Thanks – can we think if a slide or paper is possible? We will use it at least three times.....

Thanks,

It's a more intelligent list than the one which we received from [redacted] and correspondingly – on the first point at least - it's going to be challenging to give them much of substance.

The points around risk valuation and contingency management are tricky as Jeremy mentioned at the HNP meeting yesterday. I'll discuss again to make sure we have clear lines

To see the things Hitachi want to talk about.

Dear

Following our telephone call I would like to confirm our meeting with you and Mark Higson at 10.45 on Wednesday 25th at your offices for up to two hours (Mark rather less). There will be [redacted] and myself from our side.

The main areas of discussion from our side will be:

The process, progress, risk valuation, contingency management of the EMR/CfDs/FiTs and Strike Price.

The comfort that can be provided to the senior management of our consortium by senior and very top members of the Government.

We will also be able to address the question you raised about the impact of any changes to the fuel ponds that may be asked for by ONR.

Best regards

All

Just a reminder of our offer for further discussions. Given the challenges of diaries I wondered if you wanted to set something up – we can always cancel – rather than holding off and potentially running out of time.

Be good to hear how far you have got with your plans as well – I think Monday was a milestone?

Also, one of our technical people here had a query about the cooling ponds on the ABWR which it would be good to talk about.

Regards
