1 Introduction

Background

1. On 11 September 2008 the Prime Minister announced the launch of the £1bn Home Energy Saving Programme aimed at helping families to permanently cut their energy bills. A key part of the announcement was the creation of a new £350m Community Energy Saving Programme (CESP). This Programme will target households, across Great Britain, in given geographical areas to improve energy efficiency standards, and permanently reduce fuel bills. It will be funded by a new obligation on energy suppliers and, for the first time, an obligation on electricity generators.
2. CESP will promote a 'whole house' approach, and will be delivered through the development of community-based partnerships involving Local Authorities (LAs) along with energy suppliers and electricity generators, via a house-by-house, street-by-street approach. Partnership working will allow CESP to be implemented in a way that is best suited to individual areas and coordinated with existing initiatives. We estimate up to 100 schemes will be funded benefiting around 90-000 homes across Great Britain, and delivering a saving of nearly 2.9m tonnes of CO₂ emissions. Focussing on low income areas will also contribute to taking hard-pressed families out of fuel poverty.
3. One of the aims of CESP is to target areas of low income. These areas have been selected using the Income Domain of the Indices of Multiple Deprivation England, Scotland and Wales. In England the lowest 10% of areas ranked in the IMD will qualify for CESP and in Scotland and Wales the lowest 15% of areas will qualify.
4. Sections, 2,3 and 4 of this document list the areas in England, Scotland and Wales respectively that qualify for CESP.

5. Further information on the Indices of Multiple Deprivation and Neighbourhood Statistics can be found at:
