SL - 16 NIS Ltd

NIS, an engineering organisation, pride to provide bespoke, pragmatic, design and manufacturing services working across quality driven sectors.

With nearly 35 years' experience of design, manufacture, test, installation and commissioning of special purpose machinery, equipment and systems for the nuclear, defence, aerospace and petrochemical industries, NIS has the knowledge and skills to deliver the most complex of challenges.

Our multi-discipline Engineering team has been an integral part of our service since the outset of NIS. Providing a full engineering lifecycle support service ranging from concept, scheme and detail design through to complete manufacturing readiness.

Design

Our highly skilled multi-disciplinary design teams have a wealth of experience, derived from many years delivering design solutions across a broad range of sectors. Our highly skilled team work to provide you with a design solution that meets your requirements, delivering your project on time and within budget.

Manufacturing

Our in-house manufacturing capability is renowned throughout the industry for providing high class bespoke fabrications to our clients. Our manufacturing facilities include CNC machining, welding, assembly, testing and inspection. We are proud to exceed our client's expectations by delivering on time and within budget.

SL - 80 The Tiny Recruiter Nuclear career specialist helping companies resolverecruitment challenges and providing people with the right tools to pursue career aspirations.
tinyrecruiter@outlook.com
I specialise in finding professional people for professional positions, or better put: I find needles in haystacks. I’ve found that this is really handy for investigating career experience, and it also feeds into the CV tailoring and careers advisory services I offer.
SL - 81 The Tiny Recruiter Nuclear career specialist helping companies resolverecruitment challenges and providing people with the right tools to pursue career aspirations.
Metalcraft is a successful UK based engineering company established for over 120 years. In today's business terms we are still striving to give accurate and competitive prices. Metalcraft are members of the British Engineering Industries Association, local chambers of commerce and also of the Civil Nuclear Sector. Metalcraft are also certified to the Environment standard - ISO14001:2004 and also to the Health and Safety standard - OHSAS 18001:2007.

SL - 82 Jordan Manufacturing Ltd Manufacturer specialising in bespoke fabrication, assembly and testing of products in mild & stainless steel, aluminium, exotic alloys and others.

SL - 83 Corroserve Corroserve, a service-oriented company, can assist to prevent corrosion to new equipment and refurbish/repair corroded equipment and plant to extend service life.

SL - 84 Safetrade 24 7 Ltd Supply of manual handling, storage, safety and environmental equipment.

SL - 85 Micropore Technologies Ltd Micropore manufactures equipment for the industrial production of particles and emulsions with a very narrow size distribution.

SL - 86 Smith Bullough British SME manufacturer of non standard and special bolts and industrial fastenings. Technical advice is provided by experienced technicians.

SL - 87 Micropore has 'cracked' the long-standing engineering challenges of using membrane emulsification at scale. For many years, the technique has been limited to generating stable emulsions with strictly limited size and size distribution in the micrometer range, but it remained a laboratory process only. Micropore has developed a process that can be scaled-up to deliver high throughput production of particles and emulsions, both at absolute size and size distribution, but it removes the laboratory process only.

SL - 88 Yarl Hydracentre support the UK Oil & Gas, Defence and Nuclear projects. We deliver safe, bespoke equipment and individual components, on spec, budget and on time...every time.

Lynkeos Technology Ltd

Lynkeos Technology utilises naturally occurring radiation (cosmic muons) for the 3D imaging of shielded containers and structures, e.g. ILW drums. Cosmic muons are produced in particle showers when high-energy particles enter the atmosphere. They have been exploited for 3D imaging since the early 1950s. Lynkeos Technology's advanced technology and software processing allow for the precise and accurate imaging of complex structures.
