

Dear Department of Energy and Climate Change,

Re: Review of the Siting Process for a Geological Disposal Facility

I am concerned that your proposal will take the responsibility away from local councils to decide for themselves whether dumping nuclear waste is a good idea.

Do you want to silence local people? People need to know how they can object to nuclear waste dumping in their area. I'm not sure that process, as outlined in the consultation, is clear at all.

Yours sincerely,

Gill Bone
