

Core Social Housing Lettings, England 2015/16

Note of unscheduled revisions

This note summarises unscheduled revisions made to the Core Social Housing Lettings, England 2015/16 report which was published on November 10th 2016.

Economic Status

The number and proportion of households whose lead tenant was in the 'Other' category in the Supported Housing social rent category only has been revised as a number of these were misclassified as missing. The proportions of households in all economic status categories for supported housing social rent lettings have also been revised. Revisions have been made to the statistical release and accompanying table and figure 3c.

Ethnic Group and Nationality

Due to a significant coding error in data sent from a single local authority a number of nationalities of lead tenants were misclassified as 'Irish' instead of 'Refused'. These have been corrected and where necessary imputation has been re-run on these and a small number of other cases which originally used these as donor cases. The numbers and proportions of ethnic group and nationality have been revised in the statistical release (including table and accompanying tables and figures 3d and 3e. See the Quality Report for further details of the imputation methodology.

Housing Benefit

The number and proportion of households in receipt of Housing Benefit for all lettings has been revised due to a coding error. Revisions have been made to the statistical release and accompanying table 3g.

No maps required revisions.
