Article 27

Anti-circumvention mechanism for agricultural products and processed agricultural products

1. The products listed in Annex II-C to this Agreement are subject to the anti-circumvention mechanism set out in this Article. The average annual volume of imports from Georgia into the Union for each category of those products is provided in Annex II-C to this Agreement.
2. When the volume of imports of one or more categories of products referred to in paragraph 1 reaches 70 % of the volume indicated in Annex II-C to this Agreement in any given year starting on 1 January, the Union shall notify Georgia about the volume of imports of the product(s) concerned. Following this notification and within 14 calendar days from the date on which the volume of imports of one or more categories of products referred to in paragraph 1 reaches 80 % of the volume indicated in Annex II-C to this Agreement, Georgia shall provide the Union with a sound justification that Georgia has the capacity to produce the products for export into the Union in excess of the volumes set out in that Annex. If those imports reach 100 % of the volume indicated in Annex II-C to this Agreement, and in the absence of a sound justification by Georgia, the Union may temporarily suspend the preferential treatment for the products concerned.

The suspension shall be applicable for a period of six months and shall take effect on the date of publication of the decision to suspend preferential treatment in the Official Journal of the European Union.

3. All temporary suspensions adopted pursuant to paragraph 2 shall be notified by the Union to Georgia without undue delay.

4. A temporary suspension shall be lifted before the expiry of six months from its entry into force by the Union if Georgia provides robust and satisfactory evidence within the Association Committee in Trade configuration, as set out in Article 408(4) of this Agreement, that the volume of the relevant category of products imported in excess of the volume referred to in Annex II-C to this Agreement results from a change in the level of production and export capacity of Georgia for the product(s) concerned.

5. Annex II-C to this Agreement may be amended and the volume modified by mutual consent of the Union and Georgia in the Association Committee in Trade configuration at the request of Georgia, in order to reflect changes in the level of production and export capacity of Georgia for the product(s) concerned.

Article 28

5. The application of a temporary suspension shall be subject to the following conditions:

- (a) the Party which has made a finding, on the basis of objective information, of a failure to provide administrative cooperation or assistance and/or of irregularities or fraud from the other Party, shall without undue delay notify the Association Committee in Trade configuration, as set out in Article 408(4) of this Agreement, of its finding together with the objective information and enter into consultations within that Committee, on the basis of all relevant information and objective findings, with a view to reaching a solution acceptable to both Parties;
- (b) where the Parties have entered into consultations within the Association Committee in Trade configuration and have failed to agree on an acceptable solution within three months following the notification, the Party concerned may temporarily suspend the relevant
- (c) temporary suspensions under this Article shall be limited to that necessary to protect the financial interests of the Party concerned. They shall not exceed a period of six months, which may be renewed, if at the date of expiry nothing has changed with respect to the condition that gave rise to the initial suspension. They shall be subject to periodic consultations within the Association Committee in Trade configuration, in particular with a view to their termination as soon as the conditions for their application no longer apply.

6. Each Party shall publish in accordance with its internal procedures, notices to importers concerning any: notification referred to in paragraph 5(a); decision referred to in paragraph 5(b); and extension or termination referred to in paragraph 5(c).

Article 35

Management of administrative errors

Article 36

Agreements with other countries

1. This Agreement shall not preclude the maintenance or establishment of customs unions, free trade areas or arrangements for frontier traffic except in so far as they conflict with trade arrangements provided for in this Agreement.

2. Consultations between the Parties shall take place within the Association Committee in Trade configuration, as set out in Article 408(4) of this Agreement, at the request of either Party, concerning agreements establishing customs unions, free trade areas or arrangements for frontier traffic and on other major issues related to their respective trade policy with third countries. 2. Notwithstanding Article 37 of this Agreement, at the request of the other Party, the Party initiating a safeguard investigation and intending to apply safeguard measures shall provide immediately ad hoc written notification of all the pertinent information leading to the initiation of a safeguard investigation and the imposition of safeguard measures, including, where relevant, information on the initiation of a safeguard investigation, on the provisional findings and on the final findings of the investigation, as well as offer the possibility for consultations to the other Party.

3. For the purposes of this Article, a Party shall be considered as having a substantial economic interest when it is among the five largest suppliers of the imported product during the most recent three-year period of time, measured in terms of either absolute volume or value.

Article 39

Application of measures

1. When imposing safeguard measures, the Parties shall endeavour to impose them in a way that affects their bilateral trade the least.

2. For the purposes of paragraph 1 of this Article, if a Party considers that the legal requirements for the imposition of definitive safeguard measures are met and intends to apply such measures, that Party shall notify the other Party and give the latter the possibility to hold bilateral consultations. Disclosures shall be made in writing and allow interested parties sufficient time to make their comments.
3. Provided it does not unnecessarily delay the conduct of the investigation, each interested Party shall be granted the possibility to be heard in order to express their views during anti-dumping and anti-subsidy investigations.

Article 42

Consideration of public interest

Anti-dumping or countervailing measures may not be applied by a Party where, on the basis of the information made available during the investigation, it can clearly be concluded that it is not in the public interest to apply such measures. Article 43

1. Without prejudice to the provisions of Articles 47 and 48 of this Agreement, and with respect to technical regulations relating to labelling or marking requirements, the Parties reaffirm the principles of Chapter 2.2 of the TBT Agreement that such requirements are not prepared, adopted or applied with a view to or with the effect of creating unnecessary obstacles to international trade. For this purpose, such labelling or marking requirements shall not be more trade-restrictive than necessary to fulfil a legitimate objective, taking account of the risks that non-fulfilment would create.

2. Regarding obligatory marking or labelling in particular, the Parties agree that:

- (a) they will endeavour to minimise their needs for marking or labelling, except as required for the adoption of the Union acquis in this area and for the protection of health, safety or the environment, or for other reasonable public policy purposes;

3. Subject to reservations listed in Annexes XIV-A and XIV-E to this Agreement, the Parties shall not adopt any new regulations or measures which introduce discrimination as regards the establishment of juridical persons of the Union or of Georgia on their territory or in respect of their operation, once established, by comparison with their own juridical persons.

Article 80

Review

1. With a view to progressively liberalising the establishment conditions, the Parties shall regularly review the provisions of this Section and the list of reservations referred to in Article 79 of this Agreement as well as the establishment environment, consistent with their commitments in international agreements.

2. In the context of the review referred to in paragraph 1, the Parties shall assess any obstacles to establishment that have been encountered. With a view to deepening the provisions of this Chapter, the Parties shall find, if need be, appropriate ways to address such obstacles, which could include further negotiations, including with respect to investment protection and to investor-to-state dispute settlement procedures.

Article 81

Other agreements

This Chapter shall not affect the rights of entrepreneurs of the Parties arising from any existing or future international agreement relating to investment, to which a Member State of the EU and Georgia are parties.

Article 82

Standard of treatment for branches and representative offices

1. The provisions of Article 79 of this Agreement do not preclude the application by a Party of particular rules concerning the establishment and operation in its territory of branches and representative offices of juridical persons of another Party not incorporated in the territory of the first Party, which are justified by legal or technical differences between such branches and representative offices as compared to branches and representative offices of juridical persons incorporated in its territory or, as regards financial services, for prudential reasons.

2. The difference in treatment shall not go beyond what is strictly necessary as a result of such legal or technical differences or, as regards financial services, for prudential reasons.

Section 3

Cross-border supply of services

Article 83

Scope

This Section applies to measures of the Parties affecting the cross border supply of all services sectors with the exception of:

- (a) audio-visual services;
- (b) national maritime cabotage ⁽¹¹⁾, and

2. A Party may meet the requirement of paragraph 1 by according to services and service suppliers of the other Party either formally identical treatment or formally different treatment to that it accords to its own like services and service suppliers.

3. Formally identical or formally different treatment shall be considered to be less favourable if it modifies the conditions of competition in favour of services or service suppliers of the Party compared to like services or service suppliers of the other Party.

4. Specific commitments entered into under this Article shall not be construed to require any Party to compensate for inherent competitive disadvantages which result from the foreign character of the relevant services or services suppliers.

Article 86

Lists of commitments

The sectors liberalised by each Party pursuant to this Section and, by means of reservations, the market access and national treatment limitations applicable to services and services suppliers of the other Party in those sectors are set out in lists of commitments included in Annexes XIV-B and XIV-F to this Agreement.

With a view to the progressive liberalisation of the cross-border supply of services between the Parties, the Association Committee in Trade configuration, as set out in Article 408(4) of this Agreement, shall regularly review the list of commitments referred to in Article 86 of this Agreement. This review shall take into account the process of gradual approximation, referred to in Articles 103, 113, 122 and 126 of

- (a) cross-border supply of services;
- (b) establishment in their territory of juridical and natural persons defined in Article 77(9) of this Agreement, and
- (c) temporary stay in their territory of categories of natural persons as defined in points (a) to (e) of Article 88(2) of this Agreement.

2. In the case of cross-border supply of services, those disciplines shall only apply to sectors for which the Party has undertaken specific commitments and to the extent that these specific commitments apply in accordance with Annexes XIV-B and XIV-F to this Agreement. In the case of establishment, those disciplines shall not apply to sectors to the extent that a reservation is listed in accordance with Annexes XIV-A and XIV-E to this Agreement. In the case of temporary stay of natural persons, these disciplines shall not apply to sectors to the extent that a reservation is listed in accordance with Annexes XIV-C, XIV-D, XIV-G and XIV-H to this Agreement.

3. Those disciplines do not apply to measures to the extent that they constitute limitations under the relevant Annexes to this Agreement.

4. For the purposes of this Section:

- (a) 'licencing requirements' means substantive requirements, other than qualification requirements, with which a natural or a juridical person is required to comply in order to obtain, amend or renew authorisation to carry out the activities as defined in points (a) to (c) of paragraph 1;
- (b) 'licencing procedures' means administrative or procedural rules that a natural or a juridical person, seeking authorisation to carry out the activities as defined in points (a) to (c) of paragraph 1, including the amendment or renewal of a licence, must adhere to in order to demonstrate compliance with licencing requirements;
- (c) 'qualification requirements' means substantive requirements relating to the competence of a natural person to supply a service, and which are required to be demonstrated for the purpose of obtaining authorisation to supply a service;

Article 94

Conditions for licencing and qualification

1. Each Party shall ensure that measures relating to licencing requirements and procedures, qualification requirements and procedures are based on criteria which preclude the competent authorities from exercising their power of assessment in an arbitrary manner.

2. The criteria referred to in paragraph 1 shall be:

- (a) proportionate to a public policy objective;
- (b) clear and unambiguous;
- (c) objective;
- (d) pre-established;
- (e) made public in advance;
- (f) transparent and accessible.

3. An authorisation or a licence shall be granted as soon as it is established, in the light of an appropriate examination, that the conditions for obtaining an authorisation or licence have been met.
4. Each Party shall maintain or institute judicial, arbitral or administrative tribunals or procedures which provide, at the request of an affected entrepreneur or service supplier, for a prompt review of, and where justified, appropriate remedies for, administrative decisions affecting establishment, cross-border supply of services or temporary presence of natural persons for business purposes. Where such procedures are not independent of the agency entrusted with the administrative decision concerned, each Party shall ensure that the procedures in fact provide for an objective and impartial review.
5. Where the number of licences available for a given activity is limited because of the scarcity of available natural resources or technical capacity, each Party shall apply a selection procedure to potential candidates which provides full guarantees of impartiality and transparency, including, in particular, adequate publicity about the launch, conduct and completion of the procedure.
6. Subject to the provisions specified by this Article, in establishing the rules for the selection procedure, each Party may take into account public policy objectives, including considerations of health, safety, the protection of the environment and the preservation of cultural heritage.

