Introduction	3
Transition issues	4
The main changes in SORP 2015	5

Introduction

In March 2013 the Financial Reporting Council (FRC) published a new financial reporting standard (FRS 102) to replace existing UK accounting standards for accounting periods beginning on or after 1 January 2015. The Charity Commission and the Office of the Scottish Charity Regulator, as the joint SORP-making body for charities, subsequently issued a new Charities SORP (Statement of Recommended Practice) on 16 July 2014, based on FRS 102, hereafter referred to as 'SORP 2015'.

This guide provides:

- an update of the main changes arising from SORP 2015 that are relevant to established academy trusts (incorporated before 1 January 2015), building on our guidance published in September 2015
- cross reference tool to the 2015 to 2016 Academies Accounts Direction

This guide is not intended to be a substitute for SORP 2015. A full copy of SORP 2015 together with useful help sheets can be found at on the charities SORP website.

The Charity Commission also published a separate SORP based on the Financial Reporting Standard for Smaller Entities (FRSSE) in 2014. However, this is being withdrawn in 2016. Academy trusts must not follow the SORP based on FRSSE.

Where academy trusts are unsure about any of the changes, we recommend that they discuss them with their professional advisors.

Transition issues

Due to the simplicity of operations for the majority of academy trusts, there should not be significant changes to their financial reporting arising from SORP 2015. As a minimum established academy trusts should consider:

- revisiting and revising their accounting policies as appropriate
- the need for restating comparatives for the year ended 31 August 2015, together with the opening balance sheet figures at 1 September 2014, within their financial statement for the period ended 31 August 2016
- revising the format of the statutory accounts, ensuring that the trustees are aware of, and understand, the changes. The <u>Accounts Direction</u> for the period ending 31 August 2016 provides model financial statements (the 'Coketown model') based on SORP 2015, covering most situations
- whether the trust's accounting systems will be able to accommodate the changes
- the impact on timetables for preparing, auditing and approving the financial statements. The trust's management team should plan and discuss this with the trustees, professional advisers and auditors as appropriate
- whether specialist assistance is needed to identify transitional issues
- whether finance staff need training on the changes to the SORP

The main changes in SORP 2015

Area	Impact of SORP 2015/FRS102	Actions required	2015 to 2016 AAD reference
Trustees' Report	Changes required by SORP 2015 are minimal and should not require too much additional effort for most academy trusts.	Determine the academy trust's key management personnel	• Part 3 – note 9e and 7.5.1
	Changes include explaining arrangements and policies for setting pay and remuneration of the academy trust's key management personnel, including an explanation of any benchmark or parameters/criteria used for setting pay.	Compare the current level of reserves against the reserves policy	 Part 3 – Trustees' Report and 4.1.19
	Key management personnel is a term used by FRS 102 for those persons having authority and responsibility for planning, directing and controlling the activities of a reporting entity, directly or indirectly, including any director (whether executive or otherwise). This includes academy directors and those members of staff who are the senior management personnel to whom the trustees have delegated significant authority or responsibility in the day-to-day running of the academy trust. In practice this is likely to equate to trustees and members of an academy trust's senior leadership team. For multi-academy trusts it may also include principals and senior leadership teams of individual academies. However, this will depend on the specific circumstances and levels of delegation in place.	Ensure risks can be identified and that the trust can describe how they are being managed	• Part 3 – Trustees' report and 4.1.12

Area	Impact of SORP 2015/FRS102	Actions required	2015 to 2016 AAD reference
,	Trusts should also compare the actual level of reserves held with the level stated in the reserves policy and identify the level of free reserves held. Risk management disclosures now require a description of the risks identified and a summary of the trust's plans and strategies for managing them.		
of Financial Activities: Income and expenditure headings	The activity basis of accounting, under which charities classify their income and expenditure by activity, has been retained but several of the headings have been changed. A help sheet is available on the Charities SORP website . This includes a mapping between SORP 2005 and SORP 2015 headings (see help sheet 2). Changes to income headings: 'voluntary income' is renamed 'donations' (including capital grants) income from charitable activities is retained income from other trading activities' (which includes income from trading activities and fundraising events	 Consider whether accounting systems are set up to capture this information. Trusts may wish to revisit their 'chart of accounts' and other internal reporting. Make required changes to the statutory accounts format Restate prior period comparative figures where headings and/or accounting policies have 	 Part 3 – SoFA and note 3 Part 8.12

