Essence of Care
2010
Benchmarks for Food and Drink
**Title**
ESSENCE OF CARE 2010

**Author**
DEPARTMENT OF HEALTH

**Publication Date**
1ST OCTOBER 2010

**Target Audience**
PCT CEs, NHS Trust CEs, Care Trust CEs, Foundation Trust CEs, Directors of Nursing, Local Authority CEs, Directors of Adult SSs, PCT PEC Chairs, Special HA CEs, Allied Health Professionals, GPs, Communications Leads, Emergency Care Leads, Directors of Children's SSs, Universities UK, RCN, RCM, AHPF, SHA Lead Nurses, SHA AHP Leads, Patient Organisations

**Circulation List**
PCT CEs, NHS Trust CEs, Care Trust CEs, Foundation Trust CEs, Directors of Nursing, Local Authority CEs, Directors of Adult SSs, PCT PEC Chairs, Special HA CEs, Allied Health Professionals, GPs, Communications Leads, Emergency Care Leads, Directors of Children's SSs, Voluntary Organisations/NDPBs, Universities UK, RCN, RCM, AHPF, SHA Lead Nurses, SHA AHP Leads, Patient Organisations

**Description**
Essence of Care 2010 includes all the benchmarks developed since it was first launched in 2001, including the latest on the Prevention and Management of Pain. All the benchmarks have been reviewed to reflect the current views of people requiring care, carers and staff

**Cross Ref**
Essence of Care 2001, Communication, Promoting Health and Care Environment

**Superseded Docs**
Essence of Care 2001 Gateway No. 4656 and 8489

### Factor 10
Monitoring ............................................................................. 22
Best Practice – General Indicators

The factors and indicators for each set of benchmarks focus on the specific needs, wants and preferences of people and carers. However, there are a number of general issues¹ that must be considered with every factor. These are:

**People’s experience**

- People feel that care is delivered at all times with compassion and empathy in a respectful and non-judgemental way
- The best interests of people are maintained throughout the assessment, planning, implementation, evaluation and revision of care and development of services
- A system for continuous improvement of quality of care is in place

**Diversity and individual needs**

- Ethnicity, religion, belief, culture, language, age, gender, physical, sensory, sexual orientation, developmental, mental health, social and environmental needs are taken into account when diagnosing a health or social condition, assessing, planning, implementing, evaluating and revising care and providing equality of access to services

**Effectiveness**

- The effectiveness of practice and care is continuously monitored and improved as appropriate
- Practice and care are evidence-based, underpinned by research and supported by practice development

**Consent and confidentiality**

- Explicit or expressed valid consent is obtained and recorded prior to sharing information or providing treatment or care

---

People’s best interests are maintained where they lack the capacity to make particular decisions.  
Confidentiality is maintained by all staff members

**People, carer and community members’ participation**

- *People*, carers’ and community members’ views and choices underpin the development, planning implementation, evaluation and revision of personalised care and services and their input is acted upon.
- Strategies are used to involve *people* and carers from isolated or hard to reach communities.

**Leadership**

- Effective leadership is in place throughout the organisation

**Education and training**

- Staff are competent to assess, plan, implement, evaluate and revise care according to all *people’s* and carers’ individual needs.
- Education and training are available and accessed to develop the required competencies of all those delivering care.
- *People* and carers are provided with the knowledge, skills and support to best manage care.

**Documentation**

- Care records are clear, maintained according to relevant guidance and subject to appropriate scrutiny.
- Evidence-based policies, procedures, protocols and guidelines for care are up-to-date, clear and utilised.

**Service delivery**

- Co-ordinated, consistent and accessible services exist between health and social care organisations that work in partnership with other relevant agencies.

---

Care is integrated with clear and effective communication between organisations, agencies, staff, people and carers.

Resources required to deliver care are available.

**Safety**

Safety and security of people, carers and staff is maintained at all times.

**Safeguarding**

Robust, integrated systems are in place to identify and respond to abuse, harm and neglect.

All agencies working with babies, children and young people and their families take all reasonable measures to ensure that the risks of harm to babies, children’s and young people’s welfare are minimised.

---

Benchmarks for Food and Drink

Agreed person-focused outcome

*People* are enabled to consume food and drink (orally) which meets their needs and preferences

Definitions

For simplicity, *people requiring care* is shortened to *people (in italics)* or omitted from most of the body of the text. *People* includes babies, children, young people under the age of 18 years and adults. *Carers* (for example, members of families and friends) are included as appropriate.

The term *carers* refers to those who ‘look after family, partners or friends in need of help because they are ill, frail or have a disability. The care they provide is unpaid’ (adapted from Carers UK, 2008). Please note, within these benchmarks it is acknowledged that the term ‘carer’ can include children and young People aged under 18 years.

