10. Median age of lead tenant for General Needs lettings, 2015/16
11. Proportion of General Needs lettings where the lead tenant is unemployed (jobseeker), 2015/16
12. Ratio of existing to new social housing tenants for General Needs lettings in 2015/16

Notes:

All maps have been produced using unweighted but imputed data from CORE for the years 2014/15 and 2015/16; where appropriate. All maps use Social Rent data only, except map 4.

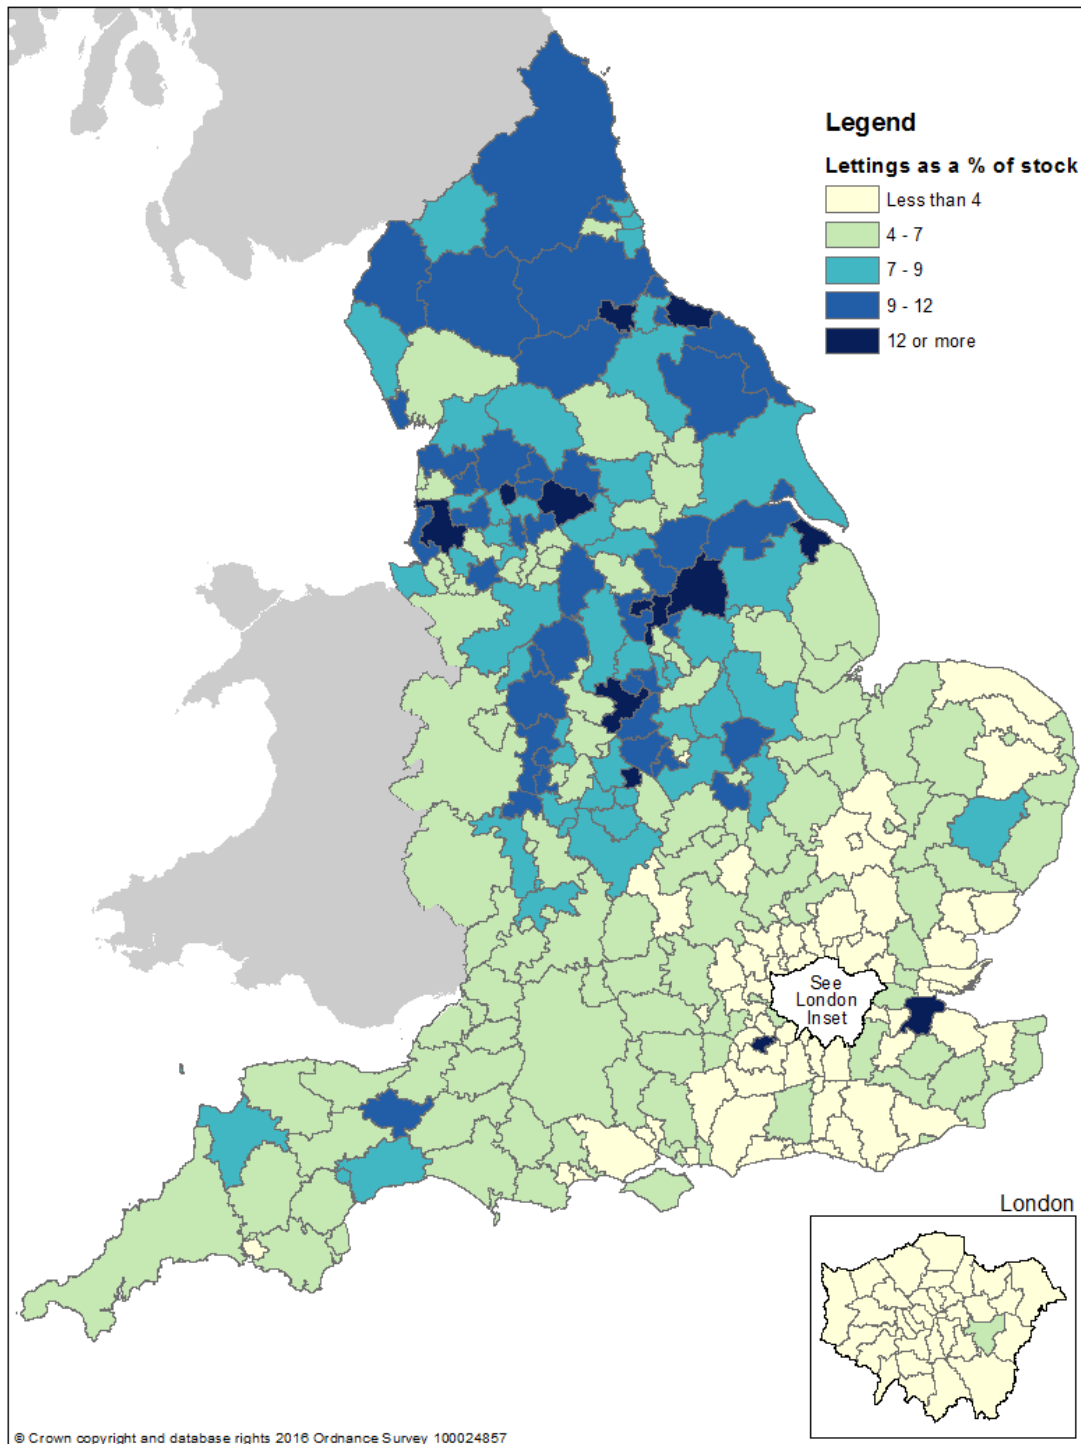

PRP stock is taken from the Homes and Communities Agency Statistical Data Return 2014/15. Local Authority housing stock is taken from DCLG's Live Table 100 and relates to April 2016.

Maps 8, 9, 11 and 12 include cartograms. The cartograms show local authority areas proportional to the number of lettings rather than their physical area.

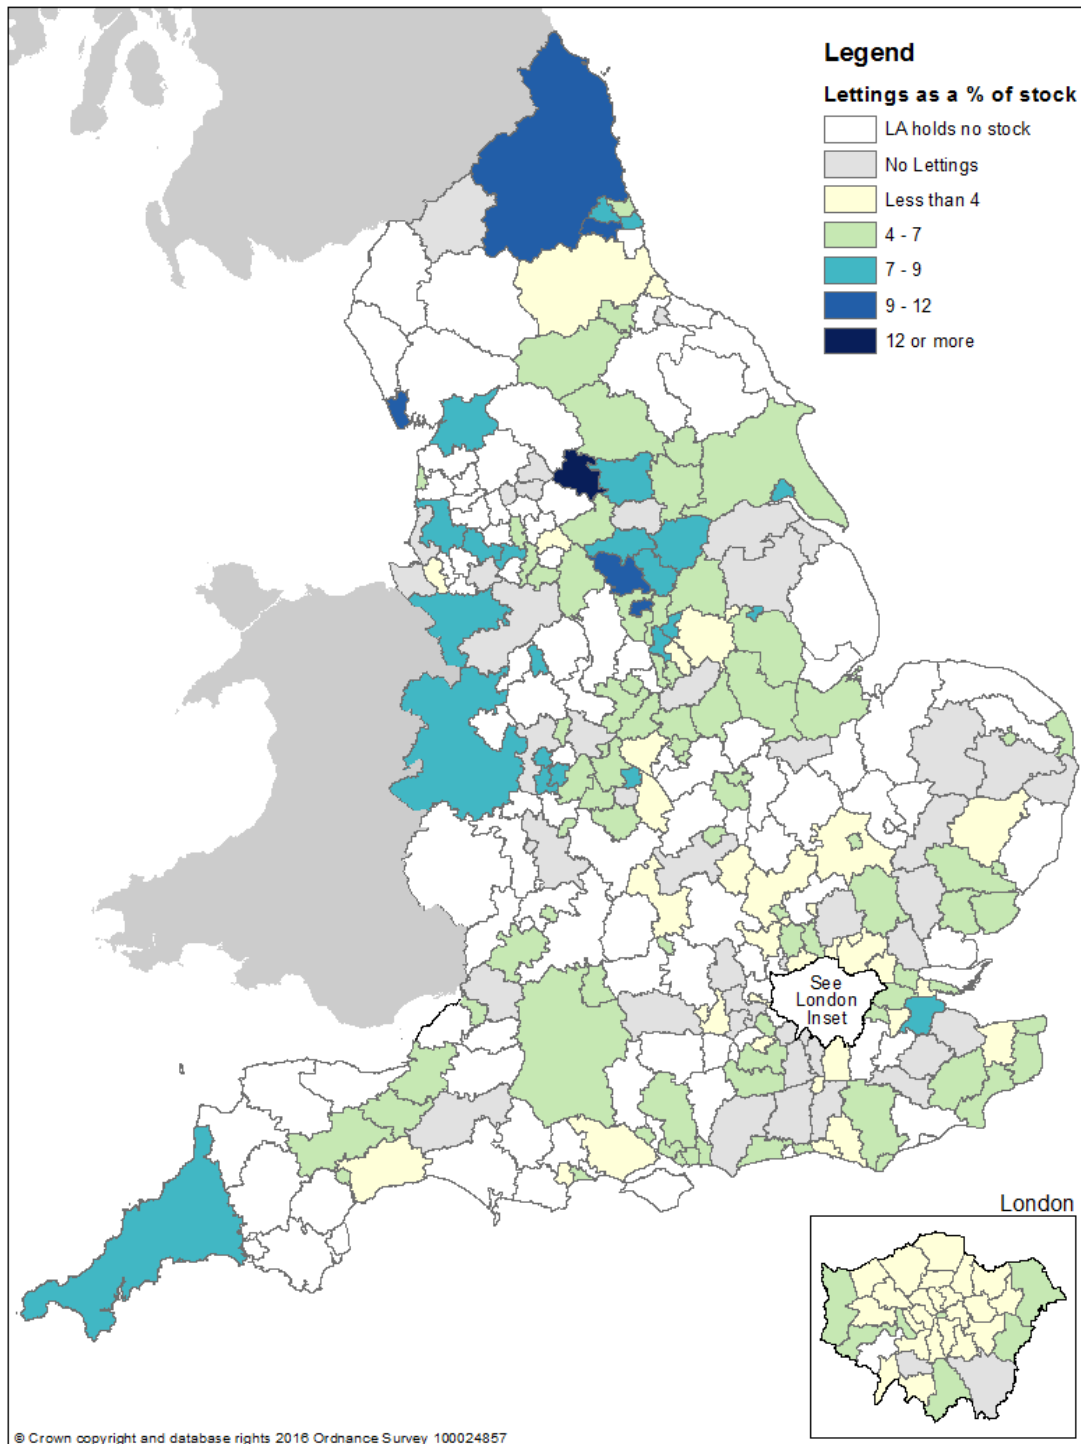

Lead tenant is also referred to as Household Reference Person.

Bands include data up to but not including, the right hand side limit. Category 5-10, for example, includes any data greater than or equal to 5, up to but not including 10. Numbers equal or greater than 10 would be in the above category.

