### **Home Office Responsible Statistician:**

Damon Wingfield, Director of Crime and Policing Statistics.

Contact via [crimeandpolicestats@homeoffice.gsi.gov.uk](mailto:crimeandpolicestats@homeoffice.gsi.gov.uk) if you have any statistical comments or need any assistance accessing the data.

This statistical bulletin is produced to the highest professional standards and is free from political interference. It has been produced by statisticians working in the Crime and Policing Analysis Unit in accordance with the Home Office's [statement of compliance](#) with the Code of Practice for Official Statistics, which covers Home Office policy on revisions and other matters. The Chief Statistician, as Head of Profession, reports to the National Statistician with respect to all professional statistical matters and oversees all Home Office National Statistics products with respect to the Code, being responsible for their timing, content and methodology.

# 1 Key findings

---

## 1.1 Arrests and outcomes

Arrests for terrorism-related offences fell by a third in the year ending June 2016 compared with the previous year (from 330 to 222 arrests). The number of arrests was less than in the year ending June 2015, but similar to other previous years.

There was a fall in the proportion of those arrested who considered themselves to be British or British dual nationality. This was down to 73% of those arrested for terrorism-related offences in the year ending June 2016, compared with 79% in the previous year.

## 1.2 Court proceedings

In the year ending June 2016, 62 trials were completed by the Crown Prosecution Service Counter Terrorism Division (CPS CTD). Of these, 54 led to a conviction. This was an increase on the previous year, when 50 trials were completed (43 of which led to a conviction).

There was an increase in the number of people receiving longer sentences in the most recent year, with those receiving sentences of between 4 and 10 years increasing from 9 to 21, and the number of life sentences given increasing from 1 to 7. The number of individuals receiving a sentence of less than 4 years fell by from 27 to 20.

## 1.3 Terrorist and extremist prisoners

As at 30 June 2016, there were 165 persons in custody for terrorism-related offences and domestic extremism/separatism. This was a fall from 184 in custody as at 30 June 2015.

The fall was driven by a reduction in the number of persons in custody for domestic extremism/separatism, which fell from 48 to 13 over the same period. The number of individuals in custody for international terrorism has shown a steady increase in recent quarters.

## 1.4 Other police powers under the Terrorism Act 2000

In the year ending June 2016:

- the Metropolitan Police Service (MPS) carried out 552 stops and searches under section 43 of the Terrorism Act (TACT) 2000, an increase of 26% compared with the previous year
- 12% of these searches led to an arrest, up from 8% in the previous year
- there were over 23,500 examinations carried out under Schedule 7 to TACT 2000, a fall of 23% compared with the previous year

## 2 Introduction

---

### 2.1 National Statistics Status

This publication has recently been assessed by the United Kingdom Statistics Authority (UKSA) and, as a result, the UKSA designated these as National Statistics in May 2016. This means that these statistics meet the highest standards of trustworthiness, impartiality, quality and public value, and are fully compliant with the [Code of Practice for Official Statistics](#). As part of the assessment process, the Home Office has reviewed and improved the [user guide](#) that accompanies this release. This now contains more details about the strengths and limitations of the various datasets within the publication, as well as the steps taken to engage with users. Further details on the assessment process can be found on the [UKSA website](#).

### 2.2 Overview

This release covers the use of police powers under terrorism and terrorism-related legislation in Great Britain in the most recent 9 quarters to June 2016. The release is broken down into 4 sections.

The **Arrests and outcomes** section uses data provided by the National Counter Terrorism Policing Functions Command (NCTPFC) and includes statistics for **Great Britain** on:

- arrests for terrorism-related activity and outcomes (such as charges and convictions) following arrests
- the legislation used to bring charges and convictions
- gender, age, ethnicity, and nationality of those arrested, charged and convicted
- the type of terrorism involvement of those arrested, charged and convicted (such as whether the individual had links to international, domestic, or Northern Ireland-related terrorism)

A flow chart summarising this section can be found in [Annex A](#).

The **Court proceedings** section uses data from the Crown Prosecution Service (CPS) and includes statistics for **England and Wales** on:

- the number of persons proceeded against by the CPS for terrorism-related activity
- the legislation under which persons have been prosecuted and convicted
- the sentence length given to those convicted for terrorism-related offences

The **Terrorist and extremist/separatist prisoners** section uses data from the National Offender Management Service (NOMS) and the Scottish Prison Service (SPS) and includes statistics for **Great Britain** on:

- the number of persons in custody for domestic extremism and terrorism-related offences
- the ethnicity, nationality and religion of those in custody
- the number of persons released from custody

The **Other police powers under the Terrorism Act 2000** section uses data provided by the Metropolitan Police Service (MPS) and the National Counter Terrorism Policing Headquarters (NCTPHQ), and includes statistics on:

- the number of stops and searches carried out by the **MPS** under s.43 of the Terrorism Act (TACT) 2000
- the number of examinations and subsequent detentions made in **Great Britain** under Schedule

7 to TACT 2000

- data on goods examinations, strip searches and postponement of questioning refusals under Schedule 7 to TACT 2000

The [user guide](#) provides further details on this release. It includes details on the strengths and limitations of the datasets, as well as the quality assurance processes involved in ensuring that the data meet the highest possible standard. It also includes a summary of the criminal justice process, a glossary of terms used in the publication, and more detailed information about the legislation and categories mentioned in this release.

A flow chart summarising the **Arrests and outcomes** section of this release can be found in [Annex A](#).

## 3 Arrests and outcomes

---

### 3.1 Introduction

Statistics presented in this section represent the number of persons arrested by police in Great Britain, where there is suspicion of involvement in a terrorism-related offence, either at the time of arrest or at a subsequent point in the investigation. In some cases, evidence may emerge after a terrorism-related arrest that suggests a suspect does not have links to terrorist activity, but has committed a non-terrorism-related offence. These cases are included in the data as non-terrorism-related charges and/or convictions.

Outcomes following arrests for terrorism-related offences are also included in the statistics and show the number of arrests that led to a charge or prosecution, as well as other outcomes. Demographic information about those arrested, charged and convicted is also provided in this section. All data in this section are based on the date of arrest. This allows users to see the outcomes of all of the arrests in a specific period (such as how many led to a charge and conviction).

