NAME REDACTED S.40(2),

Lines on supply chain below.

NAME REDACTED S.40(2)

### **Supply Chain**

The UK Government has a vision of a globally recognisable UK nuclear industry, with key companies forming an integral part of the domestic civil nuclear market and a large and diverse supporting supply chain across manufacturing, professional services and construction. If this is achieved successfully, UK companies could broaden their involvement with the major players on the global nuclear market. With this vision in mind, Government has, with industry, initiated work to develop the **Nuclear Supply Chain Action Plan** with the following objectives:

- To raise awareness across the supply chain of nuclear sector opportunities, to identify barriers preventing access to those opportunities and to develop actions from Government and Industry that will help place the supply chain in a stronger position to compete for those opportunities.
- To maximise UK economic activity and growth from the nuclear sector, including employment and business opportunities for the UK supply chain.
- To maximise local and regional opportunities, addressing long term unemployment and creating business clusters.
- To use the domestic nuclear market to provide a platform for enhancing a sustainable and successful UK civil nuclear industry and with areas of global commercial advantage enabling a domestic platform for export and economic growth and jobs

It is our intention to issue the action plan in December 2012.

NAME REDACTED S.40(2)

Just heard that SoS has a 20 minute slot with Luc Oursel tomorrow – do you know about it? Areva want to cover supply chains, skills, new build, REDACTED S.43(2) and probably something on Horizon. Suppose it may be linked to the report which was brought to our attention yesterday. Can you or NAME REDACTED S.40(2) please follow up as I think your side will be the main topic, but you may have been asked about this already?