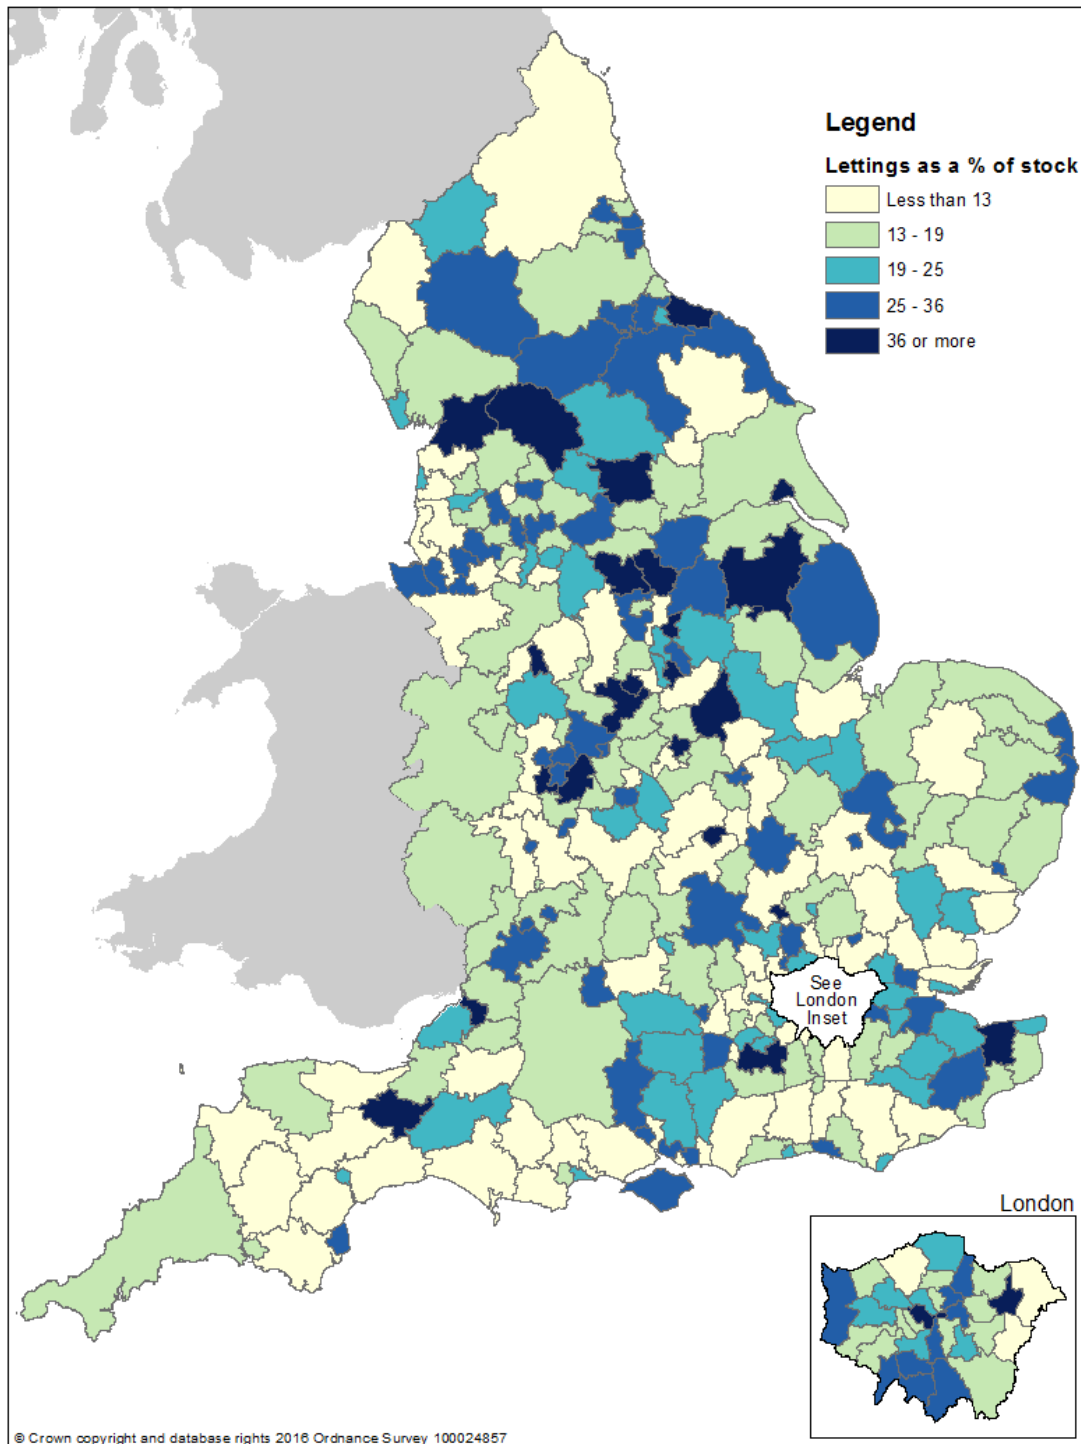

Map 1: Private Registered Provider General Needs lettings as a proportion of PRP GN stock, 2015/16

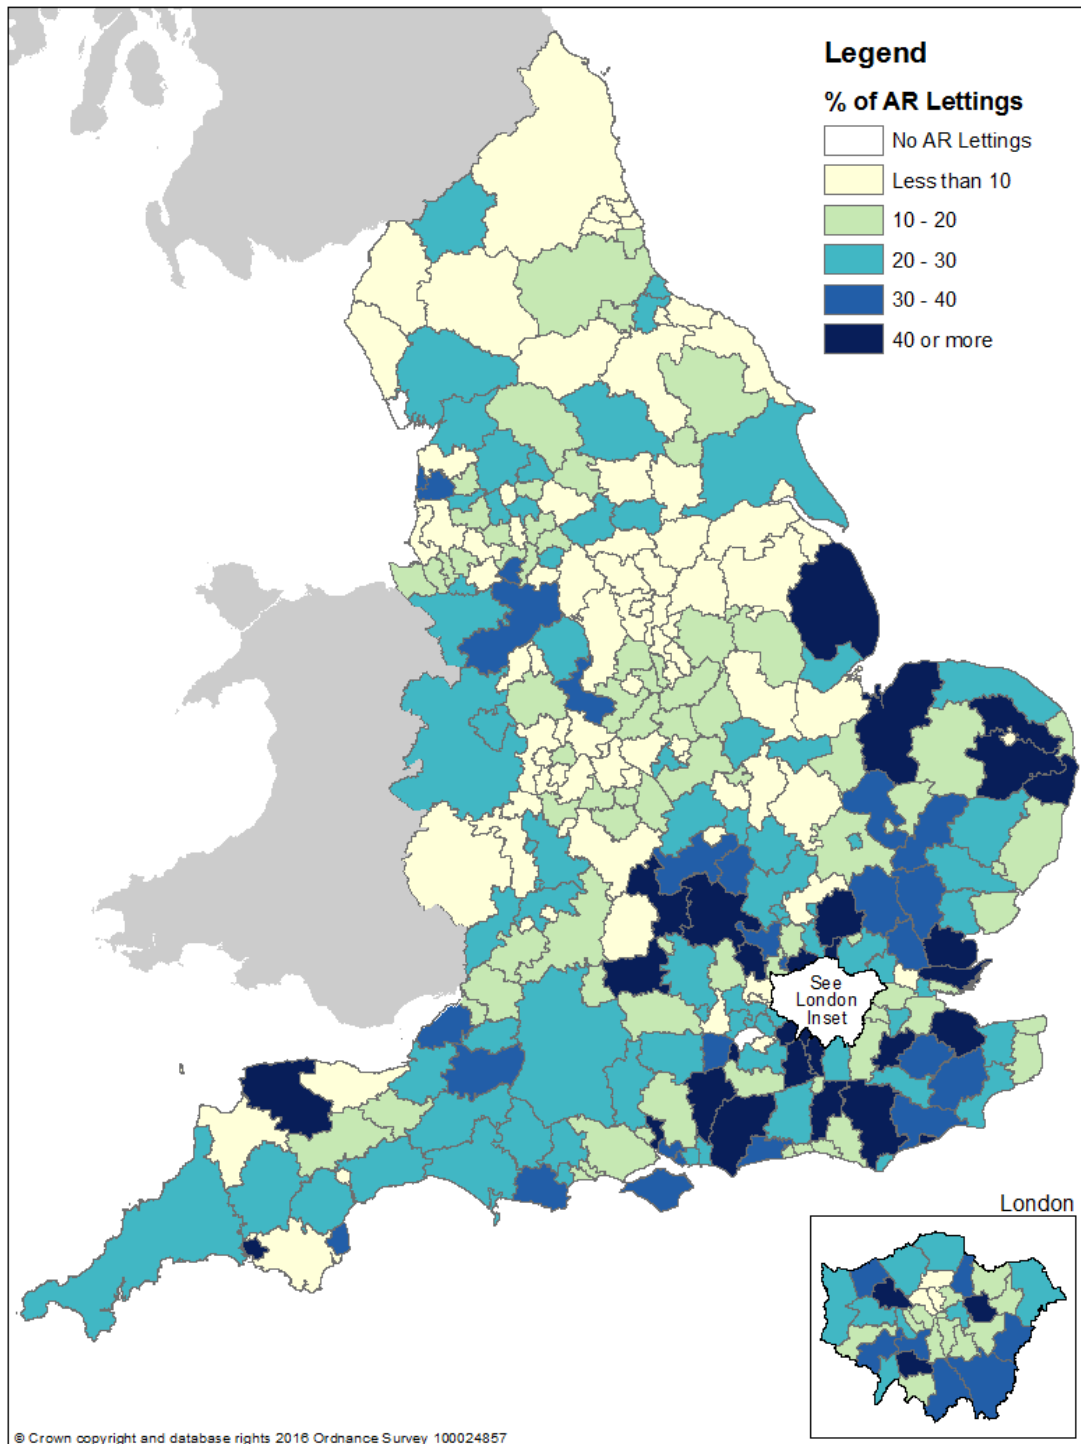

Map 2: Local Authority General Needs lettings as a proportion of LA stock, 2015/16

