Notes on source of data

- 1 Reserves data for 1973 to 2000 taken from figures published in brown books
- 2 Reserves data from 2001 onwards taken from figures published on our website
- 3 Gas reserves for 1973 and 1974 converted from figures in tcf to bcm
- 4 Production data taken from Dukes Tables
- 5 Offshore oil production began in 1975; earlier cumulative oil total is from onshore oil production
- 6 Offshore gas production began in 1967;
- 7 All figures have been rounded to the nearest million tonnes for oil or nearest bcm for gas