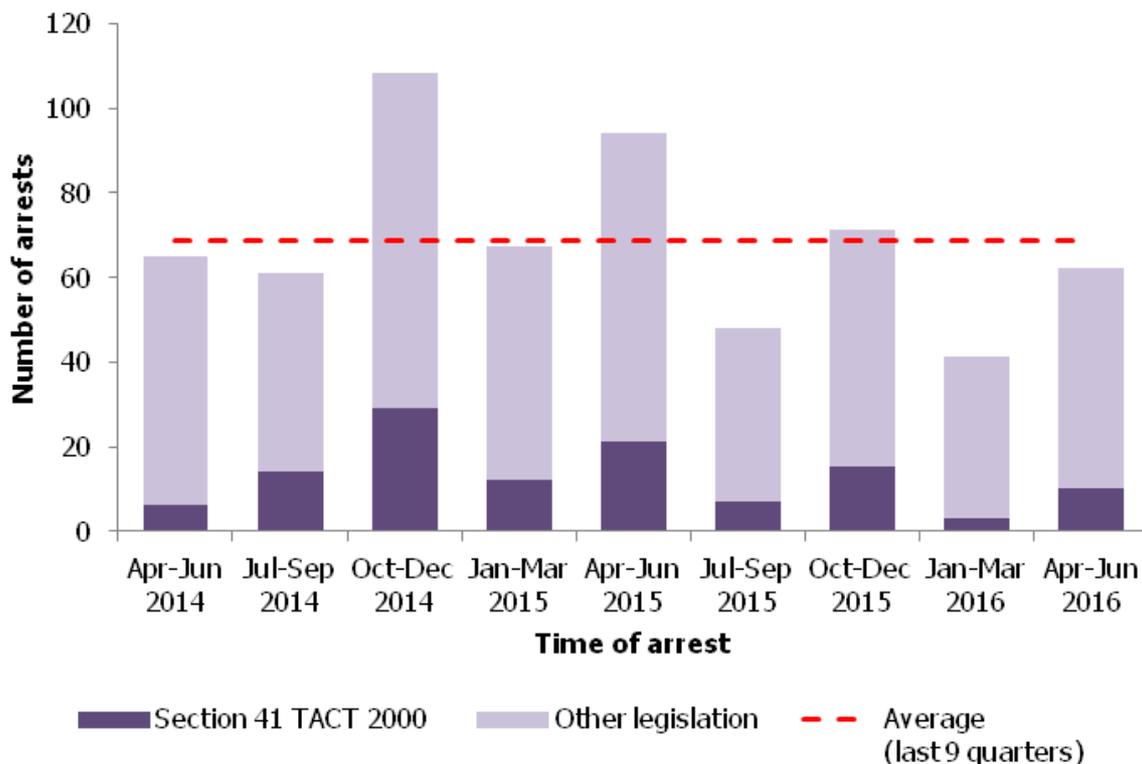

As cases progress over time, figures are likely to change. This is particularly relevant for more recent time periods where a larger number of cases will be incomplete ('released on bail' or 'awaiting prosecution'). While the effect on the arrests total should be minimal, the number of charges and convictions will be lower for more recent quarters as a greater number of cases would not have reached the point of charge or conviction yet. Figures for these quarters will increase in future publications as more cases are completed.

Data are provided to the Home Office by the NCTPFC and are taken from a live database. This section includes quarterly breakdowns of the data from the 9 quarters to June 2016, as well as totals since 11 September 2001 (when the data collection began). The data are correct as at the time of provision to the Home Office (27 July 2016).

A flow chart summarising this section is included in [Annex A](#). This follows individuals from the point of arrest through to charge (or other outcome) and prosecution. [Data tables A.01 to A.13](#) include data on arrests and outcomes.

### 3.2 Arrests

In the year ending June 2016, there were 222 arrests for terrorism-related offences in Great Britain, a fall of a third compared with the 330 arrests in the previous year. This reflects a particularly high number of arrests in two of the quarters in the year to June 2015 (rather than a low number of arrests in the most recent year), and sees the number of arrests return to levels similar to those in other previous years.

Figure 3.1: Arrests for terrorism-related offences, by legislation, Great Britain<sup>1</sup>

Source: NCTPFC (see [data table A.01](#)).

**Notes:**

1. 'Other legislation' includes arrests under non-terrorism legislation, such as the Police and Criminal Evidence Act 1984.

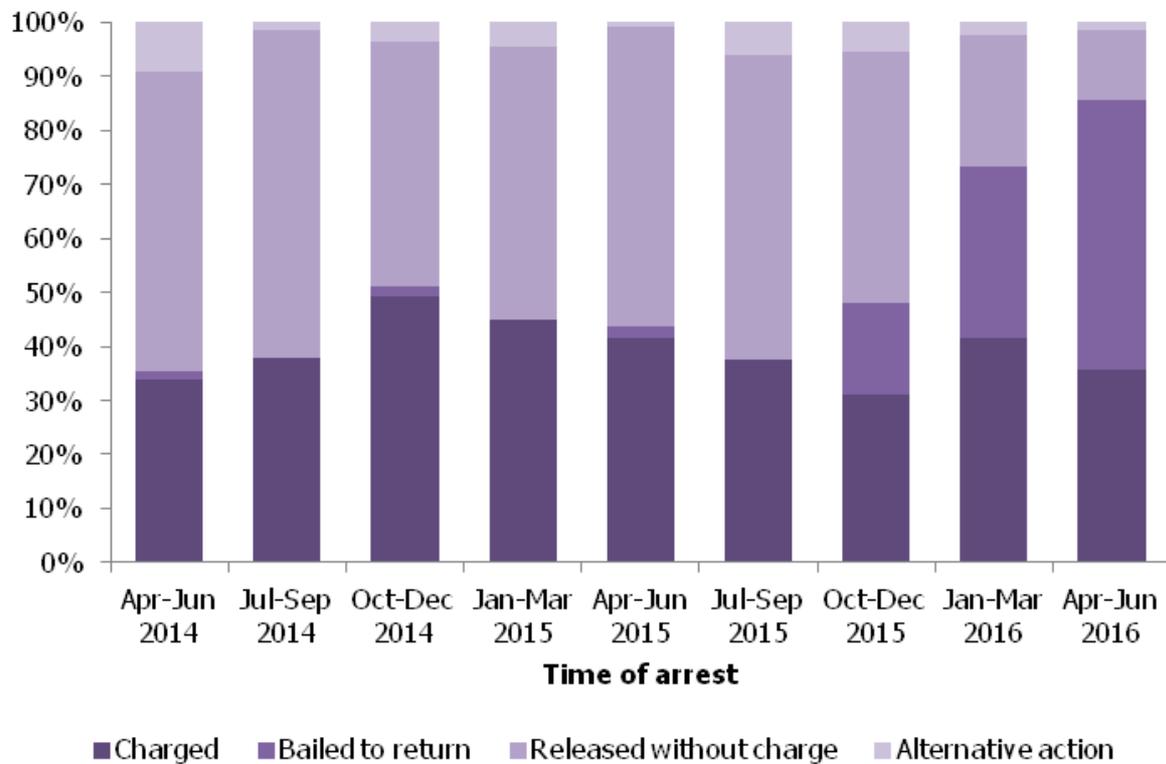

### 3.3 Charges

In line with the normal procedures for criminal justice statistics, each suspect has been classified in terms of a single principal offence. This means that when an individual is charged with a number of offences at the same time, they are recorded only against the most serious one – usually the one that carries the highest penalty. This means that the figures count the number of individuals charged, rather than the number of individual offences committed that led to a charge. Further details of the legislation under which persons have been charged following an arrest for a terrorism-related offence can be found in [data tables A.05a-c](#).

Of the 222 arrests for terrorism-related offences in the year ending June 2016, 79 resulted in a charge (63 terrorism-related and 16 non-terrorism-related) and in 78 cases the individual was released without charge. In a further 56 cases, the arrestee was released on bail pending further investigation.

