1 Foreword

2012/13 was a year to remember for north east London and the City. 2012 was the year of the Olympics and Paralympics, when this area was the centre of world attention. Thousands of visitors came to east London, and many local people and NHS staff were took part in the opening or closing ceremonies or worked as volunteers

Behind the scenes, NHS staff ensured plans were in place, and changed their pattern of work where necessary, so that local people would continue to get the care they needed, and so that the NHS would cope if there were any major incidents during that period.

Staff delivered the Olympic and Paralympic plans and on improving health, commissioning services and ensuring the performance of the NHS locally was maintained and improved. They did this while supporting preparations to bring new public health and NHS commissioning arrangements into place ready for reformed statutory arrangements from April 2013.

And that was all done within a new “cluster” for north east London PCTs. In April staff from seven PCTs came to work together under a single management structure, all designed to use our resources as effectively as possible.

Staff deserve thanks for their outstanding work during 2012/13, as do all those who worked for or with the PCTs over the past decade for their contribution to many great achievements in improving health and health services locally.

The year also marked the 70th anniversary of the *Report of the Inter-Departmental Committee on Social Insurance and Allied Services* – more popularly called the Beveridge report. In that, William Beveridge wrote of the need for a health service for all, free at the point of need, as a key element of how this country would tackle disease and inequality.

Though the NHS is changing, those principles remain and for patients and the public, the principle of access to NHS services on the basis of need and not ability to pay continues.

I have sought and received assurance from former responsible officers on statements presented in this annual report.

This report reflects what has been achieved together across the PCT areas, with specific information about this PCT, as the statutory organisation until 31 March 2013.

Peter Coates, CBE
Designated Signing Officer

2. Who we are

Waltham Forest Primary Care Trust (known publically as NHS Waltham Forest) was established in 2001. It covers the same area as the London Borough of Waltham Forest.

It was abolished, along with all primary care trusts, on 31 March 2013.

Its purpose was to improve the health of local people by ensuring that appropriate services are available in the right place and at the right time. It was responsible for leading the local NHS and for commissioning health services on behalf of the local population.

It was one of seven primary care trusts to come together in a cluster, as NHS North East London and the City, on 1 April 2012. This was a partnership with the primary care trusts for Barking and Dagenham, City and Hackney, Newham, Redbridge, Tower Hamlets, and Waltham Forest. For the previous year 2011/12, these PCTs had been in separate clusters known as NHS East London and the City (ELC) or NHS Outer North East London (ONEL), which included Havering PCT. Through these changes the PCTs continued to exist as separate statutory organisations, but to ensure efficiency and reduced costs they shared a management structure.

The overarching purpose of primary care trust clusters was to keep a strong grip on quality, safety, finances and performance of NHS services while ensuring the smooth transfer of services to the new structures within the NHS.

3. What we do

The main purpose of the primary care trust was to improve health and to commission health services to meet the needs of the local communities.

It assessed the healthcare needed by the local population by looking at a wide range of public health and other population data.

We asked local people what they thought of current services and what they want us to develop. We then looked at the different ways those needs could be met, and we enter into contracts with a range of organisations to provide services for people in Waltham Forest. These included hospital, mental health, community and primary care services such as GP and dental care.

We worked to ensure more outpatient and diagnostic services were offered in the community (in health centres, pharmacies and GP surgeries) instead of in hospitals.

Our main hospital provider for local people was Barts Health NHS Trust, which was created on 1 April 2012 with a merger of Barts and The London NHS Trust, Newham University Hospital NHS Trust and Whipps Cross University Hospital NHS Trust.

For those with more complex or severe needs, local hospitals, managed by North East London NHS Foundation Trust provides inpatient and specialist care.

Community health services are provided by North East London NHS Foundation Trust.

We made arrangements with many other organisations and individuals, including the local authority, independent providers, dentists, pharmacists and optometrists, for them to provide a wide range of services under the NHS. We join with other primary care trusts to commission ambulance services and specialist hospital services for rarer conditions.

Our vision and goals

We developed common vision and goals across NHS North East London and the City (NHS NELC) for 2012/13 to create a healthier future for local residents.

We said we would do this through:

- Ensuring the performance of the local NHS was maintained and improved
 - Improving the health of the public
 - Giving local people effective and high quality acute, community and primary care
 - Meeting financial targets.
- Implementing the NHS reforms
 - Managing the transition to new NHS commissioning arrangements.
- Improving the quality of care delivered by Barking, Havering and Redbridge University Hospital Trust ensuring it has a sustainable future
 - Delivering on quality, finance and key performance indicators for the trust and ensuring effective plans are in place for it to become an NHS Foundation Trust.
- Preparing for London 2012 and ensuring a health legacy
 - Ensuring NHS services meet the needs of local people through the 2012 Games period and that there is ongoing benefit to the health of local people.

4 Boards and committees

NHS Waltham Forest approved a shared governance arrangement for 2012/13 which meant that board meetings were held jointly with those of the PCTs for Barking and Dagenham, City and Hackney, Havering, Newham, Tower Hamlets and Redbridge. This arrangement was described as the North East London and the City cluster of PCTs. This cluster was supported by a management team across the seven PCTs but each of the PCTs retained its own statutory identity. As a result of changes for this year a common board membership was established where possible but the directors of public health and the former professional executive committee chairs remained unique to their original organisations.

The membership of the Board is outlined below.

Chair

Marie Gabriel, 1 April 2012 to 30 September 2012

Afzal Akram from 1 October to 27 October 2012

Dr John Carrier became interim Chair from 28 October 2012 to March 2013 due to Mr Akram being unavailable.

Non-Executive Directors (NEDs)

There were seven Non-Executive Directors, including the chair above, appointed across the seven primary care trusts. The Vice-Chair is a member of all seven statutory Boards as is the Audit Chair. The NEDS were:

- Frances Pennell-Buck, Vice-Chair from 1 April 2012 to 31 March 2013
- Kash Pandya as Audit Chair from 1 April 2012 to 31 March 2013
- Jane Winder, 1 April 2012 to 31 March 2013
- Paul Hendrick, 1 April 2012 to 31 March 2013
- John Lock, 1 April 2012 to 31 March 2013
- Philip Wilson, 1 April 2012 to 14 September 2012
- Alan Wells, 17 September 2012 to 31 March 2013
- Afzal Akram, 1 April 2012 to 31 March 2013

In addition, some former NHS Outer North East London and NHS Inner North East London Non-Executive Directors were retained as Associate Non-Executive Directors (ANEDs) and performed specific statutory and non-statutory duties delegated by the Boards. Those ANEDs were:

- Taric Ahmed
- Charles Beaumont
- Lesley Buckland
- Mariette Davis
- Andrea Lippett
- Catherine Max
- Honor Rhodes

Executive members The executive members of the Boards are listed below. These directors are shared across all seven PCTs:

- Alwen Williams, Chief Executive, 1 April 2012 to 31 March 2013
- Stuart Saw, Director of Finance, 1 April 2012 to 31 March 2013
- Terry Huff, Chief Operating Officer and Deputy CEO, 1 April 2012 to 31 August 2012
- Heather Mullin, Director of Transition, 1 September 2012 to 31 March 2013
- Caroline Alexander, Director of Nursing and Quality, 1 April 2012 to 27 November 2012

- Vanessa Lodge, Deputy Director of Nursing and Quality, 28 November 2012 to 31 March 2013
- Dr Ken Aswani, ONEL Medical Director, 1 April 2012 to 31 March 2013
- Dr May Cahill, ELC Medical Director, 1 April 2012 to 31 March 2013
- Peter Coles the NHS Commissioning Board North East and North Central London Local Delivery Director was co-opted onto the cluster Board as an associate (non-voting) member, 19 September 2012 to 31 March 2013
- Dr Ian Basnett, Director of Public Health, 1 April 2012 to 31 March 2013
- Dr Lesley Mountford, Director of Public Health, 1 April 2012 to 31 March 2013

Two further executive voting Board members were appointed from each PCT; the CCG chair, and the director of public health.

For NHS Waltham Forest these were

- Dr Gabby Ivbijaro, Waltham Forest Clinical Commissioning Group Chair,
- Dr Kay Eilbert, Director of Public Health.

Audit Committee arrangements

The audit committee was made up of three non-executive directors, Kash Pandya as Chair, Charles Beaumont and Mariette Davis. The chair of the PCT is not a member of the committee.

Within the Cluster arrangements each PCT retained a separate audit committee function but these met together through 2012/13 with the membership shown above.

Our directors confirmed that, as far as they are aware, there was no relevant audit information of which the auditors were unaware. They also confirmed that they took all appropriate steps to make sure they were aware of any relevant audit information and to establish that the auditors were aware of that information.

Declarations of Interest

All Board members declare any interests which might be relevant and material to their NHS responsibilities. This includes details of company directorships or other significant interests where the company involved might do business with the NHS and where this might cause a conflict with the individual's managerial responsibilities. Interests declared by Board members and other directors are stored in an Interests Register and detailed below. Where there is no entry, this means there are no relevant declared interests.

Register of interests 2012/13

Name	Role	Organisation	Nature of interest
Kash Pandya	Non-Executive Director and Audit Chair	Hillcroft College Surbiton	Council Member and Audit Chair
		Ministry of Justice Essex Advisory Committee	Lay Member
		Health & Safety Executive	Independent Audit Committee Member
		Citizens Advice Bureau	Adviser
		Havering CCG Barking & Dagenham CCG Redbridge CCG	Lay Member Lay Member Lay Member
John Carrier	Chair	Shoreditch Park Surgery	Daughter is GP partner
		University College London Hospitals NHS Foundation Trust	Governor
		Camden CCG	Vice Chair/Lay member
		Marks & Spencer PLC	Wife is shareholder
		Tottenham Hotspur	Wife is shareholder
		Cancerkin, Royal Free Hospital NHS Trust	Chair
		British cardio-vascular society	Trustee
		Bar standards board education and training committee	Advisor
		London Deanery boards in surgery, O&G public health & London deanery strategic partnership board	Chair
Afzal Akram	Non Executive Director	London Borough of Waltham Forest	Councillor
Frances Pennell-Buck	Vice Chair/Non Executive Director	Havering Crossroads Care	Trustee
Heather Mullin	Director of Transition	Newham CCG	Husband providing coaching support
		London Borough of Newham	Husband providing project support.
		Outlook care	Husband is Non-Executive Director
Dr Gabriel Ivbijaro	Chair – Waltham Forest CCG	Waltham Forest Community and Family Health Service	GP Lead
		Member World Organisations of Family Doctors	GP Member

Name	Role	Organisation	Nature of interest
Dr May Cahill	Joint Medical Director	Well Consortium City, Hackney Pathfinder CCG GP Premises the London Fields Medical Centre 38 -44 Broadway Market, London E8 4QJ	Joint Chair Owner
Dr Ken Aswani	Joint Medical Director - NELC	Allum Medical Practice NHJ Alliance RCGP	Partner Member Member
Dr Lesley Mountford	Director of Public Health	Homerton Hospital NHS Foundation Trust	Partner Governor
Stuart Saw	Cluster Director of Finance	NICE diagnostics Advisory Committee	Board member
Alan Wells	Non Executive Director, NELC Vice Chair/Lay Member, WF CCG	Capacity LTD The Simplification Centre The Alzheimer's Society CCG working Group, Institute of Chartered Secretaries and Administration	Director Director Trustee Member
Paul Hendrick	Non Executive Director	Greater London Enterprise Ltd Harevale LTD LFIG Ltd Activenewham	Director Non Executive Director
Vanessa Lodge	Deputy Director Quality and Clinical Governance (Acting Director Nursing/DIPC)	Kingston CCG	Board Nurse – 1 session per week

Managing our risks

We had an agreed risk management approach and we managed our principal risks within a Board assurance framework. This meant we assessed risks at different levels, from project, to departmental to directorate level. Our approach included a risk scoring and escalation process that sought to ensure that risks were rated consistently across the organisation. The process drew on the best practice elements of ISO 31000 (a set of international risk management standards).

The assurance framework was comprehensive in scope, consistent with the Department of Health's template, and covered the key operational areas of the organisation. It identified zero tolerance risks and horizon scanning risks, along with assurances around risk prevention and risk deterrence (such as fraud-related risks) and the way in which we manage manifested and potential risks. It mapped objectives against pertinent risks, controls and assurances and also described the ways in which public stakeholders were involved in managing risks which impact on them.

Individual directors were held accountable for the risks associated with their directorates. Their risks were reviewed and challenged by an internal risk sub-committee, which acted on behalf of the audit committee in assuring the Board that risks within the organisation were effectively managed. The risk sub-committee also scrutinised the Board assurance framework. The effectiveness of the risk management system was monitored through a series of key performance indicators which highlights movements and trends of the risk profile.

5 The new system

The Health and Social Care Act 2012

The Health and Social Care Act 2012 gained Royal Assent on 27 March 2012 and set out major changes to the NHS. The changes, including the abolition of primary care trusts and the establishment of new statutory bodies, came into effect on 1 April 2013.

Clinical commissioning – CCGs and CSU

Acute, mental health and community NHS care now is commissioned by **clinical commissioning groups**, which gives GPs and other clinicians responsibility for using resources to secure high-quality services for local people.

NHS Waltham Forest clinical commissioning group worked in shadow form during 2012/13 and underwent a national assessment programme in readiness to take on full statutory responsibilities for commissioning acute, mental health and community health services from April 2013. Waltham Forest's Clinical Commissioning Group was chaired by Dr Gabriel Ivbijaro until February 2012 and is now chaired by Dr Anwar Ali Khan

The boards of the PCTs in East London and the City agreed in March 2012 fully to delegate eligible budgets to the CCGs from 1 April 2012. This delegation was subject to: a risk assessment of the finance and quality, innovation, productivity and prevention (QIPP) plans for 2012/13; and the finalising of the performance management framework.

Alongside this CCG development work, a significant work programme was underway to develop a **commissioning support unit** (CSU) for north central and north east London's 12 CCGs. This programme included consultation with staff and staffside representatives on structures and matching and recruitment process.

In November the NHS Commissioning Board (now called NHS England) finalised its assessment of the North and East London Commissioning Support Unit's full business plan which set out a detailed plan for establishing and operating as a CSU.

In its assessment of the plan, the NHS Commissioning Board rated the CSU as low risk, stating: "The CSU has performed really well and has placed itself as a centre of good practice in terms of the existing NHS CSUs.

"There is a clear and concise business and development journey with strong service improvement plans underpinned by a range of innovative partnership arrangements."

NHS England

At a national level, NHS England ensures the new NHS architecture is fit for purpose and will provide clear national standards and accountability. Many of its functions will be carried out at a more local level, and therefore the NHS England has a regional office for London.

Commissioning of GPs, dentists, pharmacies and optometrists is the responsibility of NHS England, as is the commissioning of some specialist services.

The London regional office of the NHS England will have close relationships with clinical commissioning groups, professional and clinical leadership functions and relationships with local government and Healthwatch, the new independent consumer champion created to gather and represent the views of the public.

It is responsible for the 2013/14 commissioning planning round and future performance management of CCGs.

Health and wellbeing boards

With the establishment of health and wellbeing boards in each borough, leaders of the local health and care system have been brought together – with CCGs, elected representatives, social care, public health and local Healthwatch at the core – to work with a common purpose to drive improved services and outcomes. They link with local communities and other local public services, and, through the role of elected representatives, strengthen local accountability, enabling outcomes to be measured and demonstrated.

The board members work together to develop a joint strategic needs assessment (JSNA) and joint health and wellbeing strategy for the borough to tackle issues that matter most to the local community. Integrating services, joint commissioning and pooling resources will be central to translating the needs assessment and joint strategy into action.

The health and wellbeing board will have a duty to encourage commissioners of health services and commissioners of social care services to work in an integrated manner.

Public health

From April 2013 local authorities took on a new duty to take steps to improve the health of their population. They are largely free to determine their own priorities and services, to meet the needs of the local population, but will also be required to provide a small number of mandatory services, including:

- appropriate access to sexual health services
- NHS Health Check assessments
- plans to protect the health of the population
- weighing and measuring children for the National Child Measurement Programme
- providing public health advice to NHS commissioners.

6 Our performance

The board scrutinised performance, with a report discussed at each meeting.

Last year we did particularly well, meeting national standards, in the following areas:

Barts Health NHS Trust at Whipps Cross Hospital:

- met all requirements that patients are treated in hospital within 18 weeks of referral
- achieved national standards for cancer care
- met requirements on limiting cases of MRSA, with no cases during the year
- was within the national standard for the number of cases of C Difficile.

North East London NHS Foundation Trust;

- met its 18 week referral requirements for its children's, adult and specialist services

Some targets were not met;

Barts Health at Whipps Cross:

- failed to meet the A&E four hour wait standard
- failed to meet the standards for ensuring hospital patients were assessed for Venous thromboembolism risk on admission, although this was improving at the end of the year

The London Ambulance Service

- failed to meet the ambulance handover standards at Whipps Cross.

Over the last 10 years, all-cause mortality rates have fallen in Waltham Forest. Priorities in Waltham Forest include improving life expectancy, focusing on increasing smoking quitters and tobacco control; reducing the inequalities gap; and giving every child the best start in life.

The PCTs within NHS North East London and the City were accountable for performance issues during 2012/13. With the transition to new organisations in the NHS in April 2013, responsibility for these areas will move. In preparation for this PCTs worked closely with the developing new bodies, such as the CCGs and local authority, to ensure that good performance is maintained and that areas of poor performance are tackled.

Summary of Serious Incidents involving personal data as reported to the Information Commissioner's Office in 2012/13

All NHS organisations need to include details of serious untoward incidents involving data loss or confidentiality breaches in their annual reports. The more severe need to be detailed individually but the less serious should be aggregated and reported in terms of total numbers.

One severe incident involving data loss or confidentiality breaches were reported for the period across NHS North East London and the City.

Date of incident (month)	Nature of incident	Nature of data involved	Number of people potentially affected	Notification steps
June 2012	nhs.net account hacked into in Tower Hamlets and used by unauthorised "phisher" to send out SPAM	patient names, addresses, conditions, medication, consultant names.	2,500 (although it was likely that the majority of patients could not be identified by the information).	Degrees of confidentiality assessed and those with sensitive data potentially disclosed were sent letters informing of breach
Further action on information risk	Tower Hamlets PCT – communications bulletin sent to all members of staff alerting them to phishing scam. Handover CSU/CCG policies including IG / e-mail security elements. NHSMail contacted to strengthen and make own phishing filters proactive rather than re-active. Recommendations to decrease chance of recurrence included, where possible, not using patient names in communications, removing emails from the in-box and sent items and archiving them on a secured network if required for future reference. Action plan completed.			

The table overleaf shows less severe serious incidents in NHS North East London and the City (NELC).

Summary of other personal data related incidents in 2012/13

Category	Nature of incident	Barking and Dagenham	Havering	Redbridge	Waltham Forest	City and Hackney	Newham	Tower Hamlets	Total NELC
I	Loss of inadequately protected electronic equipment, devices or paper documents from secured NHS premises	0	0	0	0	0	0	1	1
II	Loss of inadequately protected electronic equipment, devices or paper documents from outside NHS secured premises	0	0	0	0	0	0	0	0
III	Insecure disposal of inadequately protected electronic equipment, devices or paper documents	0	0	0	0	0	0	0	0
IV	Unauthorised disclosure	0	0	0	0	0	0	0	0
V	Other	0	0	0	0	0	0	0	0

7 Patient and public engagement

The PCT listened to the views of local people formally through engagement with the Local Involvement Network ([link](#)) and other local groups. LINK members attended Board meetings and had speaking rights.

Reports on patients experience were considered by the Board.

Formal consultation with the public and stakeholders took place on:

- Moving community health services at Highams Court in Chingford to more appropriate settings.
- Emergency Dental Care.

The clinical commissioning group has established a patient and public involvement forum.

8 Our workforce

Following the introduction of a single management structure across the seven PCTs we established an effective working partnership with staff trade unions as we addressed the challenges of working through transition.

