Smart Metering Implementation Programme: consultation on draft licence conditions and technical specifications for the roll-out of gas and electricity smart metering equipment (August 2011)

We would like to confirm that we have contributed to the consultation responses you will receive from our Electricity and Gas trade associations, BEAMA SMA and SBGI and we would be more than happy to discuss our views in more detail with DECC at your convenience.

As the world's leading provider of smart metering, data collection and utility software systems, Itron welcomes the opportunity to contribute to the consultation process on Smart Metering for Electricity and Gas and we look forward to further opportunities in which to participate in the consultation/industry design process, as we move forward towards the full implementation of Smart Metering in Great Britain.

In the meantime if you require further information or clarification please do not hesitate to contact me.

Yours sincerely