More recent quarters have a larger proportion of cases where individuals have been bailed to return. This is shown in Figure 3.2. As time progresses, these cases will eventually lead to a charge, release, or alternative action, and as a result charge rates will change over time. Until all cases in a given period are complete, caution should be taken when comparing charge rates over time.

**Figure 3.2: Charging outcomes following an arrest for a terrorism-related offence, Great Britain**

**Source:** NCTPFC (see [data table A.03](#)).

**Notes:**

1. 'Alternative action' includes cautions for non-TACT offences, detentions under the mental health act, recall to prison, etc.
2. 'Bailed to return' includes those released on bail pending further investigation, and those who have absconded from bail.

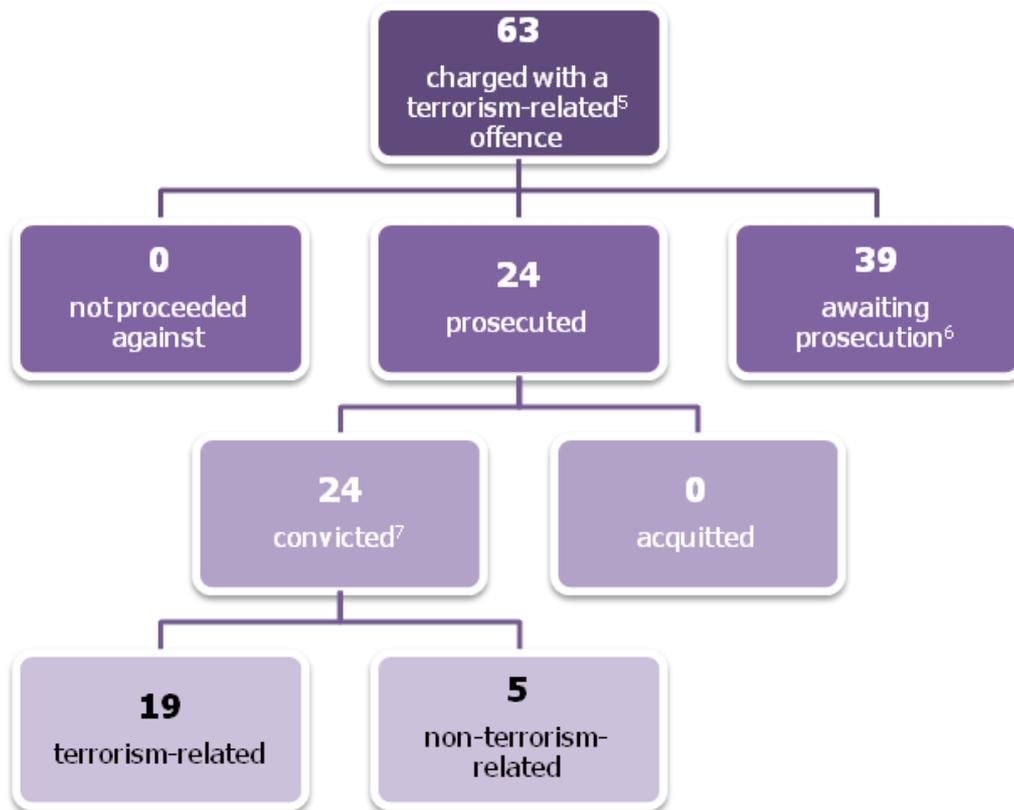

Of the 79 charges resulting from an arrest in the year ending June 2016, 80% (63) were for a terrorism-related offence, a fall compared with 89% in the year ending June 2015. As a number of cases are still incomplete, these proportions are likely to change as cases progress.

### 3.4 Prosecutions

As with the data on charges, prosecutions data are also based on the principal offence rule. Where an individual is prosecuted for more than one offence at a time, they are classified in terms of a single offence – usually the most serious. Further details of the legislation under which persons have been convicted following a charge for a terrorism-related offence can be found in [data tables A.08a-c](#).

Of the 63 persons charged with a terrorism-related offence in the year ending June 2016, 24 have been prosecuted (as at the time of data provision to the Home Office – 27 July 2016), all of which were found guilty. A further 39 were awaiting prosecution.

Figure 3.3: Outcomes following a charge for a terrorism-related offence, Great Britain, year ending June 2016<sup>1,2,3,4</sup>

Source: NCTPHQ (see [data table A.06c](#)).

**Notes:**

1. Based on time of arrest.
2. A more detailed flow chart can be found in [Annex A](#).
3. Data presented are based on the latest position with each case as at the date of data provision from NCTPFC (27 July 2016).
4. The chart does not include outcomes following non-terrorism-related charges.
5. Terrorism-related charges and convictions include some charges and convictions under non-terrorism legislation, where the offence is considered to be terrorism-related.
6. Cases that are 'awaiting prosecution' are not yet complete. As time passes, these cases will eventually lead to a prosecution, 'other' outcome, or it may be decided that the individual will not be proceeded against.
7. Excludes convictions that were later quashed on appeal.

### 3.5 Demographics of persons arrested

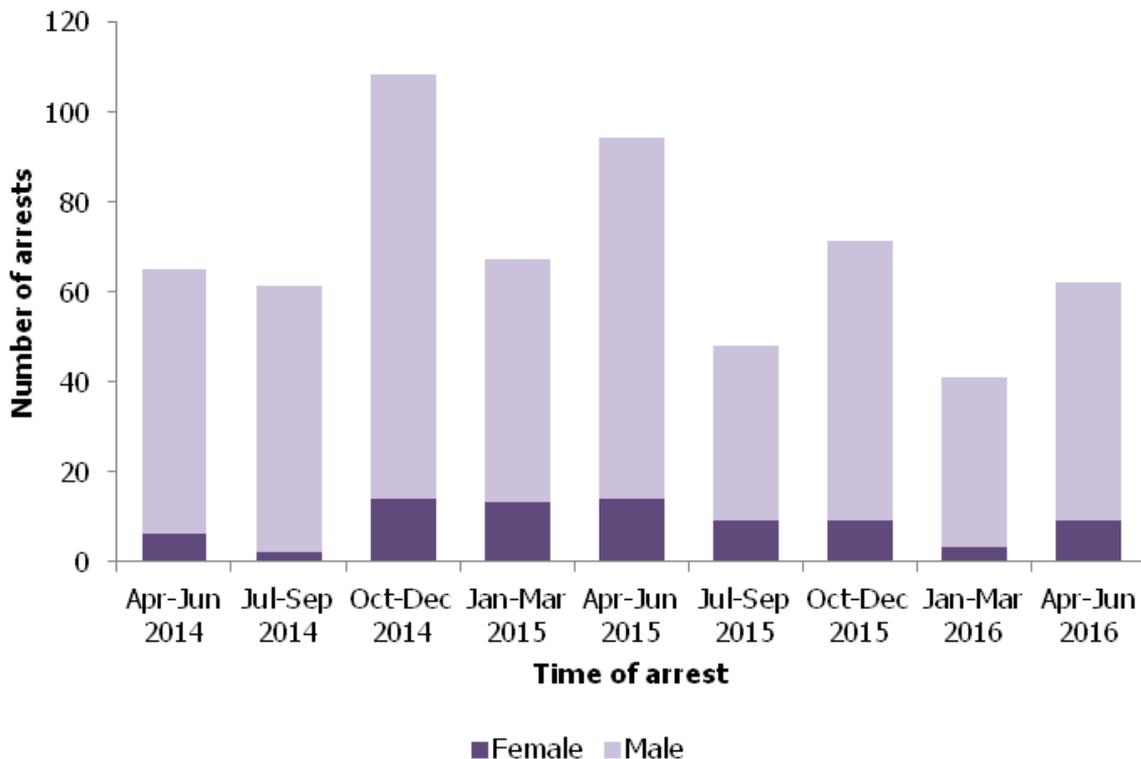

This section includes statistics on the number of persons arrested by different demographic characteristics as well as terrorist categorisation. It includes data on:

- gender
- age
- ethnic appearance
- nationality
- terrorist category

## Gender

In the year ending June 2016, 30 females were arrested for terrorism-related offences, which accounted for 14% of all arrests. This was 1 percentage point higher than the previous year, in which females accounted for 13% of all arrests for terrorism-related offences. Although females accounted for a slightly higher proportion of arrests, the number of arrests was 13 fewer than in the previous year. This fall was broadly in line with the overall fall in arrests.

**Figure 3.4: Arrests for terrorism-related offences by sex, Great Britain**

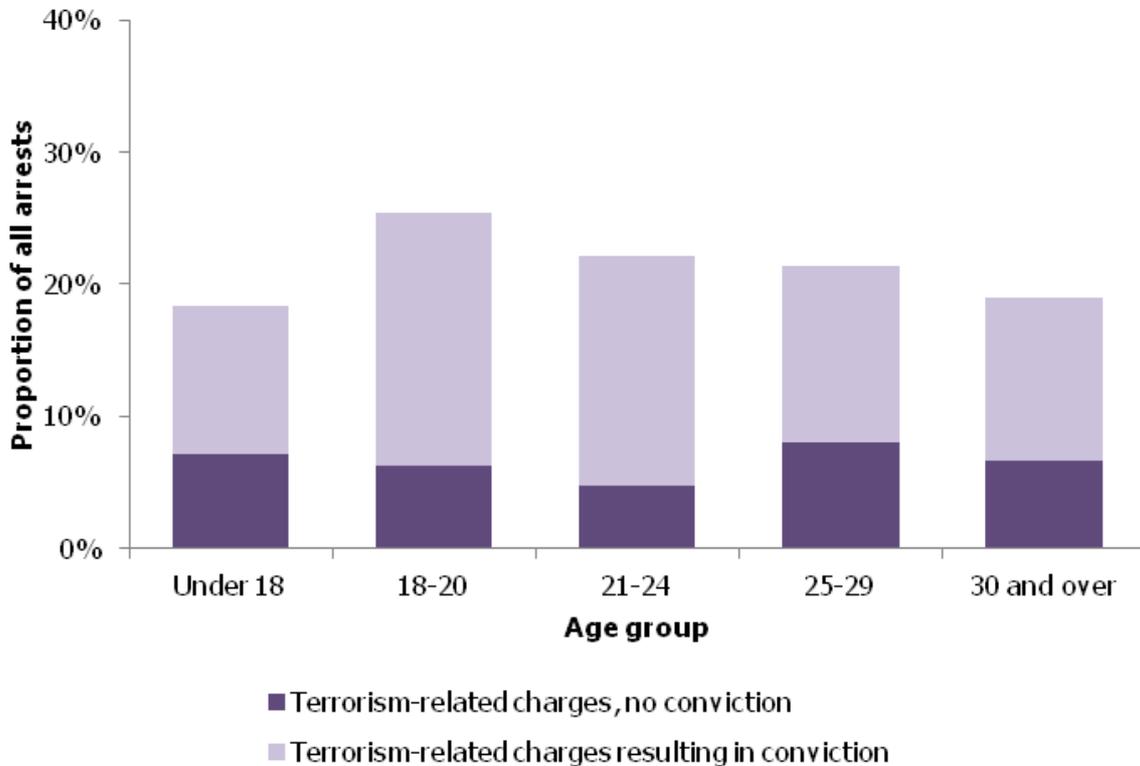

Source: NCTPFC (see [data table A.09](#)).

## Age

In the year ending June 2016, there were falls in the number of arrests across all age groups – except under 18s (which remained the same) – compared with the previous year. The falls were in line with the overall fall in the number of arrests. As with the previous year, the 30 and over age group accounted for the most arrests (52%).

Conviction rates are generally higher for younger age groups. While around two-thirds of those charged with a terrorism-related offence since 11 September 2001 have been convicted, this rate was higher for the 18 to 20 age group and the 21 to 24 age group, which saw 76% and 79% of terrorism-related charges lead to a conviction, respectively.

**Figure 3.5: Proportion of arrests by age group for terrorism-related offences since 11 September 2001<sup>1</sup> that have led to a terrorism-related charge, and subsequently a conviction, Great Britain**