The human resources and finance teams have worked effectively together to ensure consistent management information in relation to budget planning and forecasting future staffing. Internal audits, including recruitment and payroll, have provided additional assurance in terms of developing robust procedures and processes across the cluster and our payroll provider.

The chief executive and her senior team have held regular staff briefings across various PCT sites, allowing health engagement and interaction with employees. This, alongside newsletters and dedicated areas on the intranet, created opportunities for staff to receive and discuss updates on plans for the future of the NHS, including the successor organisations coming into place in 2013.

Consultation with staff and staffside representatives took place on structures for the commissioning support unit (CSU) and CCGs, and on the matching and recruitment process for the CSU.

Staff development and support

Skills development has focused on resilience and change management in order to prepare staff for their future roles across the new NHS landscape or beyond.

We provided a variety of learning experiences including masterclasses which have allowed staff to explore the wider health economy and the new developments of health strategy. Practical approaches to training included CV and recruitment preparation. To allow staff to receive support and explore future options according to their own aspirations for career development we commissioned an extensive coaching programme. Our managers and aspiring managers accessed an accredited management development programme which will result in further recognised qualifications and hopefully better career options.

Workforce Information

Sickness absence summary

Based on the 2012 calendar year, staff sickness amounted to 17,308 days lost. This was with a full-time equivalent of 77 members of staff. The average number of working days lost was 6.2. This was a sickness rate average of 2.8% across the calendar year.

'Two Ticks' symbol (positive about disability)

All the PCTs are recognised as 'Positive about Disability' through the Government's 'Two Tick symbol' certification. This applies to positively embracing disability in the workplace and has included providing staff with 'Access to Work' registration. Human resources provide advice regarding job applicants declaring disability and requiring reasonable adjustments. We work in partnership with Job Centre Plus to access support for staff with disability. Approximately 2.5% of our staff describe themselves as being disabled.

Health and wellbeing

Staff welcomed the opportunities offered through staff health and wellbeing programme. During the Olympic period we were pleased to encourage participation and attendance at the Olympic and Paralympic Games – a few staff participated in the opening and closing ceremonies, supported with time off from work. We also offered flexible working to enable staff to survive disruption in this period, and maintain a work life balance.

Health opportunities included free sports and exercise taster classes; massage at work; stress management workshops and advice; signposting to counselling and welfare services; active travel planning including workplace walks, cycle schemes; and healthy-eating demonstrations. We provided a stand-alone 'health kiosk' which has allowed staff to access up to date personal health information and monitoring over several months with the object of encouraging health and lifestyle improvements.

The programme was supported and promoted in partnership with trade unions and created a sense of 'belonging together' within a transient organisation.

Equality objectives

We revised all our 2012 equality information to ensure the information is most relevant to the equality and diversity work of the Cluster and the CCGs. Information was ratified by the Board in March 2013.

Off payroll arrangements

The Treasury requires NHS bodies to publish information on off payroll engagements. These are shown in the table below.

Table 1: Off payroll engagement at a cost of over £58,200 per annum that were in place as of 31 January 2012

	FTE
No. In place on 31 January 2012	2.00
No that have since come onto the organisation's payroll	0.00
No. that since been re-negotiated/re-engaged to include contractual clauses allowing the (organisation) to seek assurance as to their tax obligations	0.00
No that have not been successfully re-negotiated, and therefore continue without contractual clauses allowing the (organization) to seek assurance as to their tax obligations	0.00
No that have come to an end	2.00
Total FTE	2.00

Table 2: For all new off-payroll engagements between 23rd august 2012 and 31 March 2013, for more than £220 per day and more than 6 months

	FTE
No. of new engagements	1.00
No. of new engagements which include contractual clauses giving the organisation the right to request assurance in relation to income tax and National insurance obligations	1.00
Of which:	
No. for whom assurance has been accepted and received	0.00
No. for whom assurance has been accepted and not received	1.00
No that have been terminated as a result of assurance not being received	0.00
Total	1.00

We have defined “off payroll engagements” to mean that it relates to interim staff who have occupied substantive roles.

9 Taking care of the environment

NHS organisations have a responsibility for the environment. We are committed to the NHS Sustainable Development Unit's target of reducing carbon by 10% by 2015 (based on 2007 levels) and a key element of this is our commitment and registration to the good corporate citizen model. This required NHS trusts to explore their environmental credentials, identify any deficiencies and plan for future improvements. It also allowed benchmarking between trusts. We investigated, took action and monitored sustainability issues with the goal of reducing the carbon footprint. This brings financial as well as environmental benefits.

Waltham Forest PCT had an approved sustainability action plan. This sets out desired outcomes and helps in the development of a plan for sustainable health. Some sample outcomes are set out below across the eleven headings:

1) Energy and carbon management

Encourage all staff to take responsibility for energy consumption and carbon reduction, including dissemination of the climate change staff survey findings.

2) Procurement

Consider local procurement, whole lifecycle costs and the environmental impact of financial decisions, in preparation for the use of carbon as a currency.

3) Water

Measure and monitor water costs and consumption, including the results in an annual report.

4) Waste

Monitor and manage the quantity and cost of all waste streams and set trajectories to monitor, manage and reduce them over time.

5) Commissioning

Routinely mandate providers through service specifications to consider and minimise carbon impact of their service delivery proposals

6) Designing the built environment

Ensure that buildings are designed to promote sustainable behaviours in staff, patients and visitors, and are adaptable to support change towards low carbon patient pathways.

7) Role of partnerships and networks

Ensure that we use leverage within local partnerships and performance frameworks to promote carbon reduction.

8) Governance

Complete the good corporate citizen assessment model and produce an action plan with clear milestones to measure, monitor and reduce direct carbon emissions.

9) Investment

Develop carbon literacy and embed carbon reduction in financial mechanisms.

10) Green information technology programme

Reduce power consumption and paper usage and increase use of recycled paper and toners for printers.

We produce an annual sustainability report, as required by the NHS Sustainable Development Unit. This is part of the process of making the NHS more financially and environmentally sustainable and showing patients and other stakeholders that the NHS is adapting to change.

10 Emergency preparedness

A major incident such as a fire or pandemic flu outbreak can occur at any time. In order to respond effectively to such challenges and to comply with statutory guidance, we had in place a robust, tested major incident plan built on the principles of integrated emergency preparedness.

During 2012 NHS North East London and the City worked with local authorities, providers, primary care and NHS London to ensure business continuity, communications and other plans were in place for the Olympics and Paralympics.

11 Accounts

The financial statements contained in this section provide a summary of the PCT's financial position and performance. Further information is available in the full annual accounts.

Managing our finances

We have reported earlier about what we do and how our performance is measured. This section talks about how we manage our money and how our financial performance is measured. We are accountable for what we do with public money and we have a track record of balancing the books and achieving good value for money for our patients. This continued in 2012/13.

As a business, we have been on a sound financial footing as we have consistently delivered surpluses over recent years.

During 2012/13 we managed cash within the funding limits laid down by parliament.

In 2012/13 Waltham Forest PCT was given a revenue resource limit of £452.547 million from the Department of Health.

This was made up of an initial recurrent funding allocation (the money we get each year) of £428.405 million. This was an increase in recurrent funding of £11.669 million over and above what we were given in 2011/12.

We also received other non-recurrent funding (money which we have been given this year only) totalling £24.142 million during the course of the year. This funding is usually given to us to spend on something specific, so we cannot spend it on what we like. For example, money for dental services – £10.337 million – is given to us on a non-recurrent basis. This money also includes any surplus that we had made the previous year.

We used the additional funding to develop local services, and the improvements to our performance show the success of this approach.

We spent the money on services as follows:

Acute hospital care	50.8%
Specialist hospital care	5.9%
Learning disabilities and mental health	8.4%
Prescribing	7.0%
Community health services	6.3%
Primary medical services	12.4%
Corporate and other costs	9.1%

Primary care trusts are set three primary financial targets and in 2012/13 we met all three:

- **Cash limit** Our cash limits were £453.186 million (for revenue) and £2.355 million (capital). We drew down cash from the Department of Health on a monthly basis in accordance with these limits.
- **Revenue resource limit** The revenue resource limit sets a limit on the net expenditure of the organisation. We were given a limit of £452.547 million. We agreed with NHS London at the beginning of the year to achieve a surplus of £4.295 million and we were successful in achieving the revised target.
- **Capital resource limit** We also have to keep our capital expenditure (the money we spend on something that we then own, such as a building or piece of equipment, which has a value of £5,000 or over) within a 'capital resource limit', which was set by

NHS London. Our limit for the year was set at £2.355 million. The PCT spent £0.511 million in the year for the achievement of the capital programme.

We also have to pay our bills within a reasonable time. There is a 'better payment practice code' which says that NHS organisations should pay creditors within 30 days. Last year we paid 78% of non-NHS invoices (80% by value) and 89% of NHS invoices (76% by value) within this 30 day target.

We also signed up to the 'prompt payments code' which helped us to make further improvements to our payment processes.

We successfully managed our financial risks during 2012/13. We identified the top financial risks as:

- the increased costs of acute care
- the transition of the NHS system to the new organisations.

To mitigate against these risks, we took a proactive approach to financial monitoring, which means we will be able to identify any potential problems in plenty of time.

As described in section 5 of this report, the Health and Social Care Act 2012 abolished primary care trusts from April 2013. PCTs worked collectively across North East London and the City with GP clinical commissioning groups to prepare for the new arrangements, however with all change there was a degree of risk facing the PCTs through the process of rationalisation of the infrastructure, setting up new structures and establishing new legal entities. To mitigate against this risk, we worked collaboratively with the shadow GP clinical commissioning group board and the local authority, as well as NHS London, to ensure there were robust transitional arrangements in place over the next year.

In addition, we continued to maintain contingencies to address in-year unforeseen risks and to generate a planned surplus, in line with best practice, to ensure the legacy for the GP clinical commissioning group is as robust as possible.

12 Remuneration report

The NHS has adopted the recommendations outlined in the Greenbury report in respect of the disclosure of senior managers' remuneration and the manner in which it is determined. Senior managers are defined as those persons in senior positions having authority or responsibility for directing or controlling the major activities of the NHS body. This means those who influence the decisions of the entity as a whole rather than the decisions of individual directorates or departments. This report outlines how those recommendations have been implemented by the PCT in the year to 31 March 2013.

Remuneration and terms of service committee

Primary care trusts are required to have a remuneration committee to oversee the pay, terms and conditions of service of senior managers.

The main function of the committee is to make recommendations to the board on the remuneration, allowances and terms of service of other officer members to ensure they are fairly rewarded for their individual contribution to the organisation, having regard for the organisation's circumstances and performance, and taking into account national arrangements.

Remuneration

We operate a system of performance-related pay for those senior management posts subject to the Very Senior Managers (VSM) pay framework. There has been no payment of performance related pay during the year ending 31 March 2013. Future performance related pay for directors will be subject to the terms and conditions of service for very senior managers and will be considered by the remuneration committee.

No compensation was payable during the year and no amounts are included that are payable to third parties for the services of senior managers. In the event of redundancy standard NHS packages will apply.

Contractual arrangements

The chair and non-executive directors are appointed by the Appointments Commission, an independent organisation, on behalf of the Secretary of State. Their terms of service are set nationally and cannot be varied by the PCT. Non executive directors are on fixed term contracts up to five years in length, depending on individual circumstances.

The chief executive and directors are on permanent contracts, subject to a six month notice period for the chief executive and three months for directors.

Pensions

All staff, including senior managers, are eligible to join the NHS pensions scheme. The scheme has fixed the employer's contribution at 14% of the individual's salary as per the NHS Pension Agency regulations. Employee contribution rates for PCT officers and practice staff, and the prior year comparators, are as follows:

2012/13 Member Contribution Rates before tax relief (gross)

Tier	Annual pensionable pay (full time equivalent) 2012/13	Contribution Rate 2012/13
1	Up to £15,278.99	5.0%
2	£15,279.00 - £21,175.99	5.0%
3	£21,176.00 - £26,557.99	6.5%
4	£26,558.00 - £48,982.99	8.0%
5	£48,983.00 - £69,931.99	8.9%
6	£69,932.00 - £110,273.99	9.9%
7	£110,274.00 and over	10.9%

2011/12 Member Contribution Rates before tax relief (gross)

Tier	Annual pensionable pay (full time equivalent) 2011/12	Contribution Rate 2011/12
1	Up to £21,175.99	5.0%
2	£21,175.99 - £69,931.99	6.5%
3	£69,932.00 - £110,273.99	7.5%
4	£110,174.00 and over	8.5%

Scheme benefits are set by the NHS Pensions Agency and are applicable to all members.

Past and present employees are covered by the provisions of the NHS pension scheme. For full details of how pension liabilities are treated please see note 1 in the annual accounts.

Expenses policy

We reimburse expenses in line with the Agenda for Change terms and conditions Part III Sections 17 and 18, and HM Revenue and Customs guidelines. Agenda for Change is the single pay system in operation in the NHS.

Expenses which are reimbursed include public transport costs and mileage for use of own car or, where appropriate, a lease car may be provided. If a member of staff is on official duties away from home, the cost of necessary meals and accommodation costs will be reimbursed. All claims for expenses must be authorised by the employee's manager and receipts must be provided.

Executive Directors	2012/13 Expenses £
Heather Mullin	£111
Terry Huff	£2,161
Alwen Williams	£976
May Cahill	£368
Ian Basnett	£208
Lesley Mountford	£859
Vanessa Lodge	£102
Other Directors	
Conor Burke	£747
Jane Gateley	£464
Jane Mehta	£78
Andrew Ridley	£319
Chair, Non-Executive Directors and Associate NEDs	
Frances Pennell-Buck	£1,083
Lesley Buckland	£215
Kash Pandya	£835
Jill Pullen	£75
Charles Beaumont	£1,458
Phil Wilson	£316
Jane Winder	£101
Catherine Max	£97
Mariette Davis	£175

Termination agreements or exit packages

Termination arrangements are applied in accordance with statutory regulations as modified by national NHS conditions of service agreements (specified in Agenda for Change), and the NHS pension scheme. Specific termination arrangements will vary according to age, length of service and salary levels. The remuneration committee will agree any severance arrangements.

Details of any exit packages are given in note 7.4 of the annual accounts.

Non-executive directors

Non-executive directors do not have service contracts. They are appointed by the NHS Appointments Commission for a four year period, which may be extended.

Non-executive directors are paid a fee set nationally. Travel and subsistence fees were incurred in respect of official business are payable in accordance with nationality set rates. Non-executive directors are also able to reclaim expenses related to carer expenses incurred as a result of work.

Non-executive members do not receive pensionable remuneration and therefore are not eligible to join the NHS Pension Scheme.

The relationship between the highest paid director and median remuneration

Reporting bodies are required to disclose the relationship between the remuneration of the highest-paid director in their organisation and the median remuneration of the organisation's workforce.

The banded remuneration of the highest-paid director in Waltham Forest PCT in the year 2012/13 was £24,147.69 (2011/2012 = £37,388). This was 2.22 times (2011/2012 = 3.72) the median remuneration of the workforce, which was £10,881.43 (2011/2012 = £10,041.29). The reason for the variances between 2011/2012 and 2012/2013 is that the highest paid director salary is now spread across 7 PCTs (For 2011/2012 this was 4 PCTs) in the North East London Cluster.

The highest paid director's salary is based upon the estimated cost to Waltham Forest PCT. Some staff who are not recharged across the sector (seven PCTs) cost Waltham Forest PCT more than the highest paid director only due to the fact that they have not been recharged across all seven PCTs. As a result 38 staff cost Waltham Forest PCT more than the highest paid director.

The Hutton review of fair pay in the public sector guidance suggests that all staff irrespective of any recharges should be shown as 100% charged to Waltham Forest PCT compared to the highest paid director as only being shown as the element of cost the PCT is charged for that director's service

Waltham Forest PCT has moved away from this guidance as it would result in a negative pay multiple, and as such has based the calculation on the element recharged to Waltham Forest PCT only for those staff who work across other entities.

Notes

Salary and pension entitlements of directors and senior managers

The following schedules disclose further information regarding remuneration and pension entitlements.

Salary Entitlements (Share of PCT)

Non-executive directors		2012/2013			2011/2012

Cash equivalent transfer values

A cash equivalent transfer value (CETV) is the actuarially assessed capital value of the pension scheme benefits accrued by a member at a particular pointing time. The benefits valued are the member's accrued benefits and any contingent spouse's pension payable from the scheme. A CETV is a payment made by a pension scheme or arrangement to secure pension benefits in another pension scheme or arrangement when the member leaves a scheme and chooses to transfer the benefits accrued in their former scheme. The pension figures shown relate to the benefits that the individual has accrued as a consequence of their total membership of the pension scheme, not just their service in a senior capacity to which disclosure applies. The CETV figures and the other pension details include the value of any pension benefits in another scheme or arrangement which the individual has transferred to the NHS pension scheme. They also include any additional pension benefit accrued to the member as a result of their purchasing additional years of pension service in the scheme at their own cost. CETVs are calculated within the guidelines and framework prescribed by the Institute and Faculty of Actuaries.

Real increase in cash equivalent transfer values

This reflects the increase in CETV effectively funded by the employer. It takes account of the increase in accrued pension due to inflation, contributions paid by the employee (including the value of any benefits transferred from another scheme or arrangement) and uses common market valuation factors for the start and end of the period.

Peter Coates, CBE
Designated Signing Officer

13 Statement of the responsibilities of the signing officer for the Primary Care Trust 2012/13 annual accounts

The Department of Health's Accounting Officer has designated the role of signing officer for the final accounts of Waltham Forest Primary Care Trust to discharge the following responsibilities for the Department of Health:

- there are effective management systems in place to safeguard public funds and assets and assist in the implementation of corporate governance;
- value for money is achieved from the resources available to the primary care trust;
- the expenditure and income of the primary care trust has been applied to the purposes intended by Parliament and conform to the authorities which govern them;
- effective and sound financial management systems are in place; and
- annual statutory accounts are prepared in a format directed by the Secretary of State with the approval of the Treasury to give a true and fair view of the state of affairs as at the end of the financial year and the net operating cost, recognised gains and losses and cash flows for the year.

To the best of my knowledge and belief, and from the assurances provided by the PCT Accountable Officer until 31 March 2013, I am assured that the responsibilities have been properly discharged.

Peter Coates, CBE
Designated Signing Officer

14 Annual governance statement

Name of organisation: Waltham Forest Primary Care Trust

1. Scope of responsibility

The Board was accountable for internal control. During 2012/13 the Chief Executive of the Board had responsibility for maintaining a sound system of internal control that supported the achievement of the organisation's policies, aims and objectives. She also had responsibility for safeguarding the public funds and the organisation's assets.

As Designated Signing Officer I have sought assurance from the chief executive of the PCT on these matters.

The Chief Executive of the PCT was accountable to the Chair of the PCT and the Chief Executive of the Strategic Health Authority. The Chief Executive was regularly performance managed through twice yearly performance appraisals undertaken by the Chair of the Board.

In addition, the Strategic Health Authority (NHS London) met regularly with the directors and the chief executive during the year to formally review performance on delivering the organisation's objectives. These meetings were formally minuted.

Systems and processes were in place to enable effective working with these partner organisations.

In recognition of the risk in establishing an appropriate management structure to manage seven PCTs as a cluster with robust governance arrangements and organisational form to deliver its objectives significant assurance was received from the internal auditors, RSM Tenon and Parkhill, that the cluster governance arrangements and controls upon which the organisation relies to manage the risk were suitably designed, consistently applied and effective.