The term *staff* refers to any employee, or paid and unpaid worker (for example, a volunteer), who has an agreement to work in that setting and is involved in promoting well-being.

The *care environment* is defined as an area where care takes place. For example, this could be a building or a vehicle.

The *personal environment* is defined as the immediate area in which a person receives care. For example, this can be in a person’s home, a consulting room, hospital bed space, prison, or any treatment/clinic area.
**Agreed person-focused outcome**

_**People** are enabled to consume food and drink (orally) which meets their needs and preferences_

Factor 1
Promoting health

Please note that this benchmark must be used in conjunction with the How to use Essence of Care 2010 document

POOR PRACTICE
No attempt is made to encourage people to eat and drink to promote their own health

BEST PRACTICE
People are encouraged to eat and drink in a way that promotes their health

Indicators of best practice for factor 1
The following indicators support best practice for eating and drinking needs and preferences:

a. general indicators (see page 4) are considered in relation to this factor

b. opportunities are created or used to advise people on eating and drinking to promote their own health, for example, discussion, displays and handouts

c. staff in different areas work together to support people to eat and drink in a way that promotes health including, where necessary, to prevent inappropriate weight loss or gain

d. education is available for staff in the promotion of healthy eating

e. add your local indicators here
Factor 2
Information

Please note that this benchmark must be used in conjunction with the How to use Essence of Care 2010 document

POOR PRACTICE
No information is provided on how to obtain food and drink

BEST PRACTICE
People and carers have sufficient information to enable them to obtain their food and drink

Indicators of best practice for factor 2

The following indicators support best practice for eating and drinking needs and preferences:

a. general indicators (see page 4) are considered in relation to this factor

b. a range of information is available in a user-friendly format to meet people’s nutritional needs and this is shared with people, carers and staff

c. those assisting with the completion of menus or the obtaining of food have had training to ensure their competency in selecting meals to meet needs

d. the timing for placing food and drink orders with a centralised kitchen supports people’s choice

e. add your local indicators here
Factor 3
Availability

Please note that this benchmark must be used in conjunction with the How to use Essence of Care 2010 document

POOR PRACTICE
People cannot access food and drink

BEST PRACTICE
People can access food and drink at any time according to their needs and preferences

Indicators of best practice for factor 3

The following indicators support best practice for eating and drinking needs and preferences:

a. general indicators (see page 4) are considered in relation to this factor
b. a variety of hot and cold meals and drinks are available that meet people’s needs and preferences
c. hot and cold food and drink are available and provided outside meal times
d. snacks are available
e. food storage and preparation facilities that meet the requirements of national guidance are available
f. facilities are available to store food brought in, for example, by carers and friends
g. add your local indicators here
Factor 4
Provision

Please note that this benchmark must be used in conjunction with the How to use Essence of Care 2010 document

**POOR PRACTICE**
Food and drink does not meet people’s needs

**BEST PRACTICE**
People are provided with food and drink that meets their individual needs and preferences

Indicators of best practice for factor 4

The following indicators support best practice for eating and drinking needs and preferences:

a. *general indicators (see page 4) are considered in relation to this factor*

b. there is a choice of food and drink that ensures that *people’s* needs and preferences are met. This includes provision of nutritional food and drink for those at risk of malnourishment at home or in the community

c. there are arrangements for ensuring therapeutic and special formulated diets are provided, including food and drink of the appropriate texture and consistency

d. *people* are provided with the food they ordered in the appropriate portion size
e. quality of nutrition care is supported by close working of catering staff and care providers
f. catering and care providers work together to ensure people’s individual needs and preferences are met
g. *add your local indicators here*
Factor 5
Presentation

Please note that this benchmark must be used in conjunction with the *How to use Essence of Care 2010* document.

**Indicators of best practice for factor 5**

The following indicators support best practice for eating and drinking needs and preferences:

a. *general indicators (see page 4) are considered in relation to this factor*

b. the serving method used meets people’s needs and preferences, for example, whether on a plate or in a container

c. food and drink packaging is removed at the appropriate time

d. food is served at a temperature to ensure safety and to meet people’s preferences

e. serving and presentation are the responsibility of a specific member of staff to ensure food and drink are appealing

f. a suitable range of crockery and utensils is available

g. *add your local indicators here*
Factor 6
Environment

Please note that this benchmark must be used in conjunction with the How to use Essence of Care 2010 document

POOR PRACTICE
Environmental factors prevent people eating and drinking

BEST PRACTICE
People feel the environment is conducive to eating and drinking

Indicators of best practice for factor 6
The following indicators support best practice for eating and drinking needs and preferences:

a. general indicators (see page 4) are considered in relation to this factor

b. measures are taken to ensure that the environment is conducive to people’s needs. This includes consideration of dining areas, tables and seating

c. assistance with using toilet facilities and hand washing is offered prior to eating and drinking

d. inappropriate activity at meal times, such as cleaning and routine activities, are curtailed, for example, as in the ‘protected meal times’ initiative

e. add your local indicators here
Factor 7
Screening and assessment

Please note that this benchmark must be used in conjunction with the How to use Essence of Care 2010 document

POOR PRACTICE
People’s nutritional needs are not ascertained

BEST PRACTICE
People who are screened on initial contact and identified at risk receive a full nutritional assessment

Indicators of best practice for factor 7
The following indicators support best practice for eating and drinking needs and preferences:

a. general indicators (see page 4) are considered in relation to this factor

b. screening takes place on admission to hospital and care homes, on registration at GP surgeries, at their first clinic appointment or on a first visit to People’s homes. Screening is repeated for people when there is clinical concern, or a risk of malnutrition or morbid obesity and/or repeated weekly for people in hospital

c. screening should be undertaken using a validated evidence-based tool such as the Malnutrition Universal Screening Tool (MUST). Screening should include body mass index (BMI), percentage unintentional weight loss or gain, time over which nutrient intake has been unintentionally reduced or increased, and/or the likelihood of future impaired or increased nutrient intake
d. a full assessment using a validated evidence-based tool and appropriate referral is undertaken for people who are identified initially as at risk of malnutrition or as morbidly obese

e. screening and assessment is undertaken in partnership with people (where possible)

f. nutritional support should be considered for those people who are identified initially as at risk of malnutrition or who are malnourished

g. add your local indicators here
Factor 8
Planning, implementation, evaluation and revision of care

Please note that this benchmark must be used in conjunction with the How to use Essence of Care 2010 document

**POOR PRACTICE**
*People* do not have a plan of care

**BEST PRACTICE**
*People’s* care is planned, implemented, continuously evaluated and revised to meet individual needs and preferences for food and drink

Indicators of best practice for factor 8

The following indicators support best practice for eating and drinking needs and preferences:

a. *general indicators (see page 4) are considered in relation to this factor*

b. planning, implementing, evaluating and revising care involves *people* and their carers, as well as all relevant members of staff

c. care plans or care pathways designed to meet *people’s* nutritional needs are used and outcomes measured. The results are used to improve care

d. evaluation leads to changes designed to meet nutritional requirements
e. user-friendly information concerning nutrition management is available for people, carers and staff

f. audit is undertaken and the results disseminated and used to inform practice development

g. add your local indicators here
Factor 9
Assistance

Please note that this benchmark must be used in conjunction with the How to use Essence of Care 2010 document

**POOR PRACTICE**
*People* do not receive assistance to eat

**BEST PRACTICE**
*People* receive the care and assistance they require with eating and drinking

Indicators of best practice for factor 9

The following indicators support best practice for eating and drinking needs and preferences:

a. *general indicators (see page 4) are considered in relation to this factor*
b. a system is in place to ensure those *people* requiring assistance to eat and drink receive it
c. the level of assistance required is assessed on every occasion that food and drink is served
d. assistance to eat and drink is provided according to *people’s* needs. This may include the positioning of *people* requiring care, providing appropriate utensils, feeding *people* or supporting them to buy and make their own meals at home or in the community
e. carers are involved in assisting *people* to eat and drink (where appropriate)
f. education programmes are in place to teach *people* with specific needs to feed themselves

g. independence to eat and drink is promoted. Food and drink are placed in easy reach of *people* to facilitate this.

h. *people’s* dignity is maintained while eating and drinking

i. relevant staff are involved in providing advise and/or assistance, for example, dieticians, nutritionists, catering staff, speech and language therapists, occupational therapists and physiotherapists

j. *add your local indicators here*
Factor 10
Monitoring

Please note that this benchmark must be used in conjunction with the How to use Essence of Care 2010 document

**POOR PRACTICE**
*People’s food and drink intake is unknown*

**BEST PRACTICE**
*People’s food and drink intake is monitored and recorded*

**Indicators of best practice for factor 10**

The following indicators support best practice for eating and drinking needs and preferences:

a. *general indicators (see page 4) are considered in relation to this factor*

b. a system is in place to use information on food and drink intake to identify those at risk of malnutrition or morbid obesity and to amend care to meet *people’s needs*

c. food and drink intake is monitored and documented by *people*, carers and staff (as appropriate)

d. *people* who are vulnerable and/or are designated temporarily ‘nil by mouth’ are monitored to identify those at risk of malnutrition and/or dehydration
e. food is served, and food containers are collected, by a person who is able to accurately report people’s food and drink intake to the relevant person
f. *add your local indicators here*
Notes
