

Bronze turkeys (hens) free range

All valuations expressed in pence per bird

Age (days)	7	14	21	28	35	42	49
Farm gate sales	591	624	661	702	741	789	836
Sales to butchers	591	624	661	702	741	789	836

Age (days)	56	63	70	77	84	91	98
Farm gate sales	888	945	1004	1066	1131	1200	1259
Sales to butchers	888	945	1004	1066	1131	1200	1259

Age (days)	105	112	119	126	133	140	147
Farm gate sales	1701	2143	2585	3027	3469	3911	4353
Sales to butchers	1527	1794	2061	2328	2595	2862	3129

Age (days)	154	161	168
Farm gate sales	4795	5237	5679
Sales to butchers	3396	3663	3931

This table is intended to provide valuations for Traditional Farm Fresh ('TFF') and/or seasonally-produced turkeys. They are NOT intended to be used for large-scale, intensive turkey production (e.g. Bernard Matthews/Cranberry Turkeys). Bird numbers for a typical TFF/seasonal site will generally be counted in hundreds rather than thousands, although larger enterprises may produce at the latter level. A typical 'intensive' production site will rear many thousands of birds (individual houses may contain up to 20,000 birds).

During the first few weeks of the rearing period, free range birds will be kept indoors in brooding houses (or sheds). The table provides valuations for bronze-feathered hen birds. If a site rears 'as-hatched' (i.e. males and females together in broadly equal numbers), the corresponding valuation table should be consulted.

Figures are provided for both 'farm gate' sales - i.e. sales direct to the final customer and for 'sales to butchers', which are intended to reflect trade values. Because of the difference in the resultant valuations, it is important to determine which type of outlet the farmer supplies. If both types of outlet are supplied, a pro-rata figure should be calculated. Similarly, if the age of the birds does not exactly match the figures given in the tables, the corresponding pro-rata figure should also be calculated.

Valuations have been based on a maximum slaughter age of 24 weeks at which point the average liveweight has been taken to be 7.5kg (derived from industry targets) with an oven-ready weight of 6kg. Although valuations are determined on the basis of the age of birds, it is strongly recommended that for flocks that are 12 weeks or older, a random sample of 25 culled birds are weighed as a reference in case of future disputed valuation
