<b>Authorized Amendment</b>
Summary/Overview of the amendment to explain/ensure that the reader understands: the rationale for the amendment; the major changes; and, importantly, the full context (including desired outcome) of the amendment.
<b>The Regulated Community is reminded to check this amendment against any applicable AAMC, Waivers or Exemptions to ensure their ongoing validity.</b>
MAA/RN/2018/03 provided the Regulated Community with the rationale behind the MAAs intent to re-categorise aviation activities within the DAE (refer to MAA/RN/2019/06 for latest update) and to implement recommendations from the Niteworks study on Air System Safety Cases (ASSC). This NAA presents the culmination of development activity associated with ASSC regulation and aims to establish improved links between the MOD's capability development process and the establishment of effective ASSCs. Incorporation of approved NPA 19/01 comments followed a period of sentencing, a summary of which, alongside a redacted sentencing tracker, is hosted on the MAA website.
