NGEC shortlisted bidders: National Housing Prime

August 2011

The following organisations have been shortlisted to go forward to the next stage of the procurement process for the National Housing Prime, following the evaluation of pre-qualification questionnaires (PQQs).

The evaluation process looked at the evidence of the bidders' past performance which was submitted in the PQQs. This included technical capability, health and safety, financial standing, quality assurance, environmental management and equal opportunity and diversity.

The National Housing Prime will provide repairs and maintenance to more than 49,000 UK military homes, grounds maintenance, and housing construction projects of an individual value of up to £3.93 million. Subject to further review it could potentially also provide occupancy management activities such as housing allocations, move-in move-out services, and the provision of furniture and fittings.