Article 95

Licencing and qualification procedures

1. Licencing and qualification procedures and formalities shall be clear, made public in advance and be such as to provide the applicants with a guarantee that their application will be dealt with objectively and impartially.
2. Licencing and qualification procedures and formalities shall be as simple as possible and shall not unduly complicate or delay the provision of the service. Any licencing fees ⁽¹⁹⁾ which the applicants may incur from their application should be reasonable and proportionate to the cost of the authorisation procedures in question.
3. Each Party shall ensure that the procedures used by, and the decisions of, the competent authority in the licencing or authorisation process are impartial with respect to all applicants. The competent authority should reach its decision in an independent manner and not be accountable to any supplier of the services for which the licence or authorisation is required.
4. Where specific time periods for applications exist, an applicant shall be allowed a reasonable period for the submission of an application. The competent authority shall initiate the processing of an application without undue delay. Where possible, applications should be accepted in electronic format under the same conditions of authenticity as paper submissions.

5. Each Party shall ensure that the processing of an application, including reaching a final decision, is completed within a reasonable timeframe from the submission of a complete application. Each Party shall endeavour to establish the normal timeframe for processing of an application.
6. The competent authority shall, within a reasonable period of time after receipt of an application which it considers incomplete, inform the applicant, to the extent feasible identify the additional information required to complete the application, and provide the opportunity to correct deficiencies.
7. Authenticated copies should be accepted, where possible, in place of original documents.
8. If an application is rejected by the competent authority, the applicant shall be informed in writing and without undue delay. In principle, the applicant shall, upon request, also be informed of the reasons for rejection of the application and of the timeframe for an appeal against the decision.
9. Each Party shall ensure that a licence or an authorisation, once granted, enters into effect without undue delay in accordance with the terms and conditions specified therein.

Sub-section 2

Provisions of general application

Article 96

Mutual recognition

1. Nothing in this Chapter shall prevent a Party from requiring that natural persons must possess the necessary qualifications and/or professional experience specified in the territory where the service is supplied, for the sector of activity concerned.
2. Each Party shall encourage the relevant professional bodies in their respective territories to provide recommendations on mutual recognition to the Association Committee in Trade configuration, as set out in Article 408(4) of this Agreement, for the purpose of the fulfilment, in whole or in part, by entrepreneurs and service suppliers of the criteria applied by each Party for the authorisation, licensing, operation and certification of entrepreneurs and service suppliers and, in particular, professional services.
3. On receipt of a recommendation referred to in paragraph 2, the Association Committee in Trade configuration shall, within a reasonable time, review that recommendation with a view to determine whether it is consistent with this Agreement, and on the basis of the information contained therein, assess in particular:
 - (a) the extent to which the standards and criteria applied by each Party for the authorisation,

licenses, operation and certification of services providers and entrepreneurs are converging, and

(b) the potential economic value of a mutual recognition agreement.

4. Where these requirements are satisfied, the Association Committee in Trade configuration shall establish the necessary steps to negotiate and thereafter the Parties shall engage into negotiations, through their competent authorities, of a mutual recognition agreement.

5. Any such agreement shall be in conformity with the relevant provisions of the WTO Agreement and, in particular, Article VII of GATS.

Article 97

Transparency and disclosure of confidential information

1. Each Party shall respond promptly to all requests by the other Party for specific information on any of its measures of general application or international agreements which pertain to or affect this Agreement. Each Party shall also establish one or more enquiry points to provide specific information to entrepreneurs and services suppliers of the other Party, upon request, on all such matters. The Parties shall notify each other enquiry points within three months after the date of entry into force of this Agreement. Enquiry points need not be depositories of laws and regulations.

2. Nothing in this Agreement shall require any Party to provide confidential information, the disclosure of which would impede law enforcement, or otherwise be contrary to the public interest, or which would prejudice legitimate commercial interests of particular enterprises, public or private.

Sub-section 3

Computer services

Article 98

Understanding on computer services

1. To the extent that trade in computer services is liberalised in accordance with Section 2 (Establishment), Section 3 (Cross-border supply of services) and Section 4 (Temporary presence of natural persons for business purposes) of this Chapter, the Parties shall comply with paragraphs 2, 3 and 4 of this Article.

2. CPC ⁽²⁰⁾ 84, the UN code used for describing computer and related services, covers the basic functions used to provide all computer and related services:

(a) computer programmes defined as the sets of instructions required to make computers work and communicate (including their development and implementation);

- (b) data processing and storage, and
- (c) related services, such as consultancy and training services for staff of clients.

Technological developments have led to the increased offering of those services as a bundle or package of related services that can include some or all of those basic functions. For example, services such as web- or domain-hosting, data mining services and grid computing each consist of a combination of basic computer services functions.

3. Computer and related services, regardless of whether they are delivered via a network, including the internet, include all services that provide:

- (a) consulting, strategy, analysis, planning, specification, design, development, installation, implementation, integration, testing, debugging, updating, support, technical assistance, or management of or for computers or computer systems;
- (b) computer programmes defined as sets of instructions required to make computers work and communicate (in and of themselves), plus consulting, strategy, analysis, planning, specification, design, development, installation, implementation, integration, testing,
- (c) data processing, data storage, data hosting or database services; or maintenance and repair services for office machinery and equipment, including computers; or training services for staff of clients, related to computer programmes, computers or computer systems, and not elsewhere classified.

4. Computer and related services enable the provision of other services (e.g. banking) by both electronic and other means. However, there is an important distinction between the enabling service (e.g. web-hosting or application-hosting) and the content or core service that is being delivered electronically (e.g. banking). In such cases, the content or core service is not covered by CPC 84.

Sub-section 4

Postal and courier services

Article 99

Scope and definitions

1. This Sub-Section sets out the principles of the regulatory framework for all postal and courier service liberalised in accordance with Section 2 (Establishment), Section 3 (Cross-border supply of services) and Section 4 (Temporary presence of natural persons for business purposes) of this Chapter.

2. For the purpose of this Sub-Section and of Section 2 (Establishment), Section 3 (Cross-border supply of services) and Section 4 (Temporary presence of natural persons for business purposes) of this Chapter:

- (a) 'licence' means an authorisation, granted to an individual supplier by a regulatory authority, which is required before supplying a given service;
- (b) 'universal service' means the permanent provision of a postal service of specified quality at all points in the territory of a Party at affordable prices for all users.

Article 100

Universal service

Each Party has the right to define the kind of universal service obligation it wishes to maintain. Such obligations will not be regarded as anti-competitive per se, provided they are administered in a transparent, non-discriminatory and competitively neutral manner and are not more burdensome than necessary for the kind of universal service defined by the Party.

Article 101

Licences

1. A licence may only be required for services which are within the scope of the universal service.
2. Where a licence is required, the following shall be made publicly available:
 - (a) all the licensing criteria and the period of time normally required to reach a decision concerning an application for a licence; and
 - (b) the terms and conditions of licences.
3. The reasons for the denial of a licence shall be made known to the applicant upon request and an appeal procedure through an independent body will be established by each Party. Such a procedure will be transparent, non-discriminatory and based on objective criteria.

Article 102

Independence of the regulatory body

The regulatory body shall be legally separate from, and not accountable to any supplier of postal and courier services. The decisions of and the procedures used by the regulatory body shall be impartial with respect to all market participants.

Article 103

Gradual approximation

With a view to considering further liberalisation of trade in services, the Parties recognise the importance of the gradual approximation of the existing and future legislation of Georgia to the list of the Union acquis included in Annex XV-C to this Agreement.

Sub-section 5

Electronic communication networks and services

Article 104

Scope and definitions

1. This Sub-Section sets out the principles of the regulatory framework for all electronic communication services liberalised pursuant to Section 2 (Establishment), Section 3 (Cross-border supply of services) and Section 4 (Temporary presence of natural persons for business purposes) of this Chapter.

- (g) 'universal service' means the set of services of specified quality that is made available to all users in the territory of a Party regardless of their geographical location and at an affordable price; its scope and implementation are decided by each Party;
- (h) 'access' means the making available of facilities and/or services, to another services supplier, under defined conditions, on either an exclusive or non-exclusive basis, for the purpose of providing electronic communication services. It covers, inter alia, access to network elements and associated facilities, which may involve the connection of equipment, by fixed or non-fixed means (in particular this includes access to the local loop and to facilities and services necessary to provide services over the local loop), access to physical infrastructure, including buildings, ducts, and masts; access to relevant software systems, including operational support systems; access to numbering translation or systems offering equivalent functionality; access to fixed and mobile networks, in particular for roaming; access to conditional access systems for digital televisions services; access to virtual network services;

1. Each Party shall ensure that regulatory authorities for electronic communication services shall be legally distinct and functionally independent from any supplier of electronic communication services. If a Party retains ownership or control of a supplier providing electronic communication networks or services, such Party shall ensure the effective structural separation of the regulatory function from activities associated with ownership or control.
2. Each Party shall ensure that the regulatory authority shall be sufficiently empowered to regulate the sector. The tasks to be undertaken by a regulatory authority shall be made public in an easily accessible and clear form, in particular where those tasks are assigned to more than one body.

3. Each Party shall ensure that the decisions of and the procedures used by the regulatory authorities are impartial with respect to all market participants and transparent.

4. The regulatory authority shall have the power to carry out an analysis of relevant product and service markets liable to an ex ante regulation. Where the regulatory authority is required to determine under Article 107 of this Agreement whether to impose, maintain, amend or withdraw obligations it shall determine on the basis of a market analysis whether the relevant market is effectively competitive.

5. Where the regulatory authority determines that a relevant market is not effectively competitive, it shall identify and designate services suppliers with significant market power on that market and shall impose, maintain or amend specific regulatory obligations referred to in Article 107 of this Agreement as it is appropriate. Where the regulatory authority concludes that the market is effectively competitive it shall not impose or maintain any of the regulatory obligations referred to in Article 107 of this Agreement.

6. Each Party shall ensure that a services supplier affected by the decision of a regulatory authority shall have a right to appeal against that decision to an appeal body that is independent of the parties involved in the decision. Each Party shall ensure that the merits of the case are duly taken into account. Pending the outcome of any such appeal, the decision of the regulator shall stand, unless the appeal body decides otherwise. Where the appeal body is not judicial in character, written reasons for its decision shall always be given and its decisions shall also be subject to review by an impartial and independent judicial authority. Decisions taken by appeal bodies shall be effectively enforced.

7. Each Party shall ensure that where the regulatory authorities intend to take measures related to any of the provisions of this Sub-Section and which have a significant impact to the relevant market, they give the interested parties the opportunity to comment on the draft measure within a reasonable period of time. Regulators shall publish their consultation procedures. The results of the consultation procedure shall be made publicly available except in the case of confidential information.

8. Each Party shall ensure that suppliers providing electronic communication networks and services provide all the information, including financial information, necessary for regulatory authorities to ensure conformity with the provisions of this Sub-Section or decisions made in accordance with this Sub-Section. These suppliers shall provide such information promptly on request and to the time-table and level of detail required by the regulatory authority. The information requested by the regulatory authority shall be proportionate to the performance of that task. The regulatory authority shall give the reasons justifying its request for information.

Article 106

Authorisation to provide electronic communication services

1. Each Party shall ensure that the provision of services shall, as much as possible, be authorised following mere notification.
2. Each Party shall ensure that a licence can be required to address issues of attributions of numbers and frequencies. The terms and conditions for such licences shall be made publicly available.
3. Each Party shall ensure that where a licence is required:
 - (a) all the licensing criteria and a reasonable period of time normally required to reach a decision concerning an application for a licence shall be made publicly available;
 - (b) the reasons for the denial of a licence shall be made known in writing to the applicant upon request;
 - (c) the applicant of a licence shall be able to seek recourse before an appeal body in case that a licence is unduly denied;
 - (d) licence fees ⁽²¹⁾ required by any Party for granting a licence shall not exceed the applicable licences. Licence fees for the use of radio spectrum and numbering resources are not subject to the requirements of this paragraph.

Article 107

Access and interconnection

1. Each Party shall ensure that any services suppliers authorised to provide electronic communication services have the right and obligation to negotiate access and interconnection with suppliers of publicly available electronic communication networks and services. Access and interconnection should in principle be agreed on the basis of commercial negotiation between the services suppliers concerned.
2. Each Party shall ensure that services suppliers that acquire information from another services supplier during the process of negotiating interconnection arrangements use that information solely for the purpose for which it was supplied and respect at all times the confidentiality of information transmitted or stored.
3. Each Party shall ensure that upon the finding in accordance with Article 105 of this Agreement that a relevant market is not effectively competitive, the regulatory authority shall have the power to impose on the supplier designated as having significant market power one or more of the following obligations in relation to interconnection and/or access:
 - (a) obligation on non-discrimination to ensure that the operator applies equivalent conditions in equivalent circumstances to other suppliers providing equivalent services, and provides

provides for its own services, or those of its subsidiaries or partners;

- (b) obligation of a vertically integrated company to make transparent its wholesale prices and its internal transfer prices, where there is a requirement for non-discrimination or for prevention of unfair cross-subsidy. The regulatory authority may specify the format and accounting methodology to be used;
- (c) obligations to meet reasonable requests for access to, and use of, specific network elements and associated facilities, including unbundled access to the local loop, inter alia, in situations where the regulatory authority considers that denial of access or unreasonable terms and conditions having a similar effect would hinder the emergence of a sustainable competitive market at the retail level, or would not be in the end user's interest.

Regulatory authorities may attach conditions covering fairness, reasonableness and timeliness to the obligations included under this point;

- (d) to provide specified services on a wholesale basis for resale by third parties; to grant open access to technical interfaces, protocols or other key technologies that are indispensable for the interoperability of services or virtual network services; to provide co-location or other forms of facility sharing, including duct, building or mast sharing; to provide specified services needed to ensure interoperability of end-to-end services to users, including facilities for intelligent network services; to provide access to operational support systems or similar software systems necessary to ensure fair competition in the provision of services; to interconnect networks or network facilities.

Regulatory authorities may attach conditions covering fairness, reasonableness and

- (e) obligations relating to cost recovery and price controls, including obligations for cost orientation of prices and obligations concerning cost accounting systems, for the provision of specific types of interconnection and/or access, in situations where a market analysis indicates that a lack of effective competition means that the operator concerned might sustain prices at an excessively high level, or apply a price squeeze, to the detriment of end-users.

Regulatory authorities shall take into account the investment made by the operator and allow the operator a reasonable rate of return on adequate capital employed, taking into account the risks involved;

- (f) to publish the specific obligations imposed on services suppliers by the regulatory authority identifying the specific product/service and geographical markets. Up-to-date information, provided that it is not confidential and it does not comprise business secrets is made publicly
- (g) obligations for transparency requiring operators to make public specified information and, in particular, where an operator has obligations of non-discrimination, the regulator may require that operator to publish a reference offer, which shall be sufficiently unbundled to ensure that services suppliers are not required to pay for facilities which are not necessary for

the service requested, giving a description of the relevant offerings broken down into components according to market needs, and the associated terms and conditions including prices.

4. Each Party shall ensure that a service supplier requesting interconnection with a supplier designated as having significant market power shall have recourse, either at any time or after a reasonable period of time which has been made publicly known, to an independent domestic body, which may be a regulatory body as referred to in Article 104(2)(d) of this Agreement, to resolve disputes regarding terms and conditions for interconnection and/or access.

Article 108

Scarce resources

1. Each Party shall ensure that any procedures for the allocation and use of scarce resources, including frequencies, numbers and rights of way, shall be carried out in an objective, proportionate, timely, transparent and non-discriminatory manner. The current state of allocated frequency bands shall be made publicly available, but detailed identification of frequencies allocated for specific government uses is not required.

2. Each Party shall ensure the effective management of radio frequencies for electronic communication services in their territory with a view to ensure effective and efficient use of the spectrum. Where demand for specific frequencies exceeds their availability, appropriate and transparent procedures shall be followed for the assignment of these frequencies in order to optimise their use and facilitate the development of competition.

3. Each Party shall ensure that the assignment of national numbering resources and the management of the national numbering plans are entrusted to the regulatory authority.

4. Where public or local authorities retain ownership or control of suppliers operating public communications networks and/or services, effective structural separation needs to be ensured between the function responsible for granting the rights of way from activities associated with ownership or control.

Article 109

Universal service

1. Each Party has the right to define the kind of universal service obligations it wishes to maintain.

2. Such obligations will not be regarded as anti-competitive per se, provided they are administered in a transparent, objective and non-discriminatory way. The administration of such obligations shall also be neutral with respect to competition

and be not more burdensome than necessary for the kind of universal service defined by the Party.

3. Each Party shall ensure that all suppliers should be eligible to ensure universal service and no services supplier shall be a priori excluded. The designation shall be made through an efficient, transparent, objective and non-discriminatory mechanism. Where necessary, each Party shall assess whether the provision of universal service represents an unfair burden on organisation(s) designated to provide universal service. Where justified on the basis of such calculation, and taking into account the market benefit, if any, which accrues to an organisation that offers the universal service, regulatory authorities shall determine whether a mechanism is required to compensate the services supplier(s) concerned or to share the net cost of universal service obligations.

4. Each Party shall ensure that, where directories of all subscribers are available to users, whether printed or electronic, the organisations that provide those directories apply the principle of non-discrimination to the treatment of information that has been provided to them by other organisations.

Article 110

Cross-border provision of electronic communication services

Neither Party may require a service supplier of the other Party to set up an establishment, to establish any form of presence, or to be resident, in its territory as a condition for the cross-border supply of a service.

Article 111

Confidentiality of information

Each Party shall ensure the confidentiality of electronic communications and related traffic data by means of a public communication network and publicly available electronic communication services without restricting trade in services.

Article 112

Disputes between services suppliers

1. Each Party shall ensure that in the event of a dispute arising between suppliers of electronic communication networks or services in connection with rights and obligations referred to in this Section, the regulatory authority concerned shall, at the request of either Party, issue a binding decision to resolve the dispute in the shortest possible timeframe and in any case within four months.

2. The decision of the regulatory authority shall be made available to the public, having regard to the requirements of business confidentiality. The suppliers of electronic communication networks and services concerned shall be given a full statement of the reasons on which it is based.

3. When such a dispute concerns the cross-border provision of services, the regulatory authorities concerned shall co-ordinate their efforts in order to bring about a resolution of the dispute.

Article 113

Gradual approximation

With a view to considering further liberalisation of trade in services, the Parties recognise the importance of the gradual approximation of the existing and future legislation of Georgia to the list of the Union *acquis* included in the Annex XV-B to this Agreement.

Article 137

Current payments

The Parties undertake to impose no restrictions and shall allow, in freely convertible currency, in accordance with the provisions of Article VIII of the Agreement of the International Monetary Fund, any payments and transfers on the current account of balance of payments between the Parties.

Article 138

Capital movements

1. With regard to transactions on the capital and financial account of balance of payments, from the entry into force of this Agreement, the Parties shall ensure the free movement of capital relating to direct investments, including the acquisition of real estate, made in accordance with the laws of the host country, investments made in accordance with the provisions of Chapter 6 (Establishment, Trade in Services and Electronic Commerce) of Title IV (Trade and Trade-related Matters) of this Agreement and the liquidation or repatriation of invested capital and of any profit stemming therefrom.

2. With regard to transactions on the capital and financial account of balance of payments other than the transactions listed in paragraph 1 of this Article, from the entry into force of this Agreement, each Party shall ensure without prejudice to other provisions of this Agreement:

- (a) the free movement of capital relating to credits for commercial transactions or for the provision of services in which a resident of one of the Parties is participating;
- (b) the free movement of capital relating to portfolio investments, financial loans and credits by the investors of the other Party.

Article 139

Safeguard measures

Where, in exceptional circumstances, payments or movements of capital cause, or threaten to cause, serious difficulties for the operation of exchange rate policy or monetary policy, including serious balance of payments difficulties, in one or more Member States or in Georgia, the Parties concerned may take safeguard measures for a period not exceeding six months if such measures are strictly necessary. The Party adopting the safeguard measure shall inform the other Party forthwith of the adoption of any safeguard measure and, as soon as possible, of a time schedule for its removal.

Article 140

Facilitation and evolution provisions

CHAPTER 8

Public procurement

Article 141

Objectives

1. The Parties recognise the contribution of transparent, non-discriminatory, competitive and open tendering to sustainable economic development and set as their objective the effective, reciprocal and gradual opening of their respective procurement markets.
2. This Chapter envisages mutual access to public procurement markets on the basis of the principle of national treatment at national, regional and local level for public contracts and concessions in the traditional sector as well as in the utilities sector. It provides for a gradual approximation of the public procurement legislation in Georgia with the Union public procurement acquis based on the principles governing public procurement in the Union and the terms and definitions set out in Directive 2004/18/EC of the European Parliament and of the Council of 31 March 2004 on the coordination of procedures for the award of public works contracts, public supply contracts and public service contracts (Directive 2004/18/EC) and Directive 2004/17/EC of the European Parliament and of the Council of 31 March 2004 coordinating the procurement procedures of entities operating in the water, energy, transport and postal services sectors (Directive 2004/17/EC).

Article 142

Scope

1. This Chapter applies to works, supplies and services public contracts, as well as works, supplies and services contracts in the utilities sectors and, if and where such contracts are used, to works and services concessions.
2. This Chapter applies to any contracting authority and any contracting entity which meets the definitions of the Union public procurement acquis (hereinafter referred to as ‘the contracting entities’). It covers also bodies governed by public law and public undertakings in the field of utilities such as state-owned enterprises carrying out the relevant activities and private undertakings operating on the basis of special and exclusive rights in the field of utilities ⁽²⁵⁾.
3. This Chapter applies to contracts above the value thresholds set out in Annex XVI-A to this Agreement.
4. The calculation of the estimated value of a public contract shall be based on the total amount payable, net of taxes on value added. When applying these thresholds, Georgia shall calculate and convert contract values into its national currency, using the conversion rate of its national bank.
5. Value thresholds shall be revised regularly every two years, beginning in the year of entry into force of this Agreement, based on the average daily value of the euro, expressed in Special Drawing Rights, over the 24 months terminating on the last day of August preceding the revision with effect from January 1. The value of the thresholds thus revised shall, where necessary, be rounded down to nearest thousand euro. The revision of the thresholds shall be adopted by the decision of the Association Committee in Trade configuration, as set out in Article 408(4) of this Agreement.

Article 143

Institutional background

1. Each Party shall establish or maintain an appropriate institutional framework and mechanisms necessary for the proper functioning of the public procurement system and the implementation of the principles in this Chapter.
2. Georgia shall designate in particular:
 - (a) an executive body at central government level tasked with guaranteeing a coherent policy and its implementation in all areas related to public procurement. That body shall facilitate and coordinate the implementation of this Chapter and guide the process of gradual approximation to the Union acquis, as set out in Annex XVI-B to this Agreement;
 - (b) an impartial and independent body tasked with the review of decisions taken by contracting authorities or entities during the award of contracts. In this context, ‘independent’ means that that body shall be a public authority which is separate from all contracting entities and economic operators. There shall be a possibility to subject the decisions taken by this body to judicial review.

3. Each Party shall ensure that decisions taken by the authorities responsible for the review of complaints by economic operators concerning infringements of domestic law shall be effectively enforced.

Article 144

1. No later than three years from the entry into force of this Agreement, the Parties shall comply with a set of basic standards for the award of all contracts as stipulated in paragraphs 2 to 15 of this Article. These basic standards derive directly from the rules and principles of public procurement, as regulated in the Union public procurement acquis, including the principles of non-discrimination, equal treatment, transparency and proportionality.