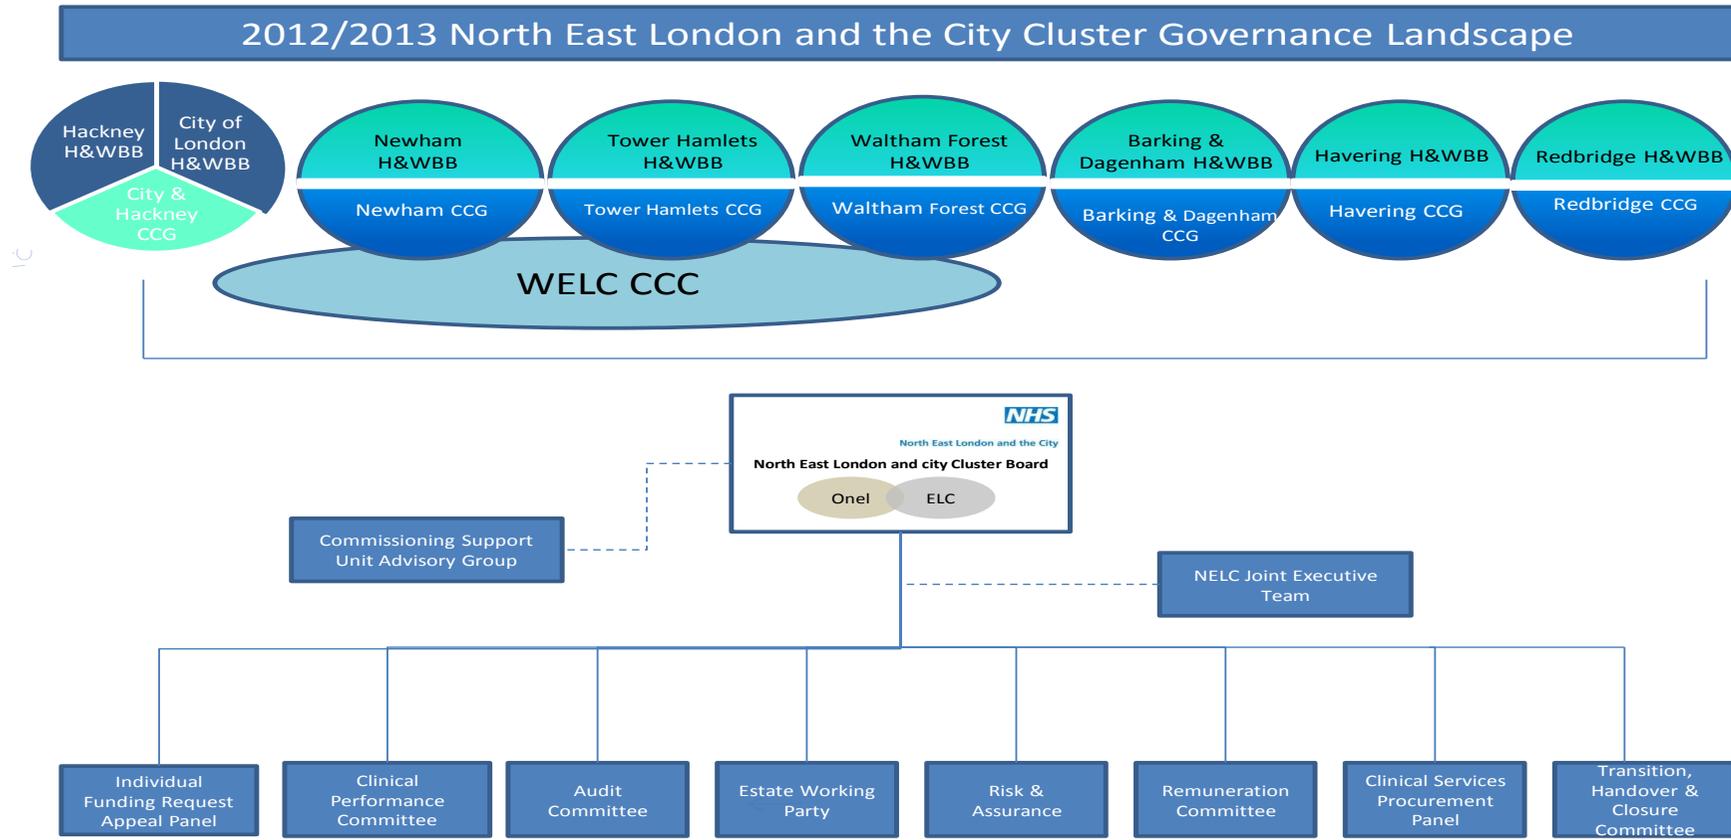

2. The governance framework of the organisation

The governance structure was designed to ensure that there was a balance between having robust governance arrangements for the organisation and being able to deliver an effective end state.

In January 2012 the boards of the seven PCTs in North East London and City agreed to work as a Cluster through an integrated management structure with effect from April 2012. This arrangement encompassed the Chair and non-executive director team being appointed across the seven PCTs and a single management team. The governance model met the requirements of the Department of Health guidance 'model 2'. These comply with the Corporate Governance Code without departure. Arrangements in place for the discharge of statutory functions have been checked for irregularities, and to ensure they are legally compliant.

The model was delivered through a joint committee structure from April 2012, shown below:

NHS North East London and City committee structure

Agreed April 2012

The Cluster Board for North East London and the City met on a bimonthly basis during 2012/2013 until March when two meetings were necessary to complete Board business and close down all seven PCTs.

The work of the Board has been underpinned by a single Corporate Governance Framework for the transition year together with a single set of Standing Orders, Standing Financial Instructions and Scheme of Delegation. This framework has enabled the Cluster to conduct its business during a period of significant change in the NHS. It has also supported the establishment of the Clinical Commissioning Groups as sub-committees of the Board and a robust Performance Management Framework to ensure accountability.

The Board's work has been supported by a number of committees as evidenced in the structure diagram. These committees have been chaired by Non-Executive Directors or Associate Non-Executive Directors. The role of Associate Non-Executive Director was created as part of the governance arrangements for the Cluster and has ensured that a wide range of non-executive knowledge and experience was retained and used in the assurance process.

The Audit Committee has met on a bi-monthly basis through to September 2012 and then met monthly from October 2012 to March to strengthen assurance. It was quorate on each occasion. It has considered internally and externally audit reports along with updates from the counter-fraud officer. It has received updates and reviewed reports on finance, the Board Assurance Framework and Corporate Risk Register together with feedback from the Risk and Assurance Committee. It also reviewed work in relation to transition, handover and closure and from November 2012 received reports from the Transition, Handover and Closure Committee.

The Risk and Assurance Committee was established from April 2012 and met on a bi-monthly basis from May. The role of the Committee was to review management action in relation to risks that impact on the delivery of the operating plans and the achievement of the corporate objectives in order to give assurance to the Board. The committee has been quorate on all occasions.

The Transition, Handover and Closure Committee chaired by a Non-Executive Director was established in October 2012 to provide additional assurance to the Board during the final months up until closure. It has met on a monthly basis since November and undertaken in depth reviews of plans, including the Transfer Schemes for staff, assets and liabilities and the closedown plans.

The Remuneration Committee met eight times in 2012/13 to consider matters relative to remuneration and terms of service of the senior management team and staff matters relating to handover and closure. All meetings were quorate.

3 Board effectiveness

All Board members were asked to complete a board evaluation questionnaire in March 2013. The questions covered the broad themes on the key functions of the Board. Board members were requested to indicate the extent to which they agreed or disagreed (to varying degrees) with the statements contained in the questionnaire. Board members also had the additional opportunity of providing comments.

Just over half of the Executive and Non-Executive Directors completed the questionnaire and their responses have been kept confidential. The general picture that emerges from the responses to the board evaluation questionnaire is that the Board is generally confident:

- that the members individually and collectively understand what is expected of them
- that it effectively carries out its functions in relation to its provision of strategic leadership to the organisation
- that it monitors the implementation of the strategic plan that it sets for the organisation
- that the Board provides leadership to the organisation in the delivery of quality improvement
- that it is assured that a sound system of internal control and risk management is in place within the organisation and is functioning effectively
- that there is an effective working relationship between the Board and the management team
- that the Board has an effective working relationship with its internal and external stakeholders
- that Board members are satisfied that they make meaningful, informed and robust contributions to discussions at Board meetings and makes effective use of its meetings

4. Assurance

Since 1 October 2012 the Board's Governance arrangements focused on the final phase of transition, handover and closure with assurance through CCG shadow governing bodies for performance and service development issues and the Director of Transition providing assurance for transition, handover and closure arrangements. Regular reports were provided to the Board on transition and handover progress and the process for the formal transfer of assets and liabilities and staff to receiving organisations. The seven PCTs as sender organisations transferred their functions, both statutory and non-statutory to 47 other organisations. The process for making this transfer was through a legal transfer scheme, one for staff and one for assets and liabilities for each PCT that makes up the Cluster. The draft transfer scheme was approved by the Board at its final meeting in March 2013.

The Risk and Assurance Committee met for the last time on 27 February. At that meeting the Committee agreed to write to the Chair of the CCGs and the Chairs of the CCG Audit Committees drawing their attention to the risks that will continue beyond the end of March and will be the receiving organisations' responsibility.

5. Risk assessment

5.1 Risk management strategy

The Cluster governance structure was designed to ensure that there was a balance between having robust governance arrangements for the organisation and being able to deliver an effective end state.

The risks to the achievement of the Cluster's Corporate Objectives were identified through the process detailed in the North East London and the City Risk Management Strategy. This document was created following a review of the risk management strategies for:

- The East London and the City (comprising City and Hackney PCT, Newham PCT and Tower Hamlets PCT) Risk Management Strategy, and
- The Outer North East London (comprising Barking and Dagenham PCT, Havering PCT, Redbridge PCT and Waltham Forest PCT) Risk Management Strategy.

Elements of best practice from these documents in terms of: risk definitions, identification processes, templates and risk matrix were taken out and combined to create the NHS North

East London and the City Risk Management Strategy. This was approved by the Board at its May 2012 meeting.

The Risk Management Strategy includes a scoring and escalation process that ensures as far as reasonably practicable that there is a consistency of applied risk ratings across the organisation.

In analysing risks the risk rating takes the following into account:

- Cluster ability to deliver its objectives and projects
- Harm/injury to patients, staff, visitors and others
- Potential for complaints / claims
- Service/business disruption
- Staffing and competence
- Financial
- Inspection/audit
- Adverse publicity

The risk assessment process drew on the best practice elements of ISO31000 and therefore embraces the concept of enterprise, integrated risk management in ensuring achievement of best outcomes. The Risk Management Strategy set out the approach to risk which demanded embedding risk within all business processes.

In moving forward the North East London and the City Risk Management Strategy has been adopted for use by several of the North East London and the City Clinical Commissioning Groups (CCGs). Additionally, the Cluster Board Assurance Framework has been reviewed by the CCGs ensuring that where appropriate, risks are handed over.

5.2 Risk identification

The risks to the achievement of Cluster objectives were identified through two main processes.

- Review of the Board Assurance Frameworks from NHS East London and City and NHS Outer North East London and the City to identify risks, controls, assurances and gaps that remained a threat to NHS North East London and the City, and
- A risk assessment of the Corporate Objectives. The Cluster Board set its Corporate Objectives at the beginning of the 2012/13 year. Subsequent review meetings with the Directorate Risk Leads identified the risks, controls, assurances and gaps. From these discussions the risks were graded in line with the NHS North East London and the City Risk Management Strategy.

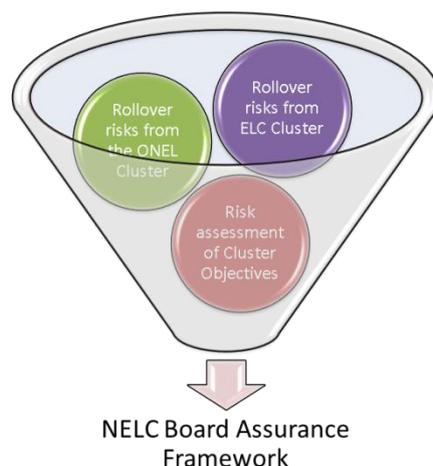

Figure 1 showing the 2 main processes that led to the creation of the NELC Board Assurance Framework

Supplementing this “top down” process of risk identification was that of Corporate Risk Register. Operational risks were identified at a Directorate level and added to the Corporate Risk Register. This process provided a “bottom up” view of risks that were both specific to the individual PCTs and those specific to the Cluster.

In September 2012 NHS London requested that all risks were categorised as at least one of the following:

- In year delivery
- Transition/closure
- Decommissioning
- Zero Tolerance Risk

This categorisation was added to the Board Assurance Framework and the Corporate Risk register in quarter 3.

5.3 Accountability for risks

Individual Directors were held accountable for the risks associated with their Directorates. The Board Assurance Framework and Corporate Risk Register were refreshed quarterly through meetings with the Directorate risk leads. Once reviewed and revised the documents were reported to the following bodies:

- **Transition, Handover and Closure Committee**
This Committee retained oversight for all the risks pertaining to Transition, Handover and Closure.
It met on a monthly basis from November 2012
- **Risk and Assurance Committee**
This Committee reviewed both the Board Assurance Framework and Corporate Risk Register in its entirety at least once a quarter to provide probity of the documents and thus the risks facing the organisation.
This Committee also had the power to request “Deep Dives” to provide assurance to the Board that the Cluster has effective systems of internal control in relation to risk management and governance. The Committee held one deep dive on the issue of “Quality and handover to the CCGs”.
It met bi-monthly.
- **Audit Committee**
The Audit Committee was responsible for reviewing the effectiveness of the internal control and risk management systems and received reports from management on the effectiveness of the risk systems that the Cluster had established.
- **Cluster Board**
The Board received the Board Assurance Framework once a quarter to ensure that the Board retained oversight of all the risks to the achievement of the Corporate Objectives and allow Board members to challenge executives on areas of weak control, assurance or high risk rating.

5.4 Board Assurance Framework 2012/13

Key risks for Waltham Forest PCT identified during 2012/13, which populated the Board Assurance Framework (BAF) for 2012/13, and how their risk rating changed over the financial year are summarised below.

	Risk description	Initial risk	June 12	Aug 12	Nov 12	Mar 13
1.1	There is a risk that some public health targets (including screening) across PCTs will not be met	Red	Yellow	Yellow	Yellow	Yellow
1.2	Risk of overspend on revenue resource limit. Risk of not meeting agreed control target surpluses.	Red	Yellow	Yellow	Yellow	Green
1.3	Risk of financial consequences for future arising from the final year of PCTs, exit/closedown and the overall transition agenda.	Red	Yellow	Yellow	Yellow	Yellow
1.4	Ensure we support CCGs to deliver operating plans, QIPP and achieve key strategic aims in 2012/13. This is in relation to improvements in healthcare and financial management.	Red	Yellow	Yellow	Yellow	Yellow
1.5	CCG failure to manage all local healthcare providers with support from CSU and the cluster could result in key quality and performance not being achieved as well as the detriment of healthcare delivered to the local population.	Yellow	Yellow	Yellow	Yellow	Yellow
1.6	Failure to meet emergency care access standards at Barts Health could adversely affect service users and other organisations	Yellow	Yellow	Yellow	Yellow	Yellow
1.8	Maintaining an effective and proactive quality assurance framework during periods of transition for both the provider and commissioner landscape across all provider groups	Yellow	Yellow	Yellow	Yellow	Green
1.9	Barts Health merger: failure of new, larger trust to deliver requisite levels of performance across all sites due to transition.	Yellow	Yellow	Yellow	Yellow	Green

2.1	Progress in quality improvement is not achieved in the timeframe set out and inability to sustain quality and safety of maternity services at BHRUT in the context of CIP and requirement to operate					
2.2	Failure to meet emergency care access standards at BHRUT/Queens Hospital adversely impacting on service users and other organisations					
2.3	Failure to deliver BHRUT 2012/13 financial plan – deficit reduced in line with plan to maximum £40m. Dependent on £23m CIP delivery and 10.3 commissioner QIPP delivery					
2.4	Failure to develop a clear plan for clinical and financial sustainability, including a plan to implement Health for North East London acute reconfiguration decisions					
3.1	Loss of talent and organisational memory in both sender and receiver organisations, leading to increased staff costs and the potential of new organisations unable to function and to take on their statutory and other roles by April 2013.					
3.2	There is risk that key performance issues regarding contractors are not managed effectively and key information is not passed on during transition due to delays in clarifying roles, structure and functions in the NHS Commissioning Board London Region and its local area teams.					
3.3	Divestment of remaining provider services and non-commissioning services – via procurement and other transfers. All transfers and procurements must be complete by 31 March 2013. Range and scope of the functions increases the risk.					
3.4	Information risks associated with records management, Fol timescales, Information Governance Toolkit requirements and data protection issues are not effectively managed during transition. Size and scope of records in the legacy PCTs increases this risk.					
3.5	Public Health transition to local authority end state is not achieved within required timescales (also see 3.2)					
3.6	Organisational memory on quality and safety (including safeguarding) is lost to the system and handover is ineffective.					
3.7	IM&T transition is not effectively aligned to transition end state in terms of asset transfer – potential issues around delays in deciding future arrangement of GP ICT at a London level.					
3.8	Failure to develop a robust and sustainable commissioning support organisation through migration					
4.1	There is a risk that the 2012 Olympics and Paralympics will impact on delivery of healthcare, thereby preventing business as usual.					

Risks to the achievement of the corporate objectives were determined at the beginning of the 2012/13 year and reported to the Board in May. From this a Board Assurance Framework was constructed and reviewed at the July meeting and at every meeting through the year. The BAF focus was on risks across the system to the delivery of the corporate objectives; The Risk Register identifies risks on a PCT specific basis as appropriate.

The assessment of risks was undertaken in accordance with the Cluster's risk strategy and Board Assurance Framework. This included a risk scoring and escalation process that ensured as far as is practicably possible that there is consistency of applied risk ratings across the organisation. In depth scrutiny of the BAF has been undertaken by the Risk and

Assurance committee. This Committee undertook a “deep dive” challenge into particular areas of risks, for example quality and safety and has held individual directors to account for the risks associated with their areas of responsibility.

The Assurance Framework was comprehensive in scope, covering the key operational areas of the PCT. Through its inclusion of zero tolerance and horizon scanning risks it ensures the assurances around risk prevention, risk deterrence (eg fraud related risks) and the management of manifested and potential risks.

The Framework was consistent with the template promulgated by the Department of Health and explicitly mapped objectives against pertinent risks, controls and assurances. It also described the ways in which public stakeholders were involved in managing risks which impact on them.

Risks to data security were managed by the Information Governance team. This had limited resources during the year and an audit of the Information Governance Toolkit highlighted a number of deficiencies. These deficiencies were addressed but in the limited time available it was only possible to achieve Level 1 compliance by the end of March 2013.

5.5 Corporate Risk Register

The 12/13 BAF was supplemented by a corporate risk register which highlighted other corporate risks as follows:

- Insufficient and ineffective communications during the transition may lead to some staff, stakeholders and the public not understanding the changes
- Review of creditors and debtors as part of the formal “winding up” process may necessitate write of uncollectable debts and non-payable income potentially causing waste of Cluster finances, loss of reputation and potential adverse media attention.
- Information Governance risks relating to non-compliance with the Information Governance Toolkit.

These corporate risks have been managed as follows:

- The delivery team for Transition, Handover and Closure put in place relationship managers to ensure there was effective communication with receiving organisations. Regular bulletins have been issued to staff and public communication statements issued in the local press and on website
- A finance closedown team has been put in place to manage “wind up” effectively
- Remedial action was taken to ensure compliance with Information Governance Toolkit by 31 March 2013. Lessons learn from the deficiencies have been passed on the CCGs and the CSU to inform their Information Governance Toolkit compliance for 2013/14

5.6 The Risk and control framework

The Board has considered and developed an Assurance Framework as part of the overall Business Planning cycle. Throughout the year, the Assurance Framework has been continuously amended and updated to refine and develop strategic understanding of the assurance agenda and its various requirements.

A rolling review of the Assurance Framework for 2012 / 2013, carried out by the PCT's internal auditors, RSM Tenon and Parkhill has demonstrated that there is an effective system of internal control to manage the principle risks identified by the organisation.

However it notes that there is scope for some improvement when articulating the mechanisms that provide assurances that the controls put in place to manage risks are indeed effective. The specific issues that have been highlighted for improvement are listed below:

- i. Information Governance
- ii. Continuing Care

6. Review of the effectiveness of risk management and internal control

As Accountable Officer, I have responsibility for reviewing the effectiveness of the system of internal control. My review is informed in a number of ways. The Head of Internal Audit provides me with an opinion on the overall arrangements for gaining assurance through the Assurance Framework and on the controls reviewed as part of Internal Audit's work.

For 2012 / 13 the Head of Internal Audit has advised me that based on the work undertaken in 2012/13, significant assurance can be given that there is a generally sound system of internal control, designed to meet the organisation's objectives, and that controls are generally being applied consistently.

However, he has issued an Information Governance report with a RED opinion rating whilst at the same time noting that we are drawing up a response to the recommendations made which we expect to mitigate any gaps in controls identified moving forwards.

Executive managers within the organisation who have responsibility for the development and maintenance of the system of internal control provide me with assurance.

The Assurance Framework itself provides me with evidence that the effectiveness of controls that manage the risks to the organisation achieving its principal objectives have been reviewed. My review is also informed by other sources including;

- Scrutiny from our external auditors
- Information Governance Assurance Toolkit compliance submission
- The Cluster's internal monitoring and review process for its quality of commissioned services described in the Department of Health's Operating Framework and delivered through the Risk and Assurance Committee
- Reports by Internal and External Audit and the results of Patient and Staff Surveys
- Annual Care Quality Commission (CQC) assessment for safeguarding children
- Local Safeguarding Children Board (LSCB) annual report
- Robust incident and complaints monitoring processes, ensuring compliance with national Serious Incident reporting.
- NHS London's review of the plans to support the 2012/13 QIPP programme and consequential financial impacts at both PCT and Outer North East London levels
- Assurance on fraud and potential fraud was provided through the work of the local counter fraud officer who provides updates, communications and training on all appropriate counter fraud issues to PCT staff and emerging CCG pathfinder organisations.
- My review confirms that Waltham Forest PCT had a generally sound system of internal controls that supports the achievement of its policies, aims and objectives and that those control issues have been or are being addressed.
- The Audit Committee provided the Board with an independent and objective view of arrangements for internal financial control within the PCT, ensuring that the Internal Audit service complied with mandatory auditing standards including the review of all fundamental financial systems.

- The Board and Executive Directors have managed and reviewed their principal risks through their Performance reviews both with NHS London and the cluster's Operating Plan and the Business Planning process and their contribution to the development of the Assurance Framework.

The gaps in control and assurance identified within the Assurance Framework were the subject of action plans which were approved by the Board.

Significant Issues

The following significant control issues during the year 2012/13 have taken place:

- Deficiencies in compliance with the Information Governance Toolkit. With remedial action in year the PCT only achieved level 1 compliance.
- The backlog in continuing care assessments carries significant financial risks for outer north east London CCGs.

Peter Coates, CBE
Designated Signing Officer

15 Independent auditor's statement (internal)

HEAD OF INTERNAL AUDIT OPINION ON THE EFFECTIVENESS OF THE SYSTEM OF INTERNAL CONTROL AT WALTHAM FOREST PCT FOR THE YEAR ENDED 31 MARCH 2013

1 Roles and responsibilities

The whole Board is collectively accountable for maintaining a sound system of internal control and is responsible for putting in place arrangements for gaining assurance about the effectiveness of that overall system.

The Annual Governance Statement (AGS) is an annual statement by the Accountable Officer, on behalf of the Board, setting out:

- how the individual responsibilities of the Accountable Officer are discharged with regard to maintaining a sound system of internal control that supports the achievement of policies, aims and objectives;
- the purpose of the system of internal control as evidenced by a description of the risk management and review processes, including the Assurance Framework process;
- the conduct and results of the review of the effectiveness of the system of internal control including any disclosures of significant control failures together with assurances that actions are or will be taken where appropriate to address issues arising.

The organisation's Assurance Framework is one of the key mechanisms that the Accountable Officer can use to support their AGS.

In accordance with NHS Internal Audit Standards, the Head of Internal Audit (HoIA) is required to provide an annual opinion, based upon and limited to the work performed, on the overall adequacy and effectiveness of the organisation's risk management, control and governance processes (i.e. the organisation's system of internal control). This is achieved through a risk-based plan of work, agreed with management and approved by the Audit Committee, which should provide a reasonable level of assurance, subject to the inherent limitations described below.

The opinion does not imply that Internal Audit have reviewed all risks and assurances relating to the organisation. The opinion is substantially derived from the conduct of risk-based plans generated from a robust and organisation-led Assurance Framework. As such, it is one component that the Board takes into account in making its AGS.

2 The Head of Internal Audit Opinion

The purpose of my annual HoIA Opinion is to contribute to the assurances available to the Accounting Officer and the Board which underpin the Board's own assessment of the effectiveness of the organisation's system of internal control. This Opinion will in turn assist the Board in the completion of its AGS.

My opinion, based on work undertaken up to 31 March 2013, is set out as follows:

*Based on the work undertaken in 2012/13, **significant assurance** can be given that there is a generally sound system of internal control, designed to meet the organisation's objectives, and that controls are generally being applied consistently. However, we have noted one area of weakness, where a RED rated report was issued.*

We were unable to provide assurance over the effectiveness of controls over Information Governance. There had been limited work done to update the Information Governance

Toolkit throughout the year. The key risks that underpin the failings around information governance and impacted on the control environment in 2012/13 are:

- Failings to ensure staff were appropriately trained to mitigate the risk of staff failing to handle and store data securely;
- Ineffective management of information governance, information security, clinical information assurance, corporate information assurance and secondary use assurance increasing the likelihood that patients' and staff data will not be effectively handled.

Management has committed to being able to reach a Level 1 Standard by the end of the financial year, when the final Toolkit assessment is uploaded. Whilst this is not to a satisfactory level (level 2 is deemed satisfactory) there is evidence that Management is responding to the weaknesses identified in our report and further actions identified will be transferred to receiver organisations from 1 April 2013 to help improve the controls over handling patients and staff personal data in line with legislative requirements.

3 Issues Judged Relevant to the preparation of the Annual Governance Statement

There are no specific issues we would expect the PCT to consider in the formulation of the AGS, other than consideration being given to referencing the point raised above regarding the failings in information governance identified. We would also anticipate reference to issues identified elsewhere in the Cluster concerning Continuing Care where considered relevant to the PCT. These were in relation to:

- how evidence on the eligibility of Continuing Care patients could not be provided through the submission of checklists and Decision Support Tools prior to invoices being paid to continuing care providers; and
- the inability to provide sufficient evidence to demonstrate that care reviews were being consistently undertaken for all patients within three months of them being deemed eligible for continuing care funding.

RSM Tenon Limited

16 Independent auditor's statement (external)

INDEPENDENT AUDITOR'S REPORT TO THE ACCOUNTABLE OFFICER OF WALTHAM FOREST PCT

We have audited the financial statements of Waltham Forest PCT for the year ended 31 March 2013 on pages 20 to 32. The financial reporting framework that has been applied in their preparation is applicable law and the accounting policies directed by the Secretary of State with the consent of the Treasury as relevant to the National Health Service in England. We have also audited the information in the Remuneration Report that is subject to audit.

This report is made solely to the Accountable Officer Waltham Forest PCT in accordance with Part II of the Audit Commission Act 1998. Our audit work has been undertaken so that we might state to the Accountable Officer of the PCT those matters we are required to state to him in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Accountable Officer of the PCT for our audit work, for this report or for the opinions we have formed.

Respective responsibilities of Accountable Officer and auditor

As explained more fully in the Statement of Accountable Officer's Responsibilities set out on page 33. The Accountable Officer is responsible for the preparation of financial statements which give a true and fair view. Our responsibility is to audit, and express an opinion on, the financial statements in accordance with applicable law and International Standards on Auditing (UK and Ireland). Those standards require us to comply with the Auditing Practices Board's Ethical Standards for Auditors.

Scope of the audit of the financial statements

An audit involves obtaining evidence about the amounts and disclosures in the financial statements sufficient to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or error. This includes an assessment of: whether the accounting policies are appropriate to the PCT's circumstances and have been consistently applied and adequately disclosed; the reasonableness of significant accounting estimates made by the PCT; and the overall presentation of the financial statements. In addition, we read all the financial and non-financial information in the annual report to identify material inconsistencies with the audited financial statements. If we become aware of any apparent material misstatements or inconsistencies we consider the implications for our report.

Opinion on financial statements

In our opinion the financial statements:

- give a true and fair view of the financial position of Waltham Forest PCT as at 31 March 2013 and of its expenditure and income for the year then ended; and
- have been prepared properly in accordance with the accounting policies directed by the Secretary of State with the consent of the Treasury as relevant to the National Health Service in England.

Opinion on regularity prescribed by the Code of Audit Practice 2010 for local NHS bodies

In our opinion, in all material respects the expenditure and income have been applied to the purposes intended by parliament and the financial transactions conform to the authorities which govern them.

Opinion on other matters prescribed by the Code of Audit Practice 2010 for local NHS bodies

In our opinion:

- the part of the Remuneration Report subject to audit has been properly prepared in accordance with the accounting policies directed by the Secretary of State with the consent of the Treasury as relevant to the National Health Service in England; and
- the information given in the director's report for the financial year for which the financial statements are prepared is consistent with the financial statements.

Matters on which we are required to report by exception

We have nothing to report in respect of the following matters where the Code of Audit Practice 2010 for local NHS bodies requires us to report to you if:

- in our opinion, the Governance Statement does not reflect compliance with the Department of Health's requirements;
- any referrals to the Secretary of State have been made under section 19 of the Audit Commission Act 1998; or
- any matters have been reported in the public interest under the Audit Commission Act 1998 in the course of, or at the end of the audit.

Conclusion on the PCT's arrangements for securing economy, efficiency and effectiveness in the use of resources

We are required under Section 5 of the Audit Commission Act 1998 to satisfy ourselves that the PCT has made proper arrangements for securing economy, efficiency and effectiveness in its use of resources. The Code of Audit Practice issued by the Audit Commission requires us to report any matters that prevent us being satisfied that the audited body has put in place such arrangements.

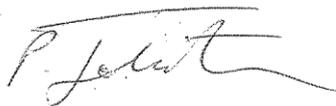

We have undertaken our audit in accordance with the Code of Audit Practice 2010 for local NHS bodies, having regard to the guidance issued by the Audit Commission in November 2012. We have considered the results of the following:

- our review of the Governance Statement; and
- the work of other relevant regulatory bodies or inspectorates, to the extent that the results of this work impact on our responsibilities at the PCT;

As a result, we have concluded that there are no matters to report.

Certificate

We certify that we have completed the audit of the accounts of Waltham Forest PCT in accordance with the requirements of the Audit Commission Act 1998 and the Code of Audit Practice 2010 for local NHS bodies issued by the Audit Commission.

17 External auditor's costs

Waltham Forest PCT's external auditor is KPMG LLP . They were paid £114,000 in 2012/3 to carry out the statutory audit. In 2011/12 the fees were £170,000.

18 Glossary of organisation names

Clinical commissioning groups (CCGs).

These are led by GPs and other clinicians and have taken statutory responsibility for commissioning local hospital, mental health and community health services, from April 2013.

Commissioning support unit, CSU

These have been established to provide technical support to clinical commissioning groups in carrying out their commissioning responsibilities.

NHS East London and the City; ELC, also referred to as inner north east London.

The cluster of PCTs – City and Hackney, Newham and Tower Hamlets – that worked together under a single management team from April 2010 to March 2011.

Inner North East London; INEL

The area comprising City and Hackney, Newham and Tower Hamlets primary care trusts (see NHS East London and the City; ELC). This comprised the former East London and the City PCTs; City and Hackney, Newham and Tower Hamlets, and the Outer North East London PCTs; Barking and Dagenham, Havering, Redbridge, and Waltham Forest.

NHS North East London and the City; NELC

The cluster of primary care trusts brought together under a single management team from April 2013 to March 2013.

NHS Outer North East London; ONEL

The cluster of PCTs – Barking and Dagenham, Havering, Redbridge, and Waltham Forest that worked together under a single management team from April 2010 to March 2011.

As a NHS Primary Care Trust no interest can be received in relation to balances held within its bank accounts.

Statement of Changes In Taxpayers Equity for the year ended 31 March 2013

	Note	General fund £000	Revaluation reserve £000	Total reserves £000
Changes in taxpayers' equity for 2012-13				
Balance at 1 April 2012		(17,100)	6,174	(10,926)
Net operating cost for the year		(448,234)	-	(448,234)
Net gain on revaluation of property, plant, equipment	11	-	1,146	1,146
Impairments and reversals	11	-	(372)	(372)
Transfers between reserves		95	(95)	-
Total recognised income and expense for 2012-13		(448,139)	679	(447,460)
Net Parliamentary funding	3	450,161	-	450,161
Balance at 31 March 2013		(15,078)	6,853	(8,225)
Changes in taxpayers' equity for 2011-12				
Balance at		(17,966)	7,721	(10,245)
Net operating cost for the year		(441,646)	-	(441,646)
Net gain/(loss) on revaluation of property, plant and equipment		-	136	136
Impairments and reversals		-	(1,683)	(1,683)
Total recognised income and expense for 2011-12		(441,646)	(1,547)	(443,193)
Net Parliamentary funding		442,512	-	442,512
Balance at 31 March 2012		(17,100)	6,174	(10,926)

The general fund reflects the cumulative surplus/deficit made arising each year from the Statement of Comprehensive Net Expenditure. The PCT's Parliamentary funding is also accounted for in this reserve. This balance cannot be released back to the Statement of Comprehensive Net Expenditure.

The revaluation reserve reflects movements in the value of property, plant and equipment and intangible assets as set out in the respective accounting policies for each asset category. The revaluation reserve balance relating to each asset is released to the general fund on disposal of that asset.

A transfer between the revaluation reserve and general fund has taken place for an amount of £95,000 in respect of assets which carried a revaluation reserve balance which was no longer required.

13 Statement of the responsibilities of the signing officer for the Primary Care Trust 2012/13 annual accounts

The Department of Health's Accounting Officer has designated the role of signing officer for the final accounts of Waltham Forest Primary Care Trust to discharge the following responsibilities for the Department of Health:

- there are effective management systems in place to safeguard public funds and assets and assist in the implementation of corporate governance;
- value for money is achieved from the resources available to the primary care trust;
- the expenditure and income of the primary care trust has been applied to the purposes intended by Parliament and conform to the authorities which govern them;
- effective and sound financial management systems are in place; and
- annual statutory accounts are prepared in a format directed by the Secretary of State with the approval of the Treasury to give a true and fair view of the state of affairs as at the end of the financial year and the net operating cost, recognised gains and losses and cash flows for the year.

To the best of my knowledge and belief, and from the assurances provided by the PCT Accountable Officer until 31 March 2013, I am assured that the responsibilities have been properly discharged.

Peter Coates, CBE
Designated Signing Officer

**2012/13 ACCOUNTS CERTIFICATE OF ASSURANCE TO THE
DEPARTMENT OF HEALTH DIRECTOR GENERAL, STRATEGY
FINANCE AND NHS**

I am aware that as signing officer designated by the Department of Health Accounting Officer, you are required to sign the accounts and supporting certificates of **Waltham Forest Primary Care Trust (PCT)** in order to comply with the Department's 2012/13 accounts finalisation process.

To assist you in that process, I can confirm that for the year ended 31 March 2013 based on my own knowledge of internal control matters and through experience in my role as Accountable Officer until 31 March 2013, the PCT:

- had in place effective management systems to safeguard public funds and assets and assist in the implementation of corporate governance;
- kept proper accounting records which disclosed with reasonable accuracy at any time the financial position of the PCT;
- took reasonable steps for the prevention and detection of fraud and other irregularities;
- achieved value for money from the resources available to the PCT;
- applied income and expenditure to the purposes intended by Parliament and conformed to the authorities which governed them; and
- had effective and sound financial management systems in place.

I also confirm that in my role overseeing the preparation of the annual statutory accounts, the accounts were prepared in the format directed by the Secretary of State with the approval of the Treasury to give a true and fair view of the state of affairs as at the end of the financial year and the net operating cost, recognised gains and losses and cash flows for the year. As required the accounts;

- apply on a consistent basis accounting policies laid down by the Secretary of State with the approval of the Treasury;
- make judgements and estimates which are reasonable and prudent;
- state whether applicable accounting standards have been followed, subject to any material departures disclosed and explained in the accounts.

**2012/13 ACCOUNTS FINANCE CERTIFICATE OF ASSURANCE TO THE
DEPARTMENT OF HEALTH DIRECTOR GENERAL, STRATEGY
FINANCE AND NHS**

I am aware that as signing officer designated by the Department of Health Accounting Officer, you are required to sign the accounts and supporting certificates of **Waltham Forest** Primary Care Trust (PCT) in order to comply with the Department's 2012/13 accounts finalisation process.

To assist you in that process, I can confirm that in my role managing the preparation of the annual statutory accounts, the accounts were prepared in the format directed by the Secretary of State with the approval of the Treasury to give a true and fair view of the state of affairs as at the end of the financial year and the net operating cost, recognised gains and losses and cash flows for the year. As required the accounts;

- apply on a consistent basis accounting policies laid down by the Secretary of State with the approval of the Treasury;
- make judgements and estimates which are reasonable and prudent;
- state whether applicable accounting standards have been followed, subject to any material departures disclosed and explained in the accounts.

Cash and cash equivalents at year end		259	15

This statement provides information on the PCT's liquidity viability and financial adaptability.

The notes on pages 5 to 43 are an integral part of these financial statements.

Notes to the financial statements

1. Accounting policies

The Secretary of State for Health has directed that the financial statements of PCTs shall meet the accounting requirements of the PCT Manual for Accounts, which shall be agreed with HM Treasury. Consequently, the following financial statements have been prepared in accordance with the 2012-13 PCTs Manual for Accounts issued by the Department of Health. The accounting policies contained in that manual follow International Financial Reporting Standards (IFRS) to the extent that they are meaningful and appropriate to the NHS, as determined by HM Treasury, which is advised by the Financial Reporting Advisory Board. Where the PCT Manual for Accounts permits a choice of accounting policy, the accounting policy which is judged to be most appropriate to the particular circumstances of the PCT for the purpose of giving a true and fair view has been selected. The particular policies adopted by the PCT are described below. They have been applied consistently in dealing with items considered material in relation to the accounts.

The PCT is within the Government Resource Accounting Boundary and therefore has only consolidated interests in other entities where the other entity is also within the resource accounting boundary and the PCT exercises in-year budgetary control over the other entity.

1.1 Accounting Conventions

These accounts have been prepared under the historical cost convention modified to account for the revaluation of property, plant and equipment, intangible assets and inventories.

Going Concern

The financial statements have been prepared on a going concern basis.

On 19 January 2011 the Government announced its intention to abolish PCT's and transfer their functions into new organisations within the umbrella of the Department of Health. On the 27th March 2012 the Health and Social Care Bill received Royal Assent.

This transfer of services is to come into effect from 1st April 2013.

After the closure it is proposed that all the PCTs functions will continue either with Commissioning Support Organisations, Clinical Commissioning Groups, National Commissioning Board or Local Authorities. Estates functions are due to be transferred to NHS Property Services Limited. Ultimate control will still reside with the Department of Health.

At the point of closure it is proposed that the PCT, in its current legal form, will be abolished.

Acquisitions and Discontinued Operations

Activities are considered to be 'acquired' only if they are acquired from outside the public sector. Activities are considered to be 'discontinued' only if they cease entirely. They are not considered to be 'discontinued' if they transfer from one NHS body to another.

Critical accounting judgements and key sources of estimation uncertainty

In the application of the PCT's accounting policies, management is required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors, that are considered to be relevant. Actual results may differ from those estimates. The estimates and underlying assumptions are continually reviewed. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Critical judgements in applying accounting policies

The following are the critical judgments, apart from those involving estimations (see below) that management has made in the process of applying the entity's accounting policies and that have the most significant effect on the amounts recognised in the financial statements.