Area	Impact of SORP 2015/FRS102	Actions required	2015 to 2016 AAD reference
	services)		
	income from investments is retained		
	other income is retained		
	Changes to expenditure headings:		
	'costs of generating voluntary income' and 'fundraising trading' are combined into 'expenditure on raising funds'		
	'expenditure on charitable activities is retained'		
	Implication		
	These are changes in titles rather than changes to the basis for classification and so there shouldn't be any significant changes to the allocation of the main sources of academy income such as General Annual Grant.		
Statement of Financial Activities:	Governance costs will no longer be separately disclosed on the face of the SoFA but will be included within charitable activities as support costs.	Make required changes to the statutory accounts format	Part 3 – note 8 and 6.1.20
Governance costs	Implication Governance costs will no longer be separately identifiable	Restate prior period comparative figures under	

Area	Impact of SORP 2015/FRS102	Actions required	2015 to 2016 AAD reference
	from reviewing the SoFA in isolation.	the new heading	
Statement of Financial Activities: Comparative figures	Comparative figures will now be required for all columns in the SoFA either by way of adding further columns, replicating the prior year SoFA or by providing this information prominently in the notes. The current SORP 2005 only requires a total column to be provided on the SoFA for the comparative period's funds. Implication The financial statements will include more detailed comparative information in respect of the SoFA.	Determine the approach the academy trust will adopt for showing comparative information	• Part 3 – notes 3 and 8.12
Statement of Financial Activities: Investments	If an academy trust has investments, then any realised and unrealised gains and losses will now be reported in the SoFA as part of net income/expenditure rather than being reported as other recognised gains and losses. Implication There is no impact on the net surplus of the period. However the net incoming/outgoing resources will be increased or reduced by any investment gains or losses respectively.	 Academy trusts holding investments to review disclosure requirements Restate prior period comparative figures under the new heading 	• Part 6.1.19

Area	Impact of SORP 2015/FRS102	Actions required	2015 to 2016 AAD reference
Balance Sheet: Basic format	The balance sheet format is generally unchanged. Implication No significant changes required to the balance sheet.	Make required changes to the statutory accounts format	Part 3 – balance sheet and 6.2
Balance Sheet: Intangible fixed assets	Under FRS 102 computer software licenses that are separable should be capitalised as 'intangible fixed assets' Under FRS5 such items would have been included within tangible fixed assets. 'Separable' items include word processing or finance packages because they are not required for the computer hardware to operate. It would exclude software such as a Windows operating system. Implication For most trusts a further asset class of intangible fixed assets will need to be included within the balance sheet. This mirrors the information already required as part of the Accounts Return.	 Determine whether software licenses held are material in total Depreciation on these intangibles will be described as amortisation, but the useful economic lives of the assets should be unaffected Calculate any opening reserves adjustments that will be required on transition (1 September 2014) 	• Part 3 – notes 1, 7, 12 and 6.2.4
		Consider whether accounting systems are set up to capture this	

Area	Impact of SORP 2015/FRS102	Actions required	2015 to 2016 AAD reference
		information. Trusts may wish to revisit their 'chart of accounts' and other internal reporting • Determine the adjustments required to the 31 August 2015 figures that will form comparatives in the 31 August 2016 financial statements	
Balance Sheet: Employee benefits – holiday pay accrual	Under FRS102 there is a requirement to recognise a liability in the balance sheet for any outstanding paid annual leave, if material. Such a circumstance may arise when the holiday year is not coterminous with the financial year. Implication Additional liabilities may need to be reflected on the balance sheet. Example Employees of trust A are permitted 24 days annual leave which must be taken in the holiday year which commences	 For staff with holiday entitlement, determine whether their holiday year is different to the financial year. This is most likely to be an issue for non-teaching staff Review the system for capturing outstanding holiday entitlement for staff 	• Part 6.2.5 and 8.12

Area	Impact of SORP 2015/FRS102	Actions required	2015 to 2016 AAD reference
	on 1 April. At 31 August an employee, pro-rata is entitled to have taken 10 days holiday. Trust A calculates from holiday records that the outstanding holiday (i.e. holiday not taken from an allowance of 10 days) is 36 days for all employees at the same pay grade. Trust A would make an accrual for the 36 days outstanding holiday measured at the average salary per day. Overall impact On transition to FRS102, a new provision would be recognised for outstanding holiday pay, with a corresponding adjustment to opening reserves. In future years trusts will need to consider changes to the annual holiday allowance, pattern of holidays taken and holiday	 Consider whether accounting systems are set up to capture this information. Trusts may wish to revisit their 'chart of accounts' and other internal reporting Calculate any opening reserves adjustments that will be required on transition (1 September 2014) Determine the 	
	year and the impact on the accrual.	adjustments required to the 31 August 2015 figures that will form comparatives in the 31 August 2016 financial statements	
Balance	The option to hold property, plant and equipment (PPE)	Consider whether to take	No specific
Sheet:	under the cost model or the revaluation model is still	the option to have a one-	reference
Property,	available under FRS102 but there is also an option to take a revalued amount as deemed cost on the date of transition	off revaluation on transition (this can be

