**PROTOCOL ESTABLISHED IN ACCORDANCE WITH ARTICLE 34 OF
THE TREATY ON EUROPEAN UNION, AMENDING, AS REGARDS THE
CREATION OF A CUSTOMS FILES IDENTIFICATION DATABASE, THE
CONVENTION ON THE USE OF INFORMATION TECHNOLOGY FOR
CUSTOMS PURPOSES**

THE HIGH CONTRACTING PARTIES to this Protocol, Member States of the European Union,

REFERRING to the Act of the Council of the European Union of 8 May 2003,

WHEREAS customs cooperation in the European Union is an important component of the area of freedom, security and justice,

WHEREAS the exchange of information between customs services of the various Member States is central to such cooperation,

IMPLEMENTING the conclusions of the Tampere European Council of 15 and 16 October 1999, according to which

- maximum benefit should be derived from cooperation between the Member States' competent authorities when investigating cross-border crime (No 43 of the conclusions),
- a balanced development should be achieved of Union-wide measures to fight crime while at the same time protecting the freedom and the constitutional rights of individuals as well as of economic operators (No 40 of the conclusions), and
- serious economic crime increasingly includes aspects of tax and customs law (No 49 of the conclusions),

HAVING REGARD to the fact that in its Resolution of 30 May 2001 on a strategy for the customs union the Council:

- expressed its agreement that a main objective must be to improve cooperation to combat fraud and other acts threatening the security of persons and goods efficiently,
- emphasised that customs plays a significant role in the fight against cross-border crime through the prevention, detection and, within the national competences of the customs services, through investigation and prosecution of criminal activities in the areas of fiscal fraud, money laundering as well as trafficking in drugs and other illicit goods, and,
- emphasised that, by virtue of the variety of tasks assigned to them, the customs authorities are required to work both in a Community context and

in the context of cooperation in the framework of Title VI of the Treaty on European Union,

CONSIDERING that the Customs Information System created by virtue of the Convention on the use of information technology for customs purposes¹ permits the entry of personal data exclusively for the purpose of sighting and reporting, discreet surveillance or specific checks (Article 5 of the Convention), and that for any additional purposes a supplementary legal basis must be established,

MINDFUL of the fact that at the moment no possibility exists of exchanging information concerning the existence of investigation files about ongoing or completed investigations between all competent authorities electronically and systematically and thus of coordinating their investigations appropriately, and that the Customs Information System should be used for that purpose,

MINDFUL of the fact that the findings of an evaluation of EU third pillar databases may identify the need for complementarity between these systems,

WHEREAS, in connection with the storage, processing and use of personal data in the customs sphere, due account should be taken of the principles laid down in the Council of Europe Convention of 28 January 1981² for the Protection of Individuals with regard to Automatic Processing of Personal Data and of point 5.5 of Recommendation R (87)15 of the Committee of Ministers of the Council of Europe of 17 September 1987 regulating the use of personal data in the police sector,

REALISING that according to point 48 of the Action plan of the Council and the Commission of 3 December 1998 on how best to implement the provisions of the Treaty of Amsterdam³ on an area of freedom, security and justice, there is a need to examine whether and how the European Police Office (Europol) could have access to the Customs Information System,

HAVE AGREED ON THE FOLLOWING PROVISIONS:

- 1) after Chapter V, the following three Chapters shall be inserted:
