Collection rates and receipts of council tax and non-domestic rates in England 2015-16 (revised)

Local Government Finance
Statistical Release

11 July 2016

(Originally published 29 June 2016)

- In 2015-16 local authorities collected a total of £25.3 billion in **council tax**, irrespective of the year to which it related. This was an increase of £0.8 billion, or 3.1%, over 2014-15. By the end of March 2016, they had collected £24.8 billion of council tax that related to 2015-16 and achieved an average in-year collection rate of 97.1%, an increase of 0.1 percentage points over 2014-15. During 2015-16, local authorities collected £614 million in council tax arrears and wrote off £193 million of uncollectable council tax.
- In 2015-16 authorities collected a total of £23.2 billion in **non-domestic rates**, irrespective of the year to which it related, an increase of £0.3 billion, or 1.4% over the figure for 2014-15. By the end of March 2016, they had collected £23.6 billion in non-domestic rates that related to 2015-16 and achieved an average in-year collection rate of 98.2% in 2015-16, an increase of 0.1 percentage points over 2014-15. They also collected £602 million in non-domestic rates arrears and wrote off £214 million of uncollectable non-domestic rates in 2015-16.
- At 31 March 2016, the total amount of council tax still outstanding amounted to £2.7 billion. This is a cumulative figure and includes arrears that may stretch back to the introduction of council tax in 1993. This is an increase of £77 million over the figure for 2014-15.
- At 31 March 2016, local authorities reported the total amount of non-domestic rates still outstanding amounted to £1.3 billion. This is a cumulative figure and includes arrears that may stretch many years. This is the second year that arrears data for non-domestic rates has been collected and they should be regarded as Experimental Data.

Introduction

This release provides information on the collection rates and the receipts of council tax and non-domestic rates by local authorities for the financial year 1 April 2015 to 31 March 2016. It also looks at changes in these figures compared with previous years. This information is derived from the final Quarterly Return of Council Taxes and Non-Domestic Rates (QRC4) returns submitted by all 326 billing authorities in England in April and May 2016.

The in-year collection rate is the amount received by 31 March of the year in question of that financial year's council tax (or non-domestic rates) shown as a percentage of the net collectable debit in respect of that year's council tax (or non-domestic rates). In other words it is how much the local authority collected by 31 March of the council tax (or non-domestic rates) as a percentage of the amount they would have collected if everyone liable had paid what they were supposed to. It includes prepayments made in previous years in respect of this year but it does not include prepayments made this year in respect of next year nor does it include the payment of any arrears.

Uses made of the data

The data in this Statistical Release are essential for a number of different purposes. A central and immediate purpose is to provide the Secretary of State, Ministers, HM Treasury and the Office for National Statistics (ONS) with the most up to date information available on the amount of council tax and non-domestic rates collected by local authorities and their performance as shown by collection rates. The data are important sources for various evidence based policy and financial decisions and answering numerous parliamentary questions

The figures are used by the ONS in compiling the Public Sector Finances and National Accounts, which are used to set fiscal and monetary policy. The data are collected quarterly during the year and estimates for England as a whole are provided to the ONS. These data are published on a quarterly basis and can be found at the following link:

<https://www.gov.uk/government/statistical-data-sets/live-tables-on-local-government-finance> .

In addition it is used by local authorities and their associations, other government departments, members of the business community and the general public. The live tables also provide a local authority breakdown of figures relating to the specific billing year and the collection of finance regardless of the year to which it relates.

Because the statistical release includes data for individual authorities, it enables the public (including both council tax and non-domestic rate payers) to compare its authority with others in the same type or locally.

Minor revisions have been made to table 8 and associated commentary in this release. More information about the reason for the revision is given in the Revisions Policy section on page 17.

Special Factors

As in previous years, there are a number of special factors which may have affected both the amount of council tax and non-domestic rates that authorities should have been able to collect and the amount they have actually collected in 2015-16.

