Tables revised June 2015

Pheasant rearing

All valuations expressed in pence per bird

Age (days)	7	14	21	28	35	42	49
Valuation	254	285	319	356	395	435	476

Age	56
Valuation	518

These tables provide valuations for the rearing phase of pheasants, most of which are destined to be transferred to release pens on shoots at 6 - 8 weeks of age.

The valuations are based on as-hatched flocks (i.e. males and females together in broadly equal numbers). Where the age of the birds to be valued does not exactly match the ages given in the table, a pro-rata figure should be calculated.

Separate valuation tables are available for birds in release pens and for breeding flocks.