**Source:** NCTPFC (see [data table A.10](#)).

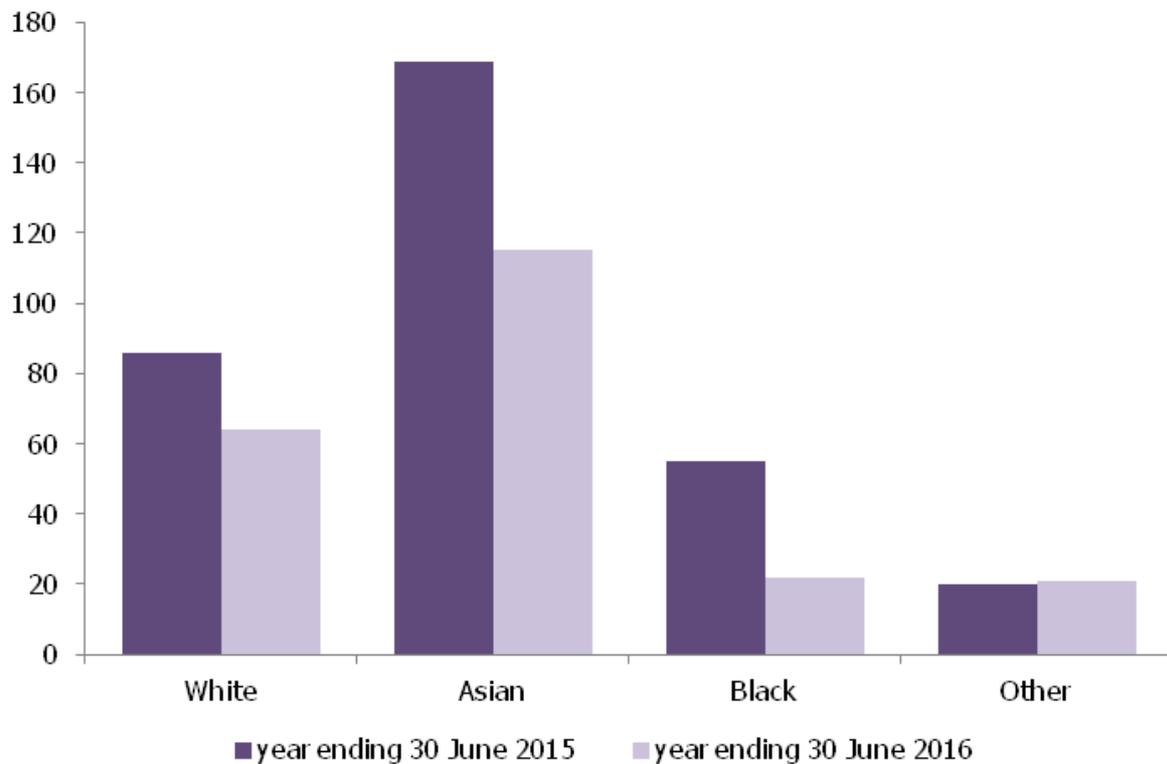

**Notes:**

1. When the current data collection began.

### Ethnic appearance

The number of arrests fell across all ethnic groups – except the ‘other’ group, which increased by 1 in the year ending June 2016 – compared with the previous year. The biggest numerical fall was seen for those of Asian ethnic appearance, which fell by 54 arrests. However, those of Black ethnic appearance saw the largest percentage fall (60%).

**Figure 3.6: Ethnic appearance of persons arrested for terrorism-related offences, year ending June 2016 compared with year ending June 2015**

**Source:** NCTPFC (see [data table A.11](#)).

### Nationality

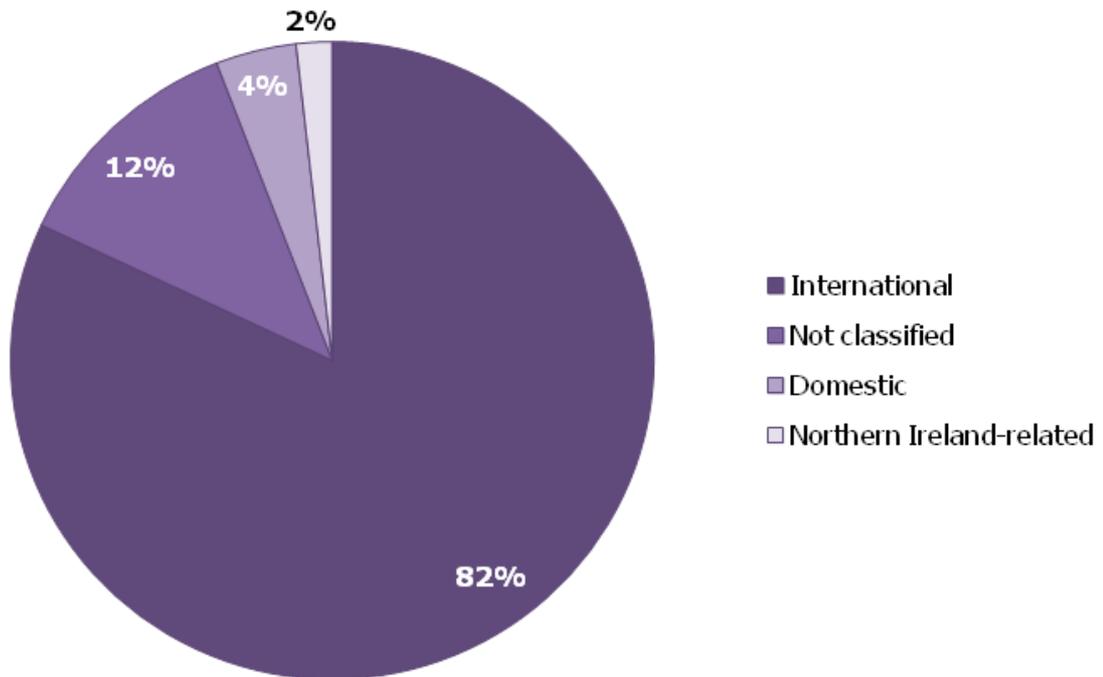

Just under three-quarters (73%) of those arrested in the year ending June 2016 considered themselves to be of British or British dual nationality. This was down 6 percentage points compared with the previous year. Since 11 September 2001 (when the data collection began), 56% of those arrested were of British or British dual nationality.

### Terrorist category

When an individual is arrested, they are categorised according to the type of terrorism they are involved in. They may be categorised as either 'international', 'domestic', 'Northern Ireland-related' or 'not classified'. Definitions for each of these categories can be found in the [user guide](#).

In the year ending June 2016, the number of persons arrested for international terrorism fell by 28% (from 252 arrests to 182) compared with the previous year. Across the same period, the number of persons arrested for domestic terrorism fell from 30 to 9. The number of persons arrested for Northern Ireland-related terrorism was 4 – the same as the previous year.

Figure 3.7: Proportion of persons arrested by terrorism category, year ending June 2016, Great Britain

Source: NCTPFC (see [data table A.13](#)).

### 3.6 Data tables

Additional data are available in the [data tables](#) which accompany this release. These include more detailed breakdowns of the data in this section, as well as data on:

- detentions under section 41 of TACT 2000 [table A.02](#)
- the legislation under which persons were charged [table A.05a-c](#)
- the legislation under which persons were convicted [tables A.08a-c](#)

# 4 Court proceedings

## 4.1 Introduction

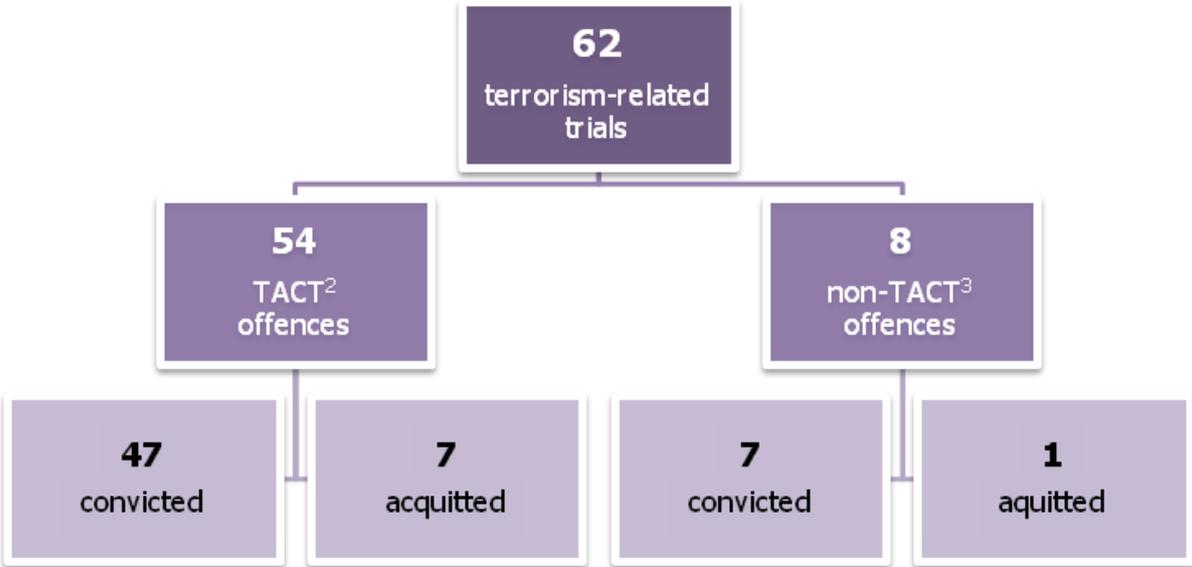

This section presents statistics on prosecutions for terrorism-related offences in England and Wales. It provides data on the number of persons prosecuted and convicted, including information on the legislation against which they were prosecuted. It also provides information on the length and type of sentence that each defendant faces. Data in this section are based on the trial completion date and are not directly comparable to the prosecutions data in the arrests and outcomes chapter (Section 3).

