General Notes

Table Conventions

- . = "not applicable"
- .. = "not available"
- = less than the rounding threshold. In tables rounded to the nearest 100, this represents a figure of less than 50. In tables rounded to the nearest 5, this represents a figure of less than 5.

Caseload figures are rounded to the nearest 100.

Enforcement figures are rounded to the nearest 5.

Appeals figures are rounded to the nearest 5.

Collections figures are rounded to the nearest £0.1m

Outstanding arrears figures are rounded to the nearest £1m.

Data

A component of the old scheme numbers is taken from a 5% sample of cases on the old CSCS computer system. The old scheme figures and the overall totals are therefore subject to a degree of sampling variation. This sampling variation is greater in proportional terms when the number estimated is small. The only exception to this is arrears distribution where 100% CSCS data is used.

CS2 data is a 100% download of all cases administered on the CS2 computer system. Updates are received on a daily basis and processed at each month end.

Clerical Case Database is a 100% download of all cases administered off system. These cases are defined as cases which, due to technical issues, cannot be processed on the computer system or are cases with a manual payment. Cases with a manual payment are those that are processed on the computer system but payments to the parent with care have to be made manually.

Accuracy figures are based on checking a sample of cases that have had a new assessment carried out. In 2011/12 for cases administered on the CS2 system, this represented a sample of approximately 1.66% of the total population.

Note about sampling error

As some of the data in these tables are derived from a 5% sample the numbers, which appear in the tables, are only estimates of the true values. The people included in the sample are 5% of the population of claimants.

Although the figures are estimates, it is possible to say with confidence that the true value, corresponding to any particular number in the tables, lies within a certain range - the confidence interval.

Changes in this QSS

There are no changes in this QSS.

Previously it was announced that we intended to publish additional tables and breakdowns to increase understanding of the CSA's collections and arrears.

Work is ongoing to develop and finalise proposals and additional data will be published when it is considered appropriate to do so.

Overview

This National Statistics publication is released on the 14 November 2012 according to arrangements approved by the [UK Statistics Authority](#).

The Department for Work and Pensions (DWP) is responsible for the child maintenance system in Great Britain. It funds information and support for separating parents and runs the statutory child maintenance schemes, currently operated through the Child Support Agency (CSA).

Its main statutory objective is to:

- Maximise the number of those children who live apart from one or both of their parents for whom effective maintenance arrangements are in place.

Its main objective is supported by the following subsidiary objectives:

- To encourage and support the making and keeping by parents of appropriate voluntary maintenance arrangements for their children;
- To support the making of applications for child support maintenance under the Child Support Act 1991 (c. 48) and to secure compliance when appropriate with parental obligations under that Act.

DWP assumed responsibility for the CSA from the Child Maintenance and Enforcement Commission on the 1 August 2012, following an announcement on 14 October 2010 that the Commission would become an executive agency of DWP as part of the Public Bodies Reform. The Commission had responsibility for the CSA between the 1 November 2008 and the 31 July 2012, prior to that DWP had responsibility for the CSA.

This publication contains the most up-to-date tables and breakdowns on the CSA's two existing statutory child maintenance schemes. These are cases operating under Current Scheme rules on the CS2 computer system and those operating under Old Scheme rules on both the CS2 and CSCS computer systems. A number of cases covering both schemes are also being administered off system.

The data covers the periods when DWP had responsibility for the CSA, and when the Commission had responsibility. The data also covers the period both before and after the removal of the compulsion on parents with care who are claiming benefits to use the CSA to collect or arrange maintenance payments. The change, which came into force on October 27 2008, affects around 400,000 CSA clients who can now choose to make private maintenance arrangements with the non-resident parent. Previous versions of the Summary of Statistics can be found on the [DWP site](#).

Read the [Child Support Agency Quarterly Summary Statistics first release](#).

More details on DWP policy statements including quality guidelines can be found at:

<http://statistics.dwp.gov.uk/asd/index.php?page=policy>

Key facts at September 2012

- The Agency was dealing with **1,113,900** cases of which **839,300** cases were operating under Current Scheme rules and **274,600** cases under Old Scheme rules. The overall caseload continues on a downward trend seen from September 2008 where the caseload was 1,265,200. Part of this reduction can be attributed to the removal of suspended Old Scheme cases in January 2010 and the general decline of new applications intake since October 2008, following the removal of the compulsion on parents with care who are claiming benefits to use the CSA.
- **698,200** cases were paying maintenance out of **872,800** cases with a child maintenance liability. This represents a maintenance outcome rate of **80.0%** and is a slight decrease from 80.6% at June 2012.
- The proportion of positive maintenance outcomes has risen steadily from December 2010 when it was 75.8%, and improved significantly from March 2005, prior to the start of the Operational Improvement Plan when it was 62.9%. This plan was designed to improve performance as well as the service given to clients by increasing the amount of money collected, achieving greater compliance alongside re-designing the child maintenance system. The Operational Improvement Plan can be found: <http://webarchive.nationalarchives.gov.uk/20120104120950/http://www.childmaintenance.org/en/pdf/oip.pdf>
- **899,400** children were benefiting from maintenance which is down slightly from 900,800 in June 2012. The number of children benefiting from maintenance has increased by 338,300 since March 2005.
- Maintenance of **£305.6m** was collected or arranged by the CSA in the quarter to September 2012. This is up by £4.4m from £301.2m collected and arranged in the previous quarter. Maintenance Collected and arranged has shown a significant improvement from March 2005 when it was £207.7m.
- **£1,204.5m** maintenance was collected or arranged in the 12 months to September 2012 of which **£113.2m** was arrears. This is up from £1,194.8m in the 12 months to June 2012 of which £115.8m was arrears and up from £798.3m of which £68.2m was arrears since the introduction of the Operational Improvement Plan in March 2005.
- **87.7%** of cases received in June 2012 were cleared within 12 weeks. This is a decrease of 1.3% compared to June 2011, where 89.0% of cases received were cleared within 12 weeks. There has been a significant improvement in the time taken to clear cases since March 2005 where only 39.7% were cleared within 12 weeks.
- **17,100** applications remain uncleared. The number of uncleared applications are the same as September 2011 but have increased since June 2012 when it was 15,900. Since March 2005 the volume of uncleared work has reduced by 94% from 310,000.
- In **95.3%** of assessed cases, the non-resident parent is male.
- In **45.3%** of assessed cases the non-resident parent is not employed, **46.2%** are employed and **8.5%** self employed.

- Non-resident parents owed a total of **£3.814bn** in September 2012.¹ 58.6% of cases with arrears owe £1,000 or less. However arrears of £1,000 or less make up only 5.1% of the total arrears owed.
- **7,600** full time equivalent staff were employed to support the Child Maintenance system. Net administration costs in 2011/12 for the delivery of the statutory maintenance schemes were **£420m**.²
- **8.1** days were lost due to sickness per full time equivalent in the 12 months to September 2012. This represents a decrease from September 2011 where it was 8.4 days.
- **5,100** complaints were received in the quarter to September 2012 while **5,000** complaints were closed. There were **1,900** complaints with outstanding actions as at September 2012. This compares with 5,000 complaints received in the previous quarter, 4,800 closed and 1,800 with outstanding actions.
- Of the complaints received this quarter **50%** were received from a non-resident parent and **49%** from a parent with care.
- **99.3%** of complaints in the 9 months to September 12 were resolved or had a resolution plan in place within 15 days. This compares to 99.6% in the 9 months to September 2011.
- In the quarter to September 2012, **1,370** appeals were received which is a reduction of 50 from June 2012, when it was 1,420. In the quarter to September 2012, **1,530** appeals were either withdrawn, had a decision revised or referred to The Tribunal Service, leaving **1,140** appeals outstanding.
- In the 12 months to September 2012, it took on average, **8.3** weeks to clear appeals through the first stage of the appeals process and **4.3** days for the Agency to revise maintenance calculations following a decision from The Tribunal Service.
- **640** appeals were received in the quarter to September 2012 from clients who had been through the Agency dispute process. This is a decrease from 800 in the quarter to September 2011.
- **863,100** telephone calls were answered in the 3 months to September 2012, with the calls answered from the queue in an average of **53** seconds. This compares to the 3 months to September 2011 where 1,011,200 telephone calls were answered, with the average waiting time of 10 seconds⁴.
- At the end of September 2012, rolling 12 month performance on accuracy to within £1 or 2% of the correct calculation stood at **96.4%**³ an increase of 1.7% on September 2011 when it stood at 94.7%.
- At the end of September 2012, rolling 12 month performance on accuracy showed that assessments were **98.4%** accurate³, an increase of 0.3% on September 2011 when it was 98.1%.

1. Arrears figure has been revised following adjustments in the 2008/09 and 2009/10 accounts which have been audited by NAO and published. Arrears figures for 2010/11 onwards have also been adjusted but these are yet to be approved and audited.
2. Net administration costs for 2011/12 have been published at:
<http://www.dwp.gov.uk/docs/cmec-report-and-accounts-11-12.pdf>.
3. Accuracy figures are derived by checking a sample of cases on which new assessments have been carried out.
4. Certain Social Media sites have been advertising alternative numbers for contacting the Child Support Agency. This has resulted in a greater number of calls being received on lines that are not resourced to cope with customer demand, and the dip in performance is attributable to this issue. A solution has been implemented which should bring performance back to expected levels next quarter.

Summary of Key Measures

The table below reflects the performance of cases managed on the core systems and cases managed off system.

Key Measures							
	March 2008	March 2009	March 2010	March 2011	March 2012	September 2012	March 2013 Indicator
Uncleared applications	121,900	43,700	18,300	14,600	13,800	17,100	-
Maintenance Outcomes % of cases with a current liability receiving maintenance in the Quarter	66.8%	70.6%	77.1%	77.6%	79.7%	80.0%	80%
Positive Outcomes Cases with a positive maintenance outcome	561,400	593,500	647,700	668,600	695,800	698,200	-
Positive Liabilities Cases in which maintenance due	840,100	841,000	840,000	861,700	872,900	872,800	-
Number of children benefiting at quarter end	749,300	780,500	845,700	867,800	899,700	899,400	900,000
Maintenance collected or arranged (12 month rolling figure)	£1,010.0m (of which £126.4m arrears)	£1,131.7m (of which £158.1m arrears)	£1,141.0m (of which £147.3m arrears)	£1,150.2m (of which £125.1m arrears)	£1,186.6m (of which £118.5m arrears)	£1,204.5m (of which £113.2m arrears)	£1,200m
Throughput							
12 weeks (Dec intake)	76.8%	81.2%	86.1%	88.0%	88.7%	87.7% (Jun 12 intake)	-
18 weeks (Oct intake)	83.3%	81.3%	92.5%	92.8%	94.0%	94.0% (Apr 12 intake)	-
26 weeks (Sep intake)	88.8%	90.2%	95.3%	96.3%	98.0%	96.6% (Mar 12 intake)	-

Notes:

- Measures are against the statutory maintenance service only.
- High level figures including performance of cases managed off system are only available from October 2006. Detailed breakdowns of the cases managed off system by scheme are only available from April 2008. Therefore detailed figures in the rest of this publication may differ from overall Agency figures in this table.
- Performance of cases with manual payments are only available from March 2009.
- Current Scheme uncleared application figures are subject to revision in future publications. Future revisions will reflect any new information which is received after the production of this table.
- Maintenance collected figures are subject to revision following the laying of the Client Fund accounts.
- Arrears collected figures include arrears of maintenance that have been linked to an arrears collection schedule. Investigations show that a proportion of arrears of maintenance collected have been incorrectly linked to a regular collection schedule and therefore classified as regular maintenance in the above table. Work is underway to correctly classify arrears collections in future publications.
- Collections on all cases managed off system are presumed to be regular collections rather than collections of arrears resulting in the potential under counting of arrears.
- Collections figures from 10/11 and 11/12 have yet to be audited and finalised.
- Figures relating to maintenance outcomes, positive outcomes, positive liabilities, the number of children benefiting and maintenance collected/arranged include Old Scheme cases held on the CSCS computer system. CSCS data included in this table is based on a 5% sample.

Caseload

This shows the number of cases currently being handled by the Agency and the division of these between the Old and Current Scheme.

- The number of live and assessed cases that the Agency handles has decreased to **1,113,900** in the quarter to September 2012 compared to 1,118,200 in the quarter to June 2012. Over the same period, Old Scheme cases have decreased from 292,000 to **274,600** and Current Scheme cases have increased from 826,200 to **839,300**.

Table 1: Quarterly Caseload by Scheme: Live and Assessed Cases

Quarter ending:	Overall Agency	Current Scheme	Old Scheme
Mar-03	995,100	100	995,000
Jun-03	992,400	7,100	985,400
Sep-03	999,700	34,100	965,600
Dec-03	1,000,700	65,200	935,400

Jun-10	1,150,800	721,300	429,500
Sep-10	1,153,900	738,300	415,600
Dec-10	1,152,200	753,400	398,800
Mar-11	1,145,700	769,200	376,500
Jun-11	1,143,400	781,500	362,000
Sep-11	1,142,600	795,000	347,600
Dec-11	1,140,500	808,700	331,800
Mar-12	1,128,400	818,000	310,400
Jun-12	1,118,200	826,200	292,000
Sep-12	1,113,900	839,300	274,600

Notes:

- Figures from April 2008 reflect the performance of cases managed off system.

2. Figures include Old Scheme cases with a full or interim maintenance assessment as well as Current Scheme cases with a full maintenance calculation or default maintenance decision.
3. A drop in the caseload can be seen from January 2010 which can be attributed to the removal of suspended cases on the CSCS computer system.
4. Live and assessed caseload includes open cases with an ongoing child maintenance liability, cases which have been assessed as nil liability and cases where arrears of maintenance have been requested.
5. Old Scheme figures include cases held on the CSCS computer system. CSCS data included in this table is based on a 5% sample.

Clerical Case Database

This shows the number of cases being managed off system.

A number of Agency cases are being maintained on the Clerical Case Database and managed off system. These are defined as cases which, due to technical issues, cannot be processed on the core computer systems. The majority of these have been on the CS2 computer system at some point. Work has been completed to include these cases in various tables throughout this publication where possible capturing the latest status of those cases managed off system. These tables have been footnoted accordingly.

- The number of live and assessed cases being managed off system has increased from 104,600 in June 2012 to **105,400** in September 2012. As a result of the issues surrounding the CS2 computer system there has been a continued increase in the number of cases on the Clerical Case Database since March 2005. The rate of increase slowed down significantly during 2011/2012 as a result of system fixes and process improvements, inefficiencies remain.

Table 2: Clerical Case Database

Quarter Ending:	Off System cases
Mar-05	10,500
Jun-05	12,600
Sep-05	14,000
Dec-05	16,100
Mar-06	19,000
Jun-06	21,100
Sep-06	23,200
Dec-06	25,100
Mar-07	27,700
Jun-07	31,900
Sep-07	33,000
Dec-07	33,000
Mar-08	36,900
Jun-08	39,300
Sep-08	43,600
Dec-08	48,800
Mar-09	59,800
Jun-09	66,100
Sep-09	75,400
Dec-09	83,300
Mar-10	87,700
Jun-10	92,100
Sep-10	95,700
Dec-10	98,400
Mar-11	100,200
Jun-11	101,500
Sep-11	101,800
Dec-11	103,000
Mar-12	104,100
Jun-12	104,600
Sep-12	105,400

Notes:

1. Figures include both live and suspended cases that are administered on the Agency's Clerical Case Database.

Intake, Clearances and Uncleared work

This shows the total intake of Current Scheme applications, total clearances and total remaining uncleared applications.

- New applications to the Agency increased to **30,900** in the quarter to September 2012. This is up from 29,200 in the quarter to June 2012. Applications received from Jobcentre Plus ceased from October 2008 following the repeal of Section 6, the legal requirement which previously compelled parents with care on income related benefits to use the services of the Child Support Agency.
- There were **29,700** Current Scheme clearances in the quarter ending September 2012 with the total number of uncleared applications across all schemes increasing to **17,100**. This compares to 26,700 clearances in the quarter to June 2012 at which time uncleared applications stood at 15,900.

Graph 1: Current Scheme Intake/Clearances

Notes:

1. A Current Scheme clearance is defined under the following circumstances; If a maintenance calculation has been carried out and a payment arrangement between the parent with care and the non-resident parent is in place; an application has been cancelled or withdrawn; a maintenance calculation has been carried out and nil liability established; a parent with care has been identified as claiming Good Cause or is subject to a Reduced Benefit Decision; or the application has been closed.
2. Intake figures count applications for Child Support. Not all applications become live cases. Similarly, clearances count all applications cleared and not just live cases.
3. A change in legislation in October 2008 removed the compulsion for parents with care on income based benefits (Income Support or Jobseeker's Allowance (Income Based)) to pursue a claim for child support through the Agency. After this date, it is expected that some parents with care will opt to end their child support claim with CSA.
4. In the run up to the change, a further legislative repeal in July 2008 meant that single parents making a new claim for income based benefit would no longer be referred to CSA. Some will have made direct arrangements with the Agency, but they are not compelled to do so.
5. These figures are subject to revision in future publications. Future revisions will reflect any new information which is received after the production of this table.

Intake/Clearances and Uncleared work

This shows the total intake of Current Scheme applications, total clearances and total remaining uncleared applications.

Table 3: Intake/Clearances and Uncleared work

Quarter ending:	Current Scheme			Uncleared Current Scheme Applications	Uncleared Old Scheme Applications
	Quarterly Intake	Quarterly Clearances	Total Uncleared Applications		
Mar-03	11,100	1,400	259,900	17,600	242,300
Jun-03	60,500	14,600	279,700	63,500	216,200
Sep-03	73,300	37,900	293,900	98,900	195,000

Notes:

1. Intake and clearances figures exclude the performance of cases managed off system.
2. Uncleared application figures include the performance of cases managed off system from October 2006.
3. Old Scheme uncleared applications relate to cases that have not been assessed.
4. These figures are subject to revision in future publications. Future revisions will reflect any new information which is received after the production of this table.
5. In January and February 2007 CSA implemented a computer system change to free-up applications that could not be progressed due to system issues. The change involved the deletion of around 11,750 Current Scheme applications and the subsequent re-entry of the vast majority back onto the system. This has had the impact of artificially increasing the clearance and intake figures for January and February by 1,500 and 10,250 respectively.

6. Intake figures in this table may differ from intake figures on page 18. Intake figures in the table above are based on the date the case was first entered on the CS2 computer system. Intake figures on page 18 are based on the date when a customer first made contact with the Agency.
7. A small sample of cases indicates that most uncleared applications reported as Old Scheme are in fact Current Scheme.

Closures

This shows the total number of Current Scheme cases that are closed or cancelled/withdrawn within the quarter.

- The number of Current Scheme case closures increased by 18.5% from 14,600 in the quarter to June 2012 to **17,300** in the quarter to September 2012.
- In the quarter to September 2012, **9,400** applications were not pursued by the applicant and in **6,500** cases the application was not eligible or no longer valid. This covers closures both prior to and following a calculation.
- A more detailed breakdown of closures **following** calculation is included in Annex A.

Time to clear applications

This shows the length of time taken to clear applications received by the Agency each month.

- **87.7%** of intake received in June 2012 was **cleared within 12 weeks**. This is a slight decrease from 88.1% 3 months earlier.
- **94.0%** of intake received in April 2012 was **cleared within 18 weeks**. This is a slight decrease from 94.1% 3 months earlier.
- **96.6%** of intake received in March 2012 was **cleared within 26 weeks**. This is a slight decrease from 97.0% 3 months earlier.

