

## Tariff Notice No 06/2013

Tariff Classification  
Excise, Customs, Stamps and Money  
10th Floor South East  
Alexander House  
21 Victoria Avenue  
Southend-on-Sea  
Essex SS99 1AA  
Email: [tariff.classification@hmrc.gsi.gov.uk](mailto:tariff.classification@hmrc.gsi.gov.uk)

A new regulation has been published on 23/3/13

In OJ L 84/5

A colour liquid crystal display (LCD) module with a diagonal measurement of the screen of 16,5 cm (6,5 inches) with mounting devices on the side, an aluminium heat sink on the back, with dimensions of approximately 16 x 10 x 2 cm.

The module comprises a low-voltage differential signalling (LVDS) receiver, a light emitting diode (LED) backlight with integrated brightness control, a LED driver circuit, printed circuit boards with control electronics for pixel addressing only comprising a microcontroller, and a 10-pin LVDS interface.

The display has the following characteristics:

- a resolution of 400 x 240 pixels,
- an aspect ratio of 16:9,
- a dot pitch of 0,1195(\*3) x 0,3305 mm.

The module does not incorporate any video signal processing assembly, for example, a video converter, a scaler or a tuner.

The module is designed for incorporation into a dashboard of a motor vehicle for displaying video signals.

8529 90 92

Classification is determined by General Rules 1 and 6 for the interpretation of the Combined Nomenclature, Note 2(b) to Section XVI, Note 2(f) to Section XVII and by the wording of CN codes 8529, 8529 90 and 8529 90 92.

As the module does not have any video signal processing components, classification as an incomplete monitor under heading 8528 is excluded.

The module is not classifiable in heading 8531, because it is not considered to be an electrical visual signalling apparatus of heading 8531 or a part of such an apparatus in view of its characteristics (see also the HS Explanatory Notes to heading 8531).

The module comprises a backlight unit, LED driver circuit and printed circuit boards with control electronics for pixel addressing only. Consequently, classification under heading 9013 is excluded (see also the HS Explanatory Notes to heading 9013 (1)).

As the module is designed for displaying video signals it is a part classifiable under heading 8529 (see also the CN Explanatory Notes to subheading 8529 90 92).

It is therefore to be classified under CN code 8529 90 92 as a part suitable for use solely or principally with the apparatus of heading 8528.

**PLEASE NOTE: This is not considered a change in UK practice.**

A new regulation has been published on 23/3/13

In OJ L 84/7

<http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=OJ:L:2013:084:0007:0008:EN:PDF>

A liquid crystal display (LCD) module with a diagonal measurement of the screen of approx 11 cm (4,3 inches) and a resolution of 480 x 272 pixels, in a frame, equipped with printed circuits for pixel addressing and a backlight. The module is designed to be incorporated in different products falling under Chapter 85, for example, media players or radio receivers, which may be classified under different headings, such as 8519, 8521, 8527 or 8528.

8548 90 90

Classification is determined by General Rules 1 and 6 for the interpretation of the Combined Nomenclature, Note 2(c) to Section XVI and by the wording of CN codes 8548, 8548 90, 8548 90 90.

Since the module can be incorporated into apparatus classified, for example, under headings 8519, 8521, 8527 or 8528, it is not suitable for use solely or principally with the apparatus of heading 8519 or 8521 or for use solely and principally with the apparatus of headings 8525 to 8528.

Consequently, classification under headings 8522 and 8529 is excluded.

The module is therefore to be classified under CN code 8548 90 90 as electrical parts of machinery or apparatus, not specified or included elsewhere in Chapter 85.

**PLEASE NOTE: This is not considered a change in UK practice.**
