more systematic understanding of materials by exploring and comparing the properties of a broad range of materials, including relating these to what they learnt about magnetism in year 3 and about electricity in year 4. They should explore reversible changes, including, evaporating, filtering, sieving, melting and dissolving, recognising that melting and dissolving are different processes. Pupils should explore changes that are difficult to reverse, such as burning, rusting and other reactions, for example vinegar with bicarbonate of soda. They should find out about how chemists create new materials, for example Spencer Silver, who invented the glue for sticky notes or Ruth Benerito, who invented wrinkle-free cotton.</td>
</tr>
<tr>
<td>- compare and group together everyday materials based on evidence from comparative and fair tests, including their hardness, solubility, transparency, conductivity (electrical and thermal), and response to magnets</td>
<td>Note: Pupils are not required to make quantitative measurements about conductivity and insulation at this stage. It is sufficient for</td>
</tr>
<tr>
<td>- understand that some materials will dissolve in liquid to form a solution, and describe how to recover a substance from a solution</td>
<td></td>
</tr>
<tr>
<td>- use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating</td>
<td></td>
</tr>
<tr>
<td>- give reasons, based on evidence from comparative and fair tests, for the particular uses of everyday materials, including</td>

<td>-----------------------------------</td>
</tr>
<tr>
<td>Note: Pupils should be warned that it is not safe to look directly at the Sun, even when wearing dark glasses.</td>
<td></td>
</tr>
<tr>
<td>Pupils should find out about the way that ideas about the solar system have developed, understanding how the geocentric model of the solar system gave way to the heliocentric model by considering the work of scientists such as Ptolemy, Alhazen and Copernicus.</td>
<td></td>
</tr>
<tr>
<td>Pupils might work scientifically by: comparing the time of day at different places on the Earth through internet links and direct communication; creating simple models of the solar system; constructing simple shadow clocks and sundials, calibrated to show midday and the start and end of the school day; finding out why some people think that structures such as Stonehenge might have been used as astronomical clocks.</td>
<td></td>
</tr>
</tbody>
</table>

**Forces**

Pupils should be taught to:

- explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object
- identify the effects of air resistance, water resistance and friction, that act between moving surfaces
- understand that force and motion can be transferred through

**Forces**

Pupils should explore falling objects and raise questions about the effects of air resistance. They should experience forces that make things begin to move, get faster or slow down. Pupils should explore the effects of friction on movement and find out how it slows or stops moving objects, for example by observing the effects of a brake on a bicycle wheel. They should explore the effects of air resistance by observing how different objects such as parachutes and sycamore seeds fall. Pupils should explore the effects of

</table>
| Pupils should be taught to:                        | Pupils should build on their learning about grouping living things in year 4 by looking at the classification system in more detail. They should be introduced to the idea of broad groupings and how these subdivide. Through direct observations where possible, they should classify animals into vertebrates (reptiles, fish, amphibians, birds and mammals) and commonly found invertebrates (e.g. insects, spiders, snails, worms). They should discuss reasons why living things are placed in one group and not another.  
Pupils might find out about the significance of the work of scientists such as Carl Linnaeus, a pioneer of classification.  
Pupils might work scientifically by: devising classification systems and keys to identify some animals and plants in the immediate environment. They could research animals and plants in other habitats and decide where they belong in the classification system. |
| - describe how living things are classified into broad groups according to common observable characteristics and based on similarities and differences, including micro-organisms, plants and animals  
- give reasons for classifying plants and animals based on specific characteristics. |                                |
| **Animals including humans**                       |                                   |
| - identify and name the main parts of the human circulatory system, and explain the functions of the heart, blood vessels and blood  
- recognise the impact of diet, exercise, drugs and lifestyle on | Pupils should build on their learning from years 3 and 4 about the main body parts and internal organs (skeletal, muscular and digestive system) to explore and answer questions that help them to understand how the circulatory system enables the body to |

<td>the way their bodies function</td>
<td>function.</td>
</tr>
<tr>
<td>▪ describe the ways in which nutrients and water are transported within animals, including humans.</td>
<td>Pupils should learn how to keep their bodies healthy and how their bodies might be damaged – including how some drugs and other substances can be harmful to the human body.</td>
</tr>
<tr>
<td></td>
<td>Pupils might work scientifically by: exploring the work of scientists and scientific research about the relationship between diet, exercise, drugs, lifestyle and health.</td>
</tr>
</tbody>
</table>

**Evolution and inheritance**

Pupils should be taught to:

- recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago
- recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents
- identify how animals and plants are adapted to suit their environment in different ways and that adaptation may lead to evolution.

**Evolution and inheritance**

Building on what they learned about fossils in the topic on rocks in year 3, pupils should find out more about how living things on earth have changed over time. They should be introduced to the idea that characteristics are passed from parents to their offspring, for instance by considering different breeds of dogs, and what happens when, for example, labradors are crossed with poodles. They should also appreciate that variation in offspring over time can make animals more or less able to survive in particular environments, for example by exploring how giraffes’ necks got longer, or the development of insulating fur on the arctic fox. Pupils might find out about the work of palaeontologists such as Mary Anning and about how Alfred Wallace and Charles Darwin developed their ideas on evolution.

**Note:** At this stage, pupils are not expected to understand how genes and chromosomes work.
<table>

<tr>
<td>Pupils might work scientifically by: observing and raising questions about local animals and how they are adapted to their environment; comparing how some living things are adapted to survive in extreme conditions, for example cactuses, penguins and camels. They might analyse the advantages and disadvantages of specific adaptations, such as being on two feet rather than four, having a long or a short beak, having gills or lungs, tendrils on climbing plants, brightly coloured and scented flowers.</td>
<td></td>
</tr>
</tbody>
</table>

### Light

**Pupils should be taught to:**

- understand that light appears to travel in straight lines
- use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye
- explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes
- use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them, and to predict the size of shadows when the position of the light source changes.

**Pupils might work scientifically by:**

- deciding where to place rear-view mirrors on cars; designing and making a periscope and using the idea that light appears to travel in straight lines to explain how it works. They might investigate the relationship between light sources, objects and shadows by using shadow puppets.

**Pupils should explore the way that light behaves, including light sources, reflection and refraction. They should talk about what happens and make predictions. They should experience a range of examples of interesting aspects of light such as rainbows, colours on soap bubbles, objects looking bent in water and white light being split by prisms.**

Key stage 3

Working scientifically

Through the content across all three disciplines, pupils should be taught to:

Scientific attitudes
- pay attention to objectivity and concern for accuracy, precision, repeatability and reproducibility
- understand that scientific methods and theories develop as scientists modify earlier explanations to take account of new evidence and ideas, together with the importance of publishing results and peer review
- evaluate risks

Experimental skills and investigations
- ask questions and develop a line of enquiry based on observations of the real world, alongside prior knowledge and experience
- make predictions using scientific knowledge and understanding
- plan and design investigations and experiments to make observations and to test predictions, including identifying independent, dependent and control variables and their intrinsic nature and other factors to be taken into account when collecting evidence and data
- use appropriate techniques, apparatus, and materials during fieldwork and laboratory work, paying attention to health and safety
- make and record observations and measurements using a range of methods for different investigations; and evaluate the reliability of methods and suggest possible improvements
- apply sampling techniques

Analysis and evaluation
- apply mathematical concepts and calculate results
- present observations and data using appropriate methods, including tables and graphs
- interpret observations and data, including identifying patterns and using observations, measurements and data to draw conclusions
- present reasoned explanations, including explaining data in relation to predictions and hypotheses
- evaluate data, showing awareness of potential sources of random and systematic error
- identify further questions arising from their results
**Measurement**

- understand and use SI units and IUPAC (International Union of Pure and Applied Chemistry) chemical nomenclature
- use and derive simple equations and carry out appropriate calculations
- undertake basic data analysis including simple statistical techniques.
Subject content

Biology

Pupils should be taught about:

Structure and function of living organisms

Cells and organisation
- cells as the fundamental unit of living organisms, including how to observe, interpret and record cell structure using a light microscope
- the functions of the cell wall, cell membrane, cytoplasm, nucleus, vacuole, mitochondria and chloroplasts
- the similarities and differences between plant and animal cells
- the role of diffusion in the movement of materials in and between cells
- the structural adaptations of some unicellular organisms
- the hierarchical organisation of multicellular organisms: from cells to tissues to organs to systems to organisms.