plant and equipment	(1 September 2014). The option to have a one-off valuation of PPE at the date of transition is available, even if a cost model was previously adopted and will continue to be adopted after transition. Implication	applied to a single item rather than the old UKGAAP where revaluations were applied to a class of asset).	
	A one-off revaluation may strengthen the balance sheet (and increase the related restricted fixed asset fund). A higher valuation will, however, increase the depreciation charge through the SoFA. The cost of obtaining a valuation would need to be	 Approval of accounting policy choice by the trustees. Where applicable, arrange and obtain a valuation of relevant PPE 	
	considered.	ensuring that the valuer understands the basis of valuation required under FRS102 and SORP 2015	
		 Calculate any opening reserves adjustments that will be required on transition (1 September 2014). 	
		Determine the adjustments required to

		the 31 August 2015 figures that will form comparatives in the 31 August 2016 financial statements.	
Statement of Cash Flows: Fewer headings and different	The cash flow statement has been renamed the statement of cash flows and now has a more simplified structure with three main headings: • operating activities – being the principal income producing activities of the trust including cash receipts from donations and grants, cash payments to suppliers	 Make required changes to the statutory accounts format Academy trusts should consider the definition of 'cash equivalents' under 	Part 3 – Statement of Cash Flows and 6.3
reconciliation	 of goods and services, staff salaries, pension contributions etc. investing activities – including the acquisition or disposal of investments and the cash generated from holding investment assets and the acquisition or disposal of tangible fixed assets. 	FRS102, being 'short- term, highly liquid investments that are readily convertible to known amounts of cash and that are subject to an insignificant risk of	
	 financing activities – relating to borrowing and permanent and expendable endowments. Also, this now reconciles down to cash and cash equivalents rather than just cash. This means that deposit accounts that are not repayable on demand without penalty, 	 changes in value'. Restate prior period comparative figures under the new headings. 	

Area	Impact of SORP 2015/FRS102	Actions required	2015 to 2016 AAD reference
	for example 3 month term deposits and indeed any other liquid resources, are now included in the bottom total as cash equivalents. Implication The number of headings is reduced from those under		
	FRS1, but otherwise the makeup of trusts' statements of cash flows should not alter significantly. However, with the introduction of cash and cash equivalents, the statement of cash flows may not equate to cash at bank and in hand.		
Accounting policies: Income recognition	Income should be recognised in the accounts when it becomes 'probable' (i.e. more likely than not) whereas under SORP 2005 it was recognised when income became 'virtually certain'. Implication This may mean income being recognised earlier than at present. For example an academy trust that receives income subject to performance related terms or conditions should recognise the income as soon as it is probable the terms or conditions can be met. However, it is unlikely to have a significant impact for trusts and, given that the majority of income is from EFA (and does not contain performance related conditions) there is no impact on the	 Identify the sources of income received. Consider if there are any sources of income that have performance related conditions. Revisit the wording required on other policies in light of changes to terminology. Consider any critical areas of judgement 	• Part 3 – note 1 and 8.4

Area	Impact of SORP 2015/FRS102	Actions required	2015 to 2016 AAD reference
	main sources of income such as General Annual Grant.	involved in preparing the financial statements as well as key assumptions and key sources of estimation uncertainty.	
		Consider the basis of the going concern assumption, taking into account all available information about the future for at least, but not limited to, 12 months from the date the accounts are approved.	
		Consider whether prior period comparative figures and opening balances at 1 September 2014 need to be restated.	
Accounting disclosures:	Key management personnel are considered to be related parties. SORP 2015 requires the total remuneration and benefits paid to key management personnel to be	Determine the academy trust's key management personnel.	• Part 3 – note 9e and 7.5.1

Area	Impact of SORP 2015/FRS102	Actions required	2015 to 2016 AAD reference
management personnel	Implication An additional disclosure will be required in the staff costs section of the financial statements.	Consider the information needs of funders and other stakeholders to determine whether more detailed disclosures may be helpful in this area.	
Accounting disclosures: Going concern	SORP 2015 states that financial statements must include disclosure of any material uncertainties of which the trustees are aware in making their going concern assessment, and where there are no material uncertainties about the academy trust's ability to continue as a going concern, this should be clearly stated. Implication For most trusts, this should not result in any significant additional disclosure. However trusts will need to state that they have considered a period of at least 12 months from the date the accounts are authorised for issue.	Continue to consider the trust's going concern status.	• Part 3 – note 1
Accounting disclosures: Related party	Any transactions involving a trustee or other related party must always be regarded as material. Additionally the new SORP specifically requires disclosure of the terms and conditions, including any security and the nature of the consideration to be provided in settlement of any related party transactions and states that a related party	 Reflect on compliance of previous disclosures and ensure that appropriate processes are in place to: determine the trust's 	• Part 7.6

Area	Impact of SORP 2015/FRS102	Actions required	2015 to 2016 AAD reference
transactions	transaction should not be described as being 'at arm's length' unless this can be substantiated. Implication This may capture the disclosure of more transactions in the financial statements.	related parties i.e. by reference to trustees' other interests and other relationships • record any transactions with related parties	
Accounting disclosures: Employee benefits – pensions	Under FRS102 there are differences in the detailed valuation requirements of pension scheme assets/liabilities. There are also changes in the recognition of interest costs in the SoFA. Rather than an 'expected return on plan assets' and 'interest on pension liabilities' there will be a 'net interest charge' on the net defined benefit pension liability. Implication There will be changes to the figures recognised for 'net interest charge' and 'actuarial gains/losses'. This is unlikely to affect the pension asset/liability.	 Ensure the appropriate valuation under FRS102 has been requested, including relevant comparative disclosures for 2015. Determine the adjustments required to the 31 August 2015 figures that will form comparatives in the 31 August 2016 financial statements. 	• Part 3 – note 29 and 8.12
Accounting disclosures:	The disclosure of commitments under operating leases must now show the expected future minimum lease	Determine which disclosures will require	Part 3 – note

Area	Impact of SORP 2015/FRS102	Actions required	2015 to 2016 AAD reference
Operating leases	payments over the remaining life of the lease (under existing UKGAAP disclosure was only required of the annual commitment). Implication Certain disclosure items will need to be restated. Example An academy trust leases equipment at a cost of £1,000 per annum for two years on 30 August. Under current UK GAAP, at 31 August, the trust would disclose the annual commitment of £1,000. Under FRS 102 the trust would need to show the total future lease payments at 31 August, being £2,000.	amending under FRS 102. • Ensure relevant information is available to enable comparative disclosures to be populated (this disclosure is already a requirement of the Annual Accounts Return).	21 and 7.8.1
Accounting disclosures: Government grants	For government grants, the following information must be disclosed: The nature and amounts of government grants recognised in the accounts Unfulfilled conditions and other contingencies attaching to grants that have been recognised in income	 Determine what government grants are received. Consider whether there are any unfulfilled conditions or contingencies. 	• Part 3 – note 4
	An indication of any other forms of government	Consider any other forms	

Area	Impact of SORP 2015/FRS102	Actions required	2015 to 2016 AAD reference
	assistance from which the trust has directly benefitted. Implication	of government assistance received.	
	Additional information will need to be disclosed in respect of government grants.		
Transition	 The following information will need to be included in the financial statements for the period ended 31 August 2016, where this is the first period of adoption: A description of each change in accounting policy. Reconciliations of the opening balance sheet at the date of transition (1 September 2014) and the comparative financial year end (31 August 2015). A reconciliation of the statement of financial activities for the comparative financial year (31 August 2015). If a trust becomes aware of errors made under the previous financial reporting framework, the above reconciliations should distinguish the correction of those errors from changes in accounting policies. 	 Identify the impacts and work required to collate information for the transition date and 31 August 2015 that will form the comparative information Put processes in place to change internal systems and year end processes as necessary. Prepare a list of transitional adjustments required to the opening balance sheet at 1 September 2014 and prepare a balance sheet 	• Part 8.12

Area	Impact of SORP 2015/FRS102	Actions required	2015 to 2016 AAD reference
		reconciliation.	
		Read through the Coketown model to ensure that any additional information required to be disclosed is obtained for the comparative period of a timely basis.	
		Draft new skeleton for SORP 2015 accounts an prepare reconciliation to the transition date and 37 August 2015 (and consider whether any of the adjustments represer errors in previous years)