Notes to the financial statements

LIFT schemes

The PCT has recognised, under IFRIC 12, the need to account for a Local Improvement Finance Trust (LIFT) scheme at Comely Bank and Wood Street as a service concession arrangement. The indications of a service concession include the provision of a healthcare service, control over the services and control over the asset at the end of the lease. The leases for these two schemes satisfy these conditions. Previously each 25 year lease was treated as an operating lease under UK GAAP. Each lease is now treated as a finance lease and the assets are included within property, plant and equipment, with a corresponding liability also recognised on the Statement of Financial Position (SoFP).

Key sources of estimation uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the Statement of Financial Position date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

Non-current asset valuations

During the financial year the District Valuation Office conducted an interim asset valuation review of all land and buildings held by the PCT. A valuation report has been prepared in accordance with the terms of the Royal Institution of Chartered Surveyors' Valuation Standards, 6th Edition, insofar as these terms are consistent with the requirements of HM Treasury, the National Health Service and Department of Health.

Public sector bodies including the NHS are required to apply the revaluation model set out in IAS 16 and value their capital assets to fair value. Fair value is defined in IAS16 as the amount for which an asset could be exchanged between knowledgeable, willing parties in an arms length transaction. The fair value of land and buildings is usually determined from market-based evidence by appraisal undertaken by professionally qualified valuers.

The interim asset valuation was undertaken in February and March 2013 as at the prospective valuation date of 31st March 2013, an agreed departure from the RICS Valuation Standards.

The age and remaining lives of buildings and their component parts have been assessed as at the valuation date.

Quality outcome framework

The liability for the QOF payment as part of the GP contract is based on the Quality Management and Analysis System giving the PCT objective feedback on quality of care delivered to patients. It shows how well the practice is performing measured against national achievement targets. Through the QOF, general practices are rewarded financially for aspects of the quality of care they provide.

Accruals

For goods and/or services that have been delivered but for which no invoice has been received/sent, the PCT makes an accrual based on the contractual arrangements that are place and it's legal obligations.

Prescribing and pharmacy liabilities

The Department of Health actions monthly cash charges to the PCT for prescribing and pharmacy contracts. These are issued approximately six weeks in arrears. The PCT uses a forecast provided by the NHS Business Authority to estimate the full year expenditure.

Outer North East London (ONEL) Recharges

A proportion of the pay and non pay costs incurred in year by the PCT have been recharged to Redbridge PCT, Havering PCT and Barking and Dagenham PCT. These three organisations, along with the PCT, operate within a cluster arrangement including having a shared management team, along with a number of functions. Shared costs incurred by the other three ONEL PCTs have also been recharged to the PCT.

Notes to the financial statements

Costs which are specific to the running of each PCT are not recharged and remain as costs within each specific PCT's statement of comprehensive net expenditure. Shared payroll costs are recharged across ONEL based upon estimated proportion of the contribution made by each employee to the ONEL PCTs. Shared non pay costs are also recharged on this basis as it considered a reasonable proxy of the relative share of expenditure.

Pay recharges are shown net within the statement of comprehensive net expenditure. Non pay and agency payroll cost items are shown net of related income.

1.2 Revenue and Funding

The main source of funding for the PCT is allocations (Parliamentary Funding) from the Department of Health within an approved cash limit, which is credited to the general fund of the PCT. Parliamentary funding is recognised in the financial period in which the cash is received.

Miscellaneous revenue is income which relates directly to the operating activities of the PCT. It principally comprises fees and charges for services provided on a full cost basis to external customers, as well as public repayment work and includes recharges to other PCTs. It includes both income appropriated-in-aid of the Vote and income to the Consolidated Fund which HM Treasury has agreed should be treated as operating income.

Revenue in respect of services provided is recognised when, and to the extent that, performance occurs, and is measured at the fair value of the probable economic flow to the PCT.

Where revenue has been received for a specific activity to be delivered in the following financial year, that income will be deferred.

Refer to note 4 for analysis.

1.3 Taxation

The PCT is not liable to pay income tax. Expenditure is shown net of recoverable VAT. Irrecoverable VAT is charged to the most appropriate expenditure heading or capitalised if it relates to the acquisition of an asset.

1.4 Administration and Programme Costs

HM Treasury has set performance targets in respect of non-frontline expenditure (administration expenditure).

From 2011-12, PCTs therefore analyse and report revenue income and expenditure by "admin and programme".

For PCTs, the Department of Health has defined "admin and programme" in terms of running costs.

The broad definition of running costs includes any cost incurred that is not a direct payment for the provision of healthcare or healthcare related services.

Expense incurred under NHS transition redundancy programmes is however classed as "programme" under Treasury budgetary control arrangements and so is recorded as such in the financial statements.

Refer to note 5.1 for further disclosure.

1.5 Property, Plant & Equipment Recognition

Property, plant and equipment is capitalised if:

- it is held for use in delivering services or for administrative purposes;
- it is probable that future economic benefits will flow to, or service potential will be supplied to, the PCT;
- it is expected to be used for more than one financial year;

Notes to the financial statements

- the cost of the item can be measured reliably; and
- the item has cost of at least £5,000; or
- collectively, a number of items have a cost of at least £5,000 and individually have a cost of more than £250, where the assets are functionally interdependent, they had broadly simultaneous purchase dates, are anticipated to have simultaneous disposal dates and are under single managerial control; or
- Items form part of the initial equipping and setting-up cost of a new building, ward or unit, irrespective of their individual or collective cost.

Valuation

All property, plant and equipment are measured initially at cost, representing the cost directly attributable to acquiring or constructing the asset and bringing it to the location and condition necessary for it to be capable of operating in the manner intended by management.

Land and buildings are measured subsequently at fair value. Plant and equipment is stated at historical cost less depreciation.

Land and buildings used for the PCT's services or for administrative purposes are stated in the statement of financial position at their revalued amounts, being the fair value at the date of revaluation less any subsequent accumulated depreciation and impairment losses. Revaluations are performed with sufficient regularity to ensure that carrying amounts are not materially different from those that would be determined at the end of the reporting period. Fair values are determined as follows:

- Land and non-specialised buildings – market value for existing use
- Specialised buildings – depreciated replacement cost

HM Treasury has adopted a standard approach to depreciated replacement cost valuations based on modern equivalent assets and, where it would meet the location requirements of the service being provided, an alternative site can be valued.

As a result of a downward valuation of land and buildings the PCT has incurred an impairment of £957,000 (£198,000 2011/12) which was charged to the statement of comprehensive net expenditure and £372,000 was charged to the revaluation reserve (£1,683,000 2011/12) in relation to several buildings owned by the PCT, further disclosure of this matter can be found at note 11.

Properties in the course of construction for service or administration purposes are carried at cost, less any impairment loss. Cost includes professional fees but not borrowing costs, which are recognised as expenses immediately, as allowed by IAS 23 for assets held at fair value. Assets are revalued and depreciation commences when they are ready for use.

The carrying value of existing assets at that date will be written off over their remaining useful lives and new fixtures and equipment are carried at depreciated historic cost as this is not considered to be materially different from fair value.

Increases in the carrying amount on revaluation of land and buildings are credited to revaluation reserve in taxpayers equity. Decreases that offset previous increases of the same asset are charged against the revaluation reserve. All other decreases are charged against the statement of comprehensive net expenditure. Each year the difference between depreciation based upon the revalued carrying amount of the asset charged to the statement of comprehensive net expenditure and depreciation based upon the assets original costs is transferred from the revaluation reserve to the general fund.

Subsequent expenditure

Where subsequent expenditure enhances an asset beyond its original specification, the directly attributable cost is capitalised. Where subsequent expenditure restores the asset to its original specification, the expenditure is capitalised and any existing carrying value of the item replaced is written-out and charged to operating expenses.

1.6 Intangible Assets

Notes to the financial statements

Recognition

Intangible assets are non-monetary assets without physical substance, which are capable of sale separately from the rest of the PCT's business or which arise from contractual or other legal rights. They are recognised only when it is probable that future economic benefits will flow to, or service potential be provided to, the PCT; where the cost of the asset can be measured reliably, and where the cost is at least £5,000.

Intangible assets acquired separately are initially recognised at fair value. Software that is integral to the operating of hardware, for example an operating system, is capitalised as part of the relevant item of property, plant and equipment. Software that is not integral to the operation of hardware, for example application software, is capitalised as an intangible asset. Expenditure on research is not capitalised: it is recognised as an operating expense in the period in which it is incurred. Internally-generated assets are recognised if, and only if, all of the following have been demonstrated:

- the technical feasibility of completing the intangible asset so that it will be available for use;
- the intention to complete the intangible asset and use it;
- the ability to sell or use the intangible asset;
- how the intangible asset will generate probable future economic benefits or service potential;
- the availability of adequate technical, financial and other resources to complete the intangible asset and sell or use it; and
- the ability to measure reliably the expenditure attributable to the intangible asset during its development.

Measurement

The amount initially recognised for internally-generated intangible assets is the sum of the expenditure incurred from the date when the criteria above are initially met. Where no internally-generated intangible asset can be recognised, the expenditure is recognised in the period in which it is incurred.

Following initial recognition, intangible assets are carried at fair value by reference to an active market, or, where no active market exists, at amortised replacement cost (modern equivalent assets basis), as a proxy for fair value. Internally-developed software is held at amortised historic cost to reflect the opposing effects of increases in development costs and technological advances.

Refer to note 12 for additional disclosure.

1.7 Depreciation, amortisation and impairments

Freehold land, properties under construction and assets held for sale are not depreciated.

Otherwise, depreciation and amortisation are charged to write off the costs or valuation of property, plant and equipment and intangible non-current assets, less any residual value, over their estimated useful lives, in a manner that reflects the consumption of economic benefits or service potential of the assets. The estimated useful life of an asset is the period over which the PCT expects to obtain economic benefits or service potential from the asset. This is specific to the PCT and may be shorter than the physical life of the asset itself. Estimated useful lives and residual values are reviewed each year end, with the effect of any changes recognised on a prospective basis. Assets held under finance leases are depreciated over their estimated useful lives.

At each reporting period end, the PCT checks whether there is any indication that any of its tangible or intangible non-current assets have suffered an impairment loss. If there is indication of an impairment loss, the recoverable amount of the asset is estimated to determine whether there has been a loss and, if so, its amount. Intangible assets not yet available for use are tested for impairment annually.

A revaluation decrease that does not result from a loss of economic value or service potential is recognised as an impairment charged to the revaluation reserve to the extent that there is a balance on the reserve for the asset and, thereafter, to expenditure. Impairment losses that arise from a clear consumption of economic benefit are taken to expenditure. Where an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of the recoverable amount but capped at the amount that would have been determined had there been no initial impairment loss. The reversal of the impairment loss is credited to expenditure to the extent of the decrease previously charged there and thereafter to the revaluation reserve.

Notes to the financial statements

Impairments are analysed between Departmental Expenditure Limits (DEL) and Annually Managed Expenditure (AME) from 2011-12. This is necessary to comply with Treasury's budgeting guidance. DEL limits are set in the Spending Review and Departments may not exceed the limits that they have been set. AME budgets are set by the Treasury and may be reviewed with departments in the run-up to the Budget. Departments need to monitor AME closely and inform Treasury if they expect AME spending to rise above forecast. Whilst Treasury accepts that in some areas of AME inherent volatility may mean departments do not have the ability to manage the spending within budgets in that financial year, any expected increases in AME require Treasury approval.

1.8 Non-current assets held for sale

Non-current assets are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met when the sale is highly probable, the asset is available for immediate sale in its present condition and management is committed to the sale, which is expected to qualify for recognition as a completed sale within one year from the date of classification. Non-current assets held for sale are measured at the lower of their previous carrying amount and fair value less costs to sell, if their carrying amount is to be recovered principally through a sale transaction rather than continuing use. Fair value is open market value including alternative uses.

The profit or loss arising on disposal of an asset is the difference between the sale proceeds and the carrying amount and is recognised in the statement of comprehensive net expenditure. On disposal, the balance for the asset in the revaluation reserve is transferred to the general fund.

Property, plant and equipment that is to be scrapped or demolished does not qualify for recognition as held for sale. Instead, it is retained as an operational asset and its economic life is adjusted. The asset is de-recognised when it is scrapped or demolished.

1.9 Inventories

Inventories are valued at the lower of cost and net realisable value. Cost is determined using the first-in first-out / weighted average cost formula. Net realisable value is the estimated selling price in the ordinary course of business less applicable variable selling expenses. This is considered to be a reasonable approximation to fair value due to the high turnover of inventories. Refer to note 15 for additional disclosure.

1.10 Cash and cash equivalents

Cash is cash in hand and deposits with any financial institution repayable without penalty on notice of not more than 24 hours. Cash equivalents are investments that mature in 3 months or less from the date of acquisition and that are readily convertible to known amounts of cash with insignificant risk of change in value.

In the statement of cash flows, cash and cash equivalents are shown net of bank overdrafts that are repayable on demand and that form an integral part of the PCT's cash management.

1.11 Losses and Special Payments

Losses and special payments are items that Government would not have contemplated when it agreed funds for the health service or passed legislation. By their nature they are items that ideally should not arise. They are therefore subject to special control procedures compared with the generality of payments. They are divided into different categories, which govern the way each individual case is handled.

Losses and special payments are charged to the relevant functional headings including losses which would have been made good through insurance cover had PCTs not been bearing their own risks (with insurance premiums then being included as normal revenue expenditure).

Losses and special payments are compiled on an accruals basis excluding any provisions in relations to such payments. Refer to note 27 for additional disclosure.

1.12 Clinical Negligence Costs

Notes to the financial statements

From 1 April 2000, the NHS Litigation Authority (NHSLA) took over the full financial responsibility for all Existing Liabilities Scheme (ELS) cases unsettled at that date and from 1 April 2002 all Clinical Negligence Scheme for Trusts (CNST) cases. Provisions for these are included in the accounts of the NHSLA. Although the NHSLA is administratively responsible for all cases from 1 April 2000, the legal liability remains with the PCTs.

The NHSLA operates a risk pooling scheme under which the PCT pays an annual contribution to the NHSLA which in return settles all clinical negligence claims. The contribution is charged to expenditure in the year that it is due. The total value of clinical negligence provisions carried by the NHSLA on behalf of the PCT is disclosed at Note 21.

Any provision in respect of clinical negligence claims are included within the accounts of the NHSLA and do not form part of the PCT's accounts.

1.13 Employee benefits

Short-term employee benefits

Salaries, wages and employment-related payments are recognised in the period in which the service is received from employees, except for bonuses earned but not yet taken, which are not accrued for at the year end, on the grounds of immateriality.

The cost of leave earned but not taken by employees at the end of the year is recognised in the financial statements to the extent that employees are permitted to carry forward leave into the following year.

Retirement benefit costs

Past and present employees are covered by the provisions of the NHS Pensions Scheme. The scheme is an unfunded, defined benefit scheme that covers NHS employers, general practices and other bodies, allowed under the direction of the Secretary of State, in England and Wales. The scheme is not designed to be run in a way that would enable NHS bodies to identify their share of the underlying scheme assets and liabilities. Therefore, the scheme is accounted for as if it were a defined contribution scheme: the cost to the NHS body of participating in the scheme is taken as equal to the contributions payable to the scheme for the accounting period.

For early retirements other than those due to ill health the additional pension liabilities are not funded by the scheme. The full amount of the liability for the additional costs is charged to expenditure at the time the PCT commits itself to the retirement, regardless of the method of payment.

Termination benefits

Termination benefits are payable when employment is terminated by the PCT before the normal retirement date, or whenever an employee accepts voluntary redundancy in exchange for these benefits. The PCT recognises termination benefits when it is demonstrably committed to a termination when the entity has a detailed formal plan to terminate the employment of current employees without possibility of withdrawal. In the case of an offer made to encourage voluntary redundancy, the termination benefits are measured based on the number of employees expected to accept the offer. Benefits falling due more than 12 months after the end of the reporting period are discounted to their present value.

1.14 Other expenses

Other operating expenses are recognised when, and to the extent that, the goods or services have been received. They are measured at the fair value of the consideration payable.

1.15 Grant making

Under section 256 of the National Health Service Act 2006, the PCT has the power to make grants to local authorities, voluntary bodies and registered social landlords to finance capital or revenue schemes. A liability in respect of these grants is recognised when the PCT has a present legal or constructive obligation which occurs when all of the conditions attached to the payment have been met.

1.16 Contingencies

Notes to the financial statements

A contingent liability is a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the PCT, or a present obligation that is not recognised because it is not probable that a payment will be required to settle the obligation or the amount of the obligation cannot be measured sufficiently reliably. A contingent liability is disclosed unless the possibility of a payment is remote.

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the trust. A contingent asset is disclosed where an inflow of economic benefits is probable.

1.17 Leases

Leases are classified as finance leases when substantially all the risks and rewards of ownership are transferred to the lessee. All other leases are classified as operating leases. Refer to note 24 for additional disclosure.

The PCT as lessee

Property, plant and equipment held under finance leases are initially recognised, at the inception of the lease, at fair value or, if lower, at the present value of the minimum lease payments, with a matching liability for the lease obligation to the lessor. Lease payments are apportioned between finance charges and reduction of the lease obligation so as to achieve a constant rate on interest on the remaining balance of the liability. Finance charges are recognised in calculating the PCT's net operating cost.

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. Lease incentives are recognised initially as a liability and subsequently as a reduction of rentals on a straight-line basis over the lease term.

Contingent rentals are recognised as an expense in the period in which they are incurred.

Where a lease is for land and buildings, the land and building components are separated and individually assessed as to whether they are operating or finance leases.

The PCT as lessor

Amounts due from lessees under finance leases are recorded as receivables at the amount of the PCT's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the PCT's net investment outstanding in respect of the leases.

Rental income from operating leases is recognised on a straight-line basis over the term of the lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised on a straight-line basis over the lease term.

1.18 Provisions

Provisions are recognised when the PCT has a present legal or constructive obligation as a result of a past event, it is probable that the PCT will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. The amount recognised as a provision is the best estimate of the expenditure required to settle the obligation at the end of the reporting period, taking into account the risks and uncertainties. Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation (being HM Treasury's discount rate of 2.2% (2.8% in respect of early staff departures) in real terms). The increase in provision due to passage of time is recognised as interest expensed.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, the receivable is recognised as an asset if it is virtually certain that reimbursements will be received and the amount of the receivable can be measured reliably.

Notes to the financial statements

Present obligations arising under onerous contracts are recognised and measured as a provision. An onerous contract is considered to exist where the PCT has a contract under which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under it.

Provisions for restructuring costs are recognised when the PCT has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources are required to settle the obligation; and the amount has been reliably estimated. The measurement of a restructuring provision includes only the direct expenditures arising from the restructuring, which are those amounts that are both necessarily entailed by the restructuring and not associated with ongoing activities of the entity. Refer to note 21 for additional disclosure.

1.19 Financial Instruments

Financial assets

Financial assets are recognised when the PCT becomes party to the financial instrument contract or, in the case of trade receivables, when the goods or services have been delivered. Financial assets are derecognised when the contractual rights have expired or the asset has been transferred. Refer to note 25 for additional disclosure.

Financial assets are initially recognised at fair value.

Financial assets are classified into the following categories: financial assets 'at fair value through profit and loss'; 'held to maturity investments'; 'available for sale' financial assets, and 'loans and receivables'. The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition.

Financial assets at fair value through profit and loss

Embedded derivatives that have different risks and characteristics to their host contracts, and contracts with embedded derivatives whose separate value cannot be ascertained, are treated as financial assets at fair value through profit and loss. They are held at fair value, with any resultant gain or loss recognised in the Statement of Comprehensive Net Expenditure. The net gain or loss incorporates any interest earned on the financial asset.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments which are not quoted in an active market. After initial recognition, they are measured at amortised cost using the effective interest method, less any impairment. Interest is recognised using the effective interest method.

The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset, to the initial fair value of the financial asset.