- Council Tax: the introduction in April 2013 of the localisation of council tax support and various technical reforms to council tax discounts gave local authorities more control over the level of council tax discounts they award which has increased the amount of council tax available to be collected by local authorities. The figures in this release for 2011-12 to 2012-13 exclude council tax benefit as this was paid directly to local authorities by the Department for Work and Pensions (DWP). In April 2013 council tax benefit was replaced by local Council Tax Support schemes which are designed and administered by local authorities. The figures for 2013-14 to 2015-16 therefore reflect these new schemes.
- Non domestic rates - the introduction of the business rates retention scheme in April 2013 allows the local government sector (billing authorities and major precepting authorities) to retain a proportion of the revenue that is generated in their area from non-domestic rates as an incentive to encourage economic growth in their area.
- Since April 2013 for council tax and April 2014 for non-domestic rates, payers have been permitted to spread the payment of their rates over 12 months as opposed to 10 months as in the past. This means authorities are unlikely to commence any recovery action to collect the arrears until the following year.

Further details about these factors can be found in *Definitions* later in the release.

Rounding Where figures have been rounded, there may be a slight discrepancy between the total and the sum of constituent parts.

1. Total receipts of council tax and non-domestic rates: 2011-12 to 2015-16

Table 1 shows the amount of council tax and non-domestic rates collected in 2011-12 to 2015-16 irrespective of the year to which it relates. As can be seen, the total receipts includes receipts for not only the year in question but also the amount of arrears collected during the year as well as pre-payments collected for future years.

- In 2015-16 local authorities collected £25.3 billion in council tax, irrespective of the year to which it related. This was an increase of £0.8 billion, or 3.1%, over 2014-15.
- In the same period local authorities collected £23.2 billion in non-domestic rates, irrespective of the year to which it related, £0.3 billion, or 1.4%, more than 2014-15.

Table 1 : Receipts of council tax and non-domestic rates collected irrespective of the year to which it relates : in England : 2011-12 to 2015-16

	Receipts of council taxes				Receipts of non-domestic rates				£ millions
	In respect of the billing year	In respect of previous years ^(b)	In respect of subsequent billing year	Total receipts collected in financial year	In respect of the billing year	In respect of previous years ^(b)	In respect of subsequent billing year	Total receipts collected in financial year	
2011-12	21,761	393	342	22,496	20,568	-131	309	20,746	
2012-13	22,053	392	314	22,759	21,590	-253	295	21,632	
2013-14	23,087	399	362	23,848	22,434	-195	341	22,580	
2014-15	23,709	457	392	24,558	22,797	-291	362	22,868	
2015-16	24,409	509	400	25,318	23,319	-486	344	23,177	

(a) Net of council taxes received in respect of previous years

(b) A negative figure indicates that local authorities repaid more than they collected in respect of previous years. This is usually down to revaluations and appeals which often stretch back over a number of years.

Details of the receipts of both council tax and non-domestic rates at local authority level can be found on the DCLG website at <https://www.gov.uk/government/statistical-data-sets/live-tables-on-local-government-finance>

2. Collection rates: 2011-12 to 2015-16

The in-year collection rate is the amount received by 31 March of the year in question, of that financial year's council tax (or non-domestic rates) shown as a percentage of the net collectable debit in respect of that year's council tax (or non-domestic rates). In other words, it is the amount of council tax (or non-domestic rates) collected by 31 March shown as a percentage of the total amount that local authorities would have collected if everyone liable had paid what they were supposed to. It includes prepayments made in respect of the current year but does not include the payment of any arrears in respect of previous years, nor any prepayments made in respect of following years.

The collection of both council tax and non-domestic rates continues once the financial year to which it relates has ended. This means the final collection rate achieved is somewhere between the figures shown in this release and 100%.

Tables 2 and 3 show in-year collection rates over the past five years, while table 4 shows how the collection rate is derived for 2015-16.

Council Tax

Table 2 and **Chart A** show, for England and by type of authority, the average in-year collection rates for council tax for the period 2011-12 to 2015-16.

- By the end of March 2016 local authorities had collected £24.8 billion in council tax for 2015-16. In doing so the authorities achieved a national average in-year collection rate for council tax of 97.1% in 2015-16, an increase of 0.1 percentage points over 2014-15.
- The collection rate in most types of authority rose from 2014-15 to 2015-16; the only exception being outer London boroughs which stayed the same as in 2014-15.

Table 2: Council tax - collection rates - England : 2011-12 to 2015-16

Non-domestic rates

Table 3 and **Chart B** show, for England and by type of authority, the average in-year collection rates for non-domestic rates for the period 2011-12 to 2015-16.

- By the end of March 2016, local authorities in England had collected £23.6 billion in non-domestic rates for 2015-16 which gave a national average in-year collection rate for non-domestic rates of 98.2% in 2015-16, an increase of 0.1 percentage points over the level achieved in 2014-15.
- All classes of authority increased their collection rates with outer London boroughs increasing their collection rates by 0.3 percentage points.

Amounts to be collected and the amounts actually collected

Table 4 show the amount local authorities should have collected if everyone pays what they were supposed to, known as the net collectable debit (or NCD), and the amount they did, and did not, collect by 31 March 2016 for both council tax and non-domestic rates in 2015-16 by type of authority.

Charts C & D show the amount of council tax and non-domestic rates collected by each type of authority as a percentage of the total amount collected to 31 March 2016.

Table 4 : Council tax and non-domestic rates - amount collected - England : by class 2015-16

Chart C : Council tax : amount collected in year : England 2015-16

Chart D : Non-domestic rates : amount collected in year : England 2015-16

Table 5 shows how both the net collectible debit and the amount actually collected up until 31 March each year have changed year-on-year since 2011-12 for both council tax and non-domestic rates.

- Local authorities in England collected £24.8 billion in council tax by the end of March 2016 out of a total of £25.5 billion collectable. This is £0.7 billion (3.0%) more than the £24.1 billion collected in 2014-15.
- Local authorities in England collected £23.6 billion in non-domestic rates by the end of March 2016 out of a total of £24.1 billion collectable. This is £0.6 billion (2.4%) more than the £23.1 billion collected in 2014-15.

In addition to the normal growth in council tax to be collected due to levels of council tax being increased, some of the change in the net collectible debit can be attributed to the special factors mentioned on page 3 of this release.

The changes in the net collectible debit for non-domestic rates can be attributed to both growth in the tax base and also increases in the multiplier used to calculate the amount of non-domestic rates payable. In addition changes in the types and levels of relief available will also have had an effect on the amount of non-domestic rates payable.

Table 5: Council tax and non-domestic rates - amount collected in year in England : 2011-12 to 2015-16								
	Council tax				Non-domestic rates			
	Net Collectible Debit	% change	Amount Collected in year	% change	Net Collectible Debit	% change	Amount Collected in year	% change
2011-12	22,688	0.7%	22,083	0.8%	21,290	6.3%	20,824	6.2%
2012-13	22,982	1.3%	22,378	1.3%	22,381	5.1%	21,873	5.0%
2013-14	24,120	5.0%	23,386	4.5%	23,139	3.4%	22,661	3.6%
2014-15	24,793	2.8%	24,052	2.8%	23,510	1.6%	23,066	1.8%
2015-16	25,522	2.9%	24,782	3.0%	24,057	2.3%	23,621	2.4%

Table 6 is available online and shows the amount to be collected, the amount collected up to 31 March and the in-year collection rates for both council tax and non-domestic rates for each authority from 2013-14 to 2015-16. It also shows the comparable figure for the type of authority plus an all-England figure.

The table is available on the Department's website and can be found at:

<https://www.gov.uk/government/organisations/department-for-communities-and-local-government/series/council-tax-statistics>

3. Arrears

Council tax

Table 7 shows the level of arrears of council tax in the period 2011-12 to 2015-16 as well as the amounts of council tax that were written off in the same period.