The skeletal and muscular systems
- the structure and functions of the human skeleton, to include support, protection, movement and making blood cells
- biomechanics – the interaction between skeleton and muscles, including the measurement of force exerted by different muscles
- the function of muscles and antagonistic muscles.

Nutrition and digestion
- content of a healthy human diet: carbohydrates, fats, proteins, vitamins, minerals, dietary fibre and water, and why each is needed
- calculations of energy requirements in a healthy daily diet
- the consequences of imbalances in the diet, including obesity, starvation and deficiency diseases
- the tissues and organs of the human digestive system, including adaptations to function and how the digestive system digests food (enzymes simply as biological catalysts)
- the importance of bacteria in the human digestive system
- healthy plants gain mineral nutrients and water from soil via their roots.
Gas exchange systems
- the structure and functions of the gas exchange system in humans, including adaptations to function
- the mechanism of breathing to move air in and out of the lungs, using a pressure model to explain the movement of gases, including simple measurements of lung volume
- the impact of exercise, asthma and smoking on the gas exchange system
- the role of leaf stomata in gas exchange in plants.

Reproduction
- reproduction in humans (as an example of a mammal), including the structure and function of the male and female reproductive systems, menstrual cycle (without details of hormones), gametes, fertilisation, gestation and birth, to include the effect of maternal lifestyle on the foetus through the placenta
- reproduction in plants, including flower structure, wind and insect pollination, fertilisation, seed and fruit formation and dispersal, including quantitative investigation of some dispersal mechanisms
- the importance of plant reproduction through insect pollination in human food security.

Health
- the effects of ‘recreational’ drugs (including substance misuse) on behaviour, health and life processes.

Material cycles and energy

Photosynthesis
- the dependence of almost all life on Earth on the use of sunlight by plants and algae in photosynthesis
- the adaptations of leaves for photosynthesis
- the relationship between the structures and functions of leaves, including chloroplasts and stomata
- the reactants in, and products of, photosynthesis, and a word summary for photosynthesis
- mineral nutrition in plants, to explain the role of nitrates
- chemosynthesis in bacteria and other organisms.

Cellular respiration
- aerobic and anaerobic respiration in living organisms, including the breakdown of organic molecules to enable all the other chemical processes necessary for life
- a word summary for aerobic respiration
the process of anaerobic respiration in humans and micro-organisms, including fermentation, and a word summary for anaerobic respiration

the differences between aerobic and anaerobic respiration in terms of reactants, products and energy.

Interactions and interdependencies

Relationships in an ecosystem

the interdependence of organisms in an ecosystem, including food webs and insect pollinated crops as examples

the importance of plant reproduction through insect pollination in human food security

how organisms affect, and are affected by, their environment, including the accumulation of toxic materials

the role of variation in enabling living things to survive in the same ecosystem.

Genetics and evolution

Inheritance, chromosomes, DNA and genes

heredity as the process by which genetic information is transmitted from one generation to the next

a simple model of chromosomes, genes and DNA in heredity, including the part played by Watson, Crick, Wilkins and Franklin in the development of the DNA model

the variation between individuals of different species

the variation between individuals within a species being continuous or discontinuous, to include measurement and graphical representation of variation

the variation between species and between individuals of the same species leading to competition which can drive natural selection

changes in the environment may leave individuals within a species, and some entire species, less well adapted to compete successfully and reproduce, which in turn may lead to extinction

the importance of biodiversity

the use of gene banks to preserve hereditary material before a species becomes extinct.
Chemistry

Pupils should be taught about:

The particulate nature of matter
- the properties of the different states of matter (solid, liquid and gas) in terms of the particle model, including gas pressure
- changes of state in terms of the particle model.

Atoms, elements and compounds
- a simple (Dalton) atomic model
- differences between atoms, elements and compounds
- chemical symbols and formulae for elements and compounds
- conservation of mass changes of state and chemical reactions.

Pure and impure substances
- the concept of a pure substance
- mixtures, including dissolving
- diffusion in terms of the particle model
- simple techniques for separating mixtures: filtration, evaporation, distillation and chromatography
- the identification of pure substances.

Chemical reactions
- chemical reactions as the rearrangement of atoms
- representing chemical reactions using formulae and using equations
- combustion, thermal decomposition, oxidation and displacement reactions
- defining acids and alkalis in terms of neutralisation reactions
- the pH scale for measuring acidity/alkalinity; and indicators
- reactions of acids with metals to produce a salt plus hydrogen
- reactions of acids with alkalis to produce a salt plus water
- what catalysts do.

Energetics
- energy changes on changes of state (qualitative)
- exothermic and endothermic chemical reactions (qualitative).
The Periodic Table
- the varying physical and chemical properties of different elements
- the principles underpinning the Mendeleev Periodic Table
- the Periodic Table: periods and groups; metals and non-metals
- how patterns in reactions can be predicted with reference to the Periodic Table
- the chemical properties of metals and non-metals
- the chemical properties of metal and non-metal oxides with respect to acidity.

Materials
- the order of metals and carbon in the reactivity series
- the use of carbon in obtaining metals from metal oxides
- properties of ceramics, polymers and composites (qualitative).

Earth and Atmosphere
- the composition of the Earth
- the structure of the Earth
- the rock cycle and the formation of igneous, sedimentary and metamorphic rocks
- Earth as a source of limited resources and the efficacy of recycling
- the carbon cycle
- the composition of the atmosphere
- the production of carbon dioxide by human activity and the impact on climate.
Physics

Pupils should be taught about:

Energy

Changes and transfers

- examples of processes that cause change: with forces (work = force x distance; levers and gears reducing force by increasing distance, changing motion, dropping an object, turning a dynamo to produce light); with matter (releasing a compressed spring, igniting fuel, putting hot and cool objects in contact, metabolism of food), with vibrations and waves (warming by radiation) and with electricity (completing an electrical circuit)

Energy and fuel

- energy transfer caused by temperature difference, maintaining heating by energy supply to the hotter body
- use of energy in a domestic context, fuel sources and heating calculations comparing ratings of appliances in kilowatts (kW)
- amounts of energy from different foods (from labels)
- relationship between rate of transfer and amount of energy used.

Energy calculations

- energy calculations using measures of change in the energy associated with elastic deformation, moving and/or vibrating objects, heating materials, and chemical changes involving fuels
- fuel use and costs (including domestic fuel bills), comparing power ratings of appliances, measured in W, kW; calculating amounts of energy transferred in J, kJ, kW hour.

Motion and forces

Pupils should be taught about:

Describing motion

- speed and the quantitative relationship between average speed, distance and time (speed = distance ÷ time)
- the representation of a journey on a distance-time graph
- relative motion: trains and cars passing one another.
Forces

- forces as pushes or pulls, arising from the interaction between two objects
- using force arrows in diagrams, adding forces in one dimension, balanced and unbalanced forces
- moment as the turning effect of a force
- forces: associated with deforming objects; stretching and squashing – springs; with rubbing and friction between surfaces, with pushing things out of the way; resistance to motion of air and water
- forces measured in newtons, measurements of stretch or compression as force is changed
- force-extension linear relation; Hooke’s Law as a special case
- work done and energy changes on deformation
- non-contact forces: gravity forces acting at a distance on Earth and in space, forces between magnets, and with static electricity.

