### Role/Occupation
Dental Laboratory Assistant

### Level
3

### Duration of Apprenticeship
Minimum 18 months

### Role Profile
To complement the role of Dental Technicians who design, manufacture, modify and repair custom-made dental devices. It is recognised that many dental laboratories have opportunities for individuals who will assist, under supervision, in the manufacture of dental devices. This pathway is designed to be the initial stage leading to the role of assistant and giving the opportunity for entry to higher qualifications that develop individuals for professional registration with the General Dental Council (GDC) - [http://www.gdc-uk.org/Pages/default.aspx](http://www.gdc-uk.org/Pages/default.aspx)

During the apprenticeship Dental Laboratory Assistants will develop basic competency in core laboratory skills before focusing on specific areas of employment. This includes primary stages in the manufacture of a range of dental devices, and may extend to one part of the manufacturing process in a dental laboratory, which may include crowns, bridges, dentures or orthodontics appliances.

Working as part of the Dental Team, Dental Laboratory Assistants will need to have knowledge of industrial regulations, health and safety compliance and meet communication standards. Dental Laboratory Assistants will always work under direct supervision of a registered and qualified Dental Technician who will be responsible for their work.

### Competencies

<table>
<thead>
<tr>
<th>Knowledge</th>
<th>The Dental Laboratory Assistant will have knowledge of:</th>
</tr>
</thead>
<tbody>
<tr>