Graph 2: Time to Clear Applications

Time to Clear Applications

This shows the length of time taken to clear applications received by the Agency each month.

Table 4: Time to Clear applications

Month of Intake	Intake	Within 12 weeks	%	Within 18 weeks	%	Within 26 weeks	%	Total cleared	%	Not cleared	%

Notes:

1. A clearance above is defined under the following circumstances; If a maintenance calculation has been carried out and a payment arrangement between the parent with care and the non-resident parent is in place; an application has been cancelled or withdrawn; a maintenance calculation has been carried out and nil liability established; a parent with care has been identified as claiming Good Cause or is subject to a Reduced Benefit Decision; or the application has been closed.
2. This table counts applications for Child Support. Not all applications become live cases.
3. Time to clearance is calculated as the time from first contact with the non-resident parent or parent with care until clearance of the application.
4. The figures in this table are subject to revision in future publications. Future revisions will reflect any new information which is received after the production of this table.
5. '*' indicates that the time band is incomplete. This means that whilst some cases will have been cleared within the time band, since the period had not yet fully elapsed, complete data is not available to allow meaningful comparison with earlier periods.
6. Intake figures in this table may differ from intake figures on page 15. Intake figures in the above table are based on the date when a customer first made contact with the Agency. Intake figures on page 15 are based on the date the case was first entered on the CS2 computer system.

Caseload Status

This shows the status of all cases with an assessment or calculation.

- The overall live and assessed caseload now stands at **1,113,900**. This is a reduction of 4,300 from June 2012 and 28,700 less than the caseload as at September 2011. The caseload has been on a downward trend since September 2008 where it stood at 1,265,200.
- The average weekly maintenance liability (including nil liability) stands at **£23.60** excluding nil liability the average is **£33.40**.
- A breakdown by scheme is included in Annex A.

Table 5: Caseload Status

Quarter ending:	Overall	Nil Liability	Assessed not Charging	Nil Compliant	Positive Outcome Caseload

Notes:

1. Figures from April 2008 reflect the performance of cases managed off system and cases where a payment has been made manually as well as cases on the CS2 and CSCS computer systems.

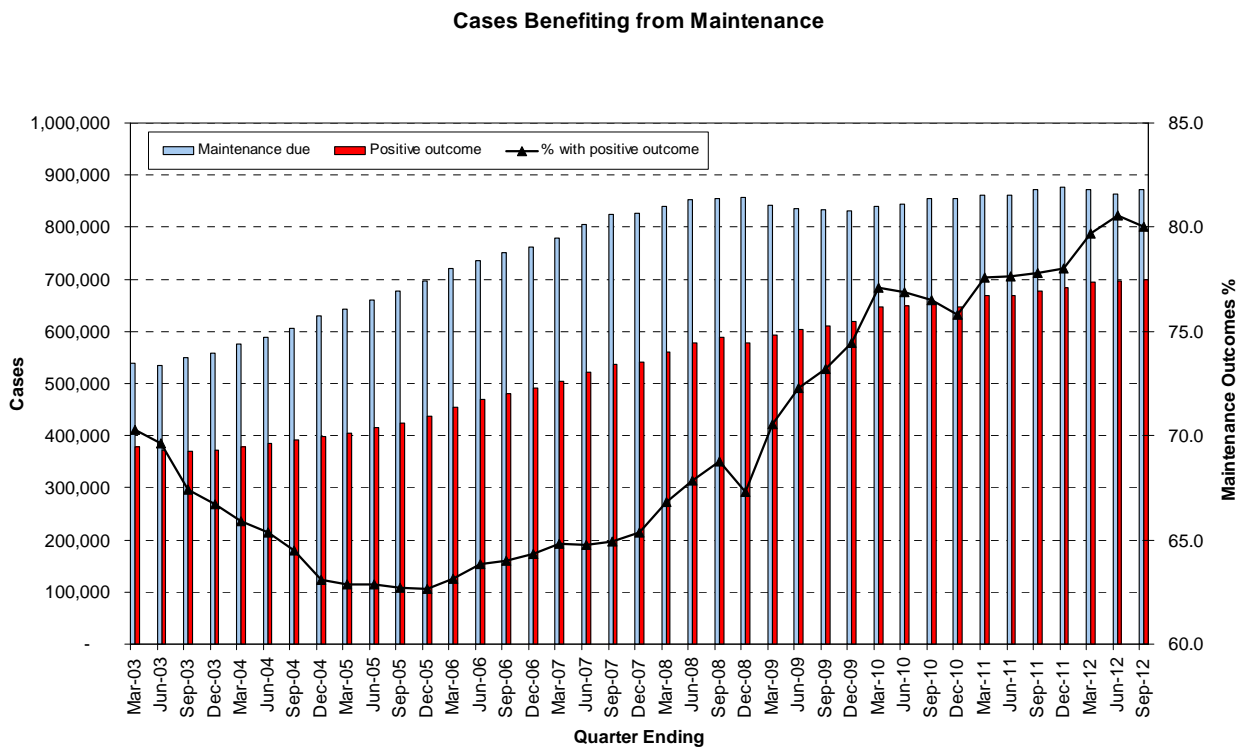

2. Figures include Old Scheme cases with a full or interim maintenance assessment as well as Current Scheme cases with a full maintenance calculation or default maintenance decision.
3. Cases are classed as compliant if they are currently open, classed as collection service cases at the end of the month, and have been charged and paid money via the collection service (either regular maintenance and/or arrears) over the preceding quarter.
4. Cases are classed as assessed and not charging (that is to say they have a positive liability but no active charging schedule is in place) if they have this status at the end of the quarter, and there have been no charges or receipts via the collection service over the period.
5. "Nil liability" means that no payments were expected on the case and "Nil compliant" means that payments were expected but none were received.
6. Cases are classed as maintenance direct if this is their status at the end of the quarter.
7. 'Others with Receipts' are cases which are nil liability, assessed and not charging or cancelled/withdrawn and where a child maintenance receipt has been received in the quarter.
8. Cases which are compliant, maintenance direct or 'Others with Receipts' make up the positive outcome caseload of total cases paying maintenance.
9. A drop in the caseload can be seen from January 2010 which can be attributed to the removal of suspended cases on the CSCS computer system.
10. Figures include Old Scheme cases held on the CSCS computer system. CSCS data included in this table is based on a 5% sample.

Cases/Children Benefiting from Maintenance

This shows the number of cases from which a payment was received or which had a maintenance direct arrangement in place over a 3 month period and the number of children benefiting from such a payment or arrangement.