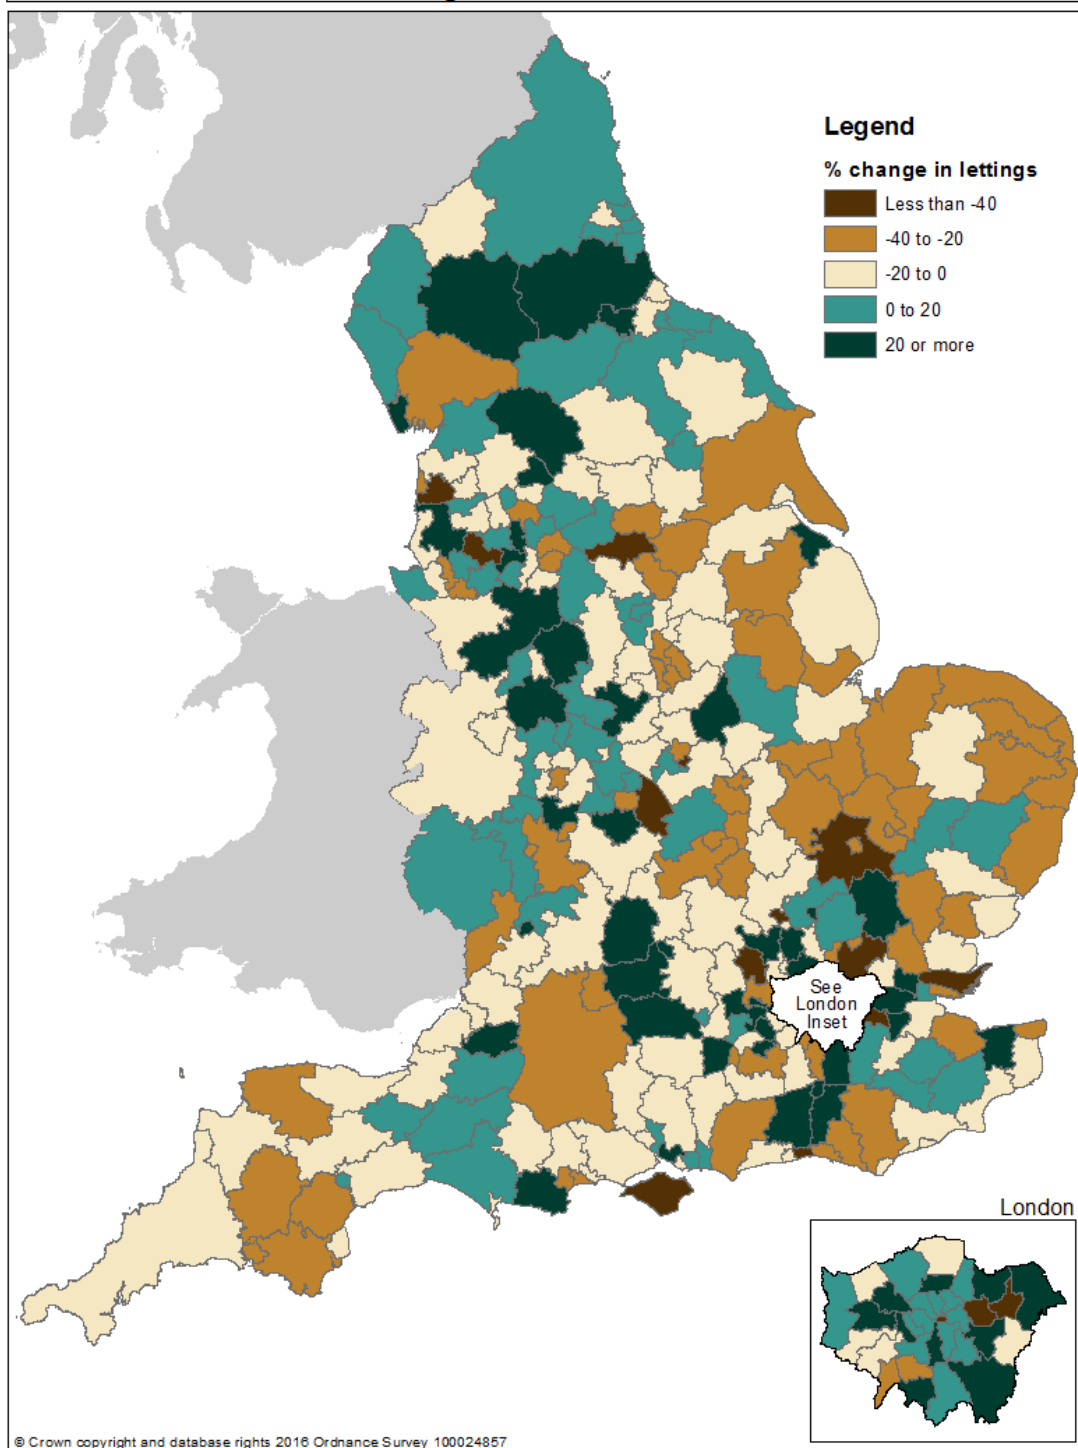

Map 3: Private Registered Provider Supported Housing lettings as a proportion of PRP SH stock, 2015/16