2. Each Party shall ensure that all intended procurements are published in an appropriate media ⁽²⁶⁾ in a manner that is sufficient:

(a) to enable the market to be opened up to competition; and

(b) to allow any interested economic operator to have appropriate access to information regarding the intended procurement prior to the award of the contract and to express its interest in obtaining the contract.

3. The publication shall be appropriate to the economic interest of the contract to economic operators.

4. The publication shall contain at least the essential details of the contract to be awarded, the criteria for qualitative selection, the award method, the contract award criteria and any other additional information that the economic operators reasonably need to decide whether to express their interest in obtaining the contract.

5. All contracts shall be awarded through transparent and impartial award procedures that prevent corruptive practices. This impartiality shall be ensured in particular through the non-discriminatory description of the subject matter of the contract, equal access for all economic operators, appropriate time-limits and a transparent and objective approach.

6. When describing the characteristics of the required work, supply or service, the contracting entities shall use general descriptions of performance and functions and international, European or national standards.

7. The description of the characteristics required of a work, supply or service shall not refer to a specific make or source, or a particular process, or to trademarks, patents, types or a specific origin or production unless such a reference is justified by the subject matter of the contract and accompanied by the words 'or equivalent'. Preference shall be given to the use of general descriptions of performance or functions.

8. Contracting entities shall not impose conditions resulting in direct or indirect discrimination against the economic operators of the other Party, such as the requirement that economic operators interested in the contract must be established in the same country, region or territory as the contracting entity.

Notwithstanding the above, in cases where it is justified by the specific circumstances of the contract, the successful applicant may be required to establish certain business infrastructure at the place of performance.

9. The time-limits for expression of interest and for submission of offers shall be sufficiently long to allow economic operators from the other Party to make a meaningful assessment of the tender and prepare their offer.

10. All participants must be able to know the applicable rules, selection criteria and award criteria in advance. Those rules must apply equally to all participants.

11. Contracting entities may invite a limited number of applicants to submit an offer, provided that:

(a) this is done in a transparent and non-discriminatory manner; and

(b) the selection is based only on objective factors such as the experience of the applicants in the sector concerned, the size and infrastructure of their businesses or their technical and professional abilities.

In inviting a limited number of applicants to submit an offer, account shall be taken of the need to ensure adequate competition.

12. Contracting entities may use negotiated procedures only in exceptional and defined cases when the use of such a procedure effectively does not distort competition.

13. Contracting entities may use qualification systems only under the condition that the list of qualified operators is compiled by means of a sufficiently advertised, transparent and open procedure. Contracts falling within the scope of such a system shall be awarded also on a non-discriminatory basis.

14. Each Party shall ensure that contracts are awarded in a transparent manner to the applicant who has submitted the economically most advantageous offer or the offer with the lowest price, based on the tender criteria and the procedural rules established and communicated in advance. The final decisions shall be communicated to all applicants without undue delay. Upon request of an unsuccessful applicant, reasons must be provided in sufficient detail to allow the review of such a decision.

15. Each Party shall ensure that any person having or having had an interest in obtaining a particular contract and who has been, or risks, being harmed by an alleged infringement is entitled to effective, impartial judicial protection against any decision of the contracting entity related to the award of that contract. The decisions taken in the course and at the end of such review procedure shall be

made public in a manner that is sufficient to inform all interested economic operators.

Article 145

Planning of gradual approximation

1. Prior to the commencement of gradual approximation, Georgia shall submit to the Association Committee in Trade configuration, as set out in Article 408(4) of this Agreement, a comprehensive roadmap for the implementation of this Chapter with time schedules and milestones which shall include all reforms in terms of approximation to the Union acquis and institutional capacity building. This roadmap shall comply with the phases and time schedules set out in Annex XVI-B to this Agreement.
2. Following a favourable opinion by the Association Committee in Trade configuration, the roadmap shall be considered as the reference document for the implementation of this Chapter. The Union shall make its best efforts in assisting Georgia in the implementation of the roadmap.

Article 146

Gradual approximation

1. Georgia shall ensure that its legislation on public procurement will be gradually approximated to the Union's public procurement acquis.
2. Approximation to the Union acquis shall be carried out in consecutive phases as set out in the schedule in Annex XVI-B to this Agreement and further specified in Annexes XVI-C to XVI-F, XVI-H, XVI-I, and XVI-K thereto. Annexes XVI-G and XVI-J to this Agreement identify non-mandatory elements that need not be approximated, whereas Annexes XVI-L to XVI-O to this Agreement identify elements of the Union acquis that remain outside the scope of approximation. In this process, due account shall be taken of the corresponding case law of the Court of Justice of the European Union and the implementing measures adopted by the European Commission as well as, should it become necessary, of any modifications of the Union acquis occurring in the meantime. The implementation of each phase shall be evaluated by the Association Committee in Trade configuration, as set out in Article 408(4) of this Agreement, and, following a positive assessment by that Committee, be linked to the reciprocal granting of market access as set out in Annex XVI-B to this Agreement. The European Commission shall notify Georgia without undue delay of any modifications of the Union acquis. It shall, upon request, provide appropriate advice and technical assistance for the purpose of implementing such modifications.
3. The Association Committee in Trade configuration shall only proceed to the evaluation of a next phase once the measures to implement the previous phase have

been carried out and approved in accordance with the modalities set out in paragraph 2.

4. Each Party shall ensure that those aspects and areas of public procurement which are not covered by this Article comply with the principles of transparency, non-discrimination and equal treatment as set out under Article 144 of this Agreement.

Article 147

Market access

1. The Parties agree that the effective and reciprocal opening of their respective markets shall be attained gradually and simultaneously. During the process of approximation, the extent of the market access mutually granted shall be linked to the progress made in this process as stipulated in Annex XVI-B to this Agreement.

2. The decision to proceed to a further phase of market opening shall be made on the basis of an assessment of the compliance of the legislation adopted with the Union *acquis* as well as its practical implementation. Such assessment shall be carried out regularly by the Association Committee in Trade configuration, as set out in Article 408(4) of this Agreement.

3. In so far as a Party has, in accordance with Annex XVI-B to this Agreement, opened its procurement market to the other Party:

(a) the Union shall grant access to contract award procedures to Georgian companies, whether established or not in the Union, pursuant to the Union public procurement rules under treatment no less favourable than that accorded to Union companies;

(b) Georgia shall grant access to contract award procedures for Union companies, whether established or not in Georgia, pursuant to national procurement rules under treatment no less favourable than that accorded to Georgian companies.

4. After the implementation of the last phase in the process of approximation, the Parties will examine the possibility to mutually grant market access with regard to procurement below the value thresholds set out in Annex XVI-A to this Agreement.

5. Finland reserves its position with regard to the Åland Islands.

Article 148

Information

1. Each Party shall ensure that contracting entities and economic operators are appropriately informed about public procurement procedures, including through the publication of all relevant legislation and administrative rulings.

2. Each Party shall ensure the effective dissemination of information on tendering opportunities.

Article 149

Cooperation

1. The Parties shall enhance their cooperation through exchanges of experience and information relating to their best practices and regulatory frameworks.

2. The Union shall facilitate the implementation of this Chapter, including through technical assistance where appropriate. In line with the provisions on financial cooperation in Title VII (Financial Assistance, and Anti-fraud and Control Provisions) of this Agreement, specific decisions on financial assistance shall be taken through the relevant Union funding mechanisms and instruments.

3. An indicative list of issues for cooperation is included in Annex XVI-P to this Agreement.

 - (ii) in so far as such use exploits the reputation of a geographical indication;
- (b) any misuse, imitation or evocation ⁽²⁸⁾, even if the true origin of the product is indicated or if the protected name is translated or accompanied by an expression such as ‘style’, ‘type’, ‘method’, ‘as produced in’, ‘imitation’, ‘flavour’, ‘like’ or similar;
- (c) any other false or misleading indication as to the provenance, origin, nature or essential qualities of the product, on the inner or outer packaging, advertising material or documents relating to the product concerned, and the packing of the product in a container liable to convey a false impression as to its origin;
- (d) any other practice liable to mislead the consumer as to the true origin of the product.

2. If geographical indications are wholly or partially homonymous, protection shall be granted to each indication provided that it has been used in good faith and with due regard for local and traditional usage and the actual risk of confusion. Without prejudice to Article 23 of the TRIPS Agreement, the Parties shall mutually decide the practical conditions of use under which the homonymous geographical indications will be differentiated from each other, taking into account the need to ensure equitable treatment of the producers concerned and that consumers are not misled. A homonymous name which misleads the consumer into believing that products come from another territory shall not be registered even if the name is accurate as far as the actual territory, region or place of origin of the product in question is concerned.

3. Where a Party, in the context of negotiations with a third country, proposes to protect a geographical indication of that third country, and the name is homonymous with a geographical indication of the other Party, the latter shall be informed and be given the opportunity to comment before the name becomes protected.

4. Nothing in this Sub-Section shall oblige a Party to protect a geographical indication of the other Party which is not or ceases to be protected in its country of origin. The Parties shall notify each other if a geographical indication ceases to be protected in its country of origin.

Article 173

Protection of transcription of geographical indications

1. Geographical indications protected under this Sub-Section in the characters of the Georgian alphabet and other non-Latin alphabets officially used in the Member

States shall be protected together with their transcription in Latin characters. This transcription may also be used for labelling purposes for the products concerned.

2. Similarly, geographical indications protected under this Sub-Section in a Latin alphabet shall be protected together with their transcription in the characters of the Georgian alphabet and in the characters of other non-Latin alphabets officially used in the Member States. This transcription may also be used for labelling purposes for the products concerned.

Article 174

Right of use of geographical indications

1. A name protected under this Sub-Section may be used by any operator marketing agricultural products, foodstuffs, wines, aromatised wines or spirit drinks conforming to the corresponding specification.

2. Once a geographical indication is protected under this Sub-Section, the use of such protected name shall not be subject to any registration of users or further charges.

Article 175

Enforcement of protection

The Parties shall enforce the protection provided for in Articles 170 to 174 of this Agreement by appropriate administrative action by their public authorities. They shall also enforce such protection at the request of an interested party.

Article 176

Relationship with trademarks

1. The Parties shall refuse to register or shall invalidate, ex officio or at the request of any interested party in conformity with the legislation of each Party, a trademark that corresponds to any of the situations referred to in Article 172(1) of this Agreement in relation to a protected geographical indication for like products, provided an application to register the trademark is submitted after the date of application for protection of the geographical indication in the territory concerned.

2. For geographical indications referred to in Article 170 of this Agreement, the date of application for protection shall be 1 April 2012.

3. For geographical indications referred to in Article 171 of this Agreement, the date of application for protection shall be the date of the transmission of a request to the other Party to protect a geographical indication.

4. The Parties shall have no obligation to protect a geographical indication where, in the light of a reputed or well-known trademark, protection is liable to mislead consumers as to the true identity of the product.

5. Without prejudice to paragraph 4, the Parties shall protect geographical indications also where a prior trademark exists. A prior trademark shall mean a trademark the use of which corresponds to one of the situations referred to in Article 172(1) of this Agreement, which has been applied for, registered or established by use, if that possibility is provided for by the legislation concerned, in the territory of one of the Parties before the date on which the application for protection of the geographical indication is submitted by the other Party under this Sub-Section. Such trademark may continue to be used and renewed notwithstanding the protection of the geographical indication, provided that no grounds for the trademark's invalidity or revocation exist in the legislation on trademarks of the Parties.

Article 177

General rules

1. This Sub-Section shall apply without prejudice to the rights and obligations of the Parties under the WTO Agreement.
2. The import, export and marketing of any product referred to in Articles 170 and 171 of this Agreement shall be conducted in compliance with the laws and regulations applying in the territory of the importing Party.
3. Any matter arising from technical specifications of registered names shall be dealt with in the Sub-Committee established in Article 179 of this Agreement.
4. Geographical indications protected under this Sub-Section may only be cancelled by the Party in which the product originates.
5. A product specification referred to in this Sub-Section shall be that approved, including any amendments also approved, by the authorities of the Party in the territory of which the product originates.

Article 178

Cooperation and transparency

1. The Parties shall, either directly or through the Geographical Indications Sub-Committee established pursuant to Article 179 of this Agreement, maintain contact on all matters relating to the implementation and the functioning of this Sub-Section. In particular, a Party may request from the other Party information relating to product specifications and their modification, and contact points for control provisions.
2. Each Party may make publicly available the specifications or a summary thereof and contact points for control provisions corresponding to geographical indications of the other Party protected pursuant to this Article.

Article 179

Geographical Indications Sub-Committee

1. The Geographical Indications Sub-Committee is hereby established. It shall consist of representatives of the Union and of Georgia with the purpose of monitoring the development of this Sub-Section and of intensifying their cooperation and dialogue on geographical indications. It shall report to the Association Committee in Trade configuration, as set out in Article 408(4) of this Agreement.

2. The Geographical Indications Sub-Committee adopts its decisions by consensus. It shall determine its own rules of procedure. It shall meet at the request of either of the Parties, alternatively in the EU and in Georgia, at a time and a place and in a manner (which may include by videoconference) mutually determined by the Parties, but no later than 90 days after the request.

3. The Geographical Indications Sub-Committee shall also see to the proper functioning of this Sub-Section and may consider any matter related to its implementation and operation. In particular, it shall be responsible for:

- (a) amending Article 170(1) and (2) of this Agreement, as regards the references to the law applicable in the Parties;
- (b) modifying Annexes XVII–C and XVII–D to this Agreement as regards geographical indications;
- (c) exchanging information on legislative and policy developments on geographical indications and any other matter of mutual interest in the area of geographical indications;
- (d) exchanging information on geographical indications for the purpose of considering their protection in accordance with this Sub-Section.

Sub-section 4

Designs

Article 180

International agreements

The Parties reaffirm their commitment to the Geneva Act to the Hague Agreement Concerning the International Registration of Industrial Designs of 1999.

Article 181

Protection of registered designs

1. Each Party shall provide for the protection of independently created designs that are new and are original ⁽²⁹⁾. This protection shall be provided by registration, which shall confer an exclusive right upon the holder of a registered design in accordance with the provisions of this Article.

2. A design applied to or incorporated in a product which constitutes a component part of a complex product shall only be considered to be new and original:

(a) if the component part, once it has been incorporated into the complex product, remains visible during normal use of the latter, and

(b) to the extent that those visible features of the component part fulfil in themselves the requirements as to novelty and originality.

3. The expression 'normal use' in point (a) of paragraph 2 shall mean use by the end user, excluding maintenance, servicing or repair work.

4. The holder of a registered design shall have the right to prevent third parties not having the owner's consent from, at a minimum, making, offering for sale, selling, importing, exporting, stocking or using a product bearing or embodying the protected design when such acts are undertaken for commercial purposes, unduly prejudice the normal exploitation of the design, or are not compatible with fair trade practices.

5. The duration of protection available shall amount to 25 years, from the date of filing of the application for registration or from a date established in accordance with the Hague Agreement Concerning the International Deposit of Industrial Designs, without prejudice to the Paris Convention.

Article 182

Exceptions and exclusions

1. Each Party may provide limited exceptions to the protection of designs, provided that such exceptions do not unreasonably conflict with the normal exploitation of protected designs and do not unreasonably prejudice the legitimate interests of the owner of the protected design, taking account of the legitimate interests of third parties.

2. Design protection shall not extend to designs dictated essentially by technical or functional considerations. In particular a design right shall not subsist in features of appearance of a product which are required to be reproduced in their exact form and dimensions in order to permit the product in which the design is incorporated or to which it is applied to be mechanically connected to or placed in, around or against another product so that either product may perform its function.

Article 183

Relationship to copyright

A design shall also be eligible for protection under the law of copyright of a Party as from the date on which the design was created or fixed in any form. The extent to which, and the conditions under which, such a protection is conferred, including the level of originality required, shall be determined by each Party.

Sub-section 5

Patents

Article 184

International agreements

The Parties reaffirm their commitment to the WIPO Patent Cooperation Treaty.

Article 185

Patents and public health

1. The Parties recognise the importance of the Declaration of the Ministerial Conference of the WTO on the TRIPS Agreement and Public Health adopted on 14 November 2001.
2. The Parties shall respect the Decision of the WTO General Council of 30 August 2003 on paragraph 6 of the declaration referred to in paragraph 1 of this Article and shall contribute to its implementation.

Article 186

Supplementary protection certificate

1. The Parties recognise that medicinal and plant protection products protected by a patent on their respective territory may be subject to an administrative authorisation procedure before being put on their market. They recognise that the period that elapses between the filing of the application for a patent and the first authorisation to place the product on their respective market, as defined for that purpose by domestic law, may shorten the period of effective protection under the patent.
2. Each Party shall provide for a further period of protection for a medicinal or plant protection product which is protected by a patent and which has been subject to an administrative authorisation procedure, that period being equal to the period referred to in the second sentence of paragraph 1, reduced by a period of five years.
3. Notwithstanding paragraph 2, the duration of the further period of protection may not exceed five years.
4. In the case of medicinal products for which paediatric studies have been carried out, and provided that the results of those studies are reflected in the product information, the Parties shall provide for a further six months extension of the period of protection referred to in paragraph 2.

Article 187

Protection of data submitted to obtain a marketing authorisation for medicinal products ⁽³⁰⁾

1. The Parties shall implement a comprehensive system to guarantee the confidentiality, non-disclosure and non-reliance of data submitted for the purpose of obtaining an authorisation to put a medicinal product on the market.
2. Each Party shall ensure, in its law, that any information submitted to obtain an authorisation to put a medicinal product on the market remains confidential and undisclosed to third parties and benefits from protection against unfair commercial use.
3. For that purpose, each Party shall not, for a period of at least six years from the date of the first authorisation in one of the Parties, permit other applicants to market the same or a similar product, on the basis of the marketing authorisation granted to the applicant which had provided the test data or studies, unless the applicant which had provided the test data or studies has given his consent. During such period, the test data or studies submitted for the first authorisation shall not be used for the benefit of any subsequent applicant aiming to obtain a marketing authorisation for a medicinal product, except when the consent of the first applicant is provided.
4. The six year period referred to in paragraph 3 shall be extended to a maximum of seven years if, during the first six years after obtaining the initial authorisation, the holder obtains an authorisation for one or more new therapeutic indications which are considered of significant clinical benefit in comparison with existing therapies.
5. Georgia undertakes to align its legislation concerning data protection for medicinal products with that of the Union at a date to be decided by the Association Committee in Trade configuration, as set out in Article 408(4) of this Agreement.

Article 188

Protection of data to obtain a marketing authorisation for plant protection products

1. Each Party shall determine safety and efficacy requirements before authorising the placing on the market of plant protection products.
2. Each Party shall ensure that data submitted for the first time by an applicant to obtain a marketing authorisation for a plant protection product benefits from protection against unfair commercial use and is not used for the benefit of any other person aiming to obtain a marketing authorisation, unless the proof of the explicit consent of the first holder is provided.
3. The test or study report submitted for the first time to obtain a marketing authorisation shall fulfil the following conditions:
 - (a) that it is for the authorisation, or for an amendment of an authorisation in order to allow the use on other crops, and

(b) that it is certified as compliant with the principles of good laboratory practice or of good experimental practice.

4. The period of protection of data shall be at least ten years starting from the date of the first marketing authorisation in the Party concerned.

Article 189

Plant varieties

The Parties shall protect plant varieties rights, in accordance with the International Convention for the Protection of New Varieties of Plants and shall cooperate to promote and enforce those rights.

Section 3

Enforcement of intellectual property rights

Article 190

General obligations

1. The Parties reaffirm their commitments under the TRIPS Agreement, and in particular Part III thereof, and shall provide for the complementary measures, procedures and remedies set out in this Section necessary to ensure the enforcement of intellectual property rights ⁽³¹⁾.

2. Those complementary measures, procedures and remedies shall be fair and equitable, and shall not be unnecessarily complicated or costly, or entail unreasonable time-limits or unwarranted delays.

3. Those complementary measures and remedies shall also be effective, proportionate and dissuasive and shall be applied in such a manner as to avoid the creation of barriers to legitimate trade and to provide for safeguards against their abuse.

Article 191

Entitled applicants

Each Party shall recognise as persons entitled to seek application of the measures, procedures and remedies referred to in this Section and in Part III of the TRIPS Agreement:

(a) the holders of intellectual property rights in accordance with the provisions of the applicable law,

(b) all other persons authorised to use those rights, in particular licencees, in so far as permitted by and in accordance with the provisions of the applicable law;

- (c) intellectual property collective rights management bodies which are regularly recognised as having a right to represent holders of intellectual property rights, in so far as permitted by and in accordance with the provisions of the applicable law,
- (d) professional defence bodies which are regularly recognised as having a right to represent holders of intellectual property rights, in so far as permitted by and in accordance with the provisions of the applicable law.

Sub-section 1

Civil enforcement

Article 192

Measures for preserving evidence

1. Each Party shall ensure that, even before the commencement of proceedings on the merits of the case, the competent judicial authorities may, on application by a party who has presented reasonably available evidence to support his/her claims that his/her intellectual property right has been infringed or is about to be infringed, order prompt and effective provisional measures to preserve relevant evidence in respect of the alleged infringement, subject to the protection of confidential information.
2. Such measures may include the detailed description, with or without the taking of samples, or the physical seizure of the alleged infringing goods, and, in appropriate cases, the materials and implements used in the production and/or distribution of these goods and the documents relating thereto. Those measures shall be taken, if necessary without the other party being heard, in particular where any delay is likely to cause irreparable harm to the right holder or where there is a demonstrable risk of evidence being destroyed.
3. Where measures to preserve evidence are adopted without the other party having been heard, the parties affected shall be given notice without delay and at the latest after the execution of the measures.

Article 193

Right of information

1. Each Party shall ensure that, in the context of proceedings concerning an infringement of an intellectual property right and in response to a justified and proportionate request of the claimant, the competent judicial authorities may order that information on the origin and distribution networks of the goods or services which infringe an intellectual property right be provided by the infringer and/or any other person who:

- (a) was found in possession of the infringing goods on a commercial scale;
- (b) was found to be using the infringing services on a commercial scale;
- (c) was found to be providing on a commercial scale services used in infringing activities; or
- (d) was found to be producing, manufacturing or distributing infringing goods or to be providing services, through information provided by any person referred to in points (a), (b), or (c).

2. The information referred to in paragraph 1 shall, as appropriate, comprise:

- (a) the names and addresses of the producers, manufacturers, distributors, suppliers and other previous holders of the goods or services, as well as the intended wholesalers and retailers, and
- (b) information on the quantities produced, manufactured, delivered, received or ordered, as well as the price obtained for the goods or services in question.

3. Paragraphs 1 and 2 shall apply without prejudice to other statutory provisions which:

- (a) grant the right holder rights to receive fuller information;
- (b) govern the use in civil or criminal proceedings of the information communicated pursuant to this Article;
- (c) govern responsibility for misuse of the right of information;
- (d) afford an opportunity for refusing to provide information which would force the person referred to in paragraph 1 to admit to his/her own participation or that of his/her close relatives in an infringement of an intellectual property right; or
- (e) govern the protection of confidentiality of information sources or the processing of personal

Article 194

Provisional measures

1. Each Party shall ensure that the judicial authorities may, at the request of the applicant, issue against the alleged infringer an interlocutory injunction intended to prevent any imminent infringement of an intellectual property right, or to forbid, on a provisional basis and subject, where appropriate, to a recurring penalty payment where provided for by domestic law, the continuation of the alleged infringements of that right, or to make such continuation subject to the lodging of guarantees intended to ensure the compensation of the right holder. An interlocutory injunction may also be issued, under the same conditions, against an

intermediary whose services are being used by a third party to infringe an intellectual property right.