- At the start of 2015-16 there was £2.7 billion of council tax arrears outstanding. During 2015-16, local authorities collected £614 million (23%) of this outstanding council tax, irrespective of the year to which it related (before any write off action).
- During 2015-16 local authorities did not collect £842 million of that year's council tax after any write off action had been accounted for.
- In 2015-16 local authorities wrote off £193 million of uncollectable council tax, irrespective of the year to which it related.
- At 31 March 2016, the total amount of council tax still outstanding amounted to £2.7 billion. This is a cumulative figure and includes arrears that may stretch back to the introduction of council tax in 1993, as well as court and administration costs. This is an increase of £77 million or 2.9% on the figure at the end of March 2015.
- Court and administration costs included in the total arrears figure rose by £10 million, or 3.8%, to £282 million, in 2015-16.

Table 7: Council tax arrears and write-offs : 2011-12 to 2015-16

(a) The figures for 31 March & 1 April of the same year are not identical as the figures for 31 March are best estimates provided by local authorities in May/June following the year in question and the 1 April figures are provided 14 months afterwards.

(b) Some authorities were unable to provide a breakdown as to which year the arrears relate to so the total shown may not equal the two following lines

(c) Includes court and administration costs

Chart E: Amount of council tax arrears and write-offs 2011-12 to 2015-16

Non-domestic rates

Table 8 shows the level of arrears of non-domestic rates at the end of 2014-15 and 2015-16 as well as the amounts of non-domestic rates that were written off during those years. This is the second time these data have been collected and are still subject to further validation. Consequently, they must be regarded as **Experimental Data**. As understanding and use of these new data is increased, the data may need to be updated, and therefore should be treated as provisional. These figures are as reported by the local authorities.

- At the start of 2015-16 there were £1.6 billion of non-domestic rates arrears outstanding. During 2015-16, local authorities collected £602 million (38%) of these arrears, irrespective of the year to which it related (before any write off action).
- During 2015-16 local authorities did not collect £461 million of that year's non-domestic rates after any write off action had been accounted for.
- In 2015-16 local authorities wrote off £214 million of uncollectable non-domestic rates, in respect of arrears.
- At 31 March 2016, the total amount of non-domestic rates still outstanding amounted to £1.3 billion. This is a cumulative figure and includes arrears that may stretch many years, as well as court and administration costs of £16 million.

4. Definitions

A list of terms relating to local government finance is given in the glossary at Annex G of *Local Government Finance Statistics England*. This is accessible at.

<https://www.gov.uk/government/collections/local-government-finance-statistics-england>

The most relevant terms for this release are explained below.

Arrears – unpaid council tax or non-domestic rates that, in the opinion of the billing authority, can still be collected. They also include costs the local authorities have incurred in attempting to collect unpaid council tax or non-domestic rates.

Billing authority – are the 326 local authorities empowered to set and collect council tax, and manage the Collection Fund, on behalf of itself and local authorities in its area. They are also empowered to collect non-domestic rates. In England, shire and metropolitan districts, the Council of the Isles of Scilly, unitary authorities, London Boroughs and the City of London are billing authorities.

Business rates retention - the business rates retention scheme was introduced in April 2013. The local government sector (local authorities and fire and rescue authorities) can now keep half of any business (non-domestic) rates revenue to invest in local services.

Council tax – a local charge (or charges) set by the billing authority in order to collect sufficient revenue to meet their budget and the precepts issued by the precepting authorities. It is calculated based on the council tax band assigned to the dwelling.

Council tax benefit – was an income related social security benefit designed to help people on low income pay their council tax. Council tax benefit was paid directly to the local authority by the Department for Work and Pensions (DWP) and not to the householder. This ceased in March 2013 and responsibility for support of council tax payers was passed to local authorities.

Localisation of council tax support – introduced on 1 April 2013 to provide support to low-income council taxpayers and replaces council tax benefit (where claimants were liable for the full charge but it was paid by government). It is now a locally set discount (claimants are only liable for part of the charge, but have to pay it themselves).

National non-domestic rates (NNDR) – also known as **business rates** and they are a means by which local businesses or organisations contribute to the cost of local authority services. Liable properties include public buildings, pipelines and advertising hoardings, as well as businesses. Some non-domestic properties, such as agricultural land and associated buildings, and churches, are exempt however. The national multiplier paid by businesses has been set by the Government.