Pressure in fluids

- atmospheric pressure, decreases with increase of height as weight of air above decreases with height
- pressure in liquids, increasing with depth; upthrust effects, floating and sinking
- pressure measured by ratio of force over area – acting normal to any surface.

Balanced forces

- opposing forces and equilibrium: weight held by stretched spring or supported on a compressed surface.

Forces and motion

- forces being needed to cause objects to stop or start moving, or to change their speed or direction of motion
- change depending on direction of force and its size.

Waves

Observed waves

- waves on water as undulations which travel through water with transverse motion; these waves can be reflected, and add or cancel – superposition.

Sound waves

- frequencies of sound waves, measured in hertz (Hz); echoes, reflection and absorption of sound
- sound needs a medium to travel, the speed of sound in air, in water, in solids
- sound produced by vibrations of objects, in loud speakers, detected by their effects on microphone diaphragm and the ear drum; sound waves are longitudinal
- auditory range of humans and animals.

**Energy and waves**
- waves carrying energy, use for cleaning and physiotherapy by ultra-sound; for carrying energy and information for conversion to electrical signals by microphone.

**Light waves**
- the similarities and differences between light waves and waves in matter
- light waves travelling through a vacuum; speed of light
- the transmission of light through materials: absorption, diffuse scattering and specular reflection at a surface
- use of ray model to explain imaging in mirrors, the pinhole camera, the refraction of light and action of convex lens in focusing (qualitative); the human eye
- light transferring energy from source to absorber leading to chemical and electrical effects; photo-sensitive material in the retina and in cameras
- colours and the different frequencies of light, white light and prisms (qualitative only); differential colour effects in absorption and diffuse reflection.

**Electricity and electromagnetism**

**Current electricity**
- electric current, measured in amperes, in circuits, series and parallel circuits, currents add where branches meet and current as flow of charge
- potential difference, measured in volts, battery and bulb ratings; resistance, measured in ohms, as the ratio of potential difference (p.d.) to current
- calculations of current, power and energy transfer for series circuits
- differences in resistance between conducting and insulating components (quantitative).

**Static electricity**
- separation of positive or negative charges when objects are rubbed together: transfer of electrons, forces between charged objects
- the idea of electric field, forces acting across the space between objects not in contact.

**Magnetism**
- magnetic poles, attraction and repulsion
- magnetic fields by plotting with compass, representation by field lines
- Earth’s magnetism, compass and navigation
- the magnetic effect of a current, electromagnets, D.C. motors (principles only).
Matter

Physical changes
- conservation of material and of mass, and reversibility, in melting, freezing, evaporation, sublimation, condensation, dissolving
- similarities and differences, including density differences, between solids, liquids and gases
- Brownian motion in gases
- diffusion in liquids and gases driven by differences in concentration
- the difference between chemical and physical changes.

Particle model
- the differences in arrangements, in motion and in closeness of particles explaining changes of state, shape and density, the anomaly of ice-water transition
- atoms and molecules as particles.

Energy in matter
- changes with temperature in motion and spacing of particles
- internal energy stored in materials.

Space physics
- gravity force, weight = mass x gravitational field strength (g), on earth g=10 N/kg, different on other planets and stars; gravity forces between earth and moon, and between earth and sun (qualitative only)
- our sun as a star, other stars in our galaxy, other galaxies
- the seasons and the Earth’s tilt, day length at different times of year, in different hemispheres
- the light year as a unit of astronomical distance.
Art and design

Purpose of study

Art, craft and design embody some of the highest forms of human creativity. A high-quality art and design education should engage, inspire and challenge pupils, equipping them with the knowledge and skills to experiment, invent and create their own works of art, craft and design. As pupils progress, they should be able to think critically and develop a more rigorous understanding of art and design. They should also know how art and design both reflect and shape our history, and contribute to the culture, creativity and wealth of our nation.

Aims

The national curriculum for art and design aims to ensure that all pupils:

- produce creative work, exploring their ideas and recording their experiences
- become proficient in drawing, painting, sculpture and other art, craft and design techniques
- evaluate and analyse creative works using the language of art, craft and design
- know about great artists, craft makers and designers, and understand the historical and cultural development of their art forms.

Attainment targets

By the end of each key stage, pupils are expected to know, apply and understand the matters, skills and processes specified in the relevant programme of study.
Subject content

Key stage 1

Pupils should be taught:

- to use a range of materials creatively to design and make products
- to use drawing, painting and sculpture to develop and share their ideas, experiences and imagination
- to develop a wide range of art and design techniques in using colour, pattern, texture, line, shape, form and space
- about the work of a range of artists, craft makers and designers, describing the differences and similarities between different practices and disciplines, and making links to their own work.

Key stage 2

Pupils should be taught to develop their techniques, including their control and their use of materials, with creativity, experimentation and an increasing awareness of different kinds of art, craft and design.

Pupils should be taught:

- to create sketch books to record their observations and use them to review and revisit ideas
- to improve their mastery of art and design techniques, including drawing, painting and sculpture with a range of materials (e.g. pencil, charcoal, paint, clay)
- about great artists, architects and designers in history.

Key stage 3

Pupils should be taught to develop their creativity and ideas, and increase proficiency in their execution. They should develop a critical understanding of artists, architects and designers, expressing reasoned judgements that can inform their own work.

Pupils should be taught:

- to use a range of techniques to record their observations in sketchbooks, journals and other media as a basis for exploring their ideas
- to use a range of techniques and media, including painting
- to increase their proficiency in the handling of different materials
- to analyse and evaluate their own work, and that of others, in order to strengthen the visual impact or applications of their work
about the history of art, craft, design and architecture, including periods, styles and major movements from ancient times up to the present day.
Citizenship

Purpose of study

A high-quality citizenship education helps to provide pupils with knowledge, skills and understanding to prepare them to play a full and active part in society. In particular, citizenship education should foster pupils’ keen awareness of how the United Kingdom is governed and how its laws are made and upheld. It should also prepare pupils to take their place in society as responsible citizens by providing them with the skills and knowledge to manage their money well and make sound financial decisions.

Aims

The national curriculum for citizenship aims to ensure that all pupils:

- acquire a sound knowledge and understanding of how the United Kingdom is governed, its political system and how citizens participate actively in its democratic systems of government
- develop a sound knowledge and understanding of the role of law and the justice system in our society and how laws are shaped and enforced
- develop an interest in, and commitment to, volunteering that they will take with them into adulthood
- are equipped with the financial skills to enable them to manage their money on a day-to-day basis, and plan for future financial needs.

Attainment targets

By the end of each key stage, pupils are expected to know, apply and understand the matters, skills and processes specified in the relevant programme of study.
Subject content

Key stage 3

Citizenship education should develop pupils’ understanding of how the United Kingdom is governed and the rights and responsibilities of its citizens.

Pupils should be taught about:

- how the political system of the UK has developed as a democracy, including the role of Parliament and the monarch
- the operation of Parliament, including voting and elections, and the role of political parties
- the precious liberties enjoyed by the citizens of the United Kingdom
- the nature of rules and laws and the justice system, including the role of the police and the operation of courts and tribunals
- the functions and uses of money, the importance of personal budgeting, and managing risk.

Key stage 4

Teaching should build on the key stage 3 programme of study to deepen pupils’ understanding of how the United Kingdom is governed, as well as other forms and systems of government.

Pupils should be taught about:

- parliamentary democracy and the key elements of the constitution of the United Kingdom, including the power of government, the role of citizens and Parliament in holding those in power to account, and the different roles of the executive, legislature and judiciary and a free press
- the different electoral systems used in and beyond the United Kingdom and actions citizens can take in democratic and electoral processes to influence decisions locally, nationally and beyond
- other systems and forms of government, both democratic and non-democratic, beyond the United Kingdom
- local, regional and international governance and the United Kingdom’s relations with the rest of Europe, the Commonwealth and the wider world
- human rights and international law
- the legal system in the UK, different sources of law and how the law helps society deal with complex problems
- diverse national, regional, religious and ethnic identities in the United Kingdom and the need for mutual respect and understanding
- the different ways in which a citizen can contribute to the improvement of his or her community, to include the opportunity to participate actively in community volunteering
- income and expenditure, credit and debt, insurance, savings and pensions, as well as a range of other financial products and services.
Computing

Purpose of study

A high-quality computing education equips pupils to understand and change the world through logical thinking and creativity, including by making links with mathematics, science, and design and technology. The core of computing is computer science, in which pupils are taught the principles of information and computation, and how digital systems work. Computing equips pupils to use information technology to create programs, systems and a range of media. It also ensures that pupils become digitally literate – able to use, and express themselves and develop their ideas through, information and communication technology – at a level suitable for the future workplace and as active participants in a digital world.

Aims

The national curriculum for computing aims to ensure that all pupils:

- can understand and apply the fundamental principles and concepts of computer science, including abstraction, logic, algorithms and data representation
- can analyse problems in computational terms, and have repeated practical experience of writing computer programs in order to solve such problems
- can evaluate and apply information technology, including new or unfamiliar technologies, analytically to solve problems
- are responsible, competent, confident and creative users of information and communication technology.

Attainment targets

By the end of each key stage, pupils are expected to know, apply and understand the matters, skills and processes specified in the relevant programme of study.
Subject content

Key stage 1

Pupils should be taught to:

- understand what algorithms are; how they are implemented as programs on digital devices; and that programs execute by following precise and unambiguous instructions
- create and debug simple programs
- use logical reasoning to predict the behaviour of simple programs
- use technology purposefully to create, organise, store, manipulate and retrieve digital content
- use technology safely and respectfully, keeping personal information private; know where to go for help and support when they have concerns about material on the internet
- recognise common uses of information technology beyond school.

Key stage 2

Pupils should be taught to:

- design, write and debug programs that accomplish specific goals, including controlling or simulating physical systems; solve problems by decomposing them into smaller parts
- use sequence, selection, and repetition in programs; work with variables and various forms of input and output
- use logical reasoning to explain how some simple algorithms work and to detect and correct errors in algorithms and programs
- understand computer networks including the internet; how they can provide multiple services, such as the world-wide web; and the opportunities they offer for communication and collaboration
- use search technologies effectively, appreciate how results are selected and ranked, and be discerning in evaluating digital content
- use technology safely, respectfully and responsibly; know a range of ways to report concerns and inappropriate behaviour
- select, use and combine a variety of software (including internet services) on a range of digital devices to accomplish given goals, including collecting, analysing, evaluating and presenting data and information.
Key stage 3

Pupils should be taught to:

- design, use and evaluate computational abstractions that model the state and behaviour of real-world problems and physical systems
- understand several key algorithms that reflect computational thinking, such as ones for sorting and searching; use logical reasoning to compare the utility of alternative algorithms for the same problem
- use two or more programming languages, at least one of which is textual, to solve a variety of computational problems; make appropriate use of data structures such as lists, tables or arrays; design and develop modular programs that use procedures or functions
- understand simple Boolean logic (such as AND, OR and NOT) and some of its uses in circuits and programming
- understand the hardware and software components that make up computer systems, and how they communicate with one another and with other systems
- understand how instructions are stored and executed within a computer system; understand how data of various types (including text, sounds and pictures) can be represented and manipulated digitally, in the form of binary digits
- understand and use binary digits, such as to be able to convert between binary and decimal and perform simple binary addition
- undertake creative projects that involve selecting, using, and combining multiple applications, preferably across a range of devices, to achieve challenging goals, including collecting and analysing data and meeting the needs of known users
- create, re-use, revise and re-purpose digital artefacts for a given audience, with attention to trustworthiness, design and usability
- understand a range of ways to use technology safely, respectfully, responsibly and securely, including protecting their online identity and privacy; recognise inappropriate content, contact and conduct and know how to report concerns.
Key stage 4

All pupils must have the opportunity to study aspects of information technology and computer science at sufficient depth to allow them to progress to higher levels of study or to a professional career.

All pupils should be taught to:

- develop their capability, creativity and knowledge in computer science, digital media and information technology
- develop and apply their analytic, problem-solving, design, and computational thinking skills
- understand how changes in technology affect safety, including new ways to protect their online privacy and identity, and how to report concerns.
Design and technology

Purpose of study

Design and technology is an inspiring, rigorous and practical subject. Using creativity and imagination, pupils design and make products that solve real and relevant problems within a variety of contexts, considering their own and others’ needs, wants and values. They acquire a broad range of subject knowledge and draw on disciplines such as mathematics, science, engineering, computing and art. Pupils learn how to take risks, becoming resourceful, innovative, enterprising and capable citizens. Through the evaluation of past and present design and technology, they develop a critical understanding of its impact on daily life and the wider world. High-quality design and technology education makes an essential contribution to the creativity, culture, wealth and well-being of the nation.

Aims

The national curriculum for design and technology aims to ensure that all pupils:

- develop the creative, technical and practical expertise needed to perform everyday tasks confidently and to participate successfully in an increasingly technological world
- build and apply a repertoire of knowledge, understanding and skills in order to design and make high-quality prototypes and products for a wide range of users
- critique, evaluate and test their ideas and products and the work of others
- understand and apply the principles of nutrition and learn how to cook.

Attainment targets

By the end of each key stage, pupils are expected to know, apply and understand the matters, skills and processes specified in the relevant programme of study.
Subject content

Key stage 1

Through a variety of creative and practical activities, pupils should be taught the knowledge, understanding and skills needed to engage in an iterative process of designing and making. They should work in a range of relevant contexts, such as the home and school, gardens and playgrounds, the local community, industry and the wider environment.

When designing and making, pupils should be taught to:

Design
- design purposeful, functional, appealing products for themselves and other users based on design criteria
- generate, develop, model and communicate their ideas through talking, drawing, templates, mock-ups and, where appropriate, information and communication technology

Make
- select from and use a range of tools and equipment to perform practical tasks such as cutting, shaping, joining and finishing
- select from and use a wide range of materials and components, including construction materials, textiles and ingredients, according to their characteristics

Evaluate
- explore and evaluate a range of existing products
- evaluate their ideas and products against design criteria

Technical knowledge
- build structures, exploring how they can be made stronger, stiffer and more stable
- explore and use mechanisms, such as levers, sliders, wheels and axles, in their products.
**Key stage 2**

Through a variety of creative and practical activities, pupils should be taught the knowledge, understanding and skills needed to engage in an iterative process of designing and making. They should work in a range of relevant contexts, such as the home, school, leisure, culture, enterprise, industry and the wider environment.

When designing and making, pupils should be taught to:

**Design**
- use research and develop design criteria to inform the design of innovative, functional, appealing products that are fit for purpose, aimed at particular individuals or groups
- generate, develop, model and communicate their ideas through discussion, annotated sketches, cross-sectional and exploded diagrams, prototypes, pattern pieces and computer-aided design

**Make**
- select from and use a wider range of tools and equipment to perform practical tasks, such as cutting, shaping, joining and finishing, accurately
- select from and use a wider range of materials and components, including construction materials, textiles and ingredients, according to their functional properties and aesthetic qualities

**Evaluate**
- investigate and analyse a range of existing products
- evaluate their ideas and products against their own design criteria and consider the views of others to improve their work
- understand how key events and individuals in design and technology have helped shape the world

**Technical knowledge**
- apply their understanding of how to strengthen, stiffen and reinforce more complex structures
- understand and use mechanical systems in their products, such as gears, pulleys, cams, levers and linkages
- understand and use electrical systems in their products, such as series circuits incorporating switches, bulbs, buzzers and motors
- apply their understanding of computing to programme, monitor and control their products.
Key stage 3

Through a variety of creative and practical activities, pupils should be taught the knowledge, understanding and skills needed to engage in an iterative process of designing and making. They should work in a range of domestic and local contexts, such as the home, health, leisure and culture, and industrial contexts, such as engineering, manufacturing, construction, food, energy, agriculture (including horticulture) and fashion.

When designing and making, pupils should be taught to:

**Design**
- use research and exploration, such as the study of different cultures, to identify and understand user needs
- identify and solve their own design problems and understand how to reformulate problems given to them
- develop specifications to inform the design of innovative, functional, appealing products that respond to needs in a variety of situations
- use a variety of approaches, such as biomimicry and user-centred design, to generate creative ideas and avoid stereotypical responses
- develop and communicate design ideas using annotated sketches, detailed plans, 3-D and mathematical modelling, oral and digital presentations and computer-based tools

**Make**
- select from and use specialist tools, techniques, processes, equipment and machinery precisely, including computer-aided manufacture
- select from and use a wider, more complex range of materials, components and ingredients, taking into account their properties

**Evaluate**
- analyse the work of past and present professionals and others to develop and broaden their understanding
- investigate new and emerging technologies
- test, evaluate and refine their ideas and products against a specification, taking into account the views of intended users and other interested groups
- understand developments in design and technology, its impact on individuals, society and the environment, and the responsibilities of designers, engineers and technologists
Technical knowledge

- understand and use the properties of materials and the performance of structural elements to achieve functioning solutions
- understand how more advanced mechanical systems used in their products enable changes in movement and force
- understand how more advanced electrical and electronic systems can be powered and used in their products, such as circuits with heat, light, sound and movement as inputs and outputs
- apply computing and use electronics to embed intelligence in products that respond to inputs such as sensors, and control outputs such as actuators, using programmable components such as microcontrollers.
Cooking and nutrition

As part of their work with food, pupils should be taught how to cook and apply the principles of nutrition and healthy eating. Instilling a love of cooking in pupils will also open a door to one of the great expressions of human creativity. Learning how to cook is a crucial life skill that enables pupils to feed themselves and others affordably and well, now and in later life.

Pupils should be taught to:

**Key stage 1**
- use the basic principles of a healthy and varied diet to prepare dishes
- understand where food comes from.

**Key stage 2**
- understand and apply the principles of a healthy and varied diet
- prepare and cook a variety of predominantly savoury dishes using a range of cooking techniques
- understand seasonality, and know where and how a variety of ingredients are grown, reared, caught and processed.

**Key stage 3**
- understand and apply the principles of nutrition and health
- cook a repertoire of predominantly savoury dishes so that they are able to feed themselves and others a healthy and varied diet
- become competent in a range of cooking techniques, such as selecting and preparing ingredients; using utensils and electrical equipment; applying heat in different ways; using awareness of taste, texture and smell to decide how to season dishes and combine ingredients; adapting and using their own recipes
- understand the source, seasonality and characteristics of a broad range of ingredients.
Geography

Purpose of study

A high-quality geography education should inspire in pupils a curiosity and fascination about the world and its people that will remain with them for the rest of their lives. Teaching should equip pupils with knowledge about diverse places, people, resources and natural and human environments, together with a deep understanding of the Earth’s key physical and human processes. As pupils progress, their growing knowledge about the world should help them to deepen their understanding of the interaction between physical and human processes, and of the formation and use of landscapes and environments. Geographical knowledge provides the tools and approaches that explain how the Earth’s features at different scales are shaped, interconnected and change over time.

Aims

The national curriculum for geography aims to ensure that all pupils:

- develop contextual knowledge of the location of places, seas and oceans, including their defining physical and human characteristics
- understand the processes that give rise to key physical and human geographical features of the world, how these are interdependent and how they bring about spatial variation and change over time
- are competent in the geographical skills needed to:
  - collect, analyse and communicate with a range of data gathered through experiences of fieldwork that deepen their understanding of geographical processes
  - interpret a range of sources of geographical information, including maps, diagrams, globes, aerial photographs and Geographical Information Systems (GIS)
  - communicate geographical information in a variety of ways, including through maps and writing at length.

Attainment targets

By the end of each key stage, pupils are expected to know, apply and understand the matters, skills and processes specified in the relevant programme of study.
Subject content

Key stage 1

Pupils should develop knowledge about the world, the United Kingdom and their locality. They should understand basic subject-specific vocabulary relating to human and physical geography and begin to use geographical skills, including first-hand observation, to enhance their locational awareness.

Pupils should be taught to:

Location knowledge
- name and locate the world’s seven continents and five oceans
- name, locate and identify characteristics of the four countries and capital cities of the United Kingdom and its surrounding seas

Place knowledge
- understand geographical similarities and differences through studying the human and physical geography of a small area of the United Kingdom, and of a small area in a contrasting non-European country

Human and physical geography
- identify seasonal and daily weather patterns in the United Kingdom and the location of hot and cold areas of the world in relation to the Equator and the North and South Poles
- use basic geographical vocabulary to refer to:
  - key physical features, including: beach, cliff, coast, forest, hill, mountain, sea, ocean, river, soil, valley, vegetation, season and weather
  - key human features, including: city, town, village, factory, farm, house, office, port, harbour and shop

Geographical skills and fieldwork
- use world maps, atlases and globes to identify the United Kingdom and its countries, as well as the countries, continents and oceans studied at this key stage
- use simple compass directions (North, South, East and West) and locational and directional language (e.g. near and far; left and right) to describe the location of features and routes on a map
- use aerial photographs and plan perspectives to recognise landmarks and basic human and physical features; devise a simple map; and use and construct basic symbols in a key
- use simple fieldwork and observational skills to study the geography of their school and its grounds and the key human and physical features of its surrounding environment.
Key stage 2

Pupils should extend their knowledge and understanding beyond the local area to include the United Kingdom and Europe, North and South America. This will include the location and characteristics of a range of the world’s most significant human and physical features. They should develop their use of geographical tools and skills to enhance their locational and place knowledge.

Pupils should be taught to:

Location knowledge
- locate the world’s countries, using maps to focus on Europe (including the location of Russia) and North and South America, concentrating on their environmental regions, key physical and human characteristics, countries, and major cities
- name and locate counties and cities of the United Kingdom, geographical regions and their identifying human and physical characteristics, key topographical features (including hills, mountains, coasts and rivers), and land-use patterns; and understand how some of these aspects have changed over time
- identify the position and significance of latitude, longitude, Equator, Northern Hemisphere, Southern Hemisphere, the Tropics of Cancer and Capricorn, Arctic and Antarctic Circle, the Prime/Greenwich Meridian and time zones (including day and night)

Place knowledge
- understand geographical similarities and differences through the study of human and physical geography of a region of the United Kingdom, a region in a European country, and a region within North or South America

Human and physical geography
- describe and understand key aspects of:
  - physical geography, including: climate zones, biomes and vegetation belts, rivers, mountains, volcanoes and earthquakes, and the water cycle
  - human geography, including: types of settlement and land use, economic activity including trade links, and the distribution of natural resources including energy, food, minerals and water

Geographical skills and fieldwork
- use maps, atlases, globes and digital/computer mapping to locate countries and describe features studied
- use the eight points of a compass, four and six-figure grid references, symbols and key (including the use of Ordnance Survey maps) to build their knowledge of the United Kingdom and the wider world
use fieldwork to observe, measure and record the human and physical features in the local area using a range of methods, including sketch maps, plans and graphs, and digital technologies.
Key stage 3

Pupils should consolidate and extend their knowledge of the world’s major countries and their physical and human features. They should understand how geographical processes interact to create distinctive human and physical landscapes that change over time. In doing so, they should become aware of increasingly complex geographical systems in the world around them. They should develop greater competence in using geographical tools, such as models and theories and geographical skills in analysing and interpreting different data sources. In this way pupils will continue to enrich their locational knowledge and spatial and environmental understanding.