2. An interlocutory injunction may also be issued to order the seizure or delivery up of goods suspected of infringing an intellectual property right, so as to prevent their entry into or movement within the channels of commerce.

3. In the case of an alleged infringement committed on a commercial scale, the Parties shall ensure that, if the applicant demonstrates circumstances likely to endanger the recovery of damages, the judicial authorities may order the precautionary seizure of the movable and immovable property of the alleged infringer, including the blocking of his/her bank accounts and other assets. To that end, the competent authorities may order access, where appropriate, to banking, financial or commercial documents under the control of the alleged infringer.

Article 195

Measures resulting from a decision on the merits of the case

1. Each Party shall ensure that the competent judicial authorities may order, at the request of the applicant and without prejudice to any damages due to the right holder by reason of the infringement, and without compensation of any sort, at least the definitive removal from the channels of commerce, or the destruction, of goods that they have found to be infringing an intellectual property right. If appropriate, the competent judicial authorities may also order the destruction of materials and implements predominantly used in the creation or manufacture of those goods.

2. The Parties' judicial authorities shall have the power to order that those measures shall be carried out at the expense of the infringer, unless particular reasons are invoked for not doing so.

3. Each Party shall ensure that, where a judicial decision is taken finding an infringement of an intellectual property right, the judicial authorities may issue against the infringer as well as against any intermediary whose services are used by a third party to infringe an intellectual property right an injunction aimed at prohibiting the continuation of the infringement.

4. The Parties may provide that, in appropriate cases and at the request of the person liable to be subject to the measures provided for in this Article, the competent judicial authorities may order pecuniary compensation to be paid to the injured party instead of applying the measures provided for in this Article if that person acted unintentionally and without negligence, if execution of the measures in question would cause him/her disproportionate harm and if pecuniary compensation to the injured party appears reasonably satisfactory.

Article 196

Damages

1. Each Party shall ensure that the judicial authorities, on application of the injured party, order the infringer who knowingly, or with reasonable grounds to know, engaged in an infringing activity, to pay the right holder damages appropriate to the actual prejudice suffered by that right holder as a result of the infringement. When the judicial authorities set the damages:

- (a) they shall take into account all appropriate aspects, such as the negative economic consequences, including lost profits, which the injured party has suffered, any unfair profits made by the infringer and, in appropriate cases, elements other than economic factors, such as moral prejudice, caused to the right holder by the infringement; or
- (b) as an alternative to (a), they may, in appropriate cases, set the damages as a lump sum on the basis of elements such as at least the amount of royalties or fees which would have been due if the infringer had requested authorisation to use the intellectual property right in question.

2. Where the infringer did not knowingly, or with reasonable grounds to know, engage in infringing activity, the Parties may lay down that the judicial authorities may order in favour of the injured party the recovery of profits or the payment of damages which may be pre-established.

Article 197

Legal costs

Each Party shall ensure that reasonable and proportionate legal costs and other expenses incurred by the successful party shall as a general rule be borne by the unsuccessful party, unless equity does not allow this and without prejudice to exceptions provided by domestic procedural rules.

Article 198

Publication of judicial decisions

Each Party shall ensure that, either in legal proceedings instituted for infringement of an industrial property right or in legal proceedings instituted for infringement of copyright, or in both cases, the judicial authorities may order at the request of the applicant and at the expense of the infringer, appropriate measures for the dissemination of the information concerning the decision, including displaying the decision and publishing it in full or in part.

Article 199

Presumption of authorship or ownership

For the purposes of applying the measures, procedures and remedies provided for in this Sub-Section:

(a) for the author of a literary or artistic work, in the absence of proof to the contrary, to be regarded as such, and consequently to be entitled to institute infringement proceedings, it shall be sufficient for his/her name to appear on the work in the usual manner;

(b) the provision under point (a) shall apply *mutatis mutandis* to the holders of rights related to copyright with regard to their protected subject matter.

Sub-section 2

Other provisions

Article 200

Border measures

1. Without prejudice to Article 75 of this Agreement and to Annex XIII to this Agreement, this Article establishes the general principles of this Agreement governing the enforcement of intellectual property rights by customs authorities and the obligations of the customs authorities of the Parties to engage in cooperation.

2. When implementing border measures for the enforcement of intellectual property rights the Parties shall ensure consistency with their obligations under GATT 1994 and the TRIPS Agreement.

3. The provisions on border measures in this Article are of procedural nature. They set out the conditions and procedures for action by the customs authorities where goods suspected of infringing an intellectual property right are, or should have been, under customs control. They shall not affect in any way the substantive law of the Parties on intellectual property.

4. To facilitate the effective enforcement of intellectual property rights, the customs authorities shall adopt a range of approaches to identify shipments containing goods suspected of infringing intellectual property rights. These approaches include risk analysis techniques based, *inter alia*, on information provided by rights holders, intelligence gathered and cargo inspections.

5. The Parties agree to effectively implement Article 69 of the TRIPS Agreement in respect of international trade in goods suspected of infringing intellectual property rights. For that purpose, the Parties shall establish and notify contact points in their customs administrations and shall be ready to exchange data and information on trade in such goods affecting both Parties. They shall, in particular, promote the exchange of information and cooperation between customs authorities with regard to trade in counterfeit trademark goods and pirated copyright goods. Without prejudice to the provisions of Protocol II on Mutual Administrative Assistance in Customs Matters to this Agreement customs authorities shall, where appropriate, exchange such information swiftly and with due respect to data protection laws of the Parties.

6. The customs authorities of each Party shall cooperate, upon request or upon their own initiative, to provide relevant available information to the customs authorities of the other Party, in particular for goods in transit through the territory of a Party destined for (or originating in) the other Party.

7. The Sub-Committee referred to in Article 74 of this Agreement shall establish the necessary practical arrangements concerning the exchange of data and information referred to in this Article.

8. Protocol II on Mutual Administrative Assistance in Customs Matters to this Agreement shall be applicable in respect to breaches of intellectual property rights, without prejudice to forms of cooperation resulting from the application of paragraphs 5 to 7 of this Article.

9. The Sub-Committee referred to in Article 74 of this Agreement shall act as the responsible Sub-Committee to ensure the proper functioning and implementation of this Article.

Article 201

Codes of conduct

The Parties shall encourage:

- (a) the development by trade or professional associations or organisations of codes of conduct aimed at contributing towards the enforcement of intellectual property rights.
- (b) the submission to their respective competent authorities of draft codes of conduct and of any evaluations of the application of those codes of conduct.

Article 202

Cooperation

1. The Parties agree to cooperate with a view to supporting the implementation of the commitments and obligations undertaken under this Chapter.

2. Areas of cooperation include, but are not limited to, the following activities:

- (a) exchange of information on the legal framework concerning intellectual property rights and relevant rules of protection and enforcement; exchange of experiences on legislative
- (b) exchange of experiences and information on the enforcement of intellectual property rights;
- (c) exchange of experiences on central and sub-central enforcement by customs, police, administrative and judiciary bodies; coordination to prevent exports of counterfeit goods,
- (d) capacity-building; exchange and training of personnel;

- (e) promotion and dissemination of information on intellectual property rights in, inter alia, business circles and civil society; public awareness of consumers and right holders;
- (f) enhancement of institutional cooperation, for example between intellectual property offices;
- (g) actively promoting awareness and education of the general public on policies concerning intellectual property rights: formulate effective strategies to identify key audiences and create communication programmes to increase consumer and media awareness on the impact of intellectual property violations, including the risk to health and safety and the connection to organised crime.

CHAPTER 10

Competition

Article 203

Principles

The Parties recognise the importance of free and undistorted competition in their trade relations. The Parties acknowledge that anti-competitive business practices and state interventions (including subsidies) have the potential to distort the proper functioning of markets and undermine the benefits of trade liberalisation.

Article 204

Antitrust and mergers legislation and its implementation

1. Each Party shall maintain in its respective territory comprehensive competition laws, which effectively address anti-competitive agreements, concerted practices and anti-competitive unilateral conduct of enterprises with dominant market power and which provide effective control of concentrations to avoid significant impediment to effective competition and abuse of dominant position.
2. Each Party shall maintain an authority responsible and appropriately equipped for the effective enforcement of the competition laws referred to in paragraph 1.
3. The Parties recognise the importance of applying their respective competition laws in a transparent and non-discriminatory manner, respecting the principles of procedural fairness and rights of defence of the enterprises concerned.

Article 205

State monopolies, state enterprises and enterprises entrusted with special or exclusive rights

1. Nothing in this Chapter prevents a Party from designating or maintaining state monopolies, state enterprises or to entrust enterprises with special or exclusive rights in accordance with its respective laws.

2. With regard to state monopolies of a commercial character, state enterprises and enterprises entrusted with special or exclusive rights, each Party shall ensure that such enterprises are subject to the competition laws referred to in Article 204(1), in so far as the application of those laws does not obstruct the performance, in law or in fact, of the particular tasks of public interest assigned to the enterprises in question.

Article 206

Subsidies

1. For the purpose of this Article, a ‘subsidy’ is a measure which fulfils the conditions of Article 1 of the SCM Agreement irrespective whether it is granted in relation to the production of goods or the supply of services and which is specific within the meaning of Article 2 of that Agreement.
2. Each Party shall ensure transparency in the area of subsidies. To that end, each Party shall report every two years to the other Party on the legal basis, the form, the amount or the budget and, where possible, the recipient of the subsidy granted by its government or a public body in relation to the production of goods. Such report is deemed to have been provided if the relevant information is made available by each Party on a publicly accessible website.
3. On request of a Party, the other Party shall promptly provide information and respond to questions pertaining to particular subsidies relating to the supply of services.

Article 207

Dispute settlement

The provisions on the dispute settlement mechanism in Chapter 14 (Dispute Settlement) of Title IV (Trade and Trade-related Matters) of this Agreement shall not apply to Articles 203, 204 and 205 of this Agreement.

Article 208

Relationship with the WTO

The provisions of this Chapter are without prejudice to the rights and obligations of a Party under the WTO Agreement, in particular the SCM Agreement and the Dispute Settlement Understanding (DSU).

Article 209

Confidentiality

When exchanging information under this Chapter the Parties shall take into account the limitations imposed by the requirements of professional and business secrecy in their respective jurisdictions.

CHAPTER 11
Trade-related energy provisions

Article 210

Definitions

For the purposes of this Chapter:

- (a) 'energy goods' means crude oil (HS code 27.09), natural gas (HS code 27.11) and electrical energy (HS code 27.16);
- (b) 'energy transport facilities' means high-pressure natural gas transmission pipelines; high-voltage electricity transmission grids and lines, including interconnectors used to connect different gas or electricity transmission networks; crude oil transmission pipelines, railways and other fixed facilities handling the transit of energy goods.
- (c) 'transit' means the passage of energy goods across the territory of a Party, with or without trans-shipment, warehousing, breaking bulk, or change in the mode of transport, where such passage is only a portion of a complete journey beginning and terminating beyond the
- (d) 'unauthorised taking' means any activity consisting of the unlawful taking of energy goods from energy transport facilities.

Article 211

Transit

The Parties shall ensure transit, consistent with their international commitments in accordance with the provisions of GATT 1994 and the Energy Charter Treaty.

Article 212

Unauthorised taking of goods in transit

Each Party shall take all necessary measures to prohibit and address any unauthorised taking of energy goods in transit through its territory by any entity subject to that Party's control or jurisdiction.

Article 213

Uninterrupted transit

1. A Party shall not take from or interfere otherwise with the transit of energy goods through their territory, except where such taking or other interference is specifically provided for in a contract or other agreement governing such transit or where a continued operation of the energy transport facilities without prompt corrective action creates an unreasonable threat to public security, cultural heritage,

health, safety or the environment, subject to the requirement that such action is not carried out in a manner which would constitute a means of arbitrary or unjustifiable discrimination or a disguised restriction of international trade.