Net collectable debit (NCD) - the income that authorities should collect in the year, if everyone who is liable for either council tax or non-domestic rates pays what they should. This includes not only those who are liable to pay for the whole year but also those who are liable to pay for part of the year. It reflects the amount payable after discounts (council tax) and reliefs (non-

domestic rates) are applied.

Precepting authority – this can be either a local precepting authority such as parish or town council, or a major precepting authority such as a county councils in two-tier areas, police authorities, fire and rescue authorities and the Greater London Authority.

Technical Reforms to Council Tax – from 1 April 2013 several reforms were made to council tax discounts in a move to give local authorities more control over the level of discounts set in their area. These reforms replaced council tax exemptions for short term empty properties, and properties undergoing major structural repair with a new discretionary discount which allowed local authorities to offer a discount of between 0 and 100% on all empty properties.

An Empty Property Premium was also introduced which allows local authorities to charge an additional council tax premium of up to 50% on properties which had been empty for more than 2 years.

Write-offs - the amounts of council tax or non-domestic rates local authorities no longer considered recoverable - this does not include any provision for bad debts. In this release the figures for council tax write-offs should include court costs or administration costs that have also been written off.

5. Technical Notes

Survey design for collecting QRC4 data for 2015-16

The QRC4 data collection is the final in a series of forms used to obtain data about the amounts of council tax and non-domestic rates collected each quarter by local authorities. The QRC4 was issued in April 2016 to all 326 billing authorities in England to collect further data about the levels of council tax and non-domestic rates due to be collected, the amounts actually collected along with to which year it relates.

Data quality

This Statistical Release contains National Statistics and as such has been produced to the high professional standards set out in the National Statistics Code of Practice. National Statistics products undergo regular quality assurance reviews to ensure that they meet customer demands.

The information in this release is based on data returned to the Department for Communities and Local Government by all 326 billing authorities in England on the final Quarterly Return of Council Taxes and Non-Domestic Rates (QRC4) returns submitted in April and May 2016. The data are collected using legislative powers that require all billing authorities to return completed forms. The forms should be completed in accordance with the guidance provided, however this guidance is open to interpretation by local authorities when they complete the forms.

The form has to be signed by the Chief Finance Officer of the authority; this effectively ensures a 100% response rate before the release is compiled.

Figures are subjected to rigorous pre-defined validation tests both within the form itself, while the form is being completed by the authority and also by the Department for Communities and Local Government as the data are received and stored.

Finally, the release document, once prepared, is also subject to intensive peer review before being cleared as fit for the purposes of publication.

Revisions policy

This policy has been developed in accordance with the UK Statistics Authority Code of Practice for Official statistics and the Department for Communities and Local Government Revisions Policy (found at <https://www.gov.uk/government/publications/statistical-notice-dclg-revisions-policy>). There are two types of revisions that the policy covers:

Non-Scheduled Revisions

Where a substantial error has occurred as a result of the compilation, imputation or dissemination process, the statistical release, live tables and other accompanying releases will be updated with a correction notice as soon as is practical.

A non-scheduled revision was made on the 11 July 2016 to the original statistical release, originally published on 29 June 2016. This was due to revisions relating to arrears data relating to non-domestic rates made by Worthing and Wychavon district councils. These revisions are indicated with (R) where applicable both in the Table 8 of this release and the accompanying local authority data on the web.

Scheduled Revisions

At time of publication there are no scheduled revisions for this series.

Background notes

This Statistical Release can be found at the following web address:

<https://www.gov.uk/government/collections/council-tax-statistics>

Timings of future releases are regularly placed on the Department's website,

<https://www.gov.uk/government/publications/uses-of-local-authority-spending-and-finance-data>

For a fuller picture of recent trends in local government finance, readers are directed to the latest edition of *Local Government Finance Statistics England* which is available from the Department for Communities and Local Government website:
