SALMONELLA IN LIVESTOCK PRODUCTION 2013

GLOSSARY

ABPR	Animal By-Products Regulations
AHVLA	Animal Health and Veterinary Laboratories Agency
CSBO	Control of <i>Salmonella</i> in Broiler Flocks Order
CSPO	Control of <i>Salmonella</i> in Poultry Order
CSTO	Control of <i>Salmonella</i> in Turkey Flocks Order
DoES	Department of Epidemiological Sciences (formerly ESRG)
DT	Definitive Phage Type of <i>S. Typhimurium</i> as described by Anderson et al (1977)
HPS	Health Protection Scotland
MDR	Multi-drug resistant
NCP	National Control Programme
NOPT	Not phage typed
PHE	Public Health England
PT	Phage type
RADAR	Rapid Analysis and Detection of Animal-Related Risks
RDNC	Reacts with the phages but does not conform to a recognised pattern of lysis
Rough	Rough strains of <i>Salmonella</i> that cannot be serotyped due to autoagglutination.

SE	<i>Salmonella</i> Enteritidis
SRM	Specified risk material
SRUC	Scotland's Rural College
STM	<i>Salmonella</i> Typhimurium
U	Undesignated. A recognised phage designation with a particular pattern of lysis which has not yet been included in the definitive typing scheme e.g. U302
UNTY	A culture which does not react with any of the phages in the typing scheme
Untypable	A culture which is not suitable for typing
Untypable strains	Some cultures may fail to express one or both sets of flagella antigens, and consequently cannot be named. In such cases the antigenic structure is reported or isolates are grouped as 'untypable strains'
Untyped	Full information unavailable at the time of data collation
VIDA	Veterinary Investigation Diagnosis Analysis