2. In the event of a dispute over any matter involving the Parties or one or more entities subject to the control or jurisdiction of one of the Parties, a Party through the territory of which the transit of energy goods takes place shall not, prior to the conclusion of a dispute resolution procedure under the relevant contract or of an emergency procedure under Annex XVIII to this Agreement or under Chapter 14 (Dispute Settlement) of Title IV (Trade and Trade-related Matters) of this Agreement, interrupt or reduce such transit, or permit any entity subject to its control or jurisdiction, including a state trading enterprise, to interrupt or reduce such transit, except under the circumstances provided in paragraph 1.

3. A Party shall not be held liable for an interruption or reduction of transit pursuant to this Article where that Party is unable to supply or to transit energy goods as a result of actions attributable to a third country or an entity under the control or jurisdiction of a third country.

Article 214

Transit obligation for operators

Each Party shall ensure that operators of energy transport facilities take the necessary measures to:

- (a) minimise the risk of accidental interruption or reduction of transit;
- (b) expeditiously restore the normal operation of such transit, which has been accidentally interrupted or reduced.

Article 215

Regulatory authorities

1. Each Party shall designate independent regulatory authorities empowered to regulate the gas and electricity markets. These regulatory authorities shall be legally distinct and functionally independent from any other public or private enterprise, market participant or operator.

2. The decisions of and the procedures used by a regulatory authority shall be impartial with respect to all market participants.

Sub-section 2 Compliance

Article 254

Compliance with the arbitration panel ruling

The Party complained against shall take any measure necessary to comply promptly and in good faith with the arbitration panel ruling.

Article 255

Reasonable period of time for compliance

1. If immediate compliance is not possible, the Parties shall endeavour to agree on the period of time to comply with the ruling. In such a case, the Party complained against shall, no later than 30 days after the receipt of the notification of the arbitration panel ruling to the Parties, notify the complaining Party and the Association Committee in Trade configuration, as set out in Article 408(4) of this Agreement, of the time it will require for compliance ('reasonable period of time').

2. If there is disagreement between the Parties on the reasonable period of time to comply with the arbitration panel ruling, the complaining Party shall, within 20 days of the date of receipt of the notification made under paragraph 1 by the Party complained against, request in writing the original arbitration panel to determine the length of the reasonable period of time. Such request shall be notified simultaneously to the other Party and to the Association Committee in Trade configuration. The original arbitration panel shall notify its ruling to the Parties and to the Association Committee in Trade configuration within 20 days from the date of submission of the request.

3. The Party complained against shall inform the complaining Party in writing of its progress to comply with the arbitration panel ruling at least one month before the expiry of the reasonable period of time.

4. The reasonable period of time may be extended by mutual agreement of the Parties.

Article 256

2. In the event that there is disagreement between the Parties concerning the existence or the consistency of any measure under paragraph 1, taken to comply with the provisions referred to in Article 245 of this Agreement, the complaining Party may request in writing the original arbitration panel to rule on the matter. Such request shall identify the specific measure at issue and explain how such measure is inconsistent with the provisions referred to in Article 245 of this Agreement, in a manner sufficient to present the legal basis for the complaint clearly. The original arbitration panel shall notify its ruling to the Parties and to the Association Committee in Trade configuration within 45 days of the date of submission of the request.

Article 257

Temporary remedies in case of non-compliance

1. If the Party complained against fails to notify any measure taken to comply with the arbitration panel ruling before the expiry of the reasonable period of time, or if the arbitration panel rules that no measure taken to comply exists or that the measure notified under Article 256(1) of this Agreement, is inconsistent with that Party's obligations under the provisions referred to in Article 245 of this Agreement, the Party complained against shall, if so requested by the complaining Party and after consultations with that Party, present an offer for temporary compensation.
2. If the complaining Party decides not to request an offer for temporary compensation under paragraph 1 of this Article, or, in case such request is made, if no agreement on compensation is reached within 30 days after the end of the reasonable period of time or of the notification of the arbitration panel ruling under Article 256 of this Agreement that no measure taken to comply exists or that a measure taken to comply is inconsistent with the provisions referred to in Article 245 of this Agreement, the complaining Party shall be entitled, upon notification to the other Party and to the Association Committee in Trade configuration, as set out in Article 408(4) of this Agreement, to suspend obligations arising from any provision referred to in Article 245 of this Agreement, at an adequate level, equivalent to the nullification or impairment caused by the violation. The notification shall specify the level of suspension of obligations. The complaining Party may implement the suspension at any moment after the expiry of ten days after the date of receipt of the notification by the Party complained against, unless the Party complained against has requested arbitration under paragraph 4 of this Article.

3. In suspending obligations, the complaining Party may choose to increase its tariff rates to the level applied to other WTO Members on a volume of trade to be determined in such a way that the volume of trade multiplied by the increase of the tariff rates equals the value of the nullification or impairment caused by the violation.

4. If the Party complained against considers that the level of suspension is not equivalent to the nullification or impairment caused by the violation, it may request in writing the original arbitration panel to rule on the matter. Such request shall be notified to the complaining Party and to the Association Committee in Trade configuration before the expiry of the ten day period referred to in paragraph 2. The original arbitration panel shall notify its ruling on the level of the suspension of obligations to the Parties and to the Association Committee in Trade configuration within 30 days of the date of submission of the request. Obligations shall not be suspended until the original arbitration panel has notified its ruling, and any suspension shall be consistent with the arbitration panel ruling.

5. The suspension of obligations and the compensation foreseen in this Article shall be temporary and shall not be applied after:

- (a) the Parties have reached a mutually agreed solution pursuant to Article 262 of this Agreement; or
- (b) the Parties have agreed that the measure notified under Article 256(1) of this Agreement brings the Party complained against into conformity with the provisions referred to in Article 245 of this Agreement; or
- (c) any measure found to be inconsistent with the provisions referred to in Article 245 has been withdrawn or amended so as to bring it into conformity with those provisions, as ruled under Article 256(2) of this Agreement.

Article 258

Remedies for urgent energy disputes

1. In respect of a dispute concerning Chapter 11 (Trade-related Energy) of Title IV (Trade and Trade-related Matters) of this Agreement which a Party considers to be urgent because of an interruption, in full or in part, of any transport of natural gas, oil, or electricity or a threat thereof between the Parties, the provisions of this Article on remedies shall apply.

2. By way of derogation from Articles 255, 256 and 257 of this Agreement, the complaining Party may suspend obligations arising under Title IV (Trade and Trade-related Matters) of this Agreement to an adequate level, equivalent to the nullification or impairment caused by the Party failing to bring itself into compliance with the arbitration panel ruling within 15 days of its notification. That suspension may take effect immediately. Such suspension may be maintained as

long as the Party complained against has not complied with the arbitration panel ruling.

3. Should the Party complained against dispute the existence of a failure to comply or the level of the suspension due to the failure to comply, it may initiate proceedings under Articles 257(4) and 259 of this Agreement which shall be examined expeditiously. The complaining Party shall be required to remove or adjust the suspension only once the Panel has ruled on the matter, and may maintain the suspension pending the proceedings.

Article 259

Review of any measure taken to comply after the adoption of temporary remedies for non-compliance

1. The Party complained against shall notify the complaining Party and the Association Committee in Trade configuration, as set out in Article 408(4) of this Agreement, of the measure it has taken to comply with the ruling of the arbitration panel following the suspension of concessions or following the application of temporary compensation, as the case may be. With the exception of cases under paragraph 2 of this Article, the complaining Party shall terminate the suspension of concessions within 30 days from the receipt of the notification. In cases where compensation has been applied, and with the exception of cases under paragraph 2 of this Article, the Party complained against may terminate the application of such compensation within 30 days from its notification that it has complied with the ruling of the arbitration panel.

2. If the Parties do not reach an agreement on whether the notified measure brings the Party complained against into conformity with the provisions referred to in Article 245 of this Agreement, within 30 days of the date of receipt of the notification, the complaining Party shall request in writing the original arbitration panel to rule on the matter. Such a request shall be notified simultaneously to the other Party and to the Association Committee in Trade configuration. The arbitration panel ruling shall be notified to the Parties and to the Association Committee in Trade configuration within 45 days of the date of submission of the request. If the arbitration panel rules that the measure taken to comply is in accordance with the provisions referred to in Article 245 of this Agreement, the suspension of obligations or compensation, as the case may be, shall be terminated. Where relevant, the complaining Party shall adapt the level of suspension of concessions to the level determined by the arbitration panel.

Article 260

Replacement of arbitrators

If in an arbitration proceeding under this Chapter, the original panel, or some of its members, are unable to participate, withdraw, or need to be replaced because they do not comply with the requirements of the Code of Conduct set out in Annex XXI

to this Agreement, the procedure set out in Article 249 of this Agreement shall apply. The Association Committee in Trade configuration, as set out in Article 408(4) of this Agreement, shall make the rulings of the arbitration panel publicly available in their entirety within ten days of their notification, unless it decides not to do so in order to ensure the

A Party may take appropriate measures, if the matter is not resolved within three months of the date of notification of a formal request for dispute settlement in accordance with Article 421 of this Agreement and if the complaining Party continues to consider that the other Party has failed to fulfil an obligation under this Agreement. The requirement for a three month consultation period may be waived by mutual agreement of the Parties and shall not apply to exceptional cases set out in paragraph 3 of this Article.

2. In the selection of appropriate measures, priority shall be given to those which least disturb the functioning of this Agreement. Except in cases described in paragraph 3 of this Article, such measures may not include the suspension of any rights or obligations provided for under provisions of this Agreement set out in Title IV (Trade and Trade-related Matters). The measures taken under paragraph 1 of this Article shall be notified immediately to the Association Council and shall be the subject of consultations in accordance with Article 420(2) of this Agreement, and of dispute settlement in accordance with Article 420(3) and Article 421 of this Agreement.

3. The exceptions referred to in paragraphs 1 and 2 of this Article shall concern:

- (b) violation by the other Party of any of the essential elements of this Agreement, referred to in Article 2 of Title I (General Principles) of this Agreement.

Article 423

Relation to other agreements

1. The Partnership and Cooperation Agreement between the European Communities and their Member States, of the one part, and Georgia, of the other part, signed in Luxembourg on 22 April 1996 and which entered into effect on 1 July 1999 is hereby repealed.

2. This Agreement replaces the agreement referred to in paragraph 1. References thereto in all other agreements between the Parties shall be construed as referring to this Agreement.

3. This Agreement replaces the Agreement between the European Union and Georgia on protection of geographical indications of agricultural products and foodstuffs, signed on 14 July 2011 in Brussels and which entered into force on 1 April 2012.

Article 424

existing agreements which are binding upon one or more Member States, on the one hand, and Georgia on the other hand.

2. Existing agreements relating to specific areas of cooperation falling within the scope of this Agreement shall be considered part of the overall bilateral relations as governed by this Agreement and as forming part of a common institutional framework.

Article 425

2. Without prejudice to the relevant provisions of the Treaty on European Union and the Treaty on the Functioning of the European Union, neither this Agreement nor action taken hereunder shall in any way affect the powers of the Member States to undertake bilateral cooperation activities with Georgia or to conclude, where appropriate, new cooperation agreements with Georgia.

Article 426

The Annexes and Protocols to this Agreement shall form an integral part thereof.

Article 427

1. This Agreement shall apply, of the one part, to the territories in which the Treaty on European Union, the Treaty on the Functioning of the European Union and the Treaty establishing the European Atomic Energy Community are applied and under the conditions laid down in those Treaties, and of the other part, to the territory of Georgia.

2. The application of this Agreement, or of Title IV (Trade and Trade-related Matters) thereof, in relation to Georgia's regions of Abkhazia and Tskhinvali region/South Ossetia over which the Government of Georgia does not exercise effective control, shall commence once Georgia ensures the full implementation and enforcement of this Agreement, or of Title IV (Trade and Trade-related Matters) thereof, respectively, on its entire territory.

3. The Association Council shall adopt a decision on when the full implementation and enforcement of this Agreement, or of Title IV (Trade and Trade-related Matters) thereof, on the entire territory of Georgia, is ensured.

4. Should a Party consider that the full implementation and enforcement of this Agreement, or of Title IV (Trade and Trade-related Matters) thereof, respectively, is no longer ensured in the regions of Georgia referred to in paragraph 2 of this Article, that Party may request the Association Council to reconsider the continued application of this Agreement, or of Title IV (Trade and Trade-related Matters) thereof, respectively, in relation to the regions concerned. The Association Council shall examine the situation and adopt a decision on the continued application of this Agreement, or of Title IV (Trade and Trade-related Matters) thereof, respectively, within three months of the request. If the Association Council does not adopt a decision within three months of the request, the application of this Agreement, or of Title IV (Trade and Trade-related Matters) thereof, respectively, shall be suspended in relation to the regions concerned until the Association Council adopts a decision.

5. Decisions of the Association Council under this Article on the application of Title IV (Trade and Trade-related Matters) of this Agreement shall cover the entirety of that Title and cannot only cover parts of that title.

2. This Agreement shall enter into force on the first day of the second month following the date of the deposit of the last instrument of ratification or approval.

3. Notwithstanding paragraph 2 of this Article, the Union and Georgia agree to provisionally apply this Agreement in part, as specified by the Union, as set out in paragraph 4 of this Article, and in accordance with their respective internal procedures and legislation as applicable.

4. The provisional application shall be effective from the first day of the second month following the date of receipt by the depositary of this Agreement of the following:

(a) the Union's notification on the completion of the procedures necessary for this purpose, indicating the parts of this Agreement that shall be provisionally applied; and

(b) Georgia's deposit of the instrument of ratification in accordance with its procedures and applicable legislation.

5. For the purpose of the relevant provisions of this Agreement, including the respective Annexes and Protocols hereto, any reference in such provisions to the 'date of entry into force of this Agreement' shall be understood to the 'date from which this Agreement is provisionally applied' in accordance with paragraph 3 of this Article.

6. In respect of certification of plants and plant products and other objects, the competent authorities shall apply the principles laid down in the relevant ISPMs.

Animals and animal products:

1. The competent authorities of the Parties shall ensure that certifying officers have a satisfactory knowledge of the veterinary law as regards the animals or animal products to be certified and, in general, are informed about the rules to be followed for drawing up and issuing of the certificates and, if necessary, as to the nature and extent of the enquiries, tests or examinations which should be carried out before certification.
2. Certifying officers must not certify data of which they have no personal knowledge or which cannot be ascertained by them.
3. Certifying officers must not sign blank or incomplete certificates, or certificates relating to animals or animal products, which they have not inspected or which have passed out of their control. Where a certificate is signed on the basis of another certificate or attestation, the certifying officer shall be in possession of the latter document before signing.
4. A certifying officer may certify data which have been:
 - (a) ascertained on the basis of paragraphs 1, 2 and 3 of this Annex by another person
 - (b) obtained, within the context of monitoring programmes, by reference to officially recognised quality assurance schemes or by means of an epidemiological surveillance system where this is authorised under the relevant veterinary law.
5. The competent authorities of the Parties shall take all necessary steps to ensure the integrity of certification. In particular they shall ensure that certifying officers designated by them:
 - (a) have a status which ensures their impartiality and have no direct commercial interest in the animals or products being certified or in the holdings or establishments in which they originate; and
 - (b) are fully aware of the significance of the contents of each certificate which they sign.

6. Certificates shall be drawn up in order to ensure that a specific certificate refers to a specific consignment in a language understood by the certifying officer and in at least one of the official languages of the importing Party as set out in Part C of this Annex.
7. Each competent authority shall be in a position to link a certificate with the relevant certifying officer and ensure that a copy of all certificates issued is available for a period to be determined by that competent authority.
8. Each Party shall introduce the checks and the controls necessary to prevent the issuing of false or misleading certifications and the fraudulent use of certificates purported to be issued for the purposes set out in the veterinary law.
9. Without prejudice to any judicial proceedings or penalties, the competent authorities shall carry out investigations or checks and take appropriate measures to penalise any instances of false or misleading certification, which are brought to their attention. Such measures may include the temporary suspension of the certifying officers from their duties until the investigation is over. In particular:
 - (a) if in the course of the checks it is found that a certifying officer has knowingly issued a fraudulent certificate, the competent authority shall take all necessary steps to ensure, as far as is possible, that the person concerned cannot repeat the offence;

APPROXIMATION

ANNEX XI-A

PRINCIPLES FOR THE EVALUATION OF PROGRESS IN THE APPROXIMATION PROCESS FOR THE PURPOSE OF RECOGNITION OF EQUIVALENCE

PART I

Gradual approximation

1. General rules

The sanitary, phytosanitary and animal welfare law of Georgia shall be gradually approximated to that of the Union, based on the approximation list of the EU sanitary, phytosanitary and animal welfare law. That list shall be divided into priority areas that relate to measures, as defined in Annex IV to this Agreement. For this reason Georgia shall identify its trade priority areas.

Georgia shall approximate domestic rules to the EU acquis by either:

- (a) implementing and enforcing through the adoption of additional domestic rules or procedures the rules in relevant EU acquis, or
- (b) by amending relevant domestic rules or procedures to incorporate the rules in relevant EU acquis.

In either case, Georgia shall:

- (a) eliminate any laws, regulations or any other measures inconsistent with the approximated domestic legislation;
- (b) ensure the effective implementation of approximated domestic legislation.

Georgia shall document such approximation in tables of correspondence according to a model indicating the date on which domestic rules enter into force and the official journal in which the rules were published. The model of the tables of

correspondence for the preparation and evaluation is provided in Part II of this Annex. If the approximation is not complete, reviewers ⁽¹⁾ shall describe the shortcomings in the column provided for comments.

Irrespective of the priority area identified, Georgia shall prepare specific tables of correspondence demonstrating the approximation for other general and specific legislation, including, in particular, the general rules related to:

(a) control systems:

- domestic market,
- imports;

(b) animal health and welfare:

- the identification and the registration of animals and the registration of their
- the control measures for animal diseases,
- domestic trade with live animals, semen, ova and embryos,
- animal welfare on farms, during transport and slaughter;

(c) food safety:

- placing on the market of food and feed,
- labelling, presentation and advertising of food including nutritional and health claims,
- residues controls,
- specific rules for feed;

(d) animal by-products;

(e) plant health:

- harmful organisms,
- plant protection products;

(f) genetically modified organisms:

- released into the environment,
- genetically modified food and feed.

PART II

Evaluation

1. Procedure and method

Georgia's sanitary, phytosanitary and animal welfare law covered by Chapter 4 (Sanitary and Phytosanitary Measures) of Title IV (Trade and Trade-related Matters) of this Agreement shall be gradually approximated to that of the Union and shall be effectively enforced ⁽²⁾.

Tables of correspondence shall be prepared according to the model as laid down in point (2) of this Annex for each single approximated act and submitted in English for review by the reviewers.

If the result of the evaluation is positive for an individual measure, a group of measures, a system applicable to a sector, sub-sector, a commodity or a group of commodities, the conditions of Article 57(4) of this Agreement shall apply.

2. Tables of correspondence

2.1. When preparing tables of correspondence, the following shall be taken into consideration:

The EU acts shall serve as a basis for preparation of a table of correspondence. To this end the version in force at the time of approximation shall be used. Particular attention shall be paid to precise translation into the national language, as linguistic imprecisions may lead to misinterpretation, in particular if they concern the scope of the law ⁽³⁾.

(¹) Public utilities exist in sectors such as related scientific and technical consulting services, R&D services on social sciences and humanities, technical testing and analysis services, environmental services, health services, transport services and services auxiliary to all modes of transport. Exclusive rights on such services are often granted to private operators, for instance operators with concessions from public authorities, subject to specific service obligations. Given that public utilities often also exist at the sub-central level, detailed and exhaustive sector-specific scheduling is not practical. This reservation does not apply to telecommunications and to computer and related services.

(²) In accordance with Article 54 of the TFEU these subsidiaries are considered as juridical persons of the EU. To the extent that they have a continuous and effective link with the economy of the EU, they are beneficiaries of the Union's Internal Market, which includes, inter alia, the freedom to establish and to provide services in all Member States of the EU.

(³) As regards services sectors, those limitations do not go beyond the limitations reflected in the existing commitments under GATS.

(⁴) A juridical person is controlled by other natural or juridical person(s) if the latter has/have the power to name a majority of its directors or otherwise legally direct its actions. In particular, ownership of more than 50 % of the equity interests in a juridical person shall be deemed to constitute control.

(⁵) A juridical person is controlled by other natural or juridical person(s) if the latter has/have the power to name a majority of its directors or otherwise legally direct its actions. In particular,

ownership of more than 50 % of the equity interests in a juridical person shall be deemed to constitute control.

(⁶) The horizontal limitation on public utilities applies.

(⁷) A juridical person is controlled by other natural or juridical person(s) if the latter has/have the power to name a majority of its directors or otherwise legally direct its actions. In particular, ownership of more than 50 % of the equity interests in a juridical person shall be deemed to constitute control.

(⁸) The horizontal limitation on the difference in treatment between branches and subsidiaries applies. Foreign branches may only receive an authorisation to operate in the territory of a Member State under the conditions provided for in the relevant legislation of that Member State and may therefore be required to satisfy a number of specific prudential requirements.

(⁹) Including Services auxiliary to internal waterways transport.

(¹⁰) Equivalent treatment implies non-discriminatory treatment of Union air carriers and Union CRS services suppliers.

(¹¹) A juridical person is controlled by other natural or juridical person(s) if the latter has/have the power to name a majority of its directors or otherwise legally direct its actions. In particular, ownership of more than 50 % of the equity interest in a juridical person shall be deemed to constitute control.

(¹²) Based on figures published by the Directorate General in charge of Energy in the latest EU energy statistical pocketbook: crude oil imports expressed in weight, gas imports in calorific value.

LIST OF COMMITMENTS ON CROSS-BORDER SUPPLY OF SERVICES (UNION)

1. The list of commitments below indicates the economic activities liberalised by the Union pursuant to Article 86 of this Agreement and, by means of reservations, the market access and national treatment limitations that apply to services and service suppliers of Georgia in those activities. The lists are composed of the following elements:

(a) a first column indicating the sector or sub-sector in which the commitment is assumed by the Party, and the scope of liberalisation to which the reservations apply;

(b) a second column describing the applicable reservations.

When the column referred to under point (b) only includes Member State-specific reservations, Member States not mentioned therein undertake commitments in the sector concerned without reservations (the absence of Member State-specific reservations in a given sector is without prejudice to horizontal reservations or to sectoral Union-broad reservations that may apply).

3. The list below does not include measures relating to qualification requirements and procedures, technical standards and licensing requirements and procedures when they do not constitute a market access or a national treatment limitation within the meaning of Articles 84 and 85 of this Agreement. Those measures (e.g. need to obtain a license, universal service obligations, need to obtain recognition of qualifications in regulated sectors, need to pass specific examinations, including language examinations, non-discriminatory requirement that certain activities may not be carried out in environmental protected zones or areas of the other Party.
4. The list below is without prejudice to the feasibility of Mode 1 in certain services sectors and sub-sectors and without prejudice to the existence of public monopolies and exclusive rights as described in the list of commitments on establishment.
5. In accordance with Article 76(3) of this Agreement, the list below does not include measures
6. The rights and obligations arising from this list of commitments shall have no self-executing effect and thus confer no rights directly to individual natural persons or juridical persons.