At the statement of financial position date, the PCT assesses whether any financial assets, other than those held at 'fair value through profit and loss' are impaired. Financial assets are impaired and impairment losses recognised if there is objective evidence of impairment as a result of one or more events which occurred after the initial recognition of the asset and which has an impact on the estimated future cash flows of the asset.

For financial assets carried at amortised cost, the amount of the impairment loss is measured as the difference between the asset's carrying amount and the present value of the revised future cash flows discounted at the asset's original effective interest rate. The loss is recognised in the Statement of Comprehensive Net Expenditure and the carrying amount of the asset is reduced directly, or through a provision for impairment of receivables.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed through the Statement of Comprehensive Net Expenditure to the extent that the carrying amount of the receivable at the date of the impairment is reversed does not exceed what the amortised cost would have been had the impairment not been recognised.

Financial liabilities

Notes to the financial statements

Financial liabilities are recognised on the Statement of Financial Position when the PCT becomes party to the contractual provisions of the financial instrument or, in the case of trade payables, when the goods or services have been received. Financial liabilities are derecognised when the liability has been discharged, that is, the liability has been paid or has expired.

Financial liabilities are initially recognised at fair value.

Financial liabilities are classified as either financial liabilities 'at fair value through profit and loss' or 'other financial liabilities'. The PCT only has financial liabilities categorised as 'other financial liabilities'.

Other financial liabilities

After initial recognition, all other financial liabilities are measured at amortised cost using the effective interest method. The effective interest rate is the rate that exactly discounts estimated future cash payments through the life of the asset, to the net carrying amount of the financial liability. Interest is recognised using the effective interest method.

1.20 NHS LIFT transactions

HM Treasury has determined that government bodies shall account for infrastructure LIFT schemes (including NHS LIFT) where the government body controls the use of the infrastructure and the residual interest in the infrastructure at the end of the arrangement as service concession arrangements, following the principles of the requirements of IFRIC 12. The PCT therefore recognises the LIFT asset as an item of property, plant and equipment together with a liability to pay for it. The services received under the contract are recorded as operating expenses.

The annual unitary payment is separated into the following component parts, using appropriate estimation techniques where necessary:

- a) Payment for the fair value of services received;
- b) Payment for the LIFT asset, including finance costs; and
- c) Payment for the replacement of components of the asset during the contract 'lifecycle replacement'.

Refer to note 17 for additional disclosure.

a) Services received

The fair value of services received in the year is recorded under the relevant expenditure headings within 'operating expenses'.

b) LIFT assets, liabilities, and finance costs

The LIFT assets are recognised as property, plant and equipment, when they come into use. The assets are measured initially at fair value in accordance with the principles of IAS 17. Subsequently, the assets are measured at fair value, which is kept up to date in accordance with the PCT's approach for each relevant class of asset in accordance with the principles of IAS 16. These assets have been revalued as at 31st March 2013.

A LIFT liability is recognised at the same time as the asset is recognised. It is measured initially at the same amount as the fair value of the assets and is subsequently measured as a finance lease liability in accordance with IAS 17.

An annual finance cost is calculated by applying the implicit interest rate in the lease to the opening lease liability for the period, and is charged to 'Finance Costs' within the Statement of Comprehensive Net Expenditure.

The element of the annual unitary payment that is allocated as a finance lease rental is applied to meet the annual finance cost and to repay the lease liability over the contract term.

An element of the annual unitary payment increase due to cumulative indexation is allocated to the finance lease. In accordance with IAS 17, this amount is not included in the minimum lease payments, but is instead treated as contingent rent and is expensed as incurred. In substance, this amount is a finance cost in respect of the liability and the expense is presented as a contingent finance cost in the Statement of Comprehensive Net Expenditure.

c) Lifecycle replacement

Notes to the financial statements

Components of the asset replaced by the operator during the contract ('lifecycle replacement') are capitalised where they meet the PCT's criteria for capital expenditure. They are capitalised at the time they are provided by the operator and are measured initially at their fair value.

The element of the annual unitary payment allocated to lifecycle replacement is pre-determined for each year of the contract from the operator's planned programme of lifecycle replacement. Where the lifecycle component is provided earlier or later than expected, a short-term finance lease liability or prepayment is recognised respectively.

Where the fair value of the lifecycle component is less than the amount determined in the contract, the difference is recognised as an expense when the replacement is provided. If the fair value is greater than the amount determined in the contract, the difference is treated as a 'free' asset and a deferred income balance is recognised. The deferred income is released to the operating income over the shorter of the remaining contract period or the useful economic life of the replacement component.

Assets contributed by the PCT to the operator for use in the scheme

Assets contributed for use in the scheme continue to be recognised as items of property, plant and equipment in the PCT's Statement of Comprehensive Net Expenditure.

Other assets contributed by the PCT to the operator

Assets contributed (e.g. cash payments, surplus property) by the PCT to the operator before the asset is brought into use, which are intended to defray the operator's capital costs, are recognised initially as prepayments during the construction phase of the contract. Subsequently, when the asset is made available to the PCT, the prepayment is treated as an initial payment towards the finance lease liability and is set against the carrying value of the liability.

1.21 Accounting Standards that have been issued but have not yet been adopted

The Treasury FReM does not require the following Standards and Interpretations to be applied in 2012-13. The application of the Standards as revised would not have a material impact on the accounts for 2012-13, were they applied in that year:

- IAS 27 Separate Financial Statements - subject to consultation
- IAS 28 Investments in Associates and Joint Ventures - subject to consultation
- IFRS 9 Financial Instruments - subject to consultation - subject to consultation
- IFRS 10 Consolidated Financial Statements - subject to consultation
- IFRS 11 Joint Arrangements - subject to consultation
- IFRS 12 Disclosure of Interests in Other Entities - subject to consultation
- IFRS 13 Fair Value Measurement - subject to consultation

2 Operating segments

Segment	Acute	Non Acute	Prescribing and Primary Care	Corporate	Total
	2012/13 £000	2012/13 £000	2012/13 £000	2012/13 £000	2012/13 £000
Actual net expenditure	226,906	89,585	113,289	18,454	448,234
Revenue Resource Limit	225,532	82,469	117,280	27,266	452,547
Surplus/(Deficit)	<u>(1,374)</u>	<u>(7,116)</u>	<u>3,991</u>	<u>8,812</u>	<u>4,313</u>
	2011/12 £000	2011/12 £000	2011/12 £000	2011/12 £000	2011/12 £000
Actual net expenditure	248,757	83,757	88,693	20,439	441,646
Revenue Resource Limit	246,498	82,455	90,499	22,294	441,746
Surplus/(Deficit)	<u>(2,259)</u>	<u>(1,302)</u>	<u>1,806</u>	<u>1,855</u>	<u>100</u>
			2012-13 £000	2011-12 £000	
Included within the segments are material spend as follows:-					
Prescribing and Primary Care Segment					
Prescribing Costs			32,759	35,834	
G/PMS, APMS and PCTMS (excluding employee benefits)			34,873	35,071	
Acute Segment					
Goods and services from NHS Trusts			190,270	195,838	
Non Acute Segment					
Purchase of Healthcare from Non-NHS Bodies			36,298	27,053	
Corporate Segment					
Depreciation			896	1,397	
Amortisation			-	-	
Impairments and Reversals of Property, plant and equipment			957	198	

Note: Total Operating Segments reconcile to Non Operating Cost as shown in note 3.1

The Chief Operating Decision Maker (CODM) is considered to be the Board, which evaluates performance of the organisation based on net expenditure of the segments. The statement of financial position, and cash flow statements are not reported on a segmental basis. The activities of the reportable segments are as follows:

Acute

Acute has the largest budget and accounted for 49% of total expenditure in 2012/13 (2011/12 56%). Secondary Care Services are commissioned from NHS Trusts, Foundation Trusts and the Independent Sector. Whipps Cross University Hospitals NHS Trust is the main provider of services, followed by Barts and The London NHS Trust. During 2012/13 these two organisations merged and represented a total spend of £170m (2011/12 £167m).

Non Acute

Non Acute commissioning includes adult community services and nursing care from the private sector. Non acute services are largely commissioned from Local Authorities and nursing homes. Non acute commissioning also includes mental health. North East London NHS Foundation Trust (NELFT) is the PCT's largest provider of mental health services. Expenditure with NELFT was £51m in 2012/13 (£34m 2011/12).

Prescribing and Primary Care

The PCT commissions medical services from a number of GPs and dentists. It also takes responsibility for pharmacy services. Contracts with GP Practices totalled £34m in 2012/13 (£35m 2011/12) and Prescribing Costs £35m in 2012/13 (£36m 2011/12) as included in Note 5.1.

Corporate

The Corporate function facilitates all areas of Pay and Non Pay expenditure to provide the services within other segments.

3. Financial Performance Targets

3.1 Revenue Resource Limit

The PCTs' performance for the year ended 2012-13 is as follows:

	2012-13 £000	2011-12 £000
Total Net Operating Cost for the Financial Year	448,234	441,646
Revenue Resource Limit	<u>452,547</u>	<u>441,746</u>
Under/(Over)spend Against Revenue Resource Limit (RRL)	<u>4,313</u>	<u>100</u>

3.2 Capital Resource Limit

The PCT is required to keep within its Capital Resource Limit.

	2012-13 £000	2011-12 £000
Capital Resource Limit	2,355	629
Charge to Capital Resource Limit	<u>511</u>	<u>608</u>
Underspend Against CRL	<u>1,844</u>	<u>21</u>

3.3 Underspend against cash limit

	2012-13 £000	2011-12 £000
Total charge to cash limit	450,161	442,512
Cash limit	<u>455,541</u>	<u>442,512</u>
Under/(Over)spend Against Cash Limit	<u>5,380</u>	<u>-</u>

3.4 Reconciliation of cash drawings to parliamentary funding

	2012-13 £000	2011-12 £000
Total cash received from DH (Gross)	401,000	373,579
Plus: cost of dentistry schemes (central charge to cash limits)	9,839	9,237

Other Auditors Remuneration	40	40	-	-
Education and training	60	53	7	91
Other	3,495	2,223	1,272	67
Total operating costs charged to statement of comprehensive net expenditure	451,249	4,523	446,726	442,301
Employee benefits (excluding capitalised costs)				
PCT officer board members	172	171	1	230
Other employee benefits	6,496	5,515	981	9,572
Total employee benefits charged to SOCNE	6,668	5,686	982	9,802
Total operating costs	457,917	10,209	447,708	452,103

Admin expenditure is expenditure incurred that is not a direct payment for the provision of healthcare or healthcare services.

	Total	Commissioning Public Health Services	
PCT Running Costs 2012-13			
Running costs (£000s)	10,146	9,477	669
Weighted population (number in units)	251,829	251,829	251,829
Running costs per head of population (£ per head)	40.29	37.63	2.66
PCT Running Costs 2011-12			
Running costs (£000s)	10,540	9,380	1,160
Weighted population (number in units)	251,829	251,829	251,829
Running costs per head of population (£ per head)	41.85	37.25	4.61

Running costs are costs incurred by an NHS Organisation which are not directly linked to patient treatment or well being.

Weighted population figures are not available for 2012-13 as the weighted capitation formula for PCT allocations was not updated for 2012-13. This was because it was decided to give all PCTs the same percentage growth in their allocations in this transitional year rather than differential growth based on a weighted capitation formula

Therefore, 2011-12 weighted populations have been used when calculated the Running Costs per head of population in 2012-13.

5.2 Analysis of operating expenditure by expenditure classification	2012-13 £000	2011-12 £000
Purchase of Primary Health Care		
GMS / PMS/ APMS / PCTMS	34,873	35,071

Recognised as income		
Rental Revenue	1,338	1,478
Total	1,338	1,478
Receivable:		
No later than one year	1,338	1,461
Between one and five years	5,842	5,842
After five years	27,874	29,212
Total	35,054	36,515

General Medical Services (GMS)

The GMS contract entered in to by the PCT with GP's includes conditions relating to the use of GP premises under IFRIC 4, determining whether an arrangement contains a lease.

The PCT has determined that those conditions are operating leases. As the GMS contract does not contain defined terms, it is not possible to analyse the financial impact of the arrangements over future financial years.

Employee costs capitalised	-	-	-						
Gross employee benefits excluding capitalised costs	9,802	4,855	4,947						

As per the manual for accounts the overarching principle is that transactions should be accounted for in accordance with accounting standards, with all treatments having been agreed by both parties. Generally, this means revenue income and expenditure should be recorded gross unless the transaction is of a non-trading nature and an organisation is deemed to be acting solely as an agent and does not gain any economic benefit from the transaction. Therefore employee benefits are shown on a net basis as disclosed within note 1.1. Only the element of the salary relating to the PCT has been recorded as expenditure as in substance the employee works for both organisations and the recharge is merely an administrative arrangement. This is in contrast to last financial year where pay recharges were shown gross.

7.2 staff Numbers

	2012-13 Total Number	Permanently Number	Other Number	2011-12 Total Number	Permanently Number	Other Number

	£000s	£000s	£000s	£000s	£000s
Total resource cost	-	-	-	-	-

This note provides an analysis of Exit Packages agreed during the year. Redundancy and other departure costs have been paid in accordance with the provisions of the NHS Compulsory Redundancy Scheme. Where the PCT has agreed early retirements, the additional costs are met by the PCT and not by the NHS pensions scheme. Ill-health retirement costs are met by the NHS pensions scheme and are not included in the table.

This disclosure reports the number and value of exit packages taken by agreed with staff leaving in the year. Note; The expense associated with these departures may have been recognised in part or in full in a previous period.

7.5 Pension costs

Past and present employees are covered by the provisions of the NHS Pensions Scheme. Details of the benefits payable under these provisions can be found on the NHS Pensions website at www.nhsbsa.nhs.uk/pensions. The scheme is an unfunded, defined benefit scheme that covers NHS employers, GP practices and other bodies, allowed under the direction of the Secretary of State, in England and Wales. The scheme is not designed to be run in a way that would enable NHS bodies to identify their share of the underlying scheme assets and liabilities. Therefore, the scheme is accounted for as if it were a defined contribution scheme: the cost to the NHS Body of participating in the scheme is taken as equal to the contributions payable to the scheme for the accounting period.

The scheme is subject to a full actuarial valuation every four years (until 2004, every five years) and an accounting valuation every year. An outline of these follows:

a) Full actuarial (funding) valuation

The purpose of this valuation is to assess the level of liability in respect of the benefits due under the scheme (taking into account its recent demographic experience), and to recommend the contribution rates to be paid by employers and scheme members. The last such valuation, which determined current contribution rates was undertaken as at 31 March 2004 and covered the period from 1 April 1999 to that date. The conclusion from the 2004 valuation was that the scheme had accumulated a notional deficit of £3.3 billion against the notional assets as at 31 March 2004.

In order to defray the costs of benefits, employers pay contributions at 14% of pensionable pay and most employees had up to April 2008 paid 6%, with manual staff paying 5%.

Following the full actuarial review by the Government Actuary undertaken as at 31 March 2004, and after consideration of changes to the NHS Pension Scheme taking effect from 1 April 2008, his Valuation report recommended that employer contributions could continue at the existing rate of 14% of pensionable pay, from 1 April 2008, following the introduction of employee contributions on a tiered scale from 5% up to 8.5% of their pensionable pay depending on total earnings.

On advice from the scheme actuary, scheme contributions may be varied from time to time to reflect changes in the scheme's liabilities.

b) Accounting valuation

A valuation of the scheme liability is carried out annually by the scheme actuary as at the end of the reporting period by updating the results of the full actuarial valuation.

Between the full actuarial valuations at a two-year midpoint, a full and detailed member data-set is provided to the scheme actuary. At this point the assumptions regarding the composition of the scheme membership are updated to allow the scheme liability to be valued.

The valuation of the scheme liability as at 31 March 2011, is based on detailed membership data as at 31 March 2008 (the latest midpoint) updated to 31 March 2011 with summary global member and accounting data.

The latest assessment of the liabilities of the scheme is contained in the scheme actuary report, which forms part of the annual NHS Pension Scheme (England and Wales) Resource Account, published annually. These accounts can be viewed on the NHS Pensions website. Copies can also be obtained from The Stationery Office.

c) Scheme provisions

The NHS Pension Scheme provided defined benefits, which are summarised below. This list is an illustrative guide only, and is not intended to detail all the benefits provided by the Scheme or the specific conditions that must be met before these benefits can be obtained:

The Scheme is a "final salary" scheme. Annual pensions are normally based on 1/80th for the 1995 section and of the best of the last three years pensionable pay for each year of service, and 1/60th for the 2008 section of reckonable pay per year of membership. Members who are practitioners as defined by the Scheme Regulations have their annual pensions based upon total pensionable earnings over the relevant pensionable service.

With effect from 1 April 2008 members can choose to give up some of their annual pension for an additional tax free lump sum, up to a maximum amount permitted under HMRC rules. This new provision is known as "pension commutation".

Annual increases are applied to pension payments at rates defined by the Pensions (Increase) Act 1971, and are based on changes in retail prices in the twelve months ending 30 September in the previous calendar year.

Early payment of a pension, with enhancement, is available to members of the scheme who are permanently incapable of fulfilling their duties effectively through illness or infirmity. A death gratuity of twice final year's pensionable pay for death in service, and five times their annual pension for death after retirement is payable.

For early retirements other than those due to ill health the additional pension liabilities are not funded by the scheme. The full amount of the liability for the additional costs is charged to the statement of comprehensive income at the time the PCT commits itself to the retirement, regardless of the method of payment.

Members can purchase additional service in the NHS Scheme and contribute to money purchase AVC's run by the Scheme's approved providers or by other Free Standing Additional Voluntary Contributions (FSAVC) providers.

8. Better Payment Practice Code**8.1 Measure of compliance**

	2012-13 Number	2012-13 £000	2011-12 Number	2011-12 £000

11.3 Property, plant and equipment

Of the total cost or valuation at 31 March 2013, £3,655,750 (2011/12 £3,585,000) related to land valued at open market value and £8,414,909 (2011/12 £7,738,000) related to buildings excluding dwellings valued at Modern Equivalent Asset Value which were owned by the PCT. £3,423,500 related to land at open market value and £11,830,514 related to buildings, installations and fittings valued at open market value which were not owned by the PCT but came under its LIFT Co arrangement and Finance Lease.

During the financial year a revaluation of all properties, including those owned and those included under the LIFT Co arrangement, was undertaken to value assets as at 31 March 2013. This is in line with the accounting policies of the PCT. An independent valuation report has been produced by the District Valuation office which has been prepared in accordance with the terms of the Royal Institution of Chartered Surveyors' Valuation Standards, 6th Edition, insofar as these terms are consistent with the requirements of HM Treasury, the National Health Service and Department of Health.

Public sector bodies including the NHS are required to apply the Revaluation model set out in IAS 16 and value their capital assets to fair value.

Fair value is defined in IAS16 as the amount for which an asset could be exchanged between knowledgeable, willing parties in an arms length transaction. The fair value of land and buildings is usually determined from market-based evidence by appraisal undertaken by professionally qualified valuers.

The valuation of each property is therefore on the basis of Market Value, subject to the following:

The RICS advises that assumptions underpinning the concepts of fair value should be explicitly stated and identifies two potential qualifying assumptions:

“the Market Value on the assumption that the property is sold as part of the continuing enterprise in occupation” (effectively EUV); or

“the Market Value on the assumption that the property is sold following a cessation of the existing operations” (in effect the traditional understanding of Market Value).

The Department of Health has indicated that for NHS assets it requires the former assumption to be applied for operational assets.

The valuation has had the following impact on land:-

	Increase in Value	Impairment charge to revaluation reserve	Impairment charge to the statement of comprehensive net expenditure	Total
	£000	£000	£000	£000
Chingford - Highams Court	18	-	-	18

	<u>904</u>	<u>(372)</u>	<u>(436)</u>	<u>96</u>

Where a piece of land or building has increased in value the amount has been charged against the revaluation reserve. Those pieces of land or buildings which have decreased in value have firstly been offset by balances within the revaluation reserve for those specific assets which totalled £438,000, and any further decrease in value has been charged to the statement of comprehensive net expenditure as an impairment, which totals £161,000. Where an impairment charge arose in 2011/12 for a specific property due to a value decrease, and then subsequently the property increased in value in 2012/13 a reversal of impairment was charged to the statement of comprehensive net expenditure. For more information on this impairment please refer to note 13.

As disclosed within note 1.1 the Health and Social Care Bill obtained royal ascent and as a result all closing balances within the statement of financial position will be transferred to a successor organisation. Therefore during 2012/13 a full non current asset physical verification exercise took place. As a result a number of pieces of equipment were deemed to be obsolete or had no further economic benefit to the organisation. These items have been removed from the asset register of the PCT and been disposed of accordingly. Those items removed from the asset register will not be transferred to a successor organisation.

The non current asset physical verification exercise had the following impact:-

	Impairment/(reversal) charge to the statement of comprehensive net expenditure
	£000

Loans repayable within 12 months	-
Balance at 31 March 2012	256

IAS 39 defines a financial instrument as a contract that gives rise to a financial asset in one entity and a financial liability or equity instrument in another entity. In order to comply with IAS requirements all necessary steps have been taken by the PCT to identify and review basic short-term financial instruments, the value of which have generally remained unchanged by the adoption of these standards. Much consideration has been given to checking whether longer-term or more complex financial instrument accounting arrangements have changed. The measurement and recognition of the LIFT Co investment at cost is deemed to be a reasonable approximation of fair value:

Later than One Year and not later than Five Years	-	-	-	-	-	-	-
Later than Five Years	-	-	-	-	-	-	-

A closing provision of £2,696,000 has been made in respect of continuing care cost. In April 2012, the Department of Health announced the deadline of 31 March 2013 for individuals to request an assessment of eligibility for NHS Continuing Healthcare funding, for cases during the period 1 April 2004 - 31 March 2011 from the previous deadline of 30 September 2012, the review of the claims for the second dead-line has not yet commenced.

Likewise given the subjective nature and process of assessing claims for the period 1 April 2004 to 31 March 2011 there is a possibility of further costs arising that cannot be qualified.

21 Provisions for other liabilities and charges (continued)

Other provisions comprise the following:-

	£000
Injury benefit	0
NHSLA	0
	<u>0</u>

£30,965 is included within provisions for the NHSLA at 31st March 2013 in respect of liabilities to third parties provision of the PCT (31st March 2012 £28,375)

22 Contingencies

	31 March 2013 £000	31 March 2012 £000
Contingent liabilities		
Other	<u>-</u>	<u>-</u>
Net Value of Contingent Liabilities	<u>-</u>	<u>-</u>

In accordance with IAS 37 the PCT recognises a contingent liability in regards to Liabilities to Third Parties Scheme (LTPS) and Practice Based Commissioning savings schemes.

It is not anticipated that any material liabilities will arise from the contingent liabilities other than those provided for note 21.

23.1 NHS LIFT schemes off-statement of financial position

The PCT has no NHS LIFT Schemes which are deemed to be off-statement of financial position

23.2 NHS LIFT schemes on-statement of financial position

The PCT currently has two LIFT (Local Improvement Finance Trust) Schemes which involves the PCT procuring the design, building, financing and operation of healthcare facilities to the Redbridge and Waltham Forest LIFT Company (No. 1) Limited for the benefit of Waltham Forest residents. The two schemes in question are Comely Bank and Wood Street which operate under the same contractual arrangements as a lease plus agreement. The LIFT Co acquires the site and builds the medical faculty with an option available to the PCT to purchase the asset. The term of the arrangement is 25 years over which a finance charge and lease rental is incurred. Contract payments are increased year on year based on RPI. Further to this the basis of the liabilities for the future are computed using the universal model prescribed by the Department of Health and are therefore subject to possible changes as some assumptions have been made around data input such as asset useful economic lives and elements surrounding component accounting. As all two schemes fall within the scope of a service concession they have been accounted for under IFRIC 12. The assets are therefore accounted for as on statement of financial position.

Imputed "finance lease" obligations for on SoFP LIFT Contracts due

	Comely Bank £000	Wood Street £000	31 March 2013 £000	31 March 2012 £000
No later than one year	377	540	917	765
Later than one year, no later than five years	1,506	2,159	3,665	3,058
Later than five years	7,241	10,819	18,060	16,881
Subtotal	9,124	13,518	22,642	20,704
Less: Interest element	(4,100)	(6,385)	(10,485)	(9,152)
Total	5,024	7,133	12,157	11,552

Charges to operating expenditure and future commitments in respect of on and off SOFP LIFT

	31 March 2013 £000	31 March 2012 £000
Total Charge to Operating Expenses in year - OFF SOFP LIFT	-	-
Service element of on SOFP LIFT charged to operating expenses in year	617	595
Total	617	595

Payments committed to in respect of off SOFP LIFT and the service element of on SOFP LIFT.

LIFT Scheme Expiry Date:	31 March 2013 £000	31 March 2012 £000
No Later than One Year	1,634	1,399
Later than One Year, No Later than Five Years	6,878	5,903
Later than Five Years	25,854	24,559
Total	34,366	31,861

The lease plus arrangement for the two schemes states that the PCT has an option to purchase the LIFT assets at the end of the 25 year period at an adjusted market price. This price effectively measures the difference between the actual open market value at the end of the contract and the residual value of the asset. As the purchase option prices for all two schemes are considerably lower than the fair value and residual value as per the LIFT Co model, a decision has been made by the PCT to exercise the option to purchase the asset at the end of the term. This decision is further supported by the specialist nature of the building and how it meets the health needs of the local community.

Under this joint arrangement, this affords the PCT the rights, and not the option to expect the provision of services in the maintenance of the two LIFT schemes involving planned improvements and replacement programmes for e.g. lifecycle costs. Any failure on the part of the Redbridge and Waltham Forest LIFT Company to provide such services will contravene not only the relevant legislation, and regulations, but will give rise to a reduction in the lease plus payments where evidence of a landlord event of default has occurred.

24 Impact of IFRS treatment - 2012-13

	Total £000	Admin £000	Programme £000
Revenue costs of IFRS: Arrangements reported on SoFP under IFRIC12 (e.g LIFT/PFI)

Net IFRS change (IFRIC12)	264	-	264

25 Financial Instruments**Financial risk management**

IFRS 7 financial Instruments, requires disclosure of the role that financial instruments have had during the period in creating or changing the risks and entity faces in undertaking these activities.

The PCT is not exposed to significant financial risk factors arising from financial instruments. The main source of funding for PCT's are allocations (Parliamentary Funding) from the Department of Health within an approved cash limit. Other income principally comprises fees and charges for services provided to external customers, the majority of whom are within the NHS boundary. The way in which the PCT is financed, and its role as healthcare commissioner and provider, determines that it is not exposed to the degree of financial risk faced by business entities. Financial assets and liabilities are generated by day to day operational activities rather than being held to change the risks facing the PCT in undertaking its activities.

Market Risk

Market Risk is the possibility that financial risk might arise as a result of changes in such measures as interest rates and stock market movements. The PCT's transactions are all undertaken in sterling and so it is not exposed to foreign exchange risk. It holds no significant investments other than short term bank deposits. Other than cash balance, the PCT's financial assets and liabilities carry no fixed rates of interest and the PCT's income and operating cash flows are consequently independent of changes in market interest rates.

Interest rate risk

PCTs are not permitted to borrow. The PCT therefore has low exposure to interest- rate fluctuations.

Credit Risk

Credit risk is the possibility that other parties might fail to pay amounts due to the PCT. Credit risk arises from deposits with banks as well as credit exposures to the PCT's debtors. The PCT does not operate with surplus cash as this is drawn down from the Department of Health when needed for use. As the PCT does not hold any investments other than necessary cash it is not exposed to interest rate risk. The PCT's cash assets are held within the Government banking service only. The PCT's net operating costs are incurred largely under annual service level agreements with local trusts and foundation trusts.

Liquidity Risk

Liquidity risk is the possibility that the PCT may not have funds available to meet its commitments to make payments. Prudent liquidity risk management includes maintaining sufficient cash and the availability of funding for an adequate amount of committed credit facilities. The PCT must draw down cash from its annual allocation when needed and it must not exceed this limit.

25 Financial Instruments continued

26 Related party transactions

The Department of Health is regarded as a related party. During the year the PCT has had a significant number of material transactions with the Department of Health, and with other entities for which the Department of Health is regarded as the parent entity. These entities are listed below. This note includes all significant transactions with other NHS organisations.

	2012-13		2011-12	
	Payments to related party £000	Receipts from related party £000	Payments to related party £000	Receipts from related party £000

26 Related party transactions (cont'd)

Other entities are considered to be a related party if Waltham Forest Primary Care Trust can:

*have direct or indirect control of the other party

*have influence over the financial and operational policies of the other party; or the parties are subject to common control or influence from the same source.

The below individuals declared interests which related to the full financial year for the PCT unless stated.

Name	Position in sector	Name of organisation where interest held	Position held/interest held
Afzal Akram	Deputy Chair	London Borough of Waltham Forest	Elected Councillor and Cabinet Member
Lesley Buckland	Non Executive	London South Bank University	Employee until 31st August 2011
Lesley Buckland	Non Executive	Age Concern Havering	Trustee
Phil Wilson	Non Executive	Paw Consulting Services Ltd	Director
Ken Aswani	Medical Director	Allum Medical Centre	Partner
Ken Aswani	Medical Director	NHJ Alliance	Member
Ken Aswani	Medical Director	RCGP	Member

27 Losses and special payments

There was one loss recorded in 2012/13, amounting to £958,000. (2011-12 nil cases and £nil). The loss related to St James's Health Centre after the PCT took the decision to write off payments in relation to the scheme when it failed to achieve the planning permission.

The total number of special payments in 2012-13 was nil, involving a total of £Nil (2011-12 nil cases and £nil).

28 Independent Sector Treatment Centre

The PCT operates an Independent Sector Treatment Centre in partnership with PHG (North East London) Ltd, The Secretary of State for Health, Barking and Dagenham PCT, Redbridge PCT, Waltham Forest PCT and Barking, Havering and Redbridge Hospitals NHS Trust. Barking and Dagenham PCT hold these premises within their accounts at a value of £4,288,435 for Buildings and receive funding from the Department of Health in relation to capital charges incurred on this property.

The contract in respect of this service expired on 31st December 2011 and a new contract was awarded to PHG (North East London) Ltd. The current contract is due to expire on 31st December 2014.

29 Events after the end of the reporting period

Other than abolishment of PCTs as per the Health and Social Care Bill outlined within note 1.1, the PCT does not consider to have any events after the reporting period to close.

29 Events after the end of the reporting period (continued)

As a result of the Health and Social Care Bill balances within the statement of financial position as at 31st march will be transferred as follows:-

	Balances held by PCT as 31st March 2013 £000s	Department of Health £000s	Waltham Forest Clinical Commissioning Group £000s	NHS England £000s	NHS Trusts £000s	NHS Foundation Trusts £000s	NHS Property Services £000s	Community Health Partnerships £000s

INDEPENDENT AUDITOR'S REPORT TO THE SIGNING OFFICER OF WALTHAM FOREST PRIMARY CARE TRUST

We have audited the financial statements of Waltham Forest Primary Care Trust for the year ended 31 March 2013 on pages 1 to 43. The financial reporting framework that has been applied in their preparation is applicable law and the accounting policies directed by the Secretary of State with the consent of the Treasury as relevant to the National Health Service in England. We have also audited the information in the Remuneration Report that is subject to audit.

This report is made solely to the Signing Officer of Waltham Forest Primary Care Trust in accordance with Part II of the Audit Commission Act 1998. Our audit work has been undertaken so that we might state to the Signing Officer of the PCT those matters we are required to state to him in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Signing Officer of the PCT for our audit work, for this report or for the opinions we have formed.

Respective responsibilities of Signing Officer and auditor

As explained more fully in the Statement of Signing Officer's Responsibilities set out on page 33 of the Annual Report, the Signing Officer is responsible for the preparation of financial statements which give a true and fair view. Our responsibility is to audit, and express an opinion on, the financial statements in accordance with applicable law and International Standards on Auditing (UK and Ireland). Those standards require us to comply with the Auditing Practices Board's Ethical Standards for Auditors.

Scope of the audit of the financial statements

An audit involves obtaining evidence about the amounts and disclosures in the financial statements sufficient to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or error. This includes an assessment of: whether the accounting policies are appropriate to the PCT's circumstances and have been consistently applied and adequately disclosed; the reasonableness of significant accounting estimates made by the PCT; and the overall presentation of the financial statements. In addition, we read all the financial and non-financial information in the annual report to identify material inconsistencies with the audited financial statements. If we become aware of any apparent material misstatements or inconsistencies we consider the implications for our report.

Opinion on financial statements

In our opinion the financial statements:

- give a true and fair view of the financial position of Waltham Forest Primary Care Trust as at 31 March 2013 and of its expenditure and income for the year then ended; and
 - have been prepared properly in accordance with the accounting policies directed by the Secretary of State with the consent of the Treasury as relevant to the National Health Service in England.
-

Opinion on regularity prescribed by the Code of Audit Practice 2010 for local NHS bodies

In our opinion, in all material respects the expenditure and income have been applied to the purposes intended by parliament and the financial transactions conform to the authorities which govern them.

Opinion on other matters prescribed by the Code of Audit Practice 2010 for local NHS bodies

In our opinion:

- the part of the Remuneration Report subject to audit has been properly prepared in accordance with the accounting policies directed by the Secretary of State with the consent of the Treasury as relevant to the National Health Service in England; and
- the information given in the director's report for the financial year for which the financial statements are prepared is consistent with the financial statements.

Matters on which we are required to report by exception

We have nothing to report in respect of the following matters where the Code of Audit Practice 2010 for local NHS bodies requires us to report to you if:

- in our opinion, the Governance Statement does not reflect compliance with the Department of Health's requirements;
- any referrals to the Secretary of State have been made under section 19 of the Audit Commission Act 1998; or
- any matters have been reported in the public interest under the Audit Commission Act 1998 in the course of, or at the end of, the audit.

Conclusion on the PCT's arrangements for securing economy, efficiency and effectiveness in the use of resources

We are required under Section 5 of the Audit Commission Act 1998 to satisfy ourselves that the PCT has made proper arrangements for securing economy, efficiency and effectiveness in its use of resources. The Code of Audit Practice issued by the Audit Commission requires us to report any matters that prevent us being satisfied that the audited body has put in place such arrangements.

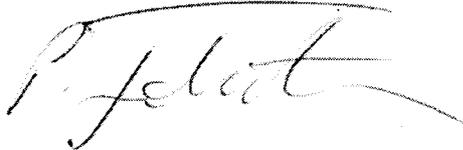

We have undertaken our audit in accordance with the Code of Audit Practice 2010 for local NHS bodies, having regard to the guidance issued by the Audit Commission in November 2012. We have considered the results of the following:

- our review of the Governance Statement;
- the work of other relevant regulatory bodies or inspectorates, to the extent that the results of this work impact on our responsibilities at the PCT; and
- our locally determined risk-based work relating to PCT abolition and the transition to new local commissioning arrangements.

As a result, we have concluded that there are no matters to report.

Certificate

We certify that we have completed the audit of the accounts of Waltham Forest Primary Care Trust in accordance with the requirements of the Audit Commission Act 1998 and the Code of Audit Practice 2010 for local NHS bodies issued by the Audit Commission.

7 June 2013

14 Annual governance statement

Name of organisation: Waltham Forest Primary Care Trust

1. Scope of responsibility

The Board was accountable for internal control. During 2012/13 the Chief Executive of the Board had responsibility for maintaining a sound system of internal control that supported the achievement of the organisation's policies, aims and objectives. She also had responsibility for safeguarding the public funds and the organisation's assets.

As Designated Signing Officer I have sought assurance from the chief executive of the PCT on these matters.

The Chief Executive of the PCT was accountable to the Chair of the PCT and the Chief Executive of the Strategic Health Authority. The Chief Executive was regularly performance managed through twice yearly performance appraisals undertaken by the Chair of the Board.

In addition, the Strategic Health Authority (NHS London) met regularly with the directors and the chief executive during the year to formally review performance on delivering the organisation's objectives. These meetings were formally minuted.

Systems and processes were in place to enable effective working with these partner organisations.

In recognition of the risk in establishing an appropriate management structure to manage seven PCTs as a cluster with robust governance arrangements and organisational form to deliver its objectives significant assurance was received from the internal auditors, RSM Tenon and Parkhill, that the cluster governance arrangements and controls upon which the organisation relies to manage the risk were suitably designed, consistently applied and effective.

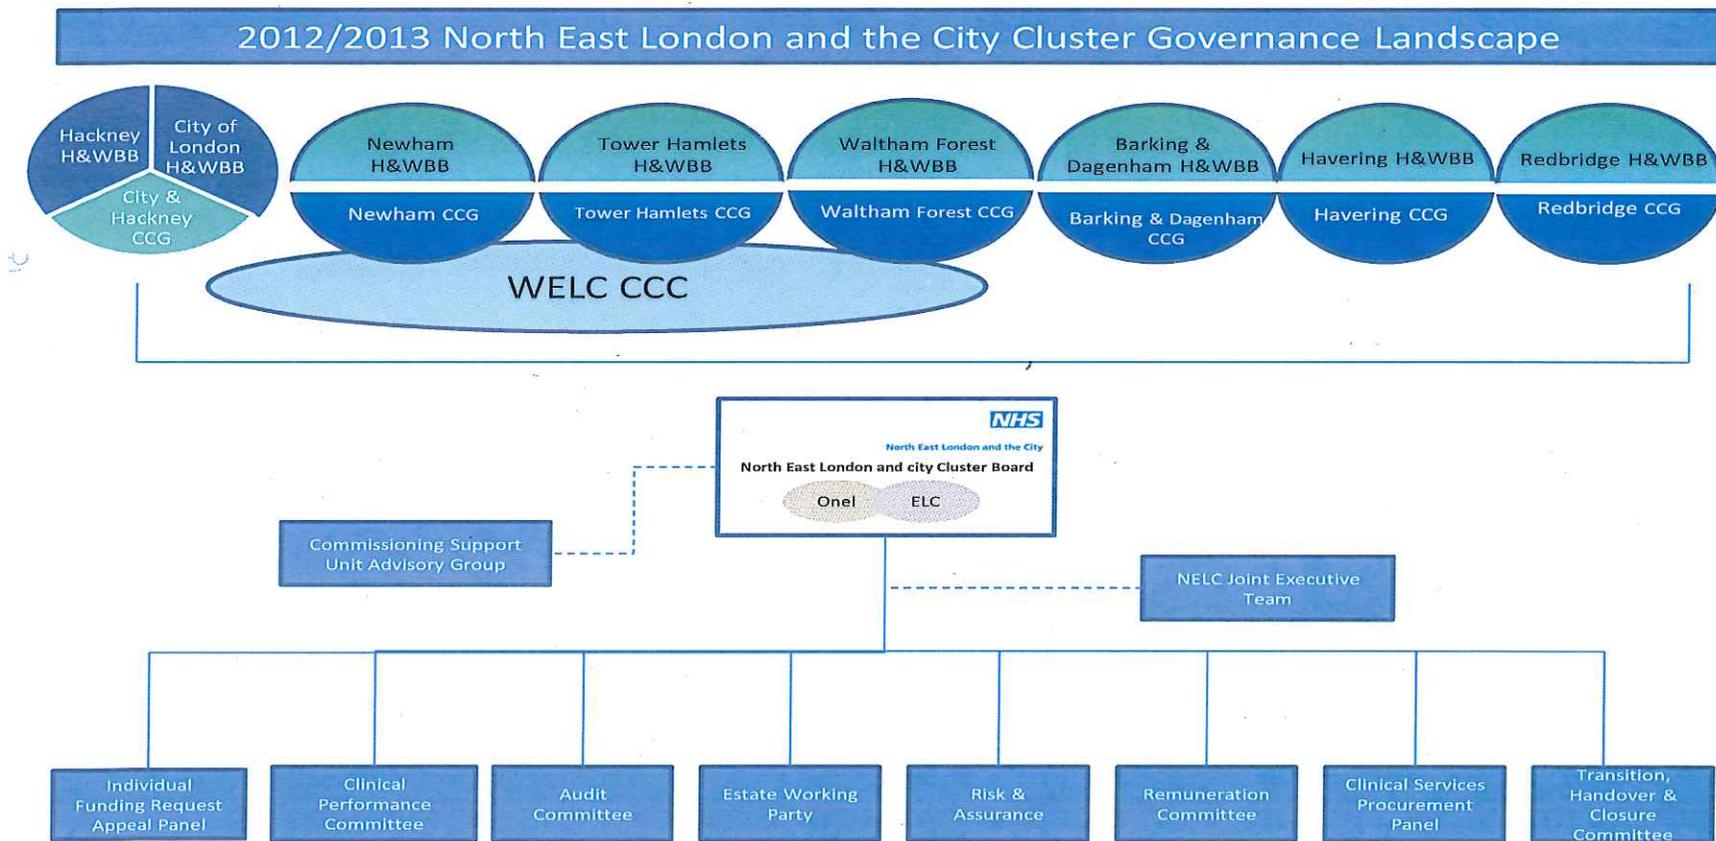

2. The governance framework of the organisation

The governance structure was designed to ensure that there was a balance between having robust governance arrangements for the organisation and being able to deliver an effective end state.