Pupils should be taught to:

Location knowledge
- extend their locational knowledge and deepen their spatial awareness of the world’s countries using maps of the world to focus on Africa, Russia, Asia (including China and India), and the Middle East, focusing on their environmental regions, including polar and hot deserts, key physical and human characteristics, countries and major cities

Place Knowledge
- understand geographical similarities and differences through the study of human and physical geography of a region within Africa and a region within Asia

Human and physical geography
- understand, through the use of detailed place-based exemplars at a variety of scales, the key processes in:
  - physical geography relating to: geological timescales and plate tectonics; rocks, weathering and soils; weather and climate, including the change in climate from the Ice Age to the present; and glaciation, hydrology and coasts
  - human geography relating to: population and urbanisation; international development; economic activity in the primary, secondary, tertiary and quaternary sectors; and the use of natural resources
- understand how human and physical processes interact to influence, and change landscapes, environments and the climate; and how human activity relies on effective functioning of natural systems

Geographical skills and fieldwork
- build on their knowledge of globes, maps and atlases and use these geographical tools routinely in the classroom and in the field
- interpret Ordnance Survey maps in the classroom and the field, including using grid references and scale, topographical and other thematic mapping, and aerial and satellite photographs
- use Geographical Information Systems (GIS) to view, analyse and interpret places and data
- use fieldwork in contrasting locations to collect, analyse and draw conclusions from geographical data, using multiple sources of increasingly complex information.
History

Purpose of study

A high-quality history education will help pupils gain a coherent knowledge and understanding of Britain’s past and that of the wider world. It should inspire pupils’ curiosity to know more about the past. Teaching should equip pupils to ask perceptive questions, think critically, weigh evidence, sift arguments, and develop perspective and judgement. History helps pupils to understand the complexity of people’s lives, the process of change, the diversity of societies and relationships between different groups, as well as their own identity and the challenges of their time.

Aims

The national curriculum for history aims to ensure that all pupils:

- know and understand the history of these islands as a coherent, chronological narrative, from the earliest times to the present day: how people’s lives have shaped this nation and how Britain has influenced and been influenced by the wider world
- know and understand significant aspects of the history of the wider world: the nature of ancient civilisations; the expansion and dissolution of empires; characteristic features of past non-European societies; achievements and follies of mankind
- gain and deploy a historically-grounded understanding of abstract terms such as ‘empire’, ‘civilisation’, ‘parliament’ and ‘peasantry’
- understand historical concepts such as continuity and change, cause and consequence, similarity, difference and significance, and use them to make connections, draw contrasts, analyse trends, frame historically-valid questions and create their own structured accounts, including written narratives and analyses
- understand the methods of historical enquiry, including how evidence is used rigorously to make historical claims, and discern how and why contrasting arguments and interpretations of the past have been constructed
- gain historical perspective by placing their growing knowledge into different contexts, understanding the connections between local, regional, national and international history; between cultural, economic, military, political, religious and social history; and between short- and long-term timescales.

Attainment targets

By the end of each key stage, pupils are expected to know, apply and understand the matters, skills and processes specified in the relevant programme of study.
Subject content

Key stage 1

Pupils should develop an awareness of the past, using common words and phrases relating to the passing of time. They should know where the people and events they study fit within a chronological framework and identify similarities and differences between ways of life in different periods. They should use a wide vocabulary of everyday historical terms. They should ask and answer questions, choosing and using parts of stories and other sources to show that they know and understand key features of events. They should understand some of the ways in which we find out about the past and identify different ways in which it is represented.

In planning to ensure the progression described above through teaching about the people, events and changes outlined below, teachers are often introducing pupils to historical periods that they will study more fully at key stages 2 and 3.

Pupils should be taught about:

- changes within living memory. Where appropriate, these should be used to reveal aspects of change in national life
- events beyond living memory that are significant nationally or globally (e.g. the Great Fire of London, the first aeroplane flight or events commemorated through festivals or anniversaries)
- the lives of significant individuals in the past who have contributed to national and international achievements. Some should be used to compare aspects of life in different periods (e.g. Elizabeth I and Queen Victoria, Christopher Columbus and Neil Armstrong, William Caxton and Tim Berners-Lee, Pieter Bruegel the Elder and LS Lowry, Rosa Parks and Emily Davison, Mary Seacole and Edith Cavell)
- significant historical events, people and places in their own locality.
Key stage 2

Pupils should continue to develop a chronologically secure knowledge and understanding of British, local and world history, establishing clear narratives within and across the periods they study. They should note connections, contrasts and trends over time and develop the appropriate use of historical terms. They should regularly address and sometimes devise historically valid questions about change, cause, similarity and difference, and significance. They should construct informed responses that involve thoughtful selection and organisation of relevant historical information. They should understand how our knowledge of the past is constructed from a range of sources and that different versions of past events may exist, giving some reasons for this.

In planning to ensure the progression described above through teaching the British, local and world history outlined below, teachers should combine overview and depth studies to help pupils understand both the long arc of development and the complexity of specific aspects of the content.

Pupils should be taught about:

- **changes in Britain from the Stone Age to the Iron Age**

  This could include:

  - late Neolithic hunter-gatherers and early farmers, e.g. Skara Brae
  - Bronze Age religion, technology and travel, e.g. Stonehenge
  - Iron Age hill forts: tribal kingdoms, farming, art and culture

- **the Roman Empire and its impact on Britain**

  This could include:

  - Julius Caesar’s attempted invasion in 55-54 BC
  - the Roman Empire by AD 42 and the power of its army
  - successful invasion by Claudius and conquest, including Hadrian’s Wall
  - British resistance, e.g. Boudica
  - “Romanisation” of Britain: sites such as Caerwent and the impact of technology, culture and beliefs, including early Christianity
- Britain’s settlement by Anglo-Saxons and Scots

  This could include:
  - Roman withdrawal from Britain in c. AD 410 and the fall of the western Roman Empire
  - Scots invasions from Ireland to north Britain (now Scotland)
  - Anglo-Saxon invasions, settlements and kingdoms: place names and village life
  - Anglo-Saxon art and culture
  - Christian conversion – Canterbury, Iona and Lindisfarne

- the Viking and Anglo-Saxon struggle for the Kingdom of England to the time of Edward the Confessor

  This could include:
  - Viking raids and invasion
  - resistance by Alfred the Great and Athelstan, first king of England
  - further Viking invasions and Danegeld
  - Anglo-Saxon laws and justice
  - Edward the Confessor and his death in 1066

- a local history study

  For example:
  - a depth study linked to one of the British areas of study listed above
  - a study over time tracing how several aspects national history are reflected in the locality (this can go beyond 1066)
  - a study of an aspect of history or a site dating from a period beyond 1066 that is significant in the locality.

- a study of an aspect or theme in British history that extends pupils’ chronological knowledge beyond 1066

  For example:
  - the changing power of monarchs using case studies such as John, Anne and Victoria
- changes in an aspect of social history, such as crime and punishment from the Anglo-Saxons to the present or leisure and entertainment in the 20th Century
- the legacy of Greek or Roman culture (art, architecture or literature) on later periods in British history, including the present day
- a significant turning point in British history, e.g. the first railways or the Battle of Britain

- the achievements of the earliest civilizations – an overview of where and when the first civilizations appeared and a depth study of one of the following: Ancient Sumer; The Indus Valley; Ancient Egypt; The Shang Dynasty of Ancient China

- Ancient Greece – a study of Greek life and achievements and their influence on the western world

- a non-European society that provides contrasts with British history - one study chosen from: early Islamic civilization, including a study of Baghdad c. AD 900; Mayan civilization c. AD 900; Benin (West Africa) c. AD 900-1300.
Key stage 3

Pupils should extend and deepen their chronologically secure knowledge and understanding of British, local and world history, so that it provides a well-informed context for wider learning. Pupils should identify significant events, make connections, draw contrasts, and analyse trends within periods and over long arcs of time. They should use historical terms and concepts in increasingly sophisticated ways. They should pursue historically valid enquiries including some they have framed themselves, and create relevant, structured and evidentially supported accounts in response. They should understand how different types of historical sources are used rigorously to make historical claims and discern how and why contrasting arguments and interpretations of the past have been constructed.

In planning to ensure the progression described above through teaching the British, local and world history outlined below, teachers should combine overview and depth studies to help pupils understand both the long arc of development and the complexity of specific aspects of the content.

Pupils should be taught about:

- the development of Church, state and society in Medieval Britain 1066-1509

This could include:

- the Norman Conquest
- Christendom, the importance of religion and the Crusades
- the struggle between Church and crown
- Magna Carta and the emergence of Parliament
- the English campaigns to conquer Wales and Scotland up to 1314
- society, economy and culture e.g. feudalism, religion in daily life (parishes, monasteries, abbeys), farming, trade and towns (especially the wool trade), art, architecture and literature
- the Black Death and its social and economic impact
- the Peasants’ Revolt
- the Hundred Years War
- the Wars of the Roses; Henry VII and attempts to restore stability
the development of Church, state and society in Britain 1509-1745

This could include:

- Renaissance and Reformation in Europe
- the English Reformation and Counter Reformation (Henry VIII to Mary I)
- the Elizabethan religious settlement and conflict with Catholics (including Scotland, Spain and Ireland)
- the first colony in America and first contact with India
- the causes and events of the civil wars throughout Britain
- the Interregnum (including Cromwell in Ireland)
- the Restoration, ‘Glorious Revolution’ and power of Parliament
- the Act of Union of 1707, the Hanoverian succession and the Jacobite rebellions of 1715 and 1745
- society, economy and culture across the period: e.g. work and leisure in town and country, religion and superstition in daily life, theatre, art, music and literature

ideas, political power, industry and empire: Britain, 1745-1901

This could include:

- the Enlightenment in Europe and Britain, with links back to 17th Century thinkers and scientists and the founding of the Royal Society
- Britain’s transatlantic slave trade: its effects and its eventual abolition
- the Seven Years War and The American War of Independence
- the French Revolutionary wars
- Britain as the first industrial nation – the impact on society
- party politics, extension of the franchise and social reform
- the development of the British Empire with a depth study (e.g. of India)
- Ireland and Home Rule
- Darwin’s ‘On The Origin of Species’

challenges for Britain, Europe and the wider world 1901 to the present day

In addition to studying the Holocaust, this could include:

- women’s suffrage
- the First World War and the Peace Settlement
- the inter-war years: the Great Depression and the rise of dictators
- the Second World War and the wartime leadership of Winston Churchill
- the creation of the Welfare State
- Indian independence and end of Empire
- social, cultural and technological change in post-war British society
- Britain’s place in the world since 1945

- a local history study
  
  For example:
  - a depth study linked to one of the British areas of study listed above
  - a study over time, testing how far sites in their locality reflect aspects of national history (some sites may predate 1066)
  - a study of an aspect or site in local history dating from a period before 1066

- the study of an aspect or theme in British history that consolidates and extends pupils’ chronological knowledge from before 1066
  
  For example:
  - the changing nature of political power in Britain, traced through selective case studies from the Iron Age to the present
  - Britain’s changing landscape from the Iron Age to the present
  - a study of an aspect of social history, such as the impact through time of the migration of people to, from and within the British Isles
  - a study in depth into a significant turning point e.g. the Neolithic Revolution

- at least one study of a significant society or issue in world history and its interconnections with other world developments
  
  For example:
  - Mughal India 1526-1857; China’s Qing dynasty 1644-1911; Changing Russian empires c.1800-1989; USA in the 20th Century.
Languages

Purpose of study

Learning a foreign language is a liberation from insularity and provides an opening to other cultures. A high-quality languages education should foster pupils’ curiosity and deepen their understanding of the world. The teaching should enable pupils to express their ideas and thoughts in another language and to understand and respond to its speakers, both in speech and in writing. It should also provide opportunities for them to communicate for practical purposes, learn new ways of thinking and read great literature in the original language. Language teaching should provide the foundation for learning further languages, equipping pupils to study and work in other countries.

Aims

The national curriculum for languages aims to ensure that all pupils:

- understand and respond to spoken and written language from a variety of authentic sources
- speak with increasing confidence, fluency and spontaneity, finding ways of communicating what they want to say, including through discussion and asking questions, and continually improving the accuracy of their pronunciation and intonation
- can write at varying length, for different purposes and audiences, using the variety of grammatical structures that they have learnt
- discover and develop an appreciation of a range of writing in the language studied.

Attainment targets

By the end of each key stage, pupils are expected to know, apply and understand the matters, skills and processes specified in the relevant programme of study.
Subject content

Key stage 2: Foreign languages

Teaching may be of any modern or ancient foreign language and should focus on enabling pupils to make substantial progress in one language. The teaching should provide an appropriate balance of spoken and written language and should lay the foundations for further foreign language teaching at key stage 3. It should enable pupils to understand and communicate ideas, facts and feelings in speech and writing, focused on familiar and routine matters, using their knowledge of phonology, grammatical structures and vocabulary.

The focus of study in modern languages will be on practical communication. If an ancient language is chosen the focus will be to provide a linguistic foundation for reading comprehension and an appreciation of classical civilisation. Pupils studying ancient languages may take part in simple oral exchanges, while discussion of what they read will be conducted in English. A linguistic foundation in ancient languages may support the study of modern languages at key stage 3.

Pupils should be taught to:

- listen attentively to spoken language and show understanding by joining in and responding
- explore the patterns and sounds of language through songs and rhymes and link the spelling, sound and meaning of words
- engage in conversations; ask and answer questions; express opinions and respond to those of others; seek clarification and help*
- speak in sentences, using familiar vocabulary, phrases and basic language structures
- develop accurate pronunciation and intonation so that others understand when they are reading aloud or using familiar words and phrases*
- present ideas and information orally to a range of audiences*
- read carefully and show understanding of words, phrases and simple writing
- appreciate stories, songs, poems and rhymes in the language
- broaden their vocabulary and develop their ability to understand new words that are introduced into familiar written material, including through using a dictionary
- write phrases from memory, and adapt these to create new sentences, to express ideas clearly
- describe people, places, things and actions orally* and in writing
- understand basic grammar appropriate to the language being studied, including (where relevant): feminine, masculine and neuter forms and the conjugation of high-frequency verbs; key features and patterns of the language; how to apply
these, for instance, to build sentences; and how these differ from or are similar to English.

The starred (*) content above will not be applicable to ancient languages.
Key stage 3: Modern foreign language

Teaching may be of any modern foreign language and should build on the foundations of language learning laid at key stage 2, whether pupils continue with the same language or take up a new one. Teaching should focus on developing the breadth and depth of pupils’ competence in listening, speaking, reading and writing, based on a sound foundation of core grammar and vocabulary. It should enable pupils to understand and communicate personal and factual information that goes beyond their immediate needs and interests, developing and justifying points of view in speech and writing, with increased spontaneity, independence and accuracy. It should provide suitable preparation for further study.

Pupils should be taught to:

Grammar and vocabulary

- identify and use tenses or other structures which convey the present, past, and future as appropriate to the language being studied
- use and manipulate a variety of key grammatical structures and patterns, including voices and moods, as appropriate
- develop and use a wide-ranging and deepening vocabulary that goes beyond their immediate needs and interests, allowing them to give and justify opinions and take part in discussion about wider issues
- use accurate grammar, spelling and punctuation.
Linguistic competence

- listen to a variety of forms of spoken language to obtain information and respond appropriately
- transcribe words and short sentences that they hear with increasing accuracy
- initiate and develop conversations, coping with unfamiliar language and unexpected responses, making use of important social conventions such as formal modes of address
- express and develop ideas clearly and with increasing accuracy, both orally and in writing
- speak coherently and confidently, with increasingly accurate pronunciation and intonation
- read and show comprehension of original and adapted materials from a range of different sources, understanding the purpose, important ideas and details, and provide an accurate English translation of short, suitable material
- read literary texts in the language, such as stories, songs, poems and letters, to stimulate ideas, develop creative expression and expand understanding of the language and culture
- write prose using an increasingly wide range of grammar and vocabulary, write creatively to express their own ideas and opinions, and translate short written text accurately into the foreign language.
Music

Purpose of study

Music is a universal language that embodies one of the highest forms of creativity. A high-quality music education should engage and inspire pupils to develop a love of music and their talent as musicians, and so increase their self-confidence, creativity and sense of achievement. As pupils progress, they should develop a critical engagement with music, allowing them to compose, and to listen with discrimination to the best in the musical canon.

Aims

The national curriculum for music aims to ensure that all pupils:

- perform, listen to, review and evaluate music across a range of historical periods, genres, styles and traditions, including the works of the great composers and musicians
- learn to sing and to use their voices, to create and compose music on their own and with others, have the opportunity to learn a musical instrument, use technology appropriately and have the opportunity to progress to the next level of musical excellence
- understand and explore how music is created, produced and communicated, including through the inter-related dimensions: pitch, duration, dynamics, tempo, timbre, texture, structure and appropriate musical notations.

Attainment targets

By the end of each key stage, pupils are expected to know, apply and understand the matters, skills and processes specified in the relevant programme of study.
**Subject content**

**Key stage 1**

Pupils should be taught to:

- use their voices expressively and creatively by singing songs and speaking chants and rhymes
- play tuned and untuned instruments musically
- listen with concentration and understanding to a range of high-quality live and recorded music
- experiment with, create, select and combine sounds using the inter-related dimensions of music.

**Key stage 2**

Pupils should be taught to sing and play musically with increasing confidence and control. They should develop an understanding of musical composition, organising and manipulating ideas within musical structures and reproducing sounds from aural memory.

Pupils should be taught to:

- play and perform in solo and ensemble contexts, using their voices and playing musical instruments with increasing accuracy, fluency, control and expression
- improvise and compose music for a range of purposes using the inter-related dimensions of music
- listen with attention to detail and recall sounds with increasing aural memory
- use and understand staff and other musical notations
- appreciate and understand a wide range of high-quality live and recorded music drawn from different traditions and from great composers and musicians
- develop an understanding of the history of music.
Key stage 3

Pupils should build on their previous knowledge and skills through performing, composing and listening. They should develop their vocal and/or instrumental fluency, accuracy and expressiveness; and understand musical structures, styles, genres and traditions, identifying the expressive use of musical dimensions. They should listen with increasing discrimination and awareness to inform their practice as musicians. They should use technologies appropriately and appreciate and understand a wide range of musical contexts and styles.

Pupils should be taught to:

- play and perform confidently in a range of solo and ensemble contexts using their voice, playing instruments musically, fluently and with accuracy and expression
- improvise and compose; and extend and develop musical ideas by drawing on a range of musical structures, styles, genres and traditions
- use staff and other relevant notations appropriately and accurately in a range of musical styles, genres and traditions
- identify and use the inter-related dimensions of music expressively and with increasing sophistication, including use of tonalities, different types of scales and other musical devices
- listen with increasing discrimination to a wide range of music from great composers and musicians
- develop a deepening understanding of the music that they perform and to which they listen, and its history.
Physical education

Purpose of study

A high-quality physical education curriculum inspires all pupils to succeed and excel in competitive sport and other physically-demanding activities. It should provide opportunities for pupils to become physically confident in a way which supports their health and fitness. Opportunities to compete in sport and other activities build character and help to embed values such as fairness and respect.

Aims

The national curriculum for physical education aims to ensure that all pupils:

- develop competence to excel in a broad range of physical activities
- are physically active for sustained periods of time
- engage in competitive sports and activities
- lead healthy, active lives.

Attainment targets

By the end of each key stage, pupils are expected to know, apply and understand the matters, skills and processes specified in the relevant programme of study.
Subject content

Key stage 1

Pupils should develop fundamental movement skills, become increasingly competent and confident and access a broad range of opportunities to extend their agility, balance and coordination, individually and with others. They should be able to engage in competitive (both against self and against others) and co-operative physical activities, in a range of increasingly challenging situations.

Pupils should be taught to:

- master basic movements including running, jumping, throwing and catching, as well as developing balance, agility and co-ordination, and begin to apply these in a range of activities
- participate in team games, developing simple tactics for attacking and defending
- perform dances using simple movement patterns.

Key stage 2

Pupils should continue to apply and develop a broader range of skills, learning how to use them in different ways and to link them to make actions and sequences of movement. They should enjoy communicating, collaborating and competing with each other. They should develop an understanding of how to improve in different physical activities and sports and learn how to evaluate and recognise their own success.

Pupils should be taught to:

- use running, jumping, throwing and catching in isolation and in combination
- play competitive games, modified where appropriate, such as badminton, basketball, cricket, football, hockey, netball, rounders and tennis, and apply basic principles suitable for attacking and defending
- develop flexibility, strength, technique, control and balance, for example through athletics and gymnastics
- perform dances using a range of movement patterns
- take part in outdoor and adventurous activity challenges both individually and within a team
- compare their performances with previous ones and demonstrate improvement to achieve their personal best.
Swimming and water safety

All schools must provide swimming instruction either in key stage 1 or key stage 2.

In particular, pupils should be taught to:

- swim competently, confidently and proficiently over a distance of at least 25 metres
- use a range of strokes effectively such as front crawl, backstroke and breaststroke
- perform safe self-rescue in different water-based situations.

Key stage 3

Pupils should build on and embed the physical development and skills learned in key stages 1 and 2, become more competent, confident and expert in their techniques, and apply them across different sports and physical activities. They should understand what makes a performance effective and how to apply these principles to their own and others’ work. They should develop the confidence and interest to get involved in exercise, sports and activities out of school and in later life, and understand and apply the long-term health benefits of physical activity.

Pupils should be taught to:

- use a range of tactics and strategies to overcome opponents in direct competition through team and individual games such as badminton, basketball, cricket, football, hockey, netball, rounders, rugby and tennis
- develop their technique and improve their performance in other competitive sports such as athletics and gymnastics
- perform dances using advanced dance techniques within a range of dance styles and forms
- take part in outdoor and adventurous activities which present intellectual and physical challenges and be encouraged to work in a team, building on trust and developing skills to solve problems, either individually or as a group
- analyse their performances compared to previous ones and demonstrate improvement to achieve their personal best
- take part in competitive sports and activities outside school through community links or sports clubs.
Key stage 4

Pupils should tackle complex and demanding physical activities. They should get involved in a range of activities that develops personal fitness and promotes an active, healthy lifestyle.

Pupils should be taught to:

- use and develop a variety of tactics and strategies to overcome opponents in team and individual games such as badminton, basketball, cricket, football, hockey, netball, rounders, rugby and tennis
- develop their technique and improve their performance in other competitive sports such as athletics and gymnastics, or other physical activities such as dance
- take part in further outdoor and adventurous activities in a range of environments which present intellectual and physical challenges and which encourage pupils to work in a team, building on trust and developing skills to solve problems, either individually or as a group
- evaluate their performances compared to previous ones and demonstrate improvement across a range of physical activities to achieve their personal best
- continue to take part regularly in competitive sports and activities outside school through community links or sports clubs.
