

# A Population numbers and GDP deflators

A.1 This annex presents the population numbers and GDP deflators used in this release.

## Population numbers by country and region

A.2 The population numbers used in Chapter A and B are in the table below. The mid-year numbers are then directly applied to the relevant financial year (e.g. mid 2010 to financial data for 2010-11).

## GDP deflators

A.3 A number of the tables in this publication give figures in real terms. Real terms figures are the current price outturns or plans adjusted to a constant price level by excluding the effect of general inflation as measured by the GDP deflator at market prices. The real terms figures in this publication are given in 2010-11 prices. The GDP deflators used in this publication are those given below. The most up to date deflators can be found on the Treasury website<sup>2</sup>.