Data are provided to the Home Office by the Crown Prosecution Service Counter Terrorism Division (CPS CTD). The data cover terrorism-related court cases that were completed in the last 9 quarters up to June 2016.

## 4.2 Court proceedings

In the year ending June 2016, there were 62 trials completed by the CPS CTD for terrorism-related offences. This was 12 more than the 50 trials completed in the previous year and was in part driven by a high number of trials between October and December 2015 and April to June 2016. Of the 62 persons proceeded against, 54 (87%) were convicted; the defendant was acquitted in the remaining 8 cases.

**Figure 4.1: Outcome of terrorism-related trials under TACT and non-TACT legislation, year ending June 2016, England and Wales**

Source: CPS CTD (see [data tables C.01-C.03](#)).

**Notes:**

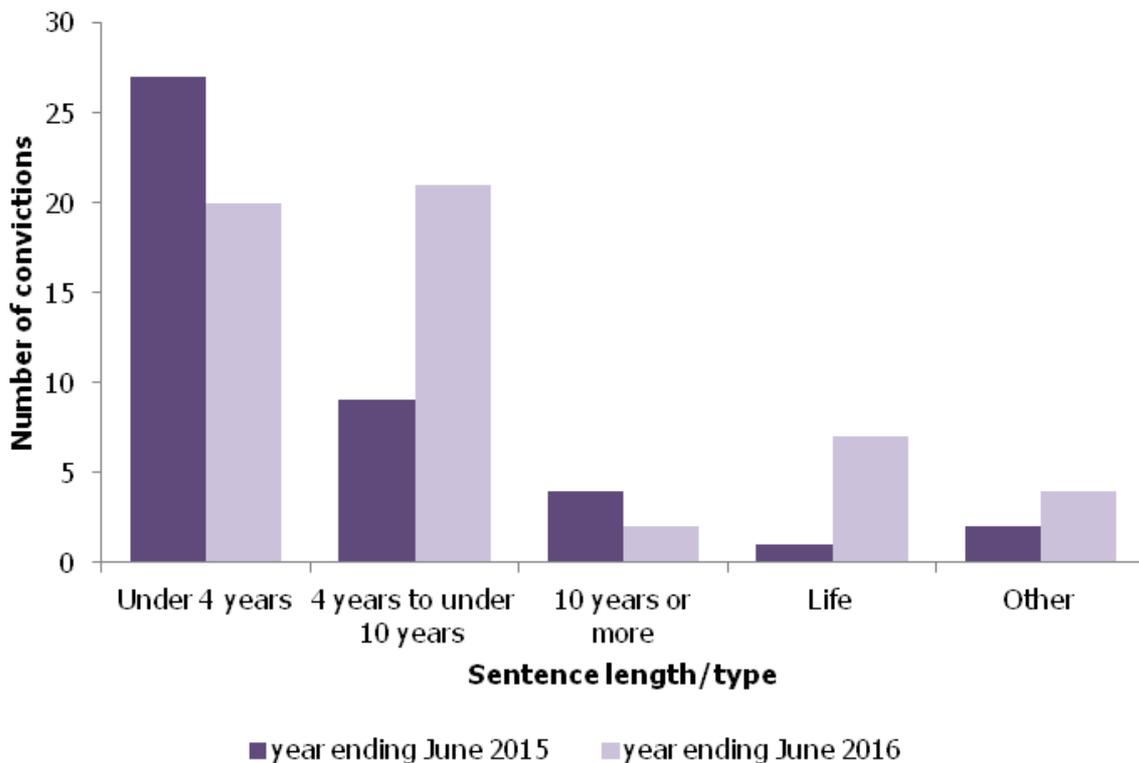

- 1. Based on the principal offence for which the defendant was prosecuted against.
- 2. TACT offences include offences specifically under terrorism-legislation.
- 3. Non-TACT offences include offences under non-terrorism-specific legislation.
- 4. Can include trials ending in a hung jury, or where the prosecution offered no evidence.

### 4.3 Sentencing

Of the 54 persons convicted, 22 pleaded guilty and 32 entered a not-guilty plea. In the previous year, 27 of the 43 persons convicted entered a guilty plea.

There has been an increase in the length of sentences in the most recent year. The biggest increase was in the number of individuals sentenced for between 4 and under 10 years, which increased from 9 in the year ending June 2015 to 21 in the year ending June 2016. The number of individuals who received a life sentence also increased from 1 to 7.

**Figure 4.2 Sentence length for persons convicted of terrorism-related offences, year ending June 2015 and June 2016, England and Wales**

**Source:** CPS CTD (see [data table C.04](#)).

**Notes:**

1. Based on the trial completion date.
2. The 'other' category includes hospital orders and non-custodial sentences.

### 4.4 Data tables

Additional data are available in tables [C.01 to C.04](#) which accompany this release. These include more detailed breakdowns of the data in this section, as well as data on:

- the legislation under which persons were proceeded against [table C.02](#)
- the legislation under which persons were convicted [table C.03](#)

## 5 Terrorist and extremist/separatist prisoners

---

### 5.1 Introduction

Statistics presented in this section give information on the number of persons in custody for terrorism-related offences and domestic extremism/separatism in Great Britain. It includes breakdowns of the ethnicity, nationality and religion of prisoners at a given time. Data on the number of terrorist and extremist/separatist prisoners released from custody are also available in this section.

Data are provided to the Home Office by NOMS and the SPS. The data give information about the prison population at the end of the last 9 quarters to June 2016. Data on the number of prisoners released are also provided and cover the 8 quarters to March 2016. Figures up to June 2016 are not yet available from NOMS. These figures will form a subset of the prison releases statistics which will be published by the Ministry of Justice in their [Offender Management Statistics Quarterly](#) release in October 2016.

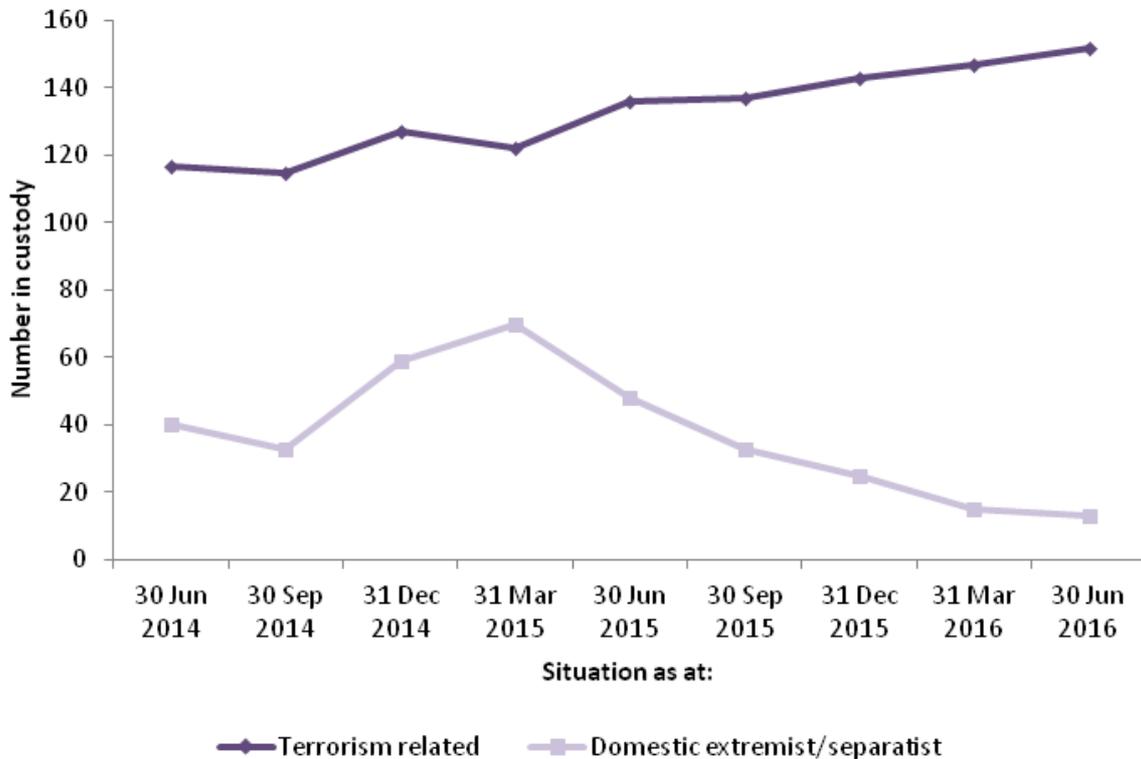

### 5.2 Persons in custody

As at 30 June 2016, there were 165 persons in custody in Great Britain for both terrorism-related (152) and domestic extremism/separatism (13) offences.

Of those in custody, the majority (84%) had been convicted. The remaining 16% were being held on remand (held in custody until a later date when a trial or sentencing hearing will take place).

The 165 prisoners in custody for terrorism-related and domestic extremism/separatism offences at 30 June 2016 was a decrease on the 184 persons in custody as at 30 June 2015. This fall was driven by a large reduction in the number of domestic extremist/separatist prisoners (which fell from 48 to 13). The number of persons in custody for offences under terrorism legislation continued to rise.

**Figure 5.1: Number of persons in custody for terrorism-related offences and domestic extremism/separatism, Great Britain**

**Source:** NOMS and SPS (see [data table P.01](#)).

### 5.3 Persons released from custody

A total of 118 prisoners held for terrorism-related and domestic extremism/separatism offences were released from custody in Great Britain in the year ending 31 March 2016. Of these, 85 (72%) were persons discharged from custody after serving their sentences, many of whom will have been released subject to meeting certain licence conditions.

The majority of the 118 (70) had sentence lengths of less than 4 years. A further 33 were not sentenced, which includes a number of persons held on remand prior to a charge or conviction.

For more details on releases from custody, see the [user guide](#).

### 5.4 Data tables

Additional data are available in [tables P.01 to P.05](#) which accompany this release. These include more detailed breakdowns on:

- the ethnicity, nationality and religion of those in custody [tables P.02 to P.04](#)
- the sentence lengths of those released from custody [table P.05](#)

## 6 Other police powers under the Terrorism Act 2000

---

### 6.1 Introduction

This section presents statistics on the use of stop and search powers available to the police under TACT 2000. It includes data on the number of stops and searches and resultant arrests, carried out by the MPS under s.43 of TACT 2000. It also includes data on the use of powers under Schedule 7 to TACT 2000 in Great Britain. This includes the number of examinations, resultant detentions, sea and air freight examinations, strip searches, and the number of times postponement of questioning was refused.

Data on s.43 stop and search are provided to the Home Office by the MPS. Data on Schedule 7 are provided to the Home Office by the NCTPHQ. This section covers the use of these powers in each of the last 9 quarters up to June 2016.

The police have the power to stop and search individuals under s.47A (previously 44) of TACT 2000. However, since the legislation was formally amended in 2011, to significantly raise the threshold for authorisation of the power, there have not been any stops and searches under this power in Great Britain. See the [user guide](#) for more details.

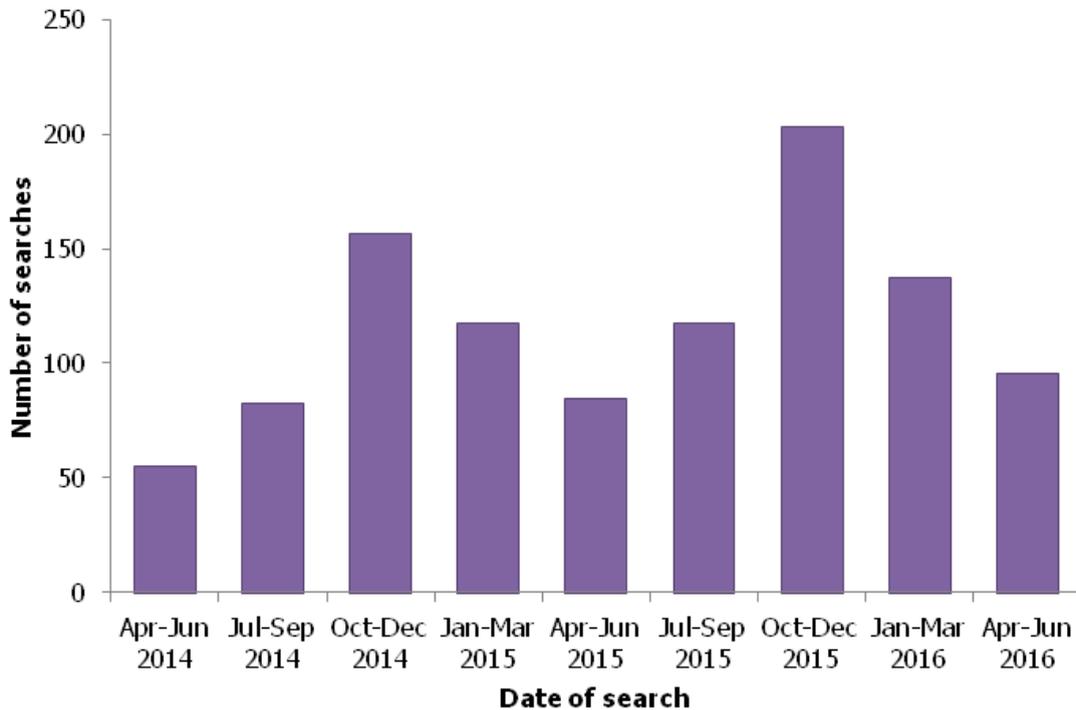

### 6.2 Stop and search under the Terrorism Act 2000

Section 43 of TACT 2000 allows a constable to stop and search a person whom he/she reasonably suspects to be involved in terrorist activity. As many forces are unable to separate s.43 TACT stops and searches from other stops and searches, this section includes data from the MPS only and excludes 'vehicle only' stops and searches.