- The percentage of cases where the non-resident parent is paying child maintenance has decreased from 80.6% in the quarter to June 2012 to **80.0%** in the quarter to September 2012. However, this is an increase of 2.2 percentage points from September 2011 when it was 77.8%.
- The number of cases with a positive liability has increased from 864,600 in June 2012 to **872,800** in September 2012. The number with a positive outcome has increased from 696,500 to **698,200** over the same period.
- The number of children benefiting on these positive outcome cases has decreased from 900,800 in June 2012 to **899,400** in September 2012. The number of children benefiting has risen by 23,300 from September 2011.
- A breakdown by scheme is included in Annex A.

Notes:

1. Figures from October 2006 reflect the performance of cases managed off system as well as cases on the CS2 and CSCS computer systems.
2. Cases are counted as having a positive maintenance outcome if they have received a payment via the collection service in the quarter or have a maintenance direct agreement in place. Cases are classed as maintenance direct if this is their status at the end of the quarter.
3. Cases are classed as having maintenance due if an ongoing liability to pay maintenance exists or arrears of maintenance have been requested. This group of cases consists of assessed not charging, compliant, nil compliant, maintenance direct and others with receipts. Definitions can be found on page 20.
4. Qualifying children are counted as receiving maintenance or with a maintenance direct agreement in place if the relevant case has received a payment via the collection service in the last three months or has a maintenance direct agreement in place. An average of 1.35 children per case has been used for positive outcome cases progressed off system. This is based on checking a sample of off system case papers.
5. Figures include Old Scheme cases held on the CSCS computer system. CSCS data included in this table is based on a 5% sample.

Annual Cases/Children Benefiting from Maintenance

This shows the number of cases from which a payment was received or which had a maintenance direct arrangement in place over a 12 month period.

- The percentage of cases where the non-resident parent is paying child maintenance in the latest 12 months has decreased slightly from 85.7% in the 12 months to June 2012 to **85.6%** in the 12 months to September 2012.
- The number of cases with a positive liability at any point in the last 12 months has increased from 969,000 in June 2012 to **975,000** in September 2012. The number with a positive outcome has increased from 830,200 to **834,700** over the same period.
- The number of children benefiting on these positive outcome cases has risen from 1,073,100 in June 2012 to **1,077,800** in September 2012.

Table 7: Annual Cases/Children Benefiting from Maintenance

Jun-12	969,000	830,200	85.7	1,073,100
Sep-12	975,000	834,700	85.6	1,077,800

Notes:

1. Figures from September 2007 include the performance of cases managed off system for the full 12 months as well as cases on the CS2 and CSCS computer systems. Information for cases managed off system is available from October 2006 and therefore is partly included in the December 2006, March 2007 and June 2007 figures.
2. Cases can migrate from the CSCS computer system to the CS2 computer system within a 12 month period and such cases may be counted twice in the above table. It has been possible to remove such duplicates from March 2007. Therefore in the 12 month period to December 2007 all duplicate cases are removed, with duplicates partly removed in the 12 months to March 2007, June 2007 and September 2007.
3. Cases are counted as having a positive maintenance outcome if they have received a payment via the collection service in the last 12 months or have a maintenance direct agreement in place. Cases are classed as maintenance direct if this is their status at the end of any quarter.
4. Qualifying children are counted as receiving maintenance or with a maintenance direct agreement in place if the relevant case has received a payment via the collection service in the last twelve months or has a maintenance direct agreement in place. An average of 1.35 children per case has been used for positive outcome cases progressed off system.
5. Figures include Old Scheme cases held on the CSCS computer system. CSCS data included in this table is based on a 5% sample.

Maintenance Collected and Arranged

This shows the total amount of maintenance collected by the Agency and the estimated value of Maintenance Direct arrangements.

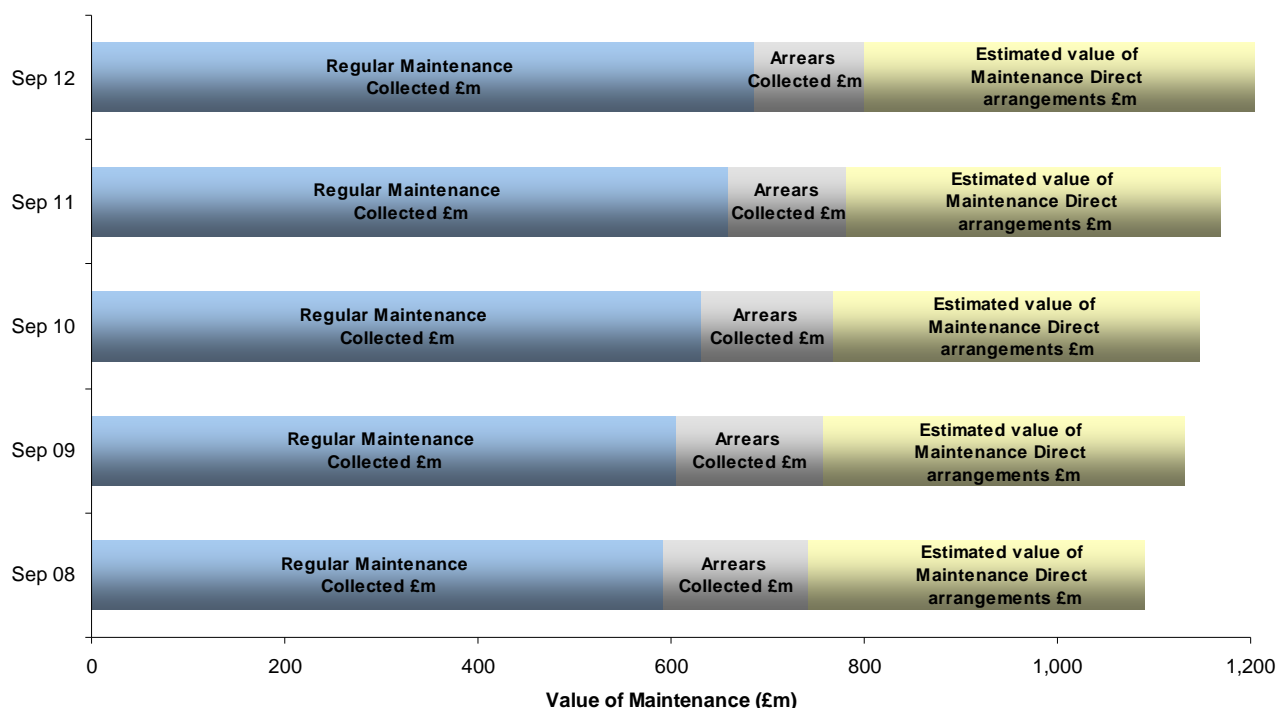

- Maintenance Collected or Arranged on a rolling 12 month basis increased to **£1,204.5m**. Arrears collected on a rolling 12 month basis fell to **£113.2m**. This is compared to a June 2012 figure of £1,194.8m, of which £115.8m was arrears and a September 2011 figure of £1,168.7m, of which £122.1m was arrears.
- In the quarter to September 2012, **£305.6m** was collected or arranged, of which **£28.1m** was arrears. This is an increase from £301.2m collected or arranged in the quarter to June 2012, of which £27.5m was arrears.

Headline collection figures are:

- **Rolling 12 Months** **£1,204.5m** of which **£113.2m** was arrears
- **Rolling Quarter:** **£305.6m** of which **£28.1m** was arrears

Graph 4: Maintenance Collected and Arranged

Total Amount Collected and Arranged - Rolling 12 Months to September 2012

Notes:

1. Quarterly amounts of maintenance collected will not sum to the financial year figures published in the Annual Accounts as they do not include end of year adjustments.
2. Figures for 10/11 and 11/12 have yet to be audited and finalised.
3. Figures include Old Scheme cases held on the CSCS computer system. CSCS data included in this table is based on a 5% sample.

Jun-12	199.0	27.5	102.2	301.2
Sep-12	202.9	28.1	102.7	305.6

Notes:

1. The amount of maintenance collected is that collected via the CSA Collection Service and this includes both off system and system payments.
2. Quarterly amounts of maintenance collected will not sum to the financial year figures published in the Annual Accounts as they do not include end of year adjustments.
3. The value of Maintenance Direct arrangements in place shows the value of the assessments that the Agency has made i.e. the recommended amount to be paid to the parent/person with care by the non-resident parent. This value is an estimate because it is not possible to calculate, for every day of the year, the value of Maintenance Direct arrangements in place at that point in time. However, it is possible to calculate the value of weekly Maintenance Direct arrangements in place at the end of each month and derive a full monthly estimate from that.
4. The estimated value of Maintenance Direct arrangements includes Maintenance Direct cases processed off system from April 2008.
5. Arrears collected figures include arrears of maintenance that have been linked to an arrears collection schedule. Investigations show that a proportion of arrears of maintenance collected have been incorrectly linked to a regular collection schedule and therefore classified as regular maintenance in the above table. Work is underway to correctly classify arrears collections in future publications.
6. In addition, collections on all cases managed off system are presumed to be regular collections rather than collections of arrears resulting in the potential under counting of arrears.

7. Figures for 10/11 and 11/12 have yet to be audited and finalised.
8. Figures include Old Scheme cases held on the CSCS computer system. CSCS data included in this table for arrears collected and for maintenance direct arrangements in place is based on a 5% sample.

Outstanding Maintenance Arrears

This shows the gross arrears position of non-resident parents at the end of each quarter.

- Outstanding child maintenance arrears have increased from £3.802 billion in June 2012 to **£3.814 billion** in September 2012.²

Graph 5: Outstanding Maintenance Arrears

Notes:

- Figures show the gross arrears position at the end of each quarter sourced from the Agency's General Ledger.
- Figures for 10/11 and 11/12 have yet to be audited and finalised. Following publication of the 2008/09 and 2009/10 Client Fund Accounts, outstanding arrears figures have been adjusted. See accounts publications for further detail on changes: <http://webarchive.nationalarchives.gov.uk/20120104120950/http://www.childmaintenance.org/en/pdf/CMEC-Client-Funds-Account-09-10.pdf>
- Adjustments have also been made from 2010/11 onwards which are yet to be agreed with National Audit Office.

Arrears Distribution

This shows the proportion of cases with arrears and value of arrears by size of arrears outstanding on each case.

It should be noted that over 40% of arrears are owed to the Secretary of State and not Parents with Care. A large proportion of arrears are based on Interim Maintenance Assessments which are punitive maintenance liabilities imposed due to the non co-operation of non-resident parents in supplying information to allow a full maintenance assessment to be made.

- 58.6% of the arrears caseload owe £1,000 or less
- Arrears of over £10,000 make up 60.9% of the total value of outstanding arrears.

Table 9: Arrears Distribution

Arrears Band	Arrears Caseload (%): September 2012	Value of Arrears (%): September 2012
Under £100	19.1%	0.2%
Over £100 to £500	27.0%	2.1%
Over £500 to £1,000	12.5%	2.7%
Over £1,000 to £5,000	24.2%	17.1%
Over £5,000 to £10,000	7.9%	16.9%
Over £10,000 to £20,000	5.5%	23.2%
Over £20,000 to £50,000	3.2%	28.8%
Over £50,000	0.4%	8.9%

Notes:

1. Figures sourced from the Agency Debt Book as maintenance arrears from the General Ledger can not be broken down by size of arrears.
2. Figures exclude cases managed off system. The Debt Book over reports the level of outstanding arrears by approximately 4%.

Enforcement

This shows the total volume of enforcement actions undertaken by the Agency.

- The number of Deduction from Earnings Orders/Requests issued between April 2011 and March 2012 was 62,740. The number of Deduction from Earnings Orders/Requests have shown a gradual decrease since 2007/2008.
- The number of Lump Sum and Regular Deduction Orders authorised has continued to increase; 760 authorised during the period April 2010 to March 11 rising to 1,145 in the period April 11 to March 12.

Table 10: Enforcement

Notes:

1. Deductions from Earnings Orders/Requests (DEO/R's) are where the Agency makes a request to an employer to deduct maintenance directly from the earnings of a non resident parent. The stock of DEO/R's and number of new DEO/R's set up

2. Deduction Orders are where the Agency applies to deduct maintenance directly from a non resident parent's bank/building society account, following non payment of maintenance. There are two types of deduction order, a regular deduction order which deducts a regular fixed amount in respect of either regular maintenance and/or arrears and a lump sum deduction order which initially freezes, and later deducts a lump sum amount solely in respect of arrears. A deduction order is made through an administrative process, which means an application to court is not required before the order can be made. Disclosure requests are sent to banks and building societies to obtain financial information. A disclosure request is sent to every bank/building society which holds an account attached to a case, therefore there can be multiple disclosure requests issued for each case.
3. Authorised – This stage of the process is where the deduction order has been approved by a senior colleague and sent to the bank/building society.
Secured – This stage, in respect of lump sum deduction orders only, is where the interim lump sum deduction order has been sent to the bank/building society and the monies have been secured, but they have not yet been sent to the Commission. Deduction orders were introduced in August 2009.
4. A liability order is a document obtained from the court showing that they legally recognise that the debt is owed. This is the same in England, Wales and Scotland. This is required before the Agency can use litigation powers (Diligence in Scotland). A liability order is counted as applied for when a court date is assigned for the application to be made. Some cases which have had liability orders applied for are still going through the liability order process, and awaiting an outcome.
5. Distress actions refer to bailiff actions in England & Wales. This is where, once the debt has been legally recognised, the Agency has passed the debt to a bailiff company for collection (or equivalent). Number of Bailiff Referrals is sourced directly from external providers. Attachments refer to actions taken by Sheriff Officers in Scotland on the Agency's instruction to attach certain goods and remove for auction if the debt is not settled. An attachment notice is served directly to the NRP by a Sheriff's Officer.
6. A charge for payment is a Scottish action only. This is where, once the debt has been legally recognised via a Liability Order, the Agency refers the case to Sheriff Officers to serve, in person, the charge for payment to the NRP.
7. Charging orders in England & Wales are where a County Court Order for the legally recognised debt is attached to the equity of a non-resident parent's property. A charging order is counted as applied for at the point the application is lodged at the County Court. Some cases which have a charging order applied for are still going through the charging order process and awaiting an outcome.
8. Order for sale action can be taken once a final charging order has been granted against a property owned or jointly owned by the NRP. Through the Agency's external supplier action will be taken to secure payment, if full payment is not made and there is evidence of equity an application may be made to the court for an order for sale. The Agency may seek to take possession of a property if there is evidence of equity and it this action is deemed to be the most appropriate to secure the child support arrears owed. The Order for Sale process is complex and, as a result, the time taken between a referral and achieving an outcome can be a lengthy period of time. Information on Orders for Sale is only available from July 2008.
9. Bills of Inhibition in Scotland do not attach directly to the non-resident parent's property, but are personal prohibitions preventing heritable property being transferred, alienated or disposed of by the non-resident parent. A bill of inhibition is counted as applied for when an instruction for Inhibition is sent to the Solicitors. Some cases which have had a bill of inhibition sent for are still going through the bill of inhibition process.
10. An order to pay is where the Magistrate grants a custodial prison sentence, suspended on condition that the NRP makes payment. Committal information includes both actual and suspended committal sentences and driving licence disqualifications following non payment of child maintenance.
11. Recovery from Deceased Estates is where the Agency and parent with care seek to recover arrears of child maintenance from the estate of a non resident parent. Cases are referred to the Department for Work and Pensions to action. The difference between the number of cases referred to DWP and cases with debt recovered reflects the duration and complexity of the Recovery from Estates process. This process can take two years or more to complete for probate to be granted and the estate to be distributed. Recovery from Deceased Estates powers came into effect in January 2010.
12. Prosecutions involve the threat and/or the use of criminal fines where an individual or organisation commits a criminal offence under child support law. Example offences include failure to provide information requisition, misrepresentation of information, and/or failure to comply with a deduction from earnings order. Information on prosecutions is only available from April 2008.

Appeals

Number of appeals and time taken to deal with appeals.

- The number of Appeals received in the year to March 2012 was 6,510 an increase of 550 on the number received the previous year but lower than the number received during 2009-2010 which was 6,750.
- The number of appeals being submitted to the Tribunal Service has reduced by 13% since March 2008 where it was 4,400.

Table 11: Appeals

	Financial Year					Rolling 12 month period Oct 2011 - Sept 2012
	Apr 2007 - Mar 2008	Apr 2008 - Mar 2009	Apr 2009 - Mar 2010	Apr 2010 - Mar 2011	Apr 2011 - Mar 2012	
CSA Appeals received						
Old Scheme	3,075	2,990	2,200	1,515	1,270	1,115
Current Scheme	4,210	4,845	4,115	4,105	5,080	4,620
Departure Appeals	525	470	430	335	160	155
Total Appeals received	7,810	8,305	6,750	5,960	6,510	5,890
Outcomes						
Revised ⁽¹⁾	1,685	1,740	1,425	1,180	1,460	1,290
Withdrawn ⁽²⁾	1,165	1,370	1,235	805	1,235	1,165
Submitted to Tribunal Service	4,400	5,250	4,040	3,885	3,840	4,050
Average time taken to clear (weeks) - Stage 1	8.5	10.7	7.5	6.9	8.7	8.3
Average time taken to revise a Maintenance calculation following a decision from The Tribunal Service - Stage 3						
Average time taken in weeks	0.3	0.8	0.7	0.6	0.6	0.6
Average time taken in days	2.3	5.9	5.2	4.2	4.2	4.3
Average time taken to clear the end to end process (weeks)	20.0	21.8	25.7	28.4	30.9	32.9

Notes:

1. Revised – Where an original decision has been found to be incorrect during the appeals process and is revised. If the new decision is to the financial advantage of the appellant then the appeal lapses and all appeals action is complete.
2. Withdrawn - The appellant may decide at any point during the appeal process that they no longer wish to proceed with the appeal and request it to be withdrawn.
3. Submitted to Tribunal Service - When an application decision is disputed and is reconsidered, but the applicant is still not satisfied with the out come.
4. Outcomes of Appeals are published within Table 1.2d of the Tribunal Services Quarterly Summary of Statistics tables. Details can be obtained by following: <http://www.justice.gov.uk/downloads/statistics/tribs-stats/tribs-tables-q3.xls>.

Telephony Performance

This shows how quickly calls to the Agency were answered each month.

- The in month percentage of calls answered within 60 seconds was **71.0%** for September 2012. This is compared to a June 2012 figure of 88.4% and the September 2011 figure of 98.2%.
- The year to date position as at September 2012 was **86.9%**. This was down on the year to date position as at June 2012 of 92.7% and the March 2012 position of 96.9%.

Graph 6: Telephony Performance

Notes:

1. Computer system enhancements were implemented in October 2008, with a higher proportion of calls now being routed direct to the caseworker dealing with that particular case.
2. Certain Social Media sites have been advertising alternative numbers for contacting the Child Support Agency. This has resulted in a greater number of calls being received on lines that are not resourced to cope with customer demand, and the dip in performance is attributable to this issue. A solution has been implemented which should bring performance back to expected levels next quarter.

Annex A.

Initial Clearance Types

This shows a breakdown by type of clearance for all Current Scheme clearances.

Month	Total Clearances	Closed	Nil Liability	Maintenance Direct	Payment Schedule Set Up	
					Payment(s) Made	No Payment Made
Jun-03	14,600	11,600	600	600	1,600	-
Sep-03	37,900	22,800	3,200	1,600	10,000	400
Dec-03	49,400	29,500	3,900	1,900	13,500	600
Mar-04	51,600	29,900	4,300	2,100	14,600	600
Jun-04	62,300	43,200	3,800	2,100	12,800	400

Mar-09	30,700	13,400	3,100	2,700	11,000	400
Jun-09	32,300	16,300	2,500	2,700	10,500	300
Sep-09	28,100	11,200	2,600	2,600	11,500	300
Dec-09	26,500	7,900	2,700	2,900	12,700	300
Mar-10	26,300	8,100	2,700	2,800	12,300	300
Jun-10	25,400	6,800	2,500	2,900	12,700	400
Sep-10	28,200	7,300	2,800	3,500	14,100	500
Dec-10	28,900	7,200	2,800	3,900	14,500	600
Mar-11	29,600	7,600	3,100	4,300	14,100	600
Jun-11	27,500	6,900	2,500	4,200	13,200	600
Sep-11	30,800	8,000	2,800	4,700	14,500	800
Dec-11	30,700	7,400	2,600	4,800	14,900	1,100
Mar-12	30,300	7,300	2,600	4,200	14,700	1,400
Jun-12	26,700	6,400	2,000	3,700	12,900	1,700
Sep-12	29,700	6,900	2,200	4,300	9,900	6,400

Notes:

1. Closed category includes applications closed prior to a calculation being carried out, applications where the parent with care is identified as claiming good cause or subject to a reduced benefit decision, the application is actually a change of circumstance on an existing case or where the case is closed after a calculation but prior to a first payment being made.
2. Nil liability includes cases where a nil liability calculation is the first calculation carried out or where a nil liability calculation is carried out prior to receipt of first payment.
3. Maintenance direct includes cases where the first calculation is a maintenance direct arrangement or where a maintenance direct arrangement is made prior to receipt of first payment.
4. Cases where no payment has yet been made will always be artificially high for the latest month of intake. These are cases where a collection schedule has been set up but the first payment may not yet be due.
5. Figures may not sum to clearance figures on page 15 due to rounding.

6. These figures are subject to revision in future publications. Payment(s) made / not made figures are subject to greater degrees of revision to reflect when a first payment is received. Future revisions will reflect any new information which is received after the production of this table.

Current Scheme Live and Assessed Caseload Status

This shows the status of all Current Scheme cases with an assessment or calculation.

Quarter ending:	Overall	Nil Liability	Assessed not Charging	Nil Compliant	Positive Outcome Caseload		
					Compliant	Maintenance Direct	Others with Receipts

Notes:

1. Figures from April 2008 reflect the performance of cases managed off system and cases where a payment has been made manually as well as cases on the CS2 computer system.
2. Figures include Current Scheme cases with a full maintenance calculation or default maintenance decision.
3. Cases are classed as compliant if they are currently open, classed as collection service cases at the end of the month, and have been charged and paid money via the collection service (either regular maintenance and/or arrears) over the preceding quarter.
4. Cases are classed as assessed and not charging (that is to say they have a positive liability but no active charging schedule is in place) if they have this status at the end of the quarter, and there have been no charges or receipts via the collection service over the period.
5. "Nil liability" means that no payments were expected on the case and "Nil compliant" means that payments were expected but none were received.
6. Cases are classed as maintenance direct if this is their status at the end of the quarter.

Old Scheme Live and Assessed Caseload Status

This shows the status of all Old Scheme cases with an assessment or calculation.

Quarter ending:	Positive Outcome Caseload

Notes:

- Figures from April 2008 reflect the performance of cases managed off system and cases where a payment has been made manually as well as cases on the CS2 and CSCS computer systems.
- Figures include Old Scheme cases with a full or interim maintenance assessment.
- Cases are classed as compliant if they are currently open, classed as collection service cases at the end of the month, and have been charged and paid money via the collection service (either regular maintenance and/or arrears) over the preceding quarter.
- Cases are classed as assessed and not charging (that is to say they have a positive liability but no active charging schedule is in place) if they have this status at the end of the quarter, and there have been no charges or receipts via the collection service over the period.
- "Nil liability" means that no payments were expected on the case and "Nil compliant" means that payments were expected but none were received.
- Cases are classed as maintenance direct if this is their status at the end of the quarter.
- A drop in the caseload can be seen from January 2010 which can be attributed to the removal of suspended cases on the CSCS computer system as outlined in the general notes section.
- Figures include Old Scheme cases held on the CSCS computer system. CSCS data included in this table is based on a 5% sample.

Current Scheme Cases/Children Benefiting from Maintenance

This shows the number of Current Scheme cases from which a payment was received or which had a maintenance direct arrangement in place over a 3 month period and the number of children benefiting from such a payment or arrangement.

Quarter ending:	Current Scheme Cases - in which:			
	Maintenance due	Positive outcome	% with positive outcome	Children benefiting from maintenance

Notes:

1. Figures from April 2008 reflect the performance of cases managed off system and cases where a payment has been made manually as well as cases on the CS2 computer system.
2. While it has been possible to include the performance of cases managed off system at Agency level since October 2006, it has only been possible to provide a scheme split from April 2009. Therefore figures in this Annex will differ from the Agency figures in the main publication.
3. Cases are counted as having a positive maintenance outcome if they have received a payment via the collection service in the quarter or have a maintenance direct agreement in place. Cases are classed as maintenance direct if this is their status at the end of the quarter.

Old Scheme Cases/Children Benefiting from Maintenance

This shows the number of Old Scheme cases from which a payment was received or which had a maintenance direct arrangement in place over a 3 month period and the number of children benefiting from such a payment or arrangement.

Sep-12	10,700	3,500	6,100	-	600	400

Notes:

1. A closure is defined under the following circumstances; an application has been cancelled or withdrawn, a parent with care has been identified as claiming Good Cause or is subject to a Reduced Benefit Decision; or the application has been closed or terminated.
2. Closures as above, though completed by case worker, can be initiated by either the system or the user themselves. Where case workers initiate closures, the closure reason is selected from a pre-defined list. As this is subjective, in some instances the selected reason may not reflect the actual reason for closure.
3. Figures do not include performance of cases processed off system.
4. Figures only include cases closed after a maintenance calculation has taken place.
5. The figures in this table are subject to revision in future publications. Future revisions will reflect any new information which is received after the production of this table.
6. A change in legislation in October 2008 removed the compulsion for parents with care on income based benefit (Income Support or Jobseeker's Allowance (Income Based)) to pursue a claim for child support through the Agency. After this date, it is expected that some parents with care will opt to end their child support claim with CSA.

Further Information.