In January 2012 the boards of the seven PCTs in North East London and City agreed to work as a Cluster through an integrated management structure with effect from April 2012. This arrangement encompassed the Chair and non-executive director team being appointed across the seven PCTs and a single management team. The governance model met the requirements of the Department of Health guidance 'model 2'. These comply with the Corporate Governance Code without departure. Arrangements in place for the discharge of statutory functions have been checked for irregularities, and to ensure they are legally compliant.

The model was delivered through a joint committee structure from April 2012, shown below:

NHS North East London and City committee structure

Agreed April 2012

The Cluster Board for North East London and the City met on a bimonthly basis during 2012/2013 until March when two meetings were necessary to complete Board business and close down all seven PCTs.

The work of the Board has been underpinned by a single Corporate Governance Framework for the transition year together with a single set of Standing Orders, Standing Financial Instructions and Scheme of Delegation. This framework has enabled the Cluster to conduct its business during a period of significant change in the NHS. It has also supported the establishment of the Clinical Commissioning Groups as sub-committees of the Board and a robust Performance Management Framework to ensure accountability.

The Board's work has been supported by a number of committees as evidenced in the structure diagram. These committees have been chaired by Non-Executive Directors or Associate Non-Executive Directors. The role of Associate Non-Executive Director was created as part of the governance arrangements for the Cluster and has ensured that a wide range of non-executive knowledge and experience was retained and used in the assurance process.

The Audit Committee has met on a bi-monthly basis through to September 2012 and then met monthly from October 2012 to March to strengthen assurance. It was quorate on each occasion. It has considered internally and externally audit reports along with updates from the counter-fraud officer. It has received updates and reviewed reports on finance, the Board Assurance Framework and Corporate Risk Register together with feedback from the Risk and Assurance Committee. It also reviewed work in relation to transition, handover and closure and from November 2012 received reports from the Transition, Handover and Closure Committee.

The Risk and Assurance Committee was established from April 2012 and met on a bi-monthly basis from May. The role of the Committee was to review management action in relation to risks that impact on the delivery of the operating plans and the achievement of the corporate objectives in order to give assurance to the Board. The committee has been quorate on all occasions.

The Transition, Handover and Closure Committee chaired by a Non-Executive Director was established in October 2012 to provide additional assurance to the Board during the final months up until closure. It has met on a monthly basis since November and undertaken in depth reviews of plans, including the Transfer Schemes for staff, assets and liabilities and the closedown plans.

The Remuneration Committee met eight times in 2012/13 to consider matters relative to remuneration and terms of service of the senior management team and staff matters relating to handover and closure. All meetings were quorate.

3 Board effectiveness

All Board members were asked to complete a board evaluation questionnaire in March 2013. The questions covered the broad themes on the key functions of the Board. Board members were requested to indicate the extent to which they agreed or disagreed (to varying degrees) with the statements contained in the questionnaire. Board members also had the additional opportunity of providing comments.

Just over half of the Executive and Non-Executive Directors completed the questionnaire and their responses have been kept confidential. The general picture that emerges from the responses to the board evaluation questionnaire is that the Board is generally confident:

- that the members individually and collectively understand what is expected of them
- that it effectively carries out its functions in relation to its provision of strategic leadership to the organisation
- that it monitors the implementation of the strategic plan that it sets for the organisation
- that the Board provides leadership to the organisation in the delivery of quality improvement
- that it is assured that a sound system of internal control and risk management is in place within the organisation and is functioning effectively
- that there is an effective working relationship between the Board and the management team
- that the Board has an effective working relationship with its internal and external stakeholders
- that Board members are satisfied that they make meaningful, informed and robust contributions to discussions at Board meetings and makes effective use of its meetings

4. Assurance

Since 1 October 2012 the Board's Governance arrangements focused on the final phase of transition, handover and closure with assurance through CCG shadow governing bodies for performance and service development issues and the Director of Transition providing assurance for transition, handover and closure arrangements. Regular reports were provided to the Board on transition and handover progress and the process for the formal transfer of assets and liabilities and staff to receiving organisations. The seven PCTs as sender organisations transferred their functions, both statutory and non-statutory to 47 other organisations. The process for making this transfer was through a legal transfer scheme, one for staff and one for assets and liabilities for each PCT that makes up the Cluster. The draft transfer scheme was approved by the Board at its final meeting in March 2013.

The Risk and Assurance Committee met for the last time on 27 February. At that meeting the Committee agreed to write to the Chair of the CCGs and the Chairs of the CCG Audit Committees drawing their attention to the risks that will continue beyond the end of March and will be the receiving organisations' responsibility.

5. Risk assessment

5.1 Risk management strategy

The Cluster governance structure was designed to ensure that there was a balance between having robust governance arrangements for the organisation and being able to deliver an effective end state.

The risks to the achievement of the Cluster's Corporate Objectives were identified through the process detailed in the North East London and the City Risk Management Strategy. This document was created following a review of the risk management strategies for:

- The East London and the City (comprising City and Hackney PCT, Newham PCT and Tower Hamlets PCT) Risk Management Strategy, and
- The Outer North East London (comprising Barking and Dagenham PCT, Havering PCT, Redbridge PCT and Waltham Forest PCT) Risk Management Strategy.

Elements of best practice from these documents in terms of: risk definitions, identification processes, templates and risk matrix were taken out and combined to create the NHS North

East London and the City Risk Management Strategy. This was approved by the Board at its May 2012 meeting.

The Risk Management Strategy includes a scoring and escalation process that ensures as far as reasonably practicable that there is a consistency of applied risk ratings across the organisation.

In analysing risks the risk rating takes the following into account:

- Cluster ability to deliver its objectives and projects
- Harm/injury to patients, staff, visitors and others
- Potential for complaints / claims
- Service/business disruption
- Staffing and competence
- Financial
- Inspection/audit
- Adverse publicity

The risk assessment process drew on the best practice elements of ISO31000 and therefore embraces the concept of enterprise, integrated risk management in ensuring achievement of best outcomes. The Risk Management Strategy set out the approach to risk which demanded embedding risk within all business processes.

In moving forward the North East London and the City Risk Management Strategy has been adopted for use by several of the North East London and the City Clinical Commissioning Groups (CCGs). Additionally, the Cluster Board Assurance Framework has been reviewed by the CCGs ensuring that where appropriate, risks are handed over.

5.2 Risk identification

The risks to the achievement of Cluster objectives were identified through two main processes.

- Review of the Board Assurance Frameworks from NHS East London and City and NHS Outer North East London and the City to identify risks, controls, assurances and gaps that remained a threat to NHS North East London and the City, and
- A risk assessment of the Corporate Objectives. The Cluster Board set its Corporate Objectives at the beginning of the 2012/13 year. Subsequent review meetings with the Directorate Risk Leads identified the risks, controls, assurances and gaps. From these discussions the risks were graded in line with the NHS North East London and the City Risk Management Strategy.

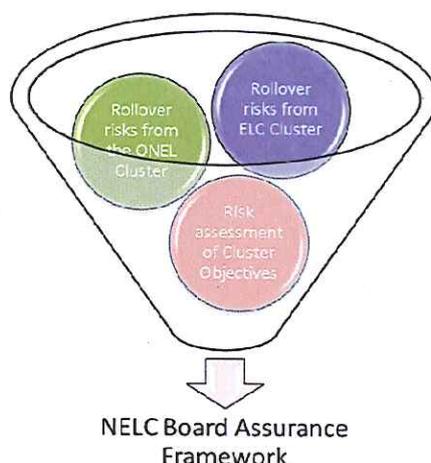

Figure 1 showing the 2 main processes that led to the creation of the NELC Board Assurance Framework

Supplementing this “top down” process of risk identification was that of Corporate Risk Register. Operational risks were identified at a Directorate level and added to the Corporate Risk Register. This process provided a “bottom up” view of risks that were both specific to the individual PCTs and those specific to the Cluster.

In September 2012 NHS London requested that all risks were categorised as at least one of the following:

- In year delivery
- Transition/closure
- Decommissioning
- Zero Tolerance Risk

This categorisation was added to the Board Assurance Framework and the Corporate Risk register in quarter 3.

5.3 Accountability for risks

Individual Directors were held accountable for the risks associated with their Directorates. The Board Assurance Framework and Corporate Risk Register were refreshed quarterly through meetings with the Directorate risk leads. Once reviewed and revised the documents were reported to the following bodies:

- **Transition, Handover and Closure Committee**
This Committee retained oversight for all the risks pertaining to Transition, Handover and Closure.
It met on a monthly basis from November 2012
- **Risk and Assurance Committee**
This Committee reviewed both the Board Assurance Framework and Corporate Risk Register in its entirety at least once a quarter to provide probity of the documents and thus the risks facing the organisation.
This Committee also had the power to request “Deep Dives” to provide assurance to the Board that the Cluster has effective systems of internal control in relation to risk management and governance. The Committee held one deep dive on the issue of “Quality and handover to the CCGs”.
It met bi-monthly.
- **Audit Committee**
The Audit Committee was responsible for reviewing the effectiveness of the internal control and risk management systems and received reports from management on the effectiveness of the risk systems that the Cluster had established.
- **Cluster Board**
The Board received the Board Assurance Framework once a quarter to ensure that the Board retained oversight of all the risks to the achievement of the Corporate Objectives and allow Board members to challenge executives on areas of weak control, assurance or high risk rating.

5.4 Board Assurance Framework 2012/13

Key risks for Waltham Forest PCT identified during 2012/13 which populated the Board Assurance Framework (BAF) for 2012/13 and how their risk rating changed over the financial year are summarised below.

	Risk description	Initial risk	June 12	Aug 12	Nov 12	Mar 13
1.1	There is a risk that some public health targets (including screening) across PCTs will not be met	Red	Yellow	Yellow	Yellow	Yellow
1.2	Risk of overspend on revenue resource limit. Risk of not meeting agreed control target surpluses.	Red	Yellow	Yellow	Yellow	Green
1.3	Risk of financial consequences for future arising from the final year of PCTs, exit/closedown and the overall transition agenda.	Red	Yellow	Yellow	Yellow	Yellow
1.4	Ensure we support CCGs to deliver operating plans, QIPP and achieve key strategic aims in 2012/13. This is in relation to improvements in healthcare and financial management.	Red	Yellow	Yellow	Yellow	Yellow
1.5	CCG failure to manage all local healthcare providers with support from CSU and the cluster could result in key quality and performance not being achieved as well as the detriment of healthcare delivered to the local population.	Yellow	Yellow	Yellow	Yellow	Yellow
1.6	Failure to meet emergency care access standards at Barts Health could adversely affect service users and other organisations	Yellow	Yellow	Yellow	Yellow	Yellow
1.8	Maintaining an effective and proactive quality assurance framework during periods of transition for both the provider and commissioner landscape across all provider groups	Yellow	Yellow	Yellow	Yellow	Green
1.9	Barts Health merger: failure of new, larger trust to deliver requisite levels of performance across all sites due to transition.	Yellow	Yellow	Yellow	Yellow	Green
2.1	Progress in quality improvement is not achieved in the timeframe set out and inability to sustain quality and safety of	Yellow	Yellow	Yellow	Yellow	Yellow

	maternity services at BHRUT in the context of CIP and requirement to operate					
2.2	Failure to meet emergency care access standards at BHRUT/Queens Hospital adversely impacting on service users and other organisations					
2.3	Failure to deliver BHRUT 2012/13 financial plan – deficit reduced in line with plan to maximum £40m. Dependent on £23m CIP delivery and 10.3 commissioner QIPP delivery					
2.4	Failure to develop a clear plan for clinical and financial sustainability, including a plan to implement Health for North East London acute reconfiguration decisions					
3.1	Loss of talent and organisational memory in both sender and receiver organisations, leading to increased staff costs and the potential of new organisations unable to function and to take on their statutory and other roles by April 2013.					
3.2	There is risk that key performance issues regarding contractors are not managed effectively and key information is not passed on during transition due to delays in clarifying roles, structure and functions in the NHS Commissioning Board London Region and its local area teams.					
3.3	Divestment of remaining provider services and non-commissioning services – via procurement and other transfers. All transfers and procurements must be complete by 31 March 2013. Range and scope of the functions increases the risk.					
3.4	Information risks associated with records management, Fol timescales, Information Governance Toolkit requirements and data protection issues are not effectively managed during transition. Size and scope of records in the legacy PCTs increases this risk.					
3.5	Public Health transition to local authority end state is not achieved within required timescales (also see 3.2)					
3.6	Organisational memory on quality and safety (including safeguarding) is lost to the system and handover is ineffective.					
3.7	IM&T transition is not effectively aligned to transition end state in terms of asset transfer – potential issues around delays in deciding future arrangement of GP ICT at a London level.					
3.8	Failure to develop a robust and sustainable commissioning support organisation through migration					
4.1	There is a risk that the 2012 Olympics and Paralympics will impact on delivery of healthcare, thereby preventing business as usual.					

Risks to the achievement of the corporate objectives were determined at the beginning of the 2012/13 year and reported to the Board in May. From this a Board Assurance Framework was constructed and reviewed at the July meeting and at every meeting through the year. The BAF focus was on risks across the system to the delivery of the corporate objectives; The Risk Register identifies risks on a PCT specific basis as appropriate.

The assessment of risks was undertaken in accordance with the Cluster's risk strategy and Board Assurance Framework. This included a risk scoring and escalation process that ensured as far as is practicably possible that there is consistency of applied risk ratings across the organisation. In depth scrutiny of the BAF has been undertaken by the Risk and

Assurance committee. This Committee undertook a “deep dive” challenge into particular areas of risks, for example quality and safety and has held individual directors to account for the risks associated with their areas of responsibility.

The Assurance Framework was comprehensive in scope, covering the key operational areas of the PCT. Through its inclusion of zero tolerance and horizon scanning risks it ensures the assurances around risk prevention, risk deterrence (eg fraud related risks) and the management of manifested and potential risks.

The Framework was consistent with the template promulgated by the Department of Health and explicitly mapped objectives against pertinent risks, controls and assurances. It also described the ways in which public stakeholders were involved in managing risks which impact on them.

Risks to data security were managed by the Information Governance team. This had limited resources during the year and an audit of the Information Governance Toolkit highlighted a number of deficiencies. These deficiencies were addressed but in the limited time available it was only possible to achieve Level 1 compliance by the end of March 2013.

5.5 Corporate Risk Register

The 12/13 BAF was supplemented by a corporate risk register which highlighted other corporate risks as follows:

- Insufficient and ineffective communications during the transition may lead to some staff, stakeholders and the public not understanding the changes
- Review of creditors and debtors as part of the formal “winding up” process may necessitate write of uncollectable debts and non-payable income potentially causing waste of Cluster finances, loss of reputation and potential adverse media attention.
- Information Governance risks relating to non-compliance with the Information Governance Toolkit.

These corporate risks have been managed as follows:

- The delivery team for Transition, Handover and Closure put in place relationship managers to ensure there was effective communication with receiving organisations. Regular bulletins have been issued to staff and public communication statements issued in the local press and on website
- A finance closedown team has been put in place to manage “wind up” effectively
- Remedial action was taken to ensure compliance with Information Governance Toolkit by 31 March 2013. Lessons learn from the deficiencies have been passed on the CCGs and the CSU to inform their Information Governance Toolkit compliance for 2013/14

5.6 The Risk and control framework

The Board has considered and developed an Assurance Framework as part of the overall Business Planning cycle. Throughout the year, the Assurance Framework has been continuously amended and updated to refine and develop strategic understanding of the assurance agenda and its various requirements.

A rolling review of the Assurance Framework for 2012 / 2013, carried out by the PCT’s internal auditors, RSM Tenon and Parkhill has demonstrated that there is an effective system of internal control to manage the principle risks identified by the organisation.

However it notes that there is scope for some improvement when articulating the mechanisms that provide assurances that the controls put in place to manage risks are indeed effective. The specific issues that have been highlighted for improvement are listed below:

- i. Information Governance
- ii. Continuing Care

6. Review of the effectiveness of risk management and internal control

As Accountable Officer, I have responsibility for reviewing the effectiveness of the system of internal control. My review is informed in a number of ways. The Head of Internal Audit provides me with an opinion on the overall arrangements for gaining assurance through the Assurance Framework and on the controls reviewed as part of Internal Audit's work.

For 2012 / 13 the Head of Internal Audit has advised me that based on the work undertaken in 2012/13, significant assurance can be given that there is a generally sound system of internal control, designed to meet the organisation's objectives, and that controls are generally being applied consistently.

However, he has issued an Information Governance report with a RED opinion rating whilst at the same time noting that we are drawing up a response to the recommendations made which we expect to mitigate any gaps in controls identified moving forwards.

Executive managers within the organisation who have responsibility for the development and maintenance of the system of internal control provide me with assurance.

The Assurance Framework itself provides me with evidence that the effectiveness of controls that manage the risks to the organisation achieving its principal objectives have been reviewed. My review is also informed by other sources including;

- Scrutiny from our external auditors
- Information Governance Assurance tool kit compliance submission
- The Cluster's internal monitoring and review process for its quality of commissioned services described in the Department of Health's Operating Framework and delivered through the Risk and Assurance Committee
- Reports by Internal and External Audit and the results of Patient and Staff Surveys
- Annual Care Quality Commission (CQC) assessment for safeguarding children
- Local Safeguarding Children Board (LSCB) annual report
- Robust incident and complaints monitoring processes, ensuring compliance with national Serious Incident reporting.
- NHS London's review of the plans to support the 2012/13 QIPP programme and consequential financial impacts at both PCT and Outer North East London levels
- Assurance on fraud and potential fraud was provided through the work of the local counter fraud officer who provides updates, communications and training on all appropriate counter fraud issues to PCT staff and emerging CCG pathfinder organisations.
- My review confirms that Waltham Forest PCT had a generally sound system of internal controls that supports the achievement of its policies, aims and objectives and that those control issues have been or are being addressed.
- The Audit Committee provided the Board with an independent and objective view of arrangements for internal financial control within the PCT, ensuring that the Internal Audit service complied with mandatory auditing standards including the review of all fundamental financial systems.

- The Board and Executive Directors have managed and reviewed their principal risks through their Performance reviews both with NHS London and the cluster's Operating Plan and the Business Planning process and their contribution to the development of the Assurance Framework.

The gaps in control and assurance identified within the Assurance Framework were the subject of action plans which were approved by the Board.

Significant Issues

The following significant control issues during the year 2012/13 have taken place:

- Deficiencies in compliance with the Information Governance Toolkit. With remedial action in year the PCT only achieved level 1 compliance.
- The backlog in continuing care assessments carries significant financial risks for outer north east London CCGs.
