Introduction

1. This publication contains statistics on Mandatory Work Activity covering the period from May 2011 to November 2011.
2. This currently includes statistics on initial referrals. Future editions of this publication will be published in line with the timetable shown in **Annexe A**. Details regarding future content will be announced via the UK Statistics Authority publication hub.
3. Every effort has been made to ensure that the quality of these statistics is of the highest standard. However, it may be necessary to revise the statistics in subsequent publications when more complete data becomes available, particularly for more recent months.
4. The format of this publication will be kept under review and any feedback or suggestions to improve this publication are welcomed.

Mandatory Work Activity - Policy Description

5. Mandatory Work Activity (MWA) was launched on 16th May 2011, enabling Jobseekers Allowance (JSA) claimants to move closer to the labour market by helping them re-engage with the system, refocus their job search and gain work-related disciplines, whilst also delivering a contribution to the local community.
6. Such disciplines include attending on time, regularly carrying out specific tasks and working under supervision. MWA is about offering further support to some Jobseekers Allowance claimants who would benefit from a short period of activity.
7. The vehicle for MWA is work-based placements delivered by external providers under contract to DWP. For those referred to a placement, their participation is mandatory.
8. The placements sourced by the provider:

- last for 4 weeks
- are for 30 hours per week, unless restrictions apply, so allowing the claimant time to meet their actively seeking obligations
- are reduced in line with any restrictions a claimant might have on their Jobseeker's Agreement. In such circumstances, placements will take up 75% of the time a claimant is available for work.
- are of benefit to the local community
- are additional to any existing or expected vacancies the host organisation might have

9. MWA participants continue to claim JSA and attend Jobsearch Reviews.

Technical Overview

10. These statistics are derived using a combination of data from the Jobcentre Plus claimant management systems (the Labour Market System) and the Clients database.
11. Information on demographics is obtained by merging data across these separate administrative systems which sometimes results in unknown values. This is because either we are unable to find a match or the information has not been recorded for the particular claimant.

Mandatory Work Activity:

12. A referral to Mandatory Work Activity is defined as the date the claimant is referred to the placement, recorded within their adviser interview. This was input by the adviser to the Jobcentre Plus' Labour Market System.

Retrospection

13. Retrospection is the time period allowed for additional or updated information to be incorporated into DWP's data systems.
14. Labour Market System (LMS) datasets are produced a month in arrears i.e. November 2011 data was available at the end of December 2011. Generally, for any given month worth of LMS data, significant retrospection can then be seen for a further month.
15. Therefore to ensure that retrospection is fully captured, final statistics in this series will be published around 2-3 months after the reference period (e.g. final statistics for November 2011 (which are published in February 2012) are produced using December 2011 data, which was released in January 2012).

Revisions Policy

16. In accordance with Principle 2 of the UK Statistics Authority's Code of Practice for Official Statistics¹, statistics within this publication adhere to DWP's statistics revisions policy, which explains how we will make revisions and inform users of our statistics when they occur: <http://research.dwp.gov.uk/asd/index.php?page=policy>

Rounding Policy

17. To reduce the risk of inferring the identity of a claimant from these statistics and other statistics, values are rounded to the nearest ten. Values less than ten, including zeros, are suppressed and marked with a dash. Therefore totals may not equal the sum of the individual cells.