In the year ending June 2016, 552 persons were stopped and searched by the MPS under s.43 of TACT 2000. This represents a rise of 26% on the previous year's total of 439. Across the same period, the number of resultant arrests has almost doubled, from 33 to 64. This has led to an increase in arrest rate from 8% in the year ending June 2015 to 12% in the latest year.

Details on the overall use of stop and search in England and Wales up to the year ending 31 March 2015 can be found in the Home Office [police powers and procedures, England and Wales](#) statistical release. The MPS also publish monthly [reports](#) on the wider use of stop and search within the force.

Figure 6.1: Stops and searches under s.43 of TACT 2000, MPS

Source: MPS (see [data table S.01](#)).

**Notes:**

1. Excludes 'vehicle only' searches.

The number of stops increased across all ethnic groups, except for those who considered themselves to be White (which fell by 8%). The largest numerical increase was of searches on those who considered themselves to be Asian, which increased by 41% (or 45 searches).

### 6.3 Schedule 7 to the Terrorism Act 2000

Under Schedule 7 to TACT 2000, an examining officer has a number of powers, the uses of which are covered in this section. These include:

- examinations of persons and resultant detentions
- goods examinations
- strip searches
- refusals to postpone questioning

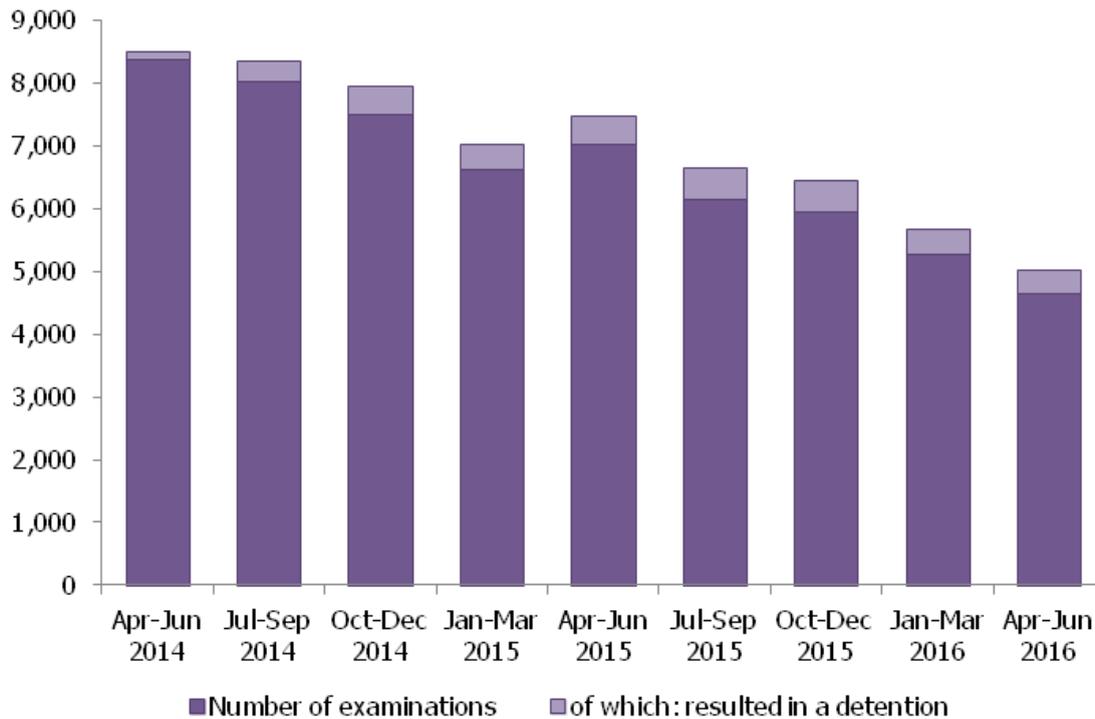

#### Examinations and resultant detentions

An examining officer may stop and question individuals entering or leaving the country through ports, airports, international rail stations and the border area. When necessary they may also detain and search individuals. The aim is to determine whether that person appears to be someone who is or has been concerned in the commission, preparation or instigation of acts of terrorism.

In the year ending June 2016, a total of 23,717 persons were examined under this power in Great Britain, a fall of 23% on the previous year. This has resulted from a gradual decline in the use of the power each quarter over the last couple of years.

Throughout the same period, the number of detentions following examinations increased by 7%, from 1,649 in the year ending June 2015 to 1,760 in the year ending June 2016. The increase in the number of detentions follows the introduction of the Anti-social Behaviour, Crime and Policing Act 2014 in August 2014, which amended the powers under Schedule 7 to TACT 2000 to ensure that a mandatory detention takes place where an examination lasts for more than an hour.

**Figure 6.2: Number of Schedule 7 examinations and resultant detentions, Great Britain**

**Source:** NCTPHQ (see [data table S.04](#)).

In the year ending June 2016, examinations on those who were of 'White' ethnicity accounted for 28% of all examinations (excluding those where ethnicity was not stated). This was down 7 percentage points on the previous year. The proportion of examinations on those who were of 'Asian or Asian British' or 'Chinese or other' ethnicity increased by 5 and 4 percentage points respectively.

**Table 6.01 Proportion and number of examinations accounted for by each ethnic group, year ending June 2015 compared with year ending June 2016.**

Ethnicity	Year ending June 2015	Year ending June 2016
White	35% (10,187)	28% (6,029)
Asian or Asian British	28% (8,028)	33% (7,179)
Chinese or other	22% (6,355)	26% (5,638)
Black or Black British	8% (2,374)	8% (1,692)
Mixed	6% (1,861)	5% (977)

**Source:** NCTPHQ (see [data table S.04](#)).

**Table Notes:**

1. Excludes cases where ethnicity was 'not stated'.

## 6.4 Other powers under Schedule 7 to the Terrorism Act 2000

The following section includes information on a number of additional powers under Schedule 7 to TACT 2000. This includes:

- goods examinations (sea and air freight)
- strip searches
- postponement of questioning refusals

Data on these powers have been collected by the Home Office since April 2015. Details on each of these powers can be found in the [user guide](#).

In the year ending June 2016:

- a total of 3,855 air freight and 6,390 sea freight examinations were conducted in Great Britain
- there were 7 strip searches carried out under the power
- postponement of questioning (usually to enable an individual to consult a solicitor) was refused 3 times

## 6.5 Data tables

Additional data are available in [tables S.01 to S.04](#) which accompany this release. These include more detailed breakdowns on:

- the ethnicity of those stopped and searched [tables S.02 and S.03](#)
- the use of powers under Schedule 7 to TACT 2000 [table S.04](#)

Statistical Bulletins are prepared by staff in Home Office Statistics under the National Statistics Code of Practice and can be downloaded from GOV.UK:
